When dry, these grades are dusty, and given the breezy nature of the anchorage area, every precaution must be exercised to prevent airborne pollution. Hatches not involved in actual loading must be kept closed. In case of consistent heavy rain, loading is to be suspended and hatches closed after due consultation with the Navios on-site representative.

Cargo spillages on deck, however small, *should not* be swept overboard. With deck scuppers properly cemented and plugged, overflowed quantities should be returned to relevant holds either by hand or mechanical means (i.e. available on board). On completion of loading, each hold, dust accumulated on cargo hatches, to be thoroughly swept back into the hold prior to closing. Should a major spillage occur, cargo must be stopped immediately, and Kivalina Port Control informed, and the resulting quantity to be returned to the hold immediately. Cargo flow to be resumed only after normal conditions are restored.

Zinc and lead concentrates must be handled in accordance with the Code of Safe Practice for Solid Bulk Cargoes as recommended by IMO (also see "Safety").

Moisture Content: The moisture content will always be within IMO limits and certified by shippers or their designated surveyors. Documentation stating the Moisture Content and Transportation Moisture Limit will be furnished by the shippers.

Stowage Plan: Upon receiving instructions to proceed to Red Dog, a Stowage Plan must be prepared, inclusive of a hold by hold loading sequence, bearing in mind the following:

1. Cargo wil be brought to the anchorage by two self unloading barges. Each barge will nominally lift about 6,000 short tons of cargo. Cargo distribution and loading sequences should be planned to ensure as many entire barges as possible are discharged into single holds, thereby restricting shifting alongside to a minimum. Quantities needed for final trimming must be of the same grade.
2. Consistent with vessel safety and proper segregation of each cargo grade, stowage should be confined to the least number of holds possible.
3. Concurrent with the development of a Stowage Plan, ballast discharge sequence should also be worked out very carefully, so that the vessel retains, at all times, a waterline to top of hatch cover airdraft not exceeding 47 ft. In practice and if feasible, it is suggested that ballast discharge commences upon completion of transfer of the first two barges, *but Masters must ensure that the vessel's rate of deballasting should not exceed that which is necessary to comply with the 47 ft. restriction.*

Ballast:

1. A heavy ballast condition on arrival is recommended and all ballast water must be clean; any dirty ballast should be changed well before arrival.
2. Vessels should maintain an evenkeel trim during the first loading phase, and only take on a stern trim sufficient to strip ballast tanks after a safe airdraft reserve has been achieved.
3. The maximum recommended draft at the anchorage is 45 ft. S.W. However, in most cases, other restrictions will apply: Either the vessel's Summer marks, the draft at the discharge port, or in the case of vessels sailing to Europe, the Panama Canal draft.
4. Overboard discharge of ballast, especially topside tanks, to be programmed in such a way that barges are not in the path of overflowing water, thereby avoiding the possiblity of wetting and damaging cargo.

Hold Cleanliness: Whilst enroute from the last discharge port, the holds should be cleaned by sweeping and washing by high powered water jet. When previous cargo residues and any loose rust or paint have been removed, a fresh water rinse should be made. Any puddles in the tank tops should be swept into the bilges to ensure that cargo spaces are reasonably dry. Particular attention should be given to removing cargo residues, *especially coal*, which is a serious contaminant to ore concentrates.

Hold Inspections: Hold cleanliness inspections will be performed by Cominco or its appointed surveyor.

Bills of Lading: The Bill of Lading shall be prepared in metric tons in accordance with the draft survey as ascertained by the authorised surveyor appointed by Cominco Alaska. Should the appointed surveyor be unavailable, the ship's figure, as determined on completion of loading, shall be used as the official quantity to be entered in the Bill of Lading.

A letter of authorisation, from the Master to Fednav Montreal to sign original Bills of Lading on his behalf, shall be prepared prior to commencement of loading.

MEDICAL: Assistance only available in an emergency.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Official Formalities:* As the ocean vessel loads outside the U.S. Territorial Waters (i.e. outside the three mile limit), the vessel is not deemed by U.S. Customs to have entered into the United States. There is, therefore, no requirement to Enter In or Clear Out the vessel with Customs.

However, this three mile limit criterion is no longer regarded by the Immigration and Naturalisation Service (I.N.S.) as the limit of their jurisdiction. Instead they consider a vessel within the twelve mile limit to have entered U.S. Territorial Waters, and that they have the right to board. Accordingly, the Master must prepare all the usual documentation, including a visaed Crew List, to satisfy the requirements by the U.S. I.N.S.

On Site Representation: Navios is represented at Red Dog by one of their senior operations staff. He will be on hand to provide up-to-date information and assistance as needed.

WEATHER: *Sea Surface Current:* From the Bering Strait, the current tends to move in a Northeasterly direction veering North when N.W. of Kotzebue. Its strength is variable, but it may reach over 3 knots, off Red Dog and Kivalina.

NOTE: Current may become variable and sometimes assume a Southerly set in the aftermath of Northerly or Northwesterly strong winds.

Ice Conditions and Reporting: A summary of the typical ice conditions, to be expected during the loading season, may be found in the Climatological Survey.

The U.S. Navy – NOAA Joint Ice Centre and Ice Forecasting Centre, Ottawa, produce frequent ice reports and forecasts for the Western Arctic. This information is available by fax and transmission times and frequencies are listed in the official List of Radio Aids to Navigation (Pub. 117 DMAH 1989). The following Radio Stations also can be used: Point Race (weather only), Kodiak (weather and ice conditions) Kotzebue AM radio 1040/1050 kHz. broadcasts marine weather bulletins that have been found useful to navigation. In addition, Guam, Pearl Harbour and Japanese Stations are all in the broadcast range and cover the area North of the Bering Strait.

SAFETY: In addition to "Code of Safe Practice for Solid Bulk Cargoes", published by IMO, Masters should be aware that zinc/lead concentrates are potentially dusty in nature, and loading in a open roadstead will require care to be exercised by both, deck personnel attending cargo operations, and those in spaces immediately adjacent to the main deck.

Besides the discomfort of working in potentially dusty surroundings, it should be borne in mind that, when in the proximity of holds being loaded, no eating, drinking or smoking should be permitted, in order to prevent involuntary ingestion of these harmful substances.

When loading these cargoes, it is recommended that:

Shut off external ventilation to the accommodation area; internal recirculation system only to be used.

A no smoking, eating or drinking rule should be enforced on the weather deck and any other areas exposed to dust from the cargo. Galley doors to be kept closed and no through passage from outside to be allowed.

One accommodation space with direct access from the main deck should be designated as a changing room. Working clothes, boots and other protective gear to be stored there prior to entering the accommodation spaces. Wearing deck working gear inside the accommodation should be prohibited.

No duty mess service will be available for deck personnel on duty.

Floor, alleyways and corridors are to be adequately protected from dirt and dust.

VHF sets used on deck to be covered with plastic bags and changed regularly.

Deck personnel on watch at hatches to stand always on the windward side.

Hard hat, goggles, face masks, gloves and boots to be available to and worn by all those working on deck.

All other precautions and hygiene rules applicable to dusty cargoes to be followed (use of protective ointments on exposed skin surfaces, showering when going off duty, thorough laundering of working clothes separately from other clothing, etc.).

As strict water pollution regulations are enforced at Kivalina, no garbage, whether treated or not, may be disposed of overside.

No hot work to be performed on deck or inside accommodation or the engine room while loading cargo.

SHIPMASTER'S REPORT: August 1991.

This is an anchorage port and the position of anchoring varies in accordance with the ice edge.

At any one time a maximum of 2 vessels can be handled.

Approaches: The approach to the anchorage is simple, from the Bering Strait keep Fairway Rock abeam (bearing 270°) and at a distance of 6 miles. Steer due North for 53 miles until reaching the position Lat. 60° 30′ N., Long. 168° 30′ W. On arrival at this position alter course to 058°(T) for a distance of 108 miles, which will bring the vessel to the pilot station which is located at Lat. 67° 27′ N., Long. 164° 35′ W.

Anchorage: The designated anchorage is between the following co-ordinates:

Lat. 67° 30.3′ N.	Long. 164° 15.6′ W.
Lat. 67° 32.5′ N.	Long. 164° 19.2′ W.
Lat. 67° 33.9′ N.	Long. 164° 13.4′ W.
Lat. 67° 31.6′ N.	Long. 164° 09.8′ W.

The anchorage is about 10 nautical miles from the pilot station in the direction 058°(T).

Anchoring is in the open sea, so vessels should have sufficient chain out at all times. We used 7 shackles and the holding ground was good. The maximum wind experienced during our visit was about 30 knots.

Restrictions: The port is open from the beginning of July until the mi of October each year (in 1991 the last vessel left on October 8th). T closing date is governed by the ice. The port started operating in Summer of 1990.

Loading: The cargo loaded is zinc and lead concentrates and at pres the maximum size vessel that can be loaded is "Panamax" size a the maximum allowable airdraft is 45 ft.

There are 2 self-unloaders of 6,000 tonnes capacity which bring cargo to the anchorage from the shore loading facilities. The rat loading with one shiploader is about 1,500 tonnes/hr.

At times, 2 self-unloaders can be tied-up alongside the vessel, o on either side. The self-unloading vessels are secured alongside w 2 headlines and 2 sternlines.

In order to minimise the vessel's rope handling work, all headli and sternlines are placed on automatic self-tensioning winches and a controlled from the self-unloaders. The self-unloaders which do not ha their own propulsion are berthed alongside with the assistance of 3 tu

Medical: Medical facilities are very restricted. In case of serious illne crew members are flown to Anchorage by a small jet.

Fresh Water: Not available.

Fuel: Not available.

Consuls: None locally.

Repairs: No facilities available.

Repatriation: Crew changes are only possible in cases of emergenc

General: Stores: Not available.

Operator: Cominco Alaska.

AUTHORITY: Masters should be aware that the parties involved operations are:

(i) *Cominco Alaska* are the Operators of the Red Dog Terminal, a are the Shippers of the cargo loaded onto their vessels.

(ii) *Foss Maritime* of Seattle are the Operators of the self-discharg barges and tugs, and are contracted to Cominco, Alaska, to prov shuttling and transhipment of the cargo.

(iii) *Navios Corporation* are the providers of the ocean transportat and contracted to Cominco, Alaska.

Navios Corporation, Stamford Harbour Park, 333 Ludlow Stre
Stamford, Connecticut 06902-6913, U.S.A. Tel: (203) 961-08
Fax: (203) 961-0845. Telex: 238853. (Also see "Radio").

REDWOOD CITY, California: 37.50 N. 122.28 W.

(See Pla

DOCUMENTS, PILOTAGE and all general information refer to "S Francisco".

RESTRICTIONS: Though a natural deep water channel extends do the bay to Redwood City there is controlled depth channel 500 ft. wi and 30 ft. deep across San Bruno Shoal. The entrance channel to t port is 2 miles long and 30 ft. deep (all depths are at MLLW) and 300 to 350 ft. wide. There are 2 large turning basins at either end of the p harbour channel. See also San Francisco.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illne reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

BERTHING:

Port of Redwood City:

Berth	*Length* (ft.)	*Depth* (ft.)	*Remarks*
No. 1	500	36	General cargo and bulk cement through pneumatic pipelines.
No. 2	355	36	
No. 3	450	36	General cargo, heavy li and scrap metal.
No. 4 (New Berth)	450	36	General cargo USGS facility.
No. 5	500	36	Designed to accommodate large tankers, general cargo and heav lift cargoes.
Private Facilities:			
Bell Marine	649	12	Barge unloading dock. Used for storage (not in use).
Lone Star Industries	496	18	Barge dock for loading cement. Not in use.
Lone Star Industries	20	16	Oil berth. Not in use.
Leslie Salt Co.	200	33	Elevator berth used for loading crude bulk salt.

BRIDGES: The San Mateo Hayward Highway Bridge with a vert clearance of 141 ft. and horizontal of 500 ft. crosses the ship chann

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. p (Albany). Garbage disposal is available. Dumpsters from 4 to 15 cu can be ordered and placed alongside. The company to order dumps from is BFI. Tel: (415) 591-2025.

WASTE OIL DISPOSAL: Collection service is available at Wharf 5 fr Gibson/Pilot JV. Tel: (800) 582-3935 or (805) 327-0413. Fee sched on application.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar (U.S.$).

DEVELOPMENTS: See "Plan".

AUTHORITY: Port of Redwood City, 675 Seaport Boulevard, Redw City, California 94063-2794. *FAX:* (415) 369-7636. *Contact:* R Shelton, Executive Director.

RICHMOND, California: 37.56 N. 122.25 W. (See Plan)

(A) CHEVRON, U.S.A.
(B) OTHER TERMINALS AT RICHMOND.

(A) *CHEVRON, U.S.A.*

LOCATION: Richmond Long Wharf and Point Orient Wharf are situated on N.E. side of San Francisco Bay, a protected harbour. The refinery and storage tanks are near the wharves.

The exact position of the Long Wharf is Lat. 37° 55′ 20″ N., Long. 122° 24′ 35″ W. Wharf heading is 324° to 144°.

The exact position of the Point Orient Wharf is Lat. 37° 57′ 20″ N., Long. 122° 25′ 39″ W. Wharf heading is 356° to 176°.

The Point Orient Wharf is currently not operative.

There is adequate anchorage and room for manoeuvring in the bay.

Documents and all general information, refer to "San Francisco".

DOCUMENTS: To clear vessel for entry, the Custom House requires the following documents:

Last Foreign Port Clearance.
Vessel's Register.
U.S. Tonnage Tax Receipts.
Load Line Certificate.
Safety Equipment Certificate.
Certificate of Financial Responsibility.

If vessel is arriving from (or departing for) a foreign port, Master must also furnish:

3 copies Crew List.
3 copies Stores List.
3 copies Passenger List.
3 copies Crew's Effects Declaration.
3 copies Cargo Manifest.
3 copies Master's Oath of Entry.
3 copies General Declaration.

The Boarding Inspectors may require additional information.

PILOTAGE: Federal and/or State Regulations require licensed pilotage in and out of San Francisco Bay. Make arrangements for this ahead of time with the Ship's Agent.

Pilots board near the San Francisco Approach Lighted Horn Buoy "SF". Pilot boat on station monitors VHF Channels 10, 13 and 16. Pilot Office monitors VHF Channel 10, and can be contacted by Tel: (415) 393-0457.

The Pilot will serve as the Mooring Master until the ship is berthed.

If vessel goes to anchorage, a licensed Bay Pilot will be required before vessel can proceed to berth.

MAX. SIZE: The main ship channel into San Francisco has a project depth of 50 ft. However, the 35 ft. depth of the Southampton Shoal channel restricts the size of ships to wharves.

LIGHTENING: When a lightening operation is necessary the terminal management will direct the ship to Anchorage No. 9. The ship to be lightened will install fenders before the lighter ties alongside. The terminal will provide the fenders. The lightening Supervisor and ship's officer will hold a meeting to discuss the cargo transfer. During transfer, follow the same precautions and safety regulations that apply to cargo transfer at the wharf. The transfer rate will be regulated by the lightening vessel. The lightening Supervisor will observe all the lightening operations. The terminal will provide oil spill recovery equipment during lightening.

HEALTH: See "Health: All Ports" before first U.S.A port (Albany). Illness Reports made to San Francisco Quarantine Station.

Quarantine and Pratique: Vessels are not required to pass a quarantine inspection. It is necessary that vessels notify their Agents at least 2 days in advance of arrival in San Francisco Bay if sickness or disease is on board. The Agent shall notify Public Health for further action if necessary.

All vessels arriving from foreign ports will require clearance by the following U.S. Government Agencies: Customs House, Immigration Service, Department of Agriculture.

The vessel's Agent should make arrangements for the inspectors to board dockside or at anchorage.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

The Terminal is U.S.C.G. Certified for removal of non-hazardous plastic waste from vessels.

RADIO/VHF: The official language of the terminal is English. Therefore, vessel must have personnel on duty at all times who can communicate in English with the wharf personnel.

San Francisco Harbour Advisory Radar System, designated bridge-to-bridge frequency: VHF Channel 13 (156.65 MHz).

Federal Communication Regulations require that at any time VHF radio is in operation, Channel 16 must be monitored (156.8 MHz distress and calling frequency).

The U.S. Coast Guard requires all vessels anchored in San Francisco Bay to maintain a radio listening watch on VHF-FM Channel 13 (156.65 MHz) when the wind is 20 knots or greater. Any ship not equipped with Channel 13 shall maintain the listening watch on Channel 16 (156.8 MHz).

The 2-3 MHz radio telephone call letters for the San Francisco Bay area are KLH.

Richmond Long Wharf (radio call KCE 372 – Chevron Shipping) is equipped with VHF radio, manned 24 hours per day. Channel 10 (156.5 MHz) is the operating frequency. While at anchor, in San Francisco Bay, vessels should maintain normal listening watches on VHF Channel 10.

ETA Requirements:

Masters of vessels bound for the Chevron U.S.A. Refinery are requested to advise Chevron Shipping (Cables address: Chevronship Richmond Sanfrancisco) of ETA, 7 days, 3 days and again 1 day (24 hours) before arrival at the wharf. First ETA message should include:

Estimated time of arrival at the wharf (local time).
Last port of call.
Estimated deep draft on arrival and departure.
Quantity of ballast to be discharged.
Quantity and grade of cargo to be transferred.
Distance from bow to cargo and bunker manifolds.
Size and type of cargo and bunker connections.
Quantity and grade of bunkers and lubes required.
Quantity of fresh water required.
Number of crew replacements expected.
Amount of provisions and stores to be loaded.
Repair work anticipated.

Make 24 hour ETA as accurate as possible and whenever arrival time changes, by 1 hour or more, send a correcting message promptly.

BERTHING: Berthing of a deep draft tanker should be timed to allow the ship to remain alongside at her arrival draft through the next low water. Negative tides are experienced at the Terminal.

If cargo transfer is delayed and it's determined that the vessel will exceed berth draft limit at the next low tide, the vessel shall be ordered to make preparations to sail 6 hours before low tide, making all tug and pilot arrangements (costs will be determined based on the responsibility for the berth delay). Vessels may be required to leave earlier if the manoeuvering area draft limit is more restrictive than the berth draft limit.

The Wharf Controller and Agent will set berth assignment prior to vessel's arrival. If a berth is not available at the time of arrival, the Agent will proceed to anchor (as directed by the Captain of the Port) and maintain radio contact with Richmond Long Wharf by VHF Channel 10. At least one hour before assigned docking time, Richmond Long Wharf should be contacted to confirm docking time, and to establish with the Terminal what channel the Pilot will be using to moor the vessel. Terminal uses VHF Channels 10, 16, 12, 7A, 18A and 18. Internal safety procedures require vessel-to-terminal communications while mooring, or unmooring, be established before vessel is 150 ft. from wharf and maintained.

No fees are charged for berthing at Chevron piers for normal cargo transfer. However, wharfage fees are charged for ships which cause undue delay or expense.

Recommended Docking Practices: The terminal require the use of adequately powered tugboats when docking at the wharves. Chevron Shipping Company has two tugs that can be hired, provided arrangements are made prior to vessel's arrival.

(a) In order to ensure maximum safety while berthing and unberthing ships at Long Wharf and Point Orient Wharf, the following minimum tug assistance is required:

			Minimum Total Horsepower Required	
Vessel Size		*No. of Tugs*	*Mooring*	*Unmooring*
Up to	20,000 d.w.t.	1 or more	1,500 h.p.	1,500 h.p.
20,001 to	50,000 d.w.t.	2 or more	2,500 h.p.	2,500 h.p.
50,001 to	80,000 d.w.t.	2 or more	4,000 h.p.	4,000 h.p.
80,001 to	100,000 d.w.t.	2 or more	5,000 h.p.	5,000 h.p.
Over	100,000 d.w.t.	2 or more	6,000 h.p.	6,000 h.p.

(b) Bow thrusters are acceptable provided the horse power rating equals or exceeds the minimum requirements.

(c) Vessels should always stem the tide when docking.

(d) Steep-angle approaches should be avoided.

(e) In view of the strong tidal currents at both wharves, make sure vessel is moored securely. Check on the number of lines and their strength. Pay special attention to the fore and aft leads.

Mooring lines shall be kept taut at all times during transfer operations, and those lines not on mooring winches must be made fast on the mooring bitts. *Under no circumstances will mooring lines be made fast to winch drums (gipsy heads).*

An all wire mooring arrangement is the safest and most desirable. A mix of wires and mooring lines leading in the same direction will not be permitted. The only exception allowed is when additional lines are utilised above the minimum requirements.

The required minimum number of mooring lines are:

Ships up to 80,000 d.w.t.: 9 wire mooring lines or 11 synthetic mooring lines.

Ships over 80,000 d.w.t. : 10 wire mooring lines or 12 synthetic mooring lines.

Under severe weather or tidal conditions, additional mooring lines will be required.

Winch brakes must be on, mooring lines in good condition, and mooring lines of adequate size are required as set forth by regulatory agencies.

Vessels should employ mooring lines that provide 75% of the rated breaking strength (i.e. lines must be in good condition). The eye of each mooring line will be led to a quick release mooring hook to ensure a prompt vessel departure in an emergency.

Vessels departing from Richmond Long Wharf with drafts of 38 ft. or over will generally not be taken from the berth under strong ebb tide conditions. Vessels are advised to consult with the Pilot's Association on their particular situation.

Hose Handling and Mooring Lines: Wharf crews are on duty continuously to handle oil hoses/arms and mooring lines. *However, they will not handle mooring lines and hoses on board vessels; this is the vessel's responsibility.* There must be a Wharf Observer aboard the vessel when connecting or disconnecting Chicksans or hoses.

Anchors: Anchors are not to be used after vessel is secured.

Gangway: Gangways should be properly and safely rigged with handrails and adequate illumination. Berths No. 1 and 4 have permanently installed gangways.

There are 2 piers that accommodate oil transfers. They are referred to as Richmond Long Wharf and Point Orient Wharf.

Long Wharf: Richmond Long Wharf, a "T"-head pier, has an overall length of 3,396 ft. It consists of concrete and wooden piles and a concrete superstructure connected to the shore, 4,200 ft. away by a piled causeway. The fender-to-fender width is 132.5 ft.

Berths 1, 2 and 3 deck level is 15.5 ft. above MLLW. Berth No. 4 deck level is 25 ft. above MLLW.

There are four deep water berths on the West side. Berth No. 1 is 950 ft. long, Berth No. 2 is 650 ft. long, Berth No. 3 is 700 ft. long and Berth No. 4 is 1,050 ft. long. They are numbered 1 through 4 from South to North. Water depth is maintained at 50 ft. at MLLW at Berths No. 1 and 4, and at 40 ft. at MLLW at Berths No. 2 and 3. As silting is a continuous problem, actual maximum allowable draft can be less than project depths. There are two inner Berths No. 9 and No. 11 that are used primarily for barge loading or discharging. Water depth is maintained at 18 ft. at MLLW.

Point Orient: The Point Orient Wharf, an "L"-head pier, is 2.25 miles North of the Long Wharf. It is 504 ft. long and 60 ft. wide. It is supported on wooden piles and has a causeway that extends 1,200 ft. to the shore.

There is one ship berth, No. 1 where the water depth is 32 ft. at MLLW. There is also one barge berth No.2. Deck level is 14.5 ft. above MLLW.

The Point Orient facility is currently not operative.

LOADING AND UNLOADING: Berth No. 2 is fitted with 4 in., 6 in, and 8 in. hoses for cargo transfer. Berth No. 1 has two 12 in. and two 16 in. Chicksan loading arms. Berths No. 3 has two 8 in. and four 12 in. Chicksan arms. Berth No. 4 has two 12 in. and three 16 in. Chicksan arms.

NOTE: All terminal flange facings are carbon steel ANSI 150 lbs. rating.

No cast iron is allowed outside of (and including) the first valve on the vessel's cargo or bunker system.

Vessels are berthed so that manifolds are positioned within the horizontal and vertical limits of the hoses or Chicksan arms.

Cargo Transfer:

(a) Pre-Transfer Declaration of Inspection – Before cargo transfer begins, the Wharfmaster and Vessel Co-Ordinator will board vessel. They will discuss the safe transferral of your cargo. They will also review the Declaration of Inspection and sign it with you when all items are understood and agreed upon.

(b) Inspection During Cargo Transfer – These representatives will also visit the ship during cargo transfer. With the approval of Deck Watch, they will check to ensure that safe working practices are being observed by both ship and wharf.

(c) Minimum Cargo-Handling Crew – When transferring cargo or ballast, the officer in charge of cargo transfer must have at least two assistants: one to maintain watch on the open-deck cargo transfer manifolds; the other to assist in handling valves, tank gauging, or shutdowns of transfer pumps in case of emergency. Other crew members may be needed depending on the size and complexity of ship transfer system. These requirements will be developed at the pre-cargo-transfer conference. When loading ship's bunkers and lubes, the Master and Chief Engineer will assure the terminal that this transfer will be handled in a similar manner.

Loading Rates: Several products can be loaded at each berth. Loading rates depend on a multitude of situations. These will be discussed at the pre-cargo-transfer conference.

Unloading Rates: Unloading rates also depend on many things – vessel's pumps, the size and availability of terminal lines and tanks, refinery operations, etc. The pre-cargo-transfer conference will develop the estimated unloading and deballasting rates and procedures.

To expedite cargo transfer, it may be necessary to use booster pumps. To eliminate hazards to this equipment, notify the Berth Operator 15 minutes ahead of time whenever you are going to: Stop or change any cargo transfer rate, strip any tanks, switch tanks.

Maximum Temperature and Pressure Limits: The terminal cargo-handling system is designed to comply with the 150 lbs. ANSI flange rating. For example: 275 psig at 100°F, 240 psig at 200°F, etc. Special restrictions apply for aromatic and other hazardous stocks. These will be explained during the pre-cargo-transfer conference.

Tank Gauges: To ensure proper handling of each cargo, the terminal requires U.S. flag company vessels to be gauged every *two* hours and matched with shore-tank gauges. Non-company vessels are not required to gauge, but may wish to compare their gauges against the shore gauges. Transfer operations will shut down immediately if:

— the transfer rate is over 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to more than 20% of that transfer rate.

OR

— the transfer rate is under 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to more than 30% of that transfer rate.

Gauging of tanks must be done from automatic tapes. Breaching of IGS is not permitted.

Vessel cargo reconciliation at end of transfer will take approximately 2 hours.

POLLUTION: The Federal Water Pollution Control Act prohibits the discharge of oil or oily waste in the waters of San Francisco Bay, which causes a film or sheen on the water or discolours it or causes a sludge or emulsion beneath the surface of the water.

No dirty ballast will be discharged overboard while vessels are tied up at the Long Wharf. Vessels with clean dedicated ballast systems may discharge clean ballast water overboard after terminal approval is obtained.

Regulations enforced by the Bay Area Pollution Control District also prohibit the emission of smoke and soot. Vessel can be fined if it emits visible smoke (Ringelmann 1) for more than 3 minutes in one hour, or blows its boiler tubes enough to create a soot nuisance on shore.

In addition, the terminal has certain regulations designed to eliminate obnoxious odours. Vessel may, therefore, be required to follow special procedures before tank cleaning, loading or ballasting. If, in spite of precautions, vessel does cause such odours, loading or unloading operations may be stopped.

OIL INSPECTIONS: To control product quality, the terminal has several requirements for sampling and gauging the oil as it is being transferred. These requirements will be explained during pre-cargo transfer conferences. Outside inspection service is provided by the following independent companies:

E. W. Saybolt Company, 124 Parker Avenue, Rodeo, CA.94572. Tel. (510) 799-2843. Fax: (510) 799-2851. Telex: 229171.

Caleb Brett U.S.A. Inc., 4108 Lakeside Drive, Richmond, Califo 94806. Tel: (510) 222-0877. Fax: (510) 222-0930. Telex: 184231.

S.G.S. Control Services Inc., 435 Valley View, El Sobrante, CA.94 Tel: (510) 236-3007. Fax: (510) 223-0956. Telex: (910) 382-6 (domestic).

MEDICAL: No facilities at wharves. Richmond Refinery has a direct to the regional ambulance. Emergency medical technicians will respo to provide basic life support, first aid and escort the ambulance to Wharf.

Non-emergency medical services must be arranged through Agent.

FRESH WATER: Potable water available. Arrange through Agent.

FUEL: Many grades of bunkers, diesel and lubricating oils are availa in bulk or drum quantities. Agents should order them from (1) Chev U.S.A., Supply and Distribution (call (510) 944-6200), or (2) Chev International (call (510) 944-62909), at least 48 hours before ves arrives, to avoid delaying the vessel.

To take on bunkers and diesel, vessels must be able to connec terminal's 4 in., 6 in. and 8 in. hoses in Berth 2, connect to 8 in. Chicks in Berth 3, to 12 in. Chicksans in Berths 1 and 4.

PROVISIONS: Provisions and stores are available through ship's Age However, they will be loaded at the Richmond Long Wharf only wh the loading does not interfere with cargo or ballast transfer. hydrocarbons, paints, detergents or other polluting materials will allowed to go aboard the vessel by means of slings or cargo nets. If vessel is large and is not equipped with booms, the Agent may need supply a spark-proof crane for the loading. Stores will not be hand by wharf personnel. Contact Wharf Master for weight restriction equipment on the wharf.

REPAIRS: There are some major repair facilities located in San Francisco Bay Area. The Agent can probably make arrangeme for use of their services.

Repairs at the terminals are not normally permitted on non-compa vessels, unless it is absolutely necessary in order to move the vess Any repair work that would necessitate hot work must have appro from refinery management. No repairs will be allowed that would de cargo transfer or lengthen the transfer time.

REPATRIATION: Facilities exist for repatriating of crew by sea or Make the arrangements through ship's Agent, and notify the termi management.

TIME: Local time: Pacific Standard Time GMT is minus 8 hours.

(Note: From the first Sunday in April to the last Sunday in O this is modified by use of Daylight Time which is GMT minus 7 h

All communications should refer to local time.

STORING: See "Prelims".

1. Vessels cannot be stored by barge while at docks; however, th can be stored by small trucks.
2. Storing by truck requires the truck to be cleared by operations a towed into location. No paint or hydrocarbon may be lifted by over local waters. This is described in the "Provisions".
3. Trucks can come alongside vessel (within 50 ft. of vessel).
4. There are no forklifts available at the terminal and the rental of requires the rental of a "spark approved" forklift. Arrangeme must be made with the Wharf Master.
5. All customs rules and regulations are enforced.
6. Local riggers can be employed to help get stores aboard vess but the vessel must make arrangements with ships Agents, and storing of vessels must be approved by Wharf Master.

Also see "Provisions".

SHORE LEAVE: Chevron Shipping Co. provides bus service from Long Wharf to Refinery Main Gate, and from there, ship's personnel c connect with local taxi or bus service nearby. Wharf bus driver can contacted by calling 66880 within the Refinery telephone system. F bus transit system information, call (415) 232-5665.

No ship's commercial passengers are ever allowed to board or lea a ship at the wharves.

GENERAL:

Tides and Currents: The maximum tidal range is approximately 9 ft. a the mean range is 4.2 ft.

Tidal currents in the wharf area can be very strong. They gener run in a North'ly and South'ly direction.

Winds: Winds of varying strength may come from any quarter. T normal wind, however, is from the N.W. in Summer, and S.W. in Win

Visibility: The visibility in this area of San Francisco Bay is generally to excellent, with occasional late evening fog in the Summer lasting u noon the following day. In the Winter, morning or tule fogs freque occur. The Winter fogs are generally more dense than those of Summ

Weather: The local weather is usually moderate, with avera temperatures ranging between 40°F and 85°F.

The (NOAA) National Weather Service VHF-FM Radio Station, KB 49, provides mariners with continuous FM broadcasts of weat observations on 162.55 MHz.

Navigation: Master is required to notify the U.S. Coast Guard Capt of the Port at least 24 hours before arriving in the Bay. Master will sat this requirement automatically if he reports in accordance with the U Coast Guard's voluntary Automated Merchant Vessel Report (AMVE System.

On entering the Bay, follow the traffic-separation scheme shown National Ocean Survey Chart 18649.

Charts and Publications: The following official charts and publicati are recommended for use when entering San Francisco Bay:

National Ocean Service Charts:

No. 18640 – San Francisco to Point Arena.
No. 18680 – Point Sur to San Francisco.
No. 18645 – Gulf of the Farallones.
No. 18649 – San Francisco Entrance.
No. 18653 – San Francisco Bay, Angel Is., to Point San Pedr

Pacific Coast of North America and Asia, Tidal Current Tables W Coast of North and South America, published by National Oc Service.

U.S. Coast Pilot No. 7 – Pacific Coast – California, Oregon, Washington and Hawaii, published by the National Ocean Service.

U.S. Coast Guard Regulations 33 CFR 154, 155 and 156, published by U.S. Coast Guard.

Current Edition of Operating Manual, S.F. Harbor Advisory Radar, published by U.S. Coast Guard.

Light Lists, Volume VI, Pacific Coast and Pacific Islands, published by U.S. Coast Guard.

Radio Navigational Aid, Pacific and Indian Oceans (Publication No. 117), published by U.S. Hydrographic Office.

Wharf Communication: The Richmond Wharves are equipped with a positive and dedicated ship-to-terminal radio communication system. On arrival, vessel will be provided with one radio (walkie-talkie). It must be with an English-speaking person on duty at all times. Vessel will be instructed in the proper use of this radio during the pre-cargo transfer conference. If the radio is not returned, a charge of $3,500 will be levied.

Telephone: A telephone will be placed on the open deck of the ship near the gangway. It is to be used for the local calls only. the following is a partial list of commonly used numbers:

Wharf Master	242-4388
Boat Co-Ordinator	242-4494
Wharf Controller	242-4387
Head Operator (PAD) Long Wharf	242-2190
Terminal Superintendent	242-2314

There are three public telephones on the Long Wharf for outside calls, one between Berths 1 and 2, one at Berth 3 and one at Berth 4. There is also a public telephone at Point Orient Wharf.

SAFETY REGULATIONS:

I. PRINCIPLES:

When a ship is berthed at our wharf, we expect its Master to give top priority at all times to safety and efficiency; and to follow all safety regulations generally followed in the marine transport industry, as well as those included here.

All cargo handling operations on the ship are the Master's responsibility. To assist in ship-to-wharf communications, we will provide you with a radio pack set (walkie-talkie), which will enable the person in charge of cargo transfer to communicate with the Berth Operator and Chevron Shipping Office.

The pack set is certified intrinsically safe for use in a hazardous location.

If a vessel disregards any of the following safety regulations, Terminal personnel are authorised to stop cargo transfer operations, and request the vessel to leave its berth. The vessel also has the right to shut down transfer operations if it is felt unsafe to proceed, provided adequate notification is given prior to shutdown.

II. EMERGENCY FACILITIES:

It is the ship's responsibility to keep its firefighting systems in readiness at all times. Likewise the Terminal will keep its firefighting and oil spill containment equipment in readiness at all times. An international fire connection is kept ready at each berth at the wharf.

III. SIGNALS FOR EMERGENCY:

The fire signal at the Terminal is one long blast of the docking whistle, followed by short blasts, indicating berth number where fire has occurred. The oil spill signal is two long blasts followed by the berth in which the spill has occurred (you will be notified if the Terminal requests you to shut down on an oil spill). For any other emergency, such as a man overboard, breaking of lines, etc., sound a series of short blasts on your ship's whistle.

If an emergency occurs on the wharf, your ship will be notified by the Berth Operator and by the terminal whistle. You will be notified if the Terminal wants you to clear the berth.

In an emergency situation, stop all cargo transfers immediately and secure valves. In case of fire on the wharf, shut down transfer and prepare to depart.

IV. OVERFLOW AND SPILLAGE:

An oil spillage of any kind is considered an extreme emergency. If one occurs, notify the Berth Operator, sound the emergency alarm, and *immediately* stop all cargo transfer operations. Do not resume them until the oil is removed from the surface of the water and from the deck of the vessel; and until any damage is repaired and no further danger exists. All reasonable clean-up and damage costs will be at the ship owner's expense.

If you observe oil from an unknown source, you must shut down, unless you are positive it is not from your ship. In either case, you must notify the Berth Operator immediately.

The Terminal is required by law to notify promptly, the U.S.C.G. Tel: (415) 437-3073, and various other County, State and Federal offices, of any spills, and permit their representatives to investigate the circumstances.

Oil spill clean-up material will be supplied at cost, upon request.

V. MINIMUM NUMBER OF SHIP'S CREW:

See that your crew is large enough to connect hoses and arms safely and to conduct cargo operations safely. The vessel will be maintained in trim, and the engine in a condition that it could leave the pier on short notice (30 minutes or less). The crew aboard will be maintained at sufficient size to disconnect cargo connections, unmoor, and get the vessel away from the dock.

VI. GENERAL:

A. Following regulations must be observed at all times while berthed at Long Wharf:

1. Boiler-tube Blowing — Do not blow boiler tubes and take every precaution to prevent sparks from escaping from the funnel. If vessel safety is at stake, stop transfer operations and move the ship to anchorage before blowing the tubes. In case vessel has boiler trouble, notify the Terminal, who in turn will notify the Air Quality District Control.
2. Cargo Tank Tops:
   (a) Before berthing, all tank tops, ullage plugs, and gauge tapes and sample wells must be closed and dogged down.
   (b) Cargo and bunker tank tops must be kept closed. This also applies to permanent ballast tanks.
3. Cargo Connections, Unused – blank unused cargo and bunker connections. A proper-sized bolt in *every hole* is the minimum requirement.
4. Engines – Keep the engines ready and the vessel trimmed so it can leave the piers under short notice. If the vessel becomes unable to get underway 2 tugs of adequate size will be standing by at all times.
5. Fire Fighting – Keep fire and emergency equipment in readiness. At least 2 uncoiled fire hoses are required at the vessel's manifold area, one forward and one aft. Provide (U.S.C.G. approved) five portable Class BC extinguishers with capacity of not less than 20 pounds, two located forward and two aft or the manifold, one located at the gangway or the accommodation ladder. All fire extinguishers shall be approved by the appropriate authority of the vessel's flag country.
6. Gas Venting:
   (a) Ullage Holes – Keep all ullage or gauge tapes completely closed (not secured) except for intermittent periods needed to ullage or gauge ship's tanks.
   (b) Flame Screens – When open, all ullage ports must be protected by clean, well-fitted flame arrestors of wire-gauge screens: these must be of an approved type and have no defects.
   (c) Vessels equipped with IGS: All breaches of IGS, for any reasons, require the approval of the Superintendent or his assistant.
7. Gas Freeing and Tank Cleaning – Do not gas-free or clean any tanks at berth without prior approval of Terminal Management.
8. Gangways – Tend the gangway and keep it safely rigged, secured and lighted.
9. Mooring Lines – Tend mooring lines to keep them taut and keep the vessel in position. See that tension winches are on manual brake. During ebb tide and East winds, when the ship has a tendency to drift away from the pier, tend the mooring lines with special care.
10. Hatches, watertight doors and portholes – Shall remain closed throughout the vessel while at the wharf.
11. Repairs – While at berth, do not perform any repair work, hot work, or maintenance work without prior approval from the Terminal Management. Hot work will require *written* approval by Terminal Management and U.S.C.G.
12. Radio – At all times in port, keep the radio transmitter and aerials switched off and grounded. Portable radios (walkie-talkies) that are certified intrinsically safe may be used.
13. Sea Suctions and Bilge Valves – See that all ship's sea and overboard discharge valves connected to the cargo system are tightly closed, lashed and sealed in accordance with U.S. Coast Guard Regulation 33 CFR 155. All engine room bilge overboard valves shall be tightly closed, lashed and sealed.
    The seals are *not* to be broken while berthed except in the presence of the Wharf Head Operator or in case of emergency.
14. Sewage Discharge – Not allowed.
15. Smoking – Allow smoking on board only in places which the Master has personally approved. There is to be NO SMOKING ON THE WHARF OR WEATHER DECK OF THE VESSEL AT ANY TIME.
16. Stern Discharge Line – Keep the stern discharge line, if any, blanked at all times. All holes to be bolted.
17. Towing Wires – Keep the towing wires (fire wires) for emergency use, lowered to 2.0 m. from the water's surface on the offshore bow and stern, where they can be reached by tugs in case of emergency.
18. When fast in the berth, ship's propeller will not be turned, except by use of jacking gear.

B. Cargo Transfer – Observe the following additional regulations DURING CARGO TRANSFER:

1. Air Intakes and Air Conditioning Units – Close any central air-conditioning or fresh-air intakes which might take in gas. Close all intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and venting points. External window-type air-conditioning units that face the cargo transfer area must be kept disconnected.
2. Communication – Ship/Shore – Station a responsible member of the crew on the loading deck by the transfer connections to maintain communications or remain in visual contact with the Berth Operator. The ship shall advise the Operator when changes in rates are required, using radio pack sets or voice contact.
3. Passageway hatches to open weather decks be kept secured except for momentary passage.
4. Electric Lights and Cables – Use only vapour-proof electric lights of an approved type, on the open deck. Disconnect portable electrical equipment on the open deck unless certified for use in hazardous areas.
5. Galley Fires – Light no galley fires unless you can first assure the terminal that they present no hazard to the cargo transfer.
6. Hand Torches (Flashlights) – See that hand torches used during cargo transfer are of an approved type, certified as safe in hazardous locations.
7. Hoses:
   (a) Before transfer, inspect cargo-loading hoses or arms to see that they are in good condition, *fully bolted,* and properly connected. All hoses must be marked, showing the service for which the hose is designated, date of last hydrotest, and a maximum allowable working pressure of at least 275 PSI.

(b) The hoses must be supported at not more than 12 ft. intervals with a bridle or mat to minimise kinks or chafing. They must not be bent to a radius less than 12 times their diameter. Do not use single slings when taking aboard or supporting during transfer.

(c) The hose or arm-to-riser connections must have drip pans of adequate size installed under them.

(d) When cargo transfer has concluded, each hose/arm is to be drained via the drain valve and blank-flanged *before* being removed from the vessel. The Terminal Head Operator is to be aboard the vessel to oversee the connecting and disconnecting of the loading arms and, also, to alert crew members when passing the arms.

8. Scuppers – All deck scuppers must be plugged and cemented oil tight or sealed with a Coast Guard approved device. Do not remove the plugs until ship has departed, except when necessary to drain off rain water. In such cases, supervise the draining closely and replace the plugs immediately. Install splash boards (on dock side) over scuppers. Cement is to be supplied by the ship.

9. Special Stock Hazards:

(a) Static-Ignition Hazards – Some kinds of stock require special precautions because of the static charge they accumulate. Their handling will also be fully discussed during pre-cargo transfer inspection. No overall loading is permitted.

(b) Hydrogen-Sulfide Hazards – Some kinds of crude may contain dissolved hydrogen-sulfide or mercaptans in concentrations which would cause the gases vented during tanker ballasting to be hazardous or odorous. Do not ballast or load into cargo tanks that might contain H_2S or mercaptan vapours, unless the tanks have been passed for loading by the Wharfmaster. The vessel must proceed to sea for clean-up prior to loadback if the Wharfmaster deems the tanks unsuitable for loadback.

(c) Aromatic-Stock Hazards – Special precautions are required for toxic cargoes such as aromatics. It is recommended that Masters review the instructions by Owners/Charterers about toxic chemical hazards.

10. Valve Shut-off – Many new tankers have motor-operated valves, operated from a central location. Never operate these valves to close off against full oil-delivery rates unless the valve closure action takes at least 90 secs. Closure times less than 90 secs. may result in surge and hammer of sufficient force to rupture the loading arm/hoses.

11. Ventilators – Keep ventilators suitably trimmed with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

VII. VAPOUR RECOVERY:

As of July 1, 1991, in order to comply with legal requirements (Regulation 8, Rule 44-301 of the BAAQMD), Vapour Recovery operations will be required when loading Organic Liquids into vessel tanks. Vapour Recovery will also then be required when loading any product (including ballast water) into vessel's tanks which previously last contained Organic Liquids (and therefore contain vapours from Organic Liquids). Definition of "Organic Liquids" (per BAAQMD Rule 8-44-204) includes all gasoline, gasoline blending stocks, aviation gas and aviation fuel (JP-4 type) and crude oil).

BAAQMD also requires (Rules 8-44-303 and 304) that all vessels associated with the loading of Organic Liquids requiring Vapour Recovery maintain their equipment (all hatches, pressure relief valves, connections, gauging ports and vents) leak free and gas tight. In order to comply with this Rule, certification that vessels meet these requirements will be required during the loading event (leak detection monitoring per E.P.A. reference Method 21). Failure to satisfy compliance requirements during loading will require that the vessel's owner or operator file an Emergency Variance with the BAAQMD. Certification must be given to the Terminal before departure of vessel, and certifying process must be done during loading, before 20% completion of cargo loading.

Facilities will consist of a vapour connecting header through vacuum pumps located on the wharf, and a thermal oxidiser located off-site of the wharf. Vapour Recovery operational details will be discussed during the Pre-Transfer Conference.

In addition, the Terminal has certain regulations designed to eliminate obnoxious odours. Your vessel may, therefore, be required to follow special procedures before tank cleaning, loading, or ballasting. If in spite of precautions, your vessel does cause such odours, your loading or unloading operations may be stopped.

The Terminal also has a "good neighbour" policy that requires us to control excessive noise. If in spite of precautions, your vessel does cause excessive noise, your loading and/or unloading rate may be reduced or stopped.

Vapour hoses, as required for Vapour Recovery operation, will be provided by the Terminal. Vapour hoses will be distinctly marked with painted red/yellow/red bands, and will be labeled. Their flange will have a unique bolt hole configuration to prevent cross connection to a cargo system.

Vapour hoses will require a purge with nitrogen before and after loading operations. This purge will be done by the Terminal Operators.

VIII. INERT GAS SYSTEM (IGS):

Terminal Guidelines for Vessel Inert Gas System (IGS):

1. The following guidelines supplement Richmond's Terminal Manual.
2. Ship's Agents are requested to inform their principals and/or ship's Masters of the content of these guidelines, particularly of the pre-arrival information requested of the Master. A copy of the guidelines shall also be provided to the Master on arrival.
3. Nothing contained in these guidelines relieves the Master of his responsibilities. The Terminal takes no responsibility for the safe condition and/or operation of the vessel, for which the Master remains fully responsible.

4. *Communications:*

4.1 The Master shall inform the Terminal, as soon as possi of any event or situation which may be the cause of conc for the safe and/or efficient operation of the vessel at t Terminal (e.g. equipment malfunction or breakdown, leakage, grounding, collision, structural damage, inadequa of officers and/or crew regarding certification, experience manning level, etc.). Such notification is in addition to, a does not relieve the Master of his obligation, to no Government and/or Harbour Authorities, if so required existing laws or regulations.

4.2 As part of the pre-arrival information supplied by the Mas at the request of the Terminal, the Master will confirm t following conditions are met by the vessel's IGS. The ves will *not be berthed* unless it complies with all conditions lis below:

(a) The IGS is fully operational and can deliver inert gas w an oxygen content below 5%.

(b) The cargo control room, IGS analyser and alarm a operational. The Terminal will require vessel to retai marine chemist to confirm readings, if these are fou inoperable.

(c) Each tank will be maintained positively pressured a below 8% oxygen during all port time.

(d) All tank openings will be closed and gas tight, and tanks have closed gauging systems.

(e) IGS will *not* be breached, and tanks will not be opene for inspection, unless mutually agreed to by both t Master and Terminal Managers.

5. *Inert Gas System Guidelines:*

5.1 All vessels, which are equipped with IGS, shall keep the IG operational at all times during berthing, while at berth, a during unberthing, and all cargo and slop tanks shall be ke in an inerted condition. IGS may be breached on individu tanks for inspection or measurement only by mutu agreement of the Master and Terminal Manager.

As part of the Pre-Transfer Conference and Declaration Inspection, the Master shall provide the Terminal with signed declaration that the IGS is operational, that the carg and slop tanks are inerted, and that the IGS will be kept operation, as necessary, to maintain all cargo and slop tan inerted.

5.2 The Master shall permit the Terminal Representative check:

(a) The vessel oxygen analyser readings to monitor that t oxygen content of the inert gas being delivered by t IGS contains less than 5% oxygen.

(b) The vessel oxygen analyser readings to monitor that t oxygen content is maintained below 8% in the cargo a slop tanks.

(c) The IGS pressure readings to monitor that the cargo a slop tanks are maintained positively pressured.

5.3 *Inert Gas System Failure:*

5.3.1 In the event that the IGS is or becomes inoperative, and unable to maintain a positive pressure and/or the oxyge content at or below 8% by volume in the cargo and slop tank the following action shall be taken:

(a) If the vessel arrives with an inoperative IGS or the IG becomes inoperative before berthing, the vessel shall n be berthed until the IGS is repaired, and the Mast warrants in writing that the cargo and slop tanks ha been checked and found to be inerted.

(b) If the IGS becomes inoperative after the vessel ha berthed, then the Master shall not start or sh immediately stop all cargo/ballast operations, and ta immediate action to prevent any air being drawn into t cargo and slop tanks. Cargo/ballast operations shall n commence or resume until the IGS has been repaire and the Master warrants in writing that the cargo a slop tanks have been checked and found to be inerte The vessel shall not leave the berth until the IGS ha been repaired, if the Terminal so requires.

(c) Vessels Loading Organic Liquid:
In case a vessel declares that their IGS becom inoperable, and cannot be repaired in a time fra acceptable to Terminal Management, the vessel w have to go to anchor to make repairs. When repairs a completed, and IGS is operational, the vessel shou contact the Richmond Long Wharf to reschedule berthing plan.

5.3.3 During any necessary re-inerting of a tank following breakdown and repair of the inert gas system, or during t initial inerting of a non-gas free tank, no dipping, ullagi sampling or other equipment should be inserted, until it ha been established that the tank is in an inert condition. If it necessary to introduce a gas sampling system into the ta for this purpose, there shall be a wait of 30 minutes aft stopping the injection of inert gas before insertion of t sampling system. Metallic components of the sampl system shall be securely earthed.

5.3.4 The attention of the Master is directed to the requirement Regulation 11(c) of Chapter 1 of the 1978 SOLAS Protoc to advise the Authorities in the event of the IGS hav become inoperative. The Master shall confirm to the Termin that such requirement has been fulfilled.

5.3.5 All damages and expenses, and all time lost by the vess because of the vessel IGS being or becoming inoperative the tanks not being inerted as required, will be for vess account.

AUTHORITY: Chevron, U.S.A., P.O.Box 1272, Richmond, CA.94802-0627, U.S.A. *Tel:* (510) 242-4630. *FAX:* (510) 242-3264. *Cables:* Chevronship Sanfrancisco and Chevronship Richmond. *Contact:* Fred Modugno.

(B) OTHER TERMINALS AT RICHMOND

BERTHING: *Levin-Richmond Bulk Commodity Wharf:*
Owners: Levin-Richmond Terminal Co.
Operated by: Levin-Richmond Terminal Co.
Use: Receipt and shipment of various dry-bulk commodities and scrap metal.
Water Depth: 35 ft. – 36 ft.
Mechanical handling facilities: On wharf; 4×50 ton electric, travelling full portal gantry cranes, each with 100 ft. boom and 2×45 ton electric travelling full portal gantry cranes, each with 118 ft. boom.
Dimensions: Length of face 600 ft.
Remarks: 50,000 sq.ft. warehouse. Railroad on premises.

Santa Fe Sugar Dock:
Owned and operated by: Atchison, Topeka and Santa Fe Railway Co.
Use: Presently not in operation, but the railroad should be contacted for further use.
Dimensions: Length of face 545 ft., lower end 51 ft.; depth alongside at MLLW 24 ft.

Richmond Terminal No. 3:
Owners: City of Richmond.
Operated by: Metropolitan California Stevedore Co.
Use: Receipt and shipment of containerised and breakbulk cargoes in all trades.
Dimensions: Length of face 1,009 ft.; depth alongside at MLLW 35 ft.
Mechanical handling facilities: Two rail-mounted dock cranes and two bridge cranes. Semi-automated operation.
Remarks: Area of container terminal – 16 acres plus a 40,000 sq.ft. enclosed warehouse.

Richmond Terminal No. 4 Wharf:
Owners: City of Richmond.
Operated by: Modesto Tallow Co., Paktank Corp. and Pacific Molasses Co., Ltd.
Use: Bulk Liquids.
Dimensions: Length of face 1,047 ft.; South side 175 ft.; North side 100 ft.; depth alongside at MLLW 32 ft. – 50 ft.

Richmond Terminal No. 5:
Owner: City of Richmond.
Use: Available for tug, barge and vessel lay-ups.
Dimensions: Two finger piers, each 550 ft. long; Pier No. 1, East side-depth 13 ft. and West side-depth 30 ft. Pier No. 2 East side-depth 16 ft. and West side-depth 12 ft., and is leased to Marin Tug & Barge Co. Pier No. 2 only).

Pt. Potrero Marine Terminal – Terminal No. 7:
Owner: City of Richmond.
Operated by: Pasha Maritime Services.
Use: Import service and delivery of foreign automobiles.
Dimensions: Length of face 1,615 ft.; depth alongside at MLLW 35 ft.; usable berthing space with dolphin 900 ft.
Mechanical handling facilities: Mobile handling equipment available.

Richmond Terminal No. 6:
Owner: City of Richmond.
Operated by: Various Lessees.
Use: Five shipyard basins available for lay-berthing, fleet mooring, lay-up and project consideration.
Dimensions: No. 1, 4 and 5: 575 ft.×100 ft., 84 ft. gate. – Depth 15 ft. MLLW.
No. 2: 748 ft.×100 ft., 84 ft. gate. – Depth 26 ft. MLLW.
No. 3: 587 ft.×100 ft., 84 ft. gate. – Depth 26 ft. MLLW.

TANKERS: *Atlantic Richfield Tanker Dock:*
Owned and operated by: Atlantic Richfield Co.
Use: Receipt and occasional shipment of petroleum products; bunkering vessels.
Dimensions: Length of face approx. 250 ft.; lower and upper sides 40 ft. each; depth alongside at MLLW 35 ft.

Atlantic Richfield Barge Dock:
Owned and operated by: Atlantic Richfield Co.
Use: Receipt and shipment of petroleum products by barge; bunkering vessels.
Dimensions: Length of face 150 ft.; depth alongside at MLLW 34 ft.

Richmond Terminal No. 1 Wharf:
Owners: City of Richmond.
Operated by: Petromark Inc.
Use: Receipt and shipment of petroleum products, chemicals and petrochemicals.
Dimensions: Length of face 557 ft.; depth alongside at MLLW 35 ft.

Richmond Terminal No. 2 Liquid Cargo Wharf:
Owners: City of Richmond.
Operated by: Richmond Terminal Agency for California Oils Co.
Use: Receipt and shipment of vegetable oils, chemicals and petrochemicals.
Dimensions: Berthing length 720 ft.; depth alongside at MLLW 35 ft.

Texaco Wharf:
Owners: Texaco Inc.
Operated by: Texaco Inc.
Use: Receipt and shipment of petroleum products.
Number of Berths: One.
Water Depth: 35 ft.
Dimensions: Length of face 600 ft.

Time Oil Company Wharf:
Owned and operated by: Time Oil Co.
Use: Receipt and shipment of petroleum products.
Number of Berths: One.
Water Depth: 35 ft.
Special Remarks: 3×10 in. pipe-lines extend to 25 steel storage tanks in rear; total capacity of 618,000 barrels.

Union Oil Co. Tanker Dock:
Owned and operated by: Union Oil Co. of California (also services Unitank).
Use: Receipt and occasional shipment of petroleum products; bunkering vessels.
Dimensions: Length of face 225 ft.; lower end 45 ft.; upper end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical Handling Facilities: Hose handling at wharf is by ship's gear and small tractor crane.

Union Oil Co. Barge Dock:
Owned and operated by: Union Oil Company of California.
Use: Shipment and occasional receipt of petroleum products; bunkering vessels.
Dimensions: Length of face 150 ft. (approx.); lower end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical Handling Facilities: Hose handling at wharf is by ship's gear and small tractor crane.
Remarks: Wharf and Tanker Docks are spaced about 230 ft. apart; together they provide 1 large tanker berth.

SURVEYORS: Surveyors are available from various San Francisco Bay Area companies and organisations.

EMERGENCY CO-ORDINATION CENTRE: The Emergency Co-ordination Center for the Port of Richmond is the U.S. Coast Guard, San Francisco, California. CA. Tel: (415) 556-2103.

BANKS:

Bank of America, Richmond Main Office, 261 Harbour Way South, Richmond, California. Tel: (510) 841-4443. Telex: TWX (San Francisco) 910 372 7720.

Central Bank, Civic Center Office, 2705 Macdonald Avenue, Richmond, California. Tel: (510) 233-5710. Telex: TWX (Oakland) TLX 17-1329.

Crocker National Bank, 3900 Macdonald Avenue, Richmond, California. Tel: (510) 235-6458.

The Mechanics Bank, Civic Center Office, 22nd and Macdonald Avenue, Richmond, California. Tel: (510) 222-0340. Telex: TWX 910 382 8167.

Wells Fargo Bank, 1221 Macdonald Avenue, Richmond, California, Tel: (510) 232-3435. Telex: TLX 34-0284 (San Francisco-International).

5. Normal U.S. Customs Regulations apply.
6. Yes.

AUTHORITY: City of Richmond, Port of Richmond, 2600 Barrett Avenue, P.O.Box 4046, Richmond, California 94804. *Tel:* (510) 215-4000. *FAX:* (510) 233-3105. *Contact:* Michael R. Powers, Port Director.

RICHMOND, Virginia: 37.32 N. 77.25 W. **(See Plan)**

LOCATION: On the James River, 90 miles from Chesapeake Bay.
DOCUMENTS: See "Hampton Roads".
PILOTAGE: Entrance through Hampton Roads. Virginia Pilots Assn. original contact same as for Norfolk, Virginia. Pilots will arrange for change of Pilots to proceed up the James River.
ANCHORAGE: Hampton Roads Anchorage, also river anchorage approximately 40 miles up river, shown as "Upper Brandon" on charts.
RESTRICTIONS: Vessels up to 255 ft. LOA may transit at night from Hopewell to Port of Richmond. Vessels up to 450 ft. LOA may transit at night using James River Bank Lighting System.
James River Dimensions:
Hampton Roads to Hopewell – 300 ft. wide, 25 ft. depth.
Hopewell to Port of Richmond – 200 ft. wide, 25 ft. depth.

Standard operations for vessels destined to Richmond: Earliest departure from Newport News 5.5 hours prior to sunrise; latest departure from Newport News 7 hours before sunset.

From Richmond to sea: Earliest departure from Richmond 30 minutes before sunrise; latest departure from Richmond 2.5 hours before sunset.
MAX. SIZE: Maximum length (daytime): Container ships 559 ft. LOA and breakbulk ships 564 ft. LOA. Maximum draft 22 ft. Depth of channel 25 ft. MLW. Tide range: 3 ft. 5 in.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: See "Hampton Roads".
TUGS: Not needed for berthing unless vessel is to be turned around. Tug available from Blaha Towing, Inc. on reasonable notice.
BERTHING: Vessels berth alongside wharf 1,250 ft. long. Depth 25 ft. at MLW.

Turning Basin: 600 ft. at widest point, 1,600 ft. length.
CRANES: Two Manitowoc 4100W Series 1, 230 tons capacity and one Manitowoc 4600 VICON Series 4, 350 tons capacity.
BRIDGES: 3 bridges across the James River between Hampton Roads and the Port of Richmond. No specific time or notice required. Air draft 145 ft.
STEVEDORES: Meehan Overseas Terminal Ltd., 5000 Deepwater Terminal Road, Richmond, Virginia 23234. Tel: (804) 275-9248. Fax: (804) 275-7461.
MEDICAL: Vessels cleared by U.S. Health Officials at Hampton Roads before proceeding up river.
DENSITY: 1000.
FRESH WATER: Available at pier.
FUEL: Bunkers available from Ocean Shipping Services, Inc., 9900 Saybrook Court, Richmond, Virginia 23236. Tel: (804) 320-5022.
CONSULS: No consuls in Richmond, handled through Hampton Roads or Washington, D.C. if needed.
REPAIRS: Only minor repairs, no shipyards.
GANGWAY/DECK WATCHMEN: None required, unless crew detained by U.S. Immigration.
OPENING/CLOSING HATCHES: On bulk vessels, usually opened and closed by ship's crew, also steel hatches handled by ship's crew, sometimes determined by terms of Charter.
CERTIFICATES:

- Ship's Register.
- Load Line Certificate.
- Safety Certificate.
- Tonnage tax receipts.
- Certificate of nationality.
- Passenger Certificate.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes (1 carton for 2/3 days) if further allowance is needed Customs Officer will return on request of Master. Wine and Spirit, 1 bottle per officer, Customs Officer will return on request of Master.
REPATRIATION: Handled through Norfolk, Virginia.
AIRPORT: Approximately 10 miles from port, regular airline service.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time from first Sunday in April to last Sunday in October.
HOLIDAYS: January 1st, January 15th (Martin Luther King Day), Good Friday, May 30th, July 4th, Labour Day (1st Monday in September), Thanksgiving Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Police Tel: (804) 780-5100. Ambulance Tel: (804) 355-9300. Fire Tel: (804) 780-6640. Emergency telephone number for all services is 911.
TELEPHONES: No arrangements for placing aboard vessels.
SHORE LEAVE: Allowed. Proper papers should be available.
IDENTIFICATION CARDS: Immigration landing permit required.
GARBAGE DISPOSAL: A collection service using dumpsters is available through Meehan Overseas Terminal Ltd., for terminal operator, Tel: (804) 275-9248 and Fax: (804) 275-7461. Drums or skips are not provided on board or alongside vessels for this service.
WASTE OIL DISPOSAL: A collection service is available through the Port of Richmond, Tel: (804) 743-7678 and Fax: (804) 271-1524. There are no shore tanks, barges, tanker trucks or special berths for this service.
SEAMAN'S CLUBS: Rev. G.C. Harbuck, Jr., of the Catalytic Language Missionary provides services for seafarers. The address of the Catalytic Language Missionary is 1913 Grove Avenue, Richmond, Virginia 23220; Tel: (804) 355-0225, (804) 743-1502.

Meehan Overseas Terminal Ltd. (the terminal operator) provides international telephone service for seafarers in their Shipping and Receiving Office on port.
CURRENCY: The name of the local currency is the U.S.Dollar. No currency exchange facilities are available in the port. Foreign currency may be exchanged at the Crestar Bank, 919 E. Main Street, Richmond, Virginia 23219. Tel: (804) 782-5689.
DEVELOPMENTS: The Port of Richmond Commission adopted an $8.5 million Master Development Plan. The new Master Plan is based on a market study that assessed the Port's competitive market and forecast future cargo levels. Maximising container handling and storage operations and improving gate operations and traffic flow are key focal points of the plan.

A 300 ft. wharf extension to the North which will enable the Port to handle 3 medium to large ships at one time is a major element of the new plan. The wharf extension project will include expansion of the dock apron cargo handling area, construction of a new maintenance building for vehicles and equipment, and levelling and consolidation of storage areas at the Northern and Western ends of the facility. Engineering work is scheduled to begin Spring 1992 and construction should be completed by 1998.
AUTHORITY: Port of Richmond, 5000 Deepwater Terminal Road, Richmond, Virginia 23234. *Tel:* (804) 743-7678. *FAX:* (804) 271-1524. *Contact:* Martin J. Moynihan, Executive Director.
Terminal Operator: Meehan Overseas Terminal Ltd., 5000 Deepwater Terminal Road, Richmond, Virginia 23234. *Tel:* (804) 275-9248. *FAX:* (804) 275-7461.

RIVERHEAD, Long Is., New York: 41.00 N. 72.39 W.
(See Pl

LOCATION: The fixed Offshore Tanker Berth is situated 1.2 m offshore from the North shore of Long Island in Long Island Sou 4 miles 257° True from the beacon on Mattituck Inlet Breakwater a 12.7 miles 178.5° True from Falkner Island Lighthouse. T geographical position of the centre point of the Operating Platform i Lat. 41° 00′ 01″ N., Long. 72° 38′ 50″ W. The platform has 4 navigat lights situated on each corner of the structure flashing every secon A similar navigation light is also situated on each of the East a West mooring dolphins.
DOCUMENTS: See "New York".

Terminal will provide "Declaration of Inspection" Form which must completed before cargo transfer begins.
PILOTAGE: Pilotage must be arranged by the vessel or vessel's Age Vessels arriving from sea with a draft of 40 ft. or less will pick up t pilot 2 miles South of Point Judith Buoy No. 2 (normally found Lat. 41° 19.3′ N., Long. 71° 28.5′ W.).

Vessels proceeding to Riverhead from the New York Harbour w normally embark a Pilot at anchor or at a berth in New York.

The Pilot Associations serving the Riverhead area are:

Interport Pilots Associates, Inc.,
Post Office Box 312,
Atlantic Highlands.
New Jersey 07716.
Tel: 201-291-1310.
Cables: Port Pilots – Atlantic Highlands, New Jersey.

Northeast Marine Pilots, Inc.,
243 Spring Street,
Newport,
Rhode Island 02840.
Tel: 401-847-9050 (weekdays), 401-331-4824 (nights, weeken and holidays)
Cables: RIS Pilots Providence.
Sandy Hook Pilots
201 Edgewater Street,
Staten Island,
New York 10305.
Tel: 718-448-3900.

The Pilot will act as Docking Master when berthing vessels alongsi the Tosco Corporation Platform.

The Pilot is required to remain aboard the vessel (for Tosco's accoun on standby, while the vessel is moored at the offshore platform.
ANCHORAGES: Vessels awaiting berth will normally anchor North the Offshore Platform. Vessels drawing more than 50 ft. may wish anchor in deeper water Northwest of the platform. Pilots are familiar wi the best anchoring areas. Holding ground is good, and a scope 90 fathoms (6 shackles) of chain is considered adequate.
RESTRICTIONS: Generally, vessels are moored on any stage of t tide and at night when weather conditions permit.
MAX. SIZE: The maximum size vessel which can be received in t North Berth is 225,000 d.w.t., 1,150 ft. LOA and 62 ft. draft.

The maximum vessel size which can be received in the South Ber is 42,000 d.w.t., 600 ft. LOA and 42 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illnes Reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
COMMUNICATIONS: Telephone at Riverhead, station to station: Di (516) 727-5600. Cable Address "Tosco Corporation Riverhead Ne York". Radio I.T.T. Amagansett. TWX No. 96-1415, TWX No. 510-22 6443 or 510-226-7837.

Use of the vessel's main radio equipment while at the platform i expressly prohibited. If a tanker's main radio telegraph must be teste following repairs, arrangements must be made to stop the transfer cargo during the tests.

Wireless messages are most expeditiously received if transmitted v "RCA Chatham".
VHF: Communications with the Terminal may be conducted by VH Channels No. 16 and 19A; with the platform on Channels No. 16 an 19A; and the utility boat on Channels No. 13, 16, 19A, 12, 6 and 2 Channel No. 16 is monitored by all stations when manned. A priva frequency radio is provided to the Person-in-Charge of the vessel dur oil transfer operations.

VHF Marine Operators use VHF Channels: Riverhead (N.Y.) Mari Operator 28; New London and New Bedford Marine Operators 2 Bridgeport Marine Operator 24; to place land calls.
TUGS: Tug assistance for docking is required, and will be arranged the vessel's Agent. Normally, 2 or 3 tugs will be used for docking a one tug for undocking at the Riverhead Tanker Platform, subject to t agreement of the Pilot and Master. Tugs are usually arranged throu Red Star Towing Co., based in New Haven, Connecticut (because the shorter running time from that port).

Tugs normally based in New Haven are:

Newport (1,800 s.h.p., 20 ton B.P.) . . . . Single Screw
New Haven (1,800 s.h.p. 17 ton B.P.) . . . . Twin Screw

Call Red Star Towing Co. on (212) 536-3800.

Tugs must be ordered at least 24 hours in advance of the schedu docking time.

Red Star has additional horsepower available, if given adequa notice, including: Stanford (3,000 s.h.p., 32 L.T. B.P.), Crusader (4,0 s.h.p., 47 L.T. B.P.).

Other tugs are available from New York Harbour, or from t Providence Steamboat Co., Providence, Rhode Island, on (401) 33 1930, which has 3,000 h.p. tugs available.
BERTHING: Vessels calling at the Offshore Platform or pier are moo at any time. The tidal current periods are substantially the same as t Race. Strong winds from the North and Northwest are experien during the Winter and Spring. Tidal currents during maximum ebb a

ood may reach 3 knots. Both docking and undocking operations may e delayed due to adverse weather conditions.

The mean range of the tide is 5.4 ft.

A terminal working crew will board arriving vessels from a 60 ft. utility oat on approach to the mooring platform. This crew will provide ssistance and information to the vessel's Master and the line handling rews. The crew carries private-frequency radios for communication with he platform in positioning and mooring the ship.

The designated Person-in-Charge for Tosco Industries Corp. will eceive and sign the Notice of Readiness and complete all paperwork ecessary for the transfer of cargo. Two representatives of the terminal ill board each tanker as it approaches the platform. They will provide adio communications with the platform and terminal, and advice and ssistance while mooring the ship.

North Berth: Vessels berthed during flood tide will moor starboard ide to and during the ebb tide current will moor port side to. Forward nd stern spring lines are secured to breasting dolphins and bow and tern lines are made fast to mooring dolphins located to the East and o the West of the platform structure. Terminal Foreman boards vessel o provide communications and assistance during mooring operation.

South Berth: Vessels berthed during flood tide current will moor port ide to and during the ebb tide current will moor starboard side to. orward and stern spring lines are secured to the breasting dolphins in he South Berth. Bow and stern lines are made fast to the mooring olphins located to the East and West of the platform structure. Breast nes are secured to the North breasting dolphins.

Two mooring buoys are situated South of the mooring facility which ere formerly used for mooring vessels in the North Berth. Mooring uoys will be used at the discretion of the Docking Master (Pilot) nd/or Tosco's Marine Supervisor.

Masters will note that platform is situated in an open roadstead and at all mooring equipment must be in proper working order and in good ondition. If, in the opinion of the Pilot (Docking Master) or Tosco's arine Supervisor, the vessel's mooring equipment is inadequate, the essel will not be permitted to remain in the berth.

Vessels must be equipped with 12 manila or better mooring lines of ot less than 8 in. circumference and not less than 90 fathoms length.

Vessels having wire moorings secured on warping winches with brake e acceptable. Warping winches must be adequate to handle mooring nes under heavy strain. Efficient stopper lines must be readily available transfer mooring lines from winch to bitts without loss of tension.

The Docking Master (Pilot) will assist the Master in the berthing of e vessel and supervise the mooring and unmooring operations.

No gangways are used at this terminal. Crew must use ship's ladder r launch service. Crew are forbidden to go on to the Platform, except n ship's business.

ERTHING FACILITIES: *North Berth:* The distance between the North reasting Dolphins is 294 ft., centre to centre. The depth of water in the orth Berth is 64 ft. at low tide. Spring lines from forward and aft are ecured on to quick-release hooks situated on the North corners of each the North Breasting Dolphins. Vessels moor heading either East or est and can normally be moored at any stage of the tide. Mooring lphins located East and West approximately 350 ft. from the centre the platform provide the mooring points for bow and stern lines from e vessel. The mooring dolphins have 4 quick-release hooks each for e North Berth, and 2 quick-release hooks each for the South Berth. hese mooring hooks are provided with hydraulic releasing mechanisms hich can be operated remotely from the mooring platform during vessel eparture. Two mooring buoys are situated South of the mooring lphins to provide securing points for extra bow and stern lines from ry large vessels or in cases where anticipated severe weather nditions indicate the need for additional lines.

outh Berth: The distance between the South Berth Breasting Dolphins 160 ft., centre to centre. Spring lines from forward and aft are secured bollards situated on the South Breasting Dolphins. Bow and stern es are secured to the mooring dolphins described for the North Berth, reast lines to the South bollards or the mooring hooks on the lower ecks of the North Breasting Dolphins. Depth of water 45 ft. at MLW

perating Platform: The Operating Platform is 100 ft. long by 45 ft. wide.

The East Building contains 2 diesel powered 100 KW. generators, ther of which will supply sufficient power to drive the deepwell Fire ump rated at 750 g.p.m. at 120 p.s.i. The other generator will supply wer to the hydraulic system for the operation of the loading/unloading /U) arms, the electric mooring capstans and air compressor, as well illumination of the structure, including floodlighting and other electrical evices. A diesel powered 15 KW. alternator is available for normal ower requirements such as charging emergency lighting system atteries, navigation aid batteries and normal illumination.

The West building contains quarters for personnel, office space for ecordkeeping, radio and telephone communication equipment, and mergency and other control equipment. The quarters and control room e situated in the North half of the building and South half of the building available for storage of emergency equipment, i.e. sorbent boom, e jackets, etc.

There are 4 hydraulically operated L/U arms, 2×12 in. and 2×16 in., ituated at the North end of the Operating Platform. At the South end the platform 2×12 in. L/U arms are situated to accommodate the outh Berth. Connections can be made to 8 in., 10 in., 12 in., 14 in. and 6 in. 150 p.s.i. A.N.S.I. manifold flanges. Connections cannot be made irectly to valve flanges (spool pieces must be provided). Adjacent onnections cannot be made to flanges less than 6 ft. apart. The L/U rms are connected to the platform manifold which is designed to handle l products to or from either berth and is connected to the 2×24 in. ubmarine pipelines leading to the shore facility.

Approximately 1,200 ft. of 26 in. oil containment boom and 2,000 ft. f 36 in. containment boom is stored on lower level of Northeast and Northwest Breasting Dolphins. reasting Dolphins. The boom is stored in a manner so that it may be safely and effectively deployed in the event f an accidental discharge of petrolem into Long Island Sound.

Terminal Transfer Piping: Vessels discharging cargo at the offshore platform should understand that they are discharging to an oil storage terminal approximately 1.5 miles distant from the dock and at an elevation of 150 ft. above sea level. The pipeline is 24 in. in diameter. The static head pressure generated by this pipeline arrangement is about 56 p.s.i.

Booster Pump Operation: Booster pumps are available to assist with the discharge of vessel's cargo. However, the Person-in-Charge of the vessel must realise that it is necessary for the ship to generate sufficient discharge pressure (minimum of 75 p.s.i.) and volume (minimum of 7,000 bbls./hr.), at the booster pump inlet, to start moving the product in the pipeline and to permit the booster pump to be engaged. Each booster pump will normally move 10,000 barrels per hour. The normal start-up procedure when discharging at Tosco Corporation docks is as follows:

(a) following agreement to begin transfer, the shore opens the platform manifold valves;
(b) the vessel will start its cargo pumps and increase pump speed until a discharge pressure of about 60 p.s.i. is obtained at the top of the pump room;
(c) the ship opens its manifold valves;
(d) ship pump's speed is increased until a discharge pressure of 100 p.s.i. is obtained;
(e) the pumpman on the ship is stationed at the pump controls and the shore is requested to start the booster pumps;
(f) as the booster pumps are started, ship personnel adjust their pumps as necessary to prevent engaging the overspeed trip;
(g) the ship adds pumps and increases pump speed as necessary to maintain desired discharge pressure.

Rapid fluctuations in the discharge pressure of the ship will cause the booster pumps to trip-out. To avoid this, speed adjustments to the ship's pumps should be made gradually. Booster pumps are set to trip-out at a low pressure of 75 p.s.i. and, therefore, can provide no assistance to the ship for stripping cargo ashore.

After all cargo tanks have drained and the pumps have lost suction, the discharge of cargo will be declared finished. With the agreement between the Ship's Officer and the Platform Operator, the oil transfer valves on the Operating Platform will be closed. All product remaining in the unloading arms will be drained back into the vessel. If the vessel's pipeline system does not allow the complete draining of the unloading arm, then arrangments must be made to drain the arm into a container or via a drain hose into a cargo tank. *No product will be permitted to drain out on to the open deck of the vessel.* After the arms have been completely drained, they may be disconnected and the ends blanked off to prevent any drippage of oil.

The discharge pressure at the rail shall be a minimum of 100 p.s.i. (maximum 125 p.s.i.) or the vessel's pumping rate shall be a minimum of 10,000 bbls./hr.

LOADING/DISCHARGING:

Discharging: Tankers are expected to achieve an unassisted discharge rate of 10,000 barrels per hour. Ships discharging at less than 10,000 barrels per hour will be subject to charges for the extra platform time used.

High Pour Petroleum: High pour petroleum must be discharged at 4,500 barrels per hour or more. If the discharge rate falls below 4,500 barrels per hour for more than 2 consecutive hours, the vessel will be instructed to stop discharge of cargo and leave the platform. If the submarine line must be displaced from shore to vessel due to low discharge rate, ship will be responsible for all expenses due to this procedure. Laytime will stop and wharfage will commence.

No. 6 oils, or other viscous products shall be heated, before discharge, to at least 120°F (49°C), or at least 30°F (17°C) above the pour point of the product, whichever temperature is higher. (For example: Oil with a pour point of 75°F must be heated to 120°F or higher. Oil with a pour point of 100°F must be heated to 130°F or higher).

A "viscous" oil is one which has a Saybolt Furol Reading greater than 25 seconds at 122° F. (This requirement is dependent, to a degree, on the pour point, discharge temperature, viscosity, and average discharge rate. The terminal reserves the right to order any vessel to stop discharging at any time terminal operations require.)

Loading: Tankers can be loaded at rates up to 30,000 barrels per hour at the request of the vessel and with the agreement of the terminal.

BALLAST: No ballast disposal facilities. Long Island Sound is inland water and United States Anti-Pollution Regulations rigidly enforced. No bilge water, oil-contaminated water, garbage or any waste matter which may pollute sea water is to be discharged overboard while vessel within Long Island Sound and approaches.

Ballast suction valves must be sealed with a numbered seal on arrival. Terminal personnel will inspect seals before and after cargo transfer.

MEDICAL: A full-service hospital is available in Riverhead for treatment of medical emergencies. This is Central Suffolk Hospital located at the traffic circle/intersection of Roanoke Avenue (Route 73) and Route 58, Riverhead, about 4 miles from the Tosco Terminal.

Emergency transportation to tnis hospital can be obtained by dialling 911 and indicating to the dispatcher the location of the medical emergency, for instance: "on the ship at the Tosco Corporation's Riverhead Terminal on Sound Shore Road".

DENSITY: Flood tide density 1025. Ebb tide density 1020.

STORES/FRESH WATER: No fresh water facilities. Stores should be ordered through the ship's Agent. For delivery of stores at anchor, or alongside the platform, Miller Launch. Tel: (516) 473-0132.

FUEL: Bunkers *may* be available by special arrangement *if* pipelines are in black-oil service.

Ship's bunkers should be ordered through the Agent, from the regular supplier for delivery, by barge, at anchor. Bunkering of ships is not permitted while alongside Tosco Corporation Docks. Eckloff Marine (212) 442-1112 and Standard Marine Services, Inc. (212) 888-1818 will perform bunkering services.

CONSULS: All Consuls offices located in New York City.

REPAIRS: No repair facilities are available. Vessel must remain in sailing readiness at all times while moored at the platform facilities.

DRY DOCKS: At New York Harbour.

SURVEYORS: *Inspection Companies:*

Caleb Brett – New Jersey. Tel: (201) 925-8282.
Independent Petro. Insp. Tel: (201) 925-4960.
S.G.S. Control Services. Tel: (201) 541-7200.
Saybolt. Tel: (201) 245-3100.

Surveyors:

American Bureau of Shipping, 65 Broadway, NY, NY 10006. Tel: (212) 440-0300.
Bureau Veritas, 17 Battery Pl., NY, NY 10004. Tel: (212) 442-2317.
Det Norske Veritas, 616 Palisade Avenue, Englewood Cliffs, NJ. Tel: (212) 868-6595.
Lloyd's Register of Shipping, 17 Battery Pl., NY, NY 10004. Tel: (212) 425-8050.
Panama Bureau of Shipping, 104 E. 40 St., NY, NY 10016. Tel: (212) 867-4760.

QUARANTINE, CUSTOMS AND IMMIGRATION: New York City is the quarantine, customs, immigration and agricultural quarantine port of entry for Tosco. Officials are stationed in New York City. Arrangements for inspections of vessels arriving from foreign ports must be made by ship's Agent in advance, not less than 24 hours before arrival on Monday through Friday, and 48 hours on Saturday or Sunday. Vessels arriving from foreign ports are reminded to provide 24 hours' pre-arrival notice to the U.S. Coast Guard, Captain of the Port, New Haven, Connecticut.

Officials will board vessels in the anchorage prior to arrival, within the vicinity of the offshore platform.

Customs Officers: Customs officers will board all vessels arriving from a foreign port, or U.S. flag vessels arriving with foreign cargo. The Customs Officer must be the first person aboard the ship (with the exception of the Pilot). He will require the close assistance of the ship's cargo officer and the public inspector, for the prompt completion of his duties. Agents are requested to order U.S. Customs Inspectors for a time *2 hours before* the vessel's ETA at the terminal.

For questions concerning Customs business, the Regional Office should be contacted on (212) 466-4407 during business hours, otherwise the Communications Office on (212) 466-5472 should be contacted.

Immigration: An Immigration Officer will normally board vessels arriving from foreign ports. Until clearance is obtained from the Immigration Officer, no crew members may leave the ship.

For questions concerning Immigration matters, contact the District Office on (212) 264-5886.

Coast Guard Inspections: Coast Guard Officers may board tankers or barges at any time for the purpose of making inspections necessary to enforce the laws of the United States.

The Riverhead Terminal is within the jurisdiction of the Captain of the Port, New Haven, Connecticut, on (203) 773-2464.

A Regional Office is maintained at 1190 Old Town Road, Coram, NY.11726. Tel: (516) 732-0326.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirit allowance: Same as permitted in New York Harbour.

REPATRIATION: Crew members departing vessels from the Tosco Terminal may obtain transportation to domestic or foreign destinations (i.e. to an from either of the major international airports: J.F. Kennedy International Airport or LaGuardia Airport), by one of several methods.

The Riverhead Station of the Long Island Rail Road is located 10 minutes from the terminal by taxi and has services for both railway and bus.

Another method is limousine service. The following are limousine companies serving this area:

Long Island Airport Limousine. Tel: (516) 582-4077.
Winston Limousine. Tel: (516) 563-1323.
Transport Limousine of L.I. Tel: (516) 567-5100

AIRPORT: New York Airports, 80 miles distant. Islip Mac Arthur Airport, 35 miles distant.

POLICE/AMBULANCE/FIRE: Terminal attends Police/Ambulance and Fire services.

State Police Tel: 727-2727, Police Tel: 911 (Emergencies only). Fire Tel: 0 (to report fire, otherwise 727-2750). Ambulance Tel: 911 or 298-4016.

EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard at New Haven, Connecticut. Tel: (203) 773-2464; and the United States Coast Guard National Response Centre. Tel: (800) 424-8802 (toll free number).

BANKS: European American Bank, located at 209 West Main Street, Riverhead, New York, NY 11901. Tel: (516) 727-7082.

STORING: Bunkers must be taken at anchor. Stores can be loaded during transfer.

Trucks cannot proceed alongside the berth, but by launch only.
Fork lift trucks cannot be used to handle stores.
Customs Regulations regarding storing are not known by this terminal.
Local Riggers can be employed to assist with storing.

TELEPHONES: A coin telephone is located in the platform office. Tel: (516) 727-9549.

SHIP SUPPLY SERVICE: *Launch Service:* Launch service must be arranged for by the vessel's Agent, and can be obtained from: J. & H. Launch Service, Port Jefferson, New York. Tel: (516) 331-5336.

The launches operate on VHF Channels 8 or 13.

Riverhead: Launch service must be provided for the transportation to and from the offshore platform of boarding officials, ship's personnel, repair personnel and ship's stores. The launch service must be maintained for the duration of the vessel's stay at Riverhead.

The terminal's workboat will assist in the mooring of the vessel and the connection of L/U arms, and shall at all times render the general servicing of the platform operation. It must remain at or near the platform during petroleum transfer operations in the event of any emergency.

In the event of an oil spill, J & H Launch Service will assist deployment of the spill containment boom. Their launch crew Tosco's marine personnel have been trained to implement appropriate response to a spill in accordance with Tosco's Oi Contingency Plan.

SHORE LEAVE: Shore leave permissible by arrangement with launch service.

IDENTIFICATION CARDS: Issued by Immigration Officer.

GARBAGE DISPOSAL: *Ship Generated Garbage Reception Faci* United States laws prohibit the dumping of any garbage, trash, re or debris overboard while within U.S. navigable waters. Procedures the reception and disposal of garbage received from vessels at To Corporation's Riverhead and Port Jefferson facilities are in compli with 33 CFR Parts 151, 158 Annex V of MARPOL, the Internatio Convention for the Prevention of Pollution from Ships, and the An and Plant Health Inspection Service (APHIS) Regulations 7 C 330.400 and 9 CFR 94.5.

General Procedures: Both foreign and domestic vessels are recei at Tosco's Terminals. Tosco's policy is to take the most conserva approach to the disposal of garbage received from vessels. Tosco assume no liability associated with these wastes. A vessel desiring tender any garbage must give the Terminal at least 24 hours notice, state the volume and approximate weight of the refuse. No chemic or flammable materials will be accepted for disposal.

1. All garbage and any medical or infectious wastes generated foreign vessels, or any vessel arriving from a foreign port, wil incinerated in accordance with APHIS approved procedures.
2. Segregated of regulated wastes (i.e. medical or infectious wastes plastics) from general domestic ship generated garbage shall be sole responsibility and obligation of the vessel.

Foreign Vessels: (Including U.S. vessels holding foreign stores).

Packaging: Any vessel requesting garbage disposal will be provi with 4 mil polyethylene bags and fibre drums with securable rings MPC Environmental Services (MPC). All garbage shall be dou bagged and the exterior bag will be tagged indicating vessel's na and date. Bags will then be placed in sealable drums which are labelled with EPA-DOT required insignia.

Handling: Subject to the approval of the U.S. Customs Inspector, launch personnel will receive and inspect each drum generated the ship. If the drum is properly sealed, the ship's name and date then be written on the outside of each drum with weather-proof mar The number of drums, total weight, ship's name, date and location be completed on the Bill of Lading, with one copy presented to the sh officer and the remaining two copies intact for tracking with the dru

Transportation: Properly packaged drums will be placed in sec storage in Tosco's Terminal. MPC will contact Medi-Waste Ltd., 44 F Street, West Babylon, New York (Tel: 516-249-3131), for pick-up transportation to their incinerator. *Incineration will take place* wi *4 days of receipt of the garbage.* The final Bill of Lading and all invoic for this service will be for the account of the vessel and will be forward to the ship's Agent by MPC for payment.

WASTE OIL DISPOSAL: *Oily Waste Reception Facilities:* accordance with requirements of the International Convention for Prevention of Pollution from Ships (MARPOL 73/78) and with Uni States Coast Guard Regulations 33 CFR Part 158, Tosco Corpora will provide oily waste reception facilities at its Riverhead and Jefferson Terminals. Both Terminals have received Letters of Adequa from the U.S. Coast Guard, COTP, New Haven.

The established capacity for oily waste reception at each facility is metric tons (3,360 gallons) per day. The oily waste is limited to slu from on-board fuel, lubricating oil processing equipment and oily water. Vessels visiting the Riverhead offshore platform will be requ to transfer the oily waste to a licensed waste hauler at anchorage. service will be provided at Riverhead between April 30th to October only, weather permitting. Ballast water *will not* be received in Tos Riverhead or Port Jefferson facilities.

Vessels requesting the disposal of oily waste at Tosco's Termi must request this service 24 hours in advance. The U.S. Environme Protection Agency (EPA) and the N.Y.S. Department of Environme Conservation require that any transfer of oily waste be carried transport trucks approved and licensed by the state. A Hazardous Wa Manifest must accompany the transport truck, and must identify generator of the waste to be disposed. The generator's U.S. identification number, name and registry of the vessel *must* be sta It is essential that you register with the U.S. EPA and obtain a generat identificication number, if you wish to dispose of oily waste at Tos facilities.

Payment for the cost of transportation and disposal of the oily w shall be borne by the vessel's owner or its Agent. For ten metric of oily waste, the cost may range from $ 3,000 to more than $ 25, The cost will depend upon the method of disposal of the wast determined at the waste disposal site by laboratory analysis and indication of toxic content.

Before acceptance by the waste hauler of any oily waste, Tosco require satisfactory proof of ability to pay and assurance of paymen to, but not limited to, $ 25,000. Tosco will also require indemnifica against any liability arising from the transfer, transportation and/or disposition of the oily waste.

SEAMAN'S CLUBS: Seamen's Church Institute, 241 Water Street, York, New York 10038.

WEATHER AND TIDE: Strong winds from North and N.W. experien during Winter and Spring. Tide during maximum ebb and flood reaches 3.5 knots to 4 knots velocity.

AUTHORITY: Tosco Industries Corp., P.O.Box 111, Riverhead 11901. *Tel:* (516) 727-5600. *Telex:* 96-1415. *Cables:* Tosco Corpora Riverhead Terminal. *FAX:* (516) 722-3340. *Contact:* Earl Espe Terminal Manager. A. Golz, Marine Supervisor.

ROCHESTER, New York: 43.17 N. 77.36 W. (See Plan)

efer to "St. Lawrence Seaway" for important general information.
See "General" below.
ILOTAGE: Not necessary.
NCHORAGE: No anchorage available within harbour limits.
ESTRICTIONS: Permit for non-emergency docking must be obtained weeks in advance by mail or telephone request.
AX. SIZE: Channel depth 20 ft. (LW). All depths in channel or longside wharves should be checked carefully against the latest ecorded elevated or lake level. This may vary from month to month. ntrance width 300 ft., turning basin depth 20 ft., 600 ft. in width.
EALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness eports made to New York Quarantine Station.
GRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ADIO: Rochester Coast Guard Station.
UGS: Not available.
ERTHING: Entrance piers are parallel to each other, and about 450 ft. part. The West Pier is 3,036 ft. long and the East Pier 2,699 ft. long. og horn and beacon on West Pier, East pierhead lighted. Radio eacon. Port Authority Terminal located on West bank of Genesee River end of Lake Pier. Has a quay wall of about 1,400 ft. in length. Depth water alongside quay wall uncertain, estimated at between 10 ft. and ft. Charlotte Docks located about 2 miles upstream from mouth of er on West bank.
RANES: Not available, except through private arrangements.
RIDGES: New York Central Railroad swing bridge near mouth of the er and upstream from Port Authority Terminal. Traffic lift bridge about 25 mile upstream from railroad bridge.
TEVEDORES: Vessel to make own arrangements.
ENSITY: Fresh water.
RESH WATER: Available at Port Authority Dock only.
UEL: Vessel to make own arrangements.
ONSULS: None.
EPAIRS: Minor only.
EPATRIATION: Can be arranged.
RPORT: Approximately 10 miles from port.
OLICE/AMBULANCE/FIRE: Police, Ambulance and Fire Tel: 911.
HORE LEAVE: Allowed.
ENTIFICATION CARDS: Required.
ARBAGE DISPOSAL: By special arrangement only. Contact Waste anagement of New York. Tel: (716) 254-3500.
ASTE OIL DISPOSAL: Not available.
EAMAN'S CLUBS: None.
ENERAL: Rochester, New York, no longer operates a commercial rt. The facilities are available only for tour and cruise boats to take and discharge passengers, and by commercial vessels in the case an extreme emergency.

t should be stressed that emergency docking is completely the aster's responsibility. The City of Rochester and the Department of ecreation and Community Services assume no liability for any vessel cking under emergency conditions at the former Port of Rochester.
UTHORITY: City of Rochester, Department of Parks, Recreation and man Services, Office of the Director, 400 Dewey Avenue, Rochester, w York 14613, U.S.A.. *Tel:* (716) 428-6755. *FAX:* (716) 428-6021.
ntact: Director of Recreation.

ACRAMENTO, California: 38.32 N. 121.30 W. (See Plan)

OCUMENTS: See "San Francisco".
LOTAGE: Pilots board vessel in San Francisco Bay. (Also see "San ancisco").
ESTRICTIONS: *Ship Channel:* Distance Fort Point to Sacramento, 79 utical miles (146 km.). Bottom width in river reach 300 ft. (91.4 m.). ttom width in channel reach 200 ft. (61.0 m.). Min. depth at MLLW ft. (9.1 m.).
rbour: Area 60 acres (24.3 hectare). Min. depth at MLLW 30 ft. 1 m.). Tidal variation 5 ft. (1.5 m.) average.
AX. SIZE: 800 ft. LOA and 106 ft. beam, 30 ft. deep at MLLW.
EALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness ports made to San Francisco Quarantine Station.
GRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ADIO: KBA 386, 156.9 MHz (24 hours).
UGS: Join vessel at Light 76 (turning basin).
ERTHING: Anchor – ships will have at least 1 anchor ready to let go case of emergency, when docking or undocking. Anchor will be raised mediately upon ship being made fast to wharf.

Insurance lines are required on off-shore side, fore and aft, mediately after ship is made fast to wharf.

A cargo net shall be securely placed under gangways. Save-all nets all be rigged abreast of holds at which general cargo is being handled.

Rat guards, at least 3 ft. in diameter, shall be placed on all mooring es immediately after docking, and shall be maintained in place until ip's departure.

er 1:
Owned and operated by: Port of Sacramento.
Use: Bulk-loading rice facility.
Construction: Concrete with timber fender piles, length 600 ft. 82.9 m.).
Water depth: 32 ft. (9.8 m).
Storage capacity: 22,000 tons; 8 silos at 2,200 tons each; 6 silos at 70 tons each; 6 silos at 270 tons each.
Mechanical handling facilities: 3 loading spouts dockside, conveyor ystem to storage facility.
Loading rate: 600 t.p.h.

Wharf 2:
Owned and operated by: Port of Sacramento.
Use: General cargo.
Construction: Concrete with timber fender piles; apron width 60 ft. (18.3 m.); length 600 ft. (182.9).
Water depth: 30 ft. (9.1 m.).
Transit sheds: One, 86,400 sq. ft.

Pier 5:
Owned by: Port of Sacramento.
Operated by: Cargill of California, Inc., as a public utility.
Use: Bulk-grain facility.
Construction: Concrete and steel silos; concrete with timber fender piles; length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m.).
Storage capacity; 1,250,000 bushels (30,000 tons); 17 concrete silos; total capacity 500,000 bushels; 6 steel silos; total capacity 750,000 bushels. Two dry bulk storage domes of 9,000 tons storage each.
Mechanical handling facilities: Bulk ship loader (600 t.p.h.), conveyor belt system connects bulk storage/rail/truck.

Wharf 6:
Owned and operated by: Port of Sacramento.
Use: General cargo and containers.
Construction: Concrete with timber fender piles; length 600 ft. (182.9 m.); apron 60 ft. (18.3 m.).
Water depth: 30 ft. (9.1 m.).
Remarks: 6 acres of open wharf; 70,000 sq. ft. off dock warehouse.

Wharves 7-8:
Owned and operated by : Port of Sacramento.
Use: Bulk material facility and general cargo.
Construction: Concrete with timber fender piles; apron 60 ft. (18.3 m.), length 600 ft. (182.9 m.).
Water depth: 30 ft. (9.1 m.).
Storage capacity: Covered 200,000 tons, open 750,000 tons.
Mechanical handling facilities: Conveyor-belt system from truck to storage, from ship to storage; from storage to ship, or from storage to truck.
Loading rate: 600 t.p.h.
Transit shed: 86,400 sq. ft. Bagging facilities for bulk cargoes.

STEVEDORES: Same as San Francisco. Port stevedores for bulk cargo.
MEDICAL: All normal medical facilities available.
DENSITY: Full fresh.
FRESH WATER: Available at all berths.
FUEL: All grades available with 24 hours notice. Delivered by barge.
CONSULS: Nearest at San Francisco.
REPAIRS: Limited repair facilities available.
GANGWAY/DECK WATCHMEN: Each ship shall have a security detail in readiness on board at all times it is in port. The security detail shall perform tasks of an emergency nature and shall have information concerning cargoes aboard in case of need for fire fighting purposes.
OPENING/CLOSING HATCHES: Opening/closing hatches is stevedore work while docked in port.
REPATRIATION: Can be arranged through local Agent.
AIRPORT: 16 miles from port and served by regular airlines.
TIME: GMT minus 8 hours.
HOLIDAYS: Only days not worked are 4th and 5th July, Labour Day, Christmas Eve and Day, New Year's Eve and Day.
POLICE/AMBULANCE/FIRE: Tel: 371-8000. Extensions 252 and 228.
TELEPHONES: Telephones are available.
SHORE LEAVE: Crew members allowed ashore subject to Immigration clearance.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Service available. Charges are man-hour rates to supply and remove double plastic bag lined 4.5 cu.ft. boxes for incineration plus per box incineration cost of $30 plus 25%. 24 hour notice must be given for garbage service. Contact Tel: (916) 371-8000, ext.280. Collection scheduled as needed.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar (U.S.$).
IDENTIFICATION CARDS: A pass signed by the Master or his designated officer will be required for crew members, passengers and their personal property to leave the port's fenced area. Property may be subject to physical inspection before leaving the fenced area.
REGULATIONS: Ships will not blow boiler tubes while in port. Bilge water or oil will not be discharged into harbour. Accidents will be reported immediately to the Terminal Superintendent. Splash boards will be placed over disposal vent-pipe openings on inboard side of vessel.

Garbage – United States and California State laws make it unlawful to dispose of ship's garbage except in approved ways. Garbage retained on board must be kept in tightly closed containers.

Smoking – Smoking prohibited in and around cargo compartments, and on open decks except that it may be permitted in marked areas under sheltered portion of weather decks on offshore side. Smoking prohibited on wharfs and piers except in marked areas. Smoking prohibited on or near ship while it is bunkering.

Welding/Burning – Welding or burning will not be done until written approval is obtained from the Terminal Superintendent and the Fire Marshal. All requirements of both the Superintendent and Marshal will be strictly adhered to.

Fire Signal – Upon detection of a fire, regardless of location or size, the alarm of fire will be sounded. The alarm shall be sounded by telephone and/or whistle or siren blasts. 5 each, 5 second blasts repeated as necessary.
DEVELOPMENTS: Deep water channel dredging project to minimum 35 ft. by 1995.
AUTHORITY: Port of Sacramento, P.O.Box 815, World Trade Centre, West Sacramento, California 95691. *Tel:* (916) 371-8000. *FAX:* (916) 372-4802. *Contact:* Michael Vernon, Director.

SALEM, Massachusetts: 42.31 N. 70.53 W. (See Plan)

SHIPMASTER'S REPORT: August 1986.

DOCUMENTS: See "Boston".
PILOTAGE: Cape Ann Pilots Association (serves Gloucester and Salem). Pilot on VHF Channels 16 and 12. Pilot boards about 1 mile South of Eastern Light Buoy No. 2.
ANCHORAGES: About 2 miles S.W. of Eastern Point.
RESTRICTIONS: Salem Channel 150 ft. in width only, therefore large vessels berth or unberth in daylight hours only.
MAX. SIZE: Length 700 ft. (approx.). Breadth 110 ft. (approx.) and draft 34 ft. (salt water).
TUGS: Available from Boston.
BERTHING: New England Power Company (NEPCO) operates Salem Terminal Wharf to supply Salem Harbour Station with coal and fuel oil.
No cranes available, coal is discharged from "self-unloading vessels" only.
TANKERS: 2 arms (Chicksan-type), 12 in. diameter. Discharging rate: 7,000 bbls. each. Length of wharf (incl. dolphin) 250 m. (approx.) dredged to 34 ft. at LW.
DENSITY: 1022 – 1025.
AIRPORT: See "Boston", about 45 minutes. Cost U.S.$50 by van.
TELEPHONES: Not placed on board, however communication with Agents via VHF possible.
GENERAL: Port is served by 1 or 2 colliers a week, and about 3 tankers a month.
NEPCO Representative acts as Loading Master. Linesman are provided from the power station.

REPORT: From Tanker Operator:
Port Approaches: The RDF stations at Cape Cod, Boston Buoy 'B' and Eastern Point are useful navigation aids. The rocky shore lines provides a good target for position fixing by radar. Fathometer readings should not be relied on for position fixing purposes, since bottom contours are erratic. Fishing boat traffic in Massachusetts Bay is heavy especially near Gloucester. It should be noted that the small fishing vessels in this area sometimes display working and running lights that could be mistaken for reguar range lights. During the Summer months, the yacht traffic is considerable. Most yachts reportedly show up poorly on the radar screen.
Channel Transit and Berthing: Loaded tank vessels enter with a rising tide. The Pilot and Agent should be consulted with regard to the actual water depths available in the channel during the intended period of transit.
The transit from the pilot boarding area to the terminal is about 10 miles. Salem Sound is entered via the Salem Channel between Bakers Island and Little Misery Island, leading Westwards for 3 miles thence Southwestward through a dreged section to the turning basin off the berth. The channel is well marked with buoys and range lights.
Shallow vessels and tows crossing the chanel may be met. During Summer months, Salem Sound is crowded with pleasure craft. Coast Guard patrol boats must sometimes be utlised to clear a path.
The tugs usually join the ship before entering the inner dredged channel Buoy No. 16. The ship is berth port side to, which requires a starboard turn of approximately 130° before landing.
During normal weather conditions, 10 mooring lines are considered to be the minimum acceptable.
Weather: Gales occur year round. The severest storms occur during the Winter months. Rain or snow associated with these storms, at times, reduce visibility to zero for extended periods. During the Winter months, freezing spray may be experienced.
Fog presents a problem year round, being heaviest during late Spring and early Summer. It is not advisable to enter or leave in thick weather.

SAN DIEGO, California: 32.41 N. 117.07 W. (See Plan)

PORT LIMITS: The seaward boundaries of the Port of San Diego at which a vessel is considered to be an "arrived vessel" is that time when the vessel is boarded by a Port Pilot at Sea Buoy No. 1 and (subject to charter party terms) lay time commences when Notification of Readiness is tendered at berth.
DOCUMENTS:
Crew Lists.
Passenger Lists.
Customs Documents.
Manifests.
Stores Lists.
Crew Curio Declaration List.
If the vessel arrives from foreign direct, 3 copies each of the above documents are required.
If the vessel movements are between U.S. ports, 2 copies each of the above documents are required.
Health Documents. Arrival from Foreign Direct, 1 copy only. All crew members should be in possession of valid vaccination certificates.
Manifests. Arrival from Foreign Direct, 1 copy of Travellers Manifest which remains with vessel, and 3 copies each of U.S. Customs Inward Foreign Manifest. Bills of Lading, ship's papers carried aboard vessel varies with steamship companies.
PILOTAGE: Compulsory. The San Diego Pilots do not maintain on station. Service is rendered according to ETA received from ve If any vessel's arrival or departure is delayed over 1 hour, an addi charge will be made. Telegraphic address of pilot station – radio to "Pilots", San Diego. Advance notice of ETA required – 24 hours to arrival of vessel with amendments 2 hours prior to arrival. Pilot is 54 ft. in length, painted white. The exact area where Pilot boards vessel is No. 1 sea buoy. Pilot on VHF Channels 16 and 12 (Tel: 233-7814).
ANCHORAGE: 3 miles S.E. of Point Loma Light.
MAX. SIZE: Length, breadth – no restrictions. Max. draft alongside of terminal, 36 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Ill Reports made to Los Angeles Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany
RADIO: All radio messages go through the Los Angeles station for re
VHF: The Port of San Diego Harbour Police maintains a listening wa on Channels 12 and 16. Channel 11 is available after initial call-up Channel 16.
TUGS: Tugs normally join vessel approximately 1 mile before be 5 available ranging from 200 h.p. – 2,400 h.p. There is no charge the use of tug's lines.
CONTAINER FACILITY: A new generation, high-speed, all-elec container crane capable of handling 20 ft. and 40 ft. units, or single h lifts of 40 long tons at National City Marine Terminal. This 17.4 a facility includes 32,500 sq. ft. for a container freight station, a conta steam-cleaning facility, office, maintenance shop, truck scales, rail spur, and paved storage for 2,280 containers including electrical out for 45 refrigerated containers. Depth 35 ft.
SPECIALISED CARGO HANDLING FACILITIES: High-speed b loading facilities exist with 800 ft. of 35 ft. deep water berthing spa and bulk storage, plus a bulk loader boom that travels 500 ft. later and can be extended or raised enough to load nearly any size or t of ship.
STEVEDORES: Advance notice of 24 hours desired in order to arran gangs.
MEDICAL: Agents should receive notification of medical atten required 24 hours prior to ETA of vessel. Complete hospital facili available.
TANKERS: Diameter of load/discharge line 6 in. to 8 in. Slop (resid discharge facilities available upon request. 2 tanker berths – max. d 35 ft. There are also 2 tanker berths at National City Marine Termi with 12 in. discharge lines.
DENSITY: Salt water in bay.
FRESH WATER: Fresh water available, delivery via pipeline.
FUEL: Diesel and bunker fuel available.
CONSULS:

Chile	Finland	Netherlands
Costa Rica	France	Norway
Denmark	Germany	Panama
Dominican Rep.	Honduras	Peru
Ecuador	Italy	Sweden
El Salvador	Mexico	

REPAIRS: All types of deck and engine repairs are available.
DRY DOCKS: Largest dry dock 1,000 ft. length, 140 ft. wid accommodates up to 30,000 displacement tons. Six additional dry doc from 3,500 to 28,000 displacement tons capacity.
SURVEYORS: A full complement of cargo inspectors and surveyors a available locally.
GANGWAY/DECK WATCHMEN: Available if considered necessary
OPENING/CLOSING HATCHES: Carried out by stevedores.
CERTIFICATES: Registered Load Line Certificate, Certificate Inspection, Safety Certificate.
CUSTOMS ALLOWANCES: Tobacco: Per each crew member U Customs allowed 2 cartons of cigarettes and 1 box of cigars. Wine a or Spirits: Quantity allowed per each crew member – 1 quart.
CARGO GEAR: Up-to-date certification of all cargo gear required order to comply with Pacific Coast Marine Safety Code.
AIRPORT: Distance from marine terminal approximately 5 miles. Air is serviced by major airlines.
TIME: Local time GMT minus 8 hours. Daylight Saving Time becom effective the first Sunday in April and continues to the last Sunday October.
HOLIDAYS: Recognised holidays are: New Year's Day; Linco Birthday; Washington's Birthday; Memorial Day, Independence D Labour Day, Columbus Day, Veteran's Day, Thanksgiving D Statewide Election Day, Christmas Day, or any other legal holiday may be proclaimed by State or National Authority; when a holiday on a Sunday, the following Monday shall be observed as a holiday
POLICE/AMBULANCE/FIRE: Non-Emergency Police Teleph Number is 236-6566. All other emergencies (including paramed Tel: 911.
EMERGENCY CO-ORDINATION CENTRE: Local maritime emerge co-ordination is handled by the U.S. Coast Guard, San Diego Reg 2710 North Harbor Drive, San Diego, CA 92101. Tel: (619) 557-58
TELEPHONES: Arrangements exist for placing telephones on boa No charge for hooking up.
SERVICES: Tank-cleaning equipment. Facilities for tank washin Compass and radar adjustments, etc.
BANKS: Full banking services for both domestic and interna transactions are available locally.
STORING: Storing and provisioning may be accomplished at docks or via barge by prior arrangement. Trucks and forklifts may be u alongside and riggers are available by arrangement with representative Agent. U.S. Customs Agents will board on arrival seal all bonded items. Otherwise, normal procedures concer controlled items will be observed by the vendor.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: U.S. Immigration requires completio Form I-95, U.S. Coast Guard requires landing permits.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

Domestic garbage (Non-APHIS Controlled): Numerous companies available through local agent. Volume, charges, and collection times vary.

International (APHIS/MARPOL V Controlled): Pacific Treatment Environmental Services, 1452 N.Johnson Avenue, El Cajon, CA 92020. Tel: (619) 441-1818. Volume, charges, and collection variable as required or scheduled.

WASTE OIL DISPOSAL: Available through agent. For MARPOL I controlled substances: Pacific Treatment Environmental Services, 1452 N.Johnson Avenue, El Cajon, CA 92020. Tel: (619) 441-1818. Volume, charges and collection variable as required or scheduled.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.Dollar (U.S.$).

AUTHORITY: Port of San Diego, P.O. Box 488, 3165 Pacific Highway, San Diego, California 92112. *Tel:* (619) 291-3900. *Telex:* 695-456. *Cables:* Sun Harbor San Diego. *FAX:* (619) 234-3965. *Contact:* Don L. Nay, Port Director. Stanley R. Westover, Manager, Marine Operations.

SAN FRANCISCO, California: 37.48 N. 122.25 W.

(See Plan)

DOCUMENTS:

General Declaration (arrival) on Customs Form 1301.

Cargo Manifest (Customs Form 1302). One original copy indicating all the cargo on board, used for making formal entry. One copy listing all cargo on board, to be used by the Customs Inspector. One copy indicating cargo for this port only.

2 copies of Crew's Effects Declaration on Customs Form 1304.

2 copies of Ship's Stores Declaration on Customs Form 1303.

2 copies Passenger List (Form I-418).

2 copies Crew List (Form I-418).

1 copy "Oil Pollution Certificate", issued in Washington D.C.

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from abroad, or 24 hours of arrival from a U.S. port:

(*a*) Health Pratique.

(*b*) Master's Oath (Customs Form 1300).

(*c*) U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).

(*d*) Certified Crew List (U.S. vessels only).

Radio Officer's Report: April 1991.

Crew List: Get the Crew List (Form I-418) visaed at the last port before the USA. Be sure to insert in column 4, date, city and country of birth column 5 and place of issue and the authority issuing passport.

Arrival USA: Prepare for every crew member a Crewman's Landing Permit (Form I-95A). If they still have one it is only valid if they are still on the same ship.

Immigration: Hand over all Crew Landing Permits (Form I-95A) and passports. Every crew member must present himself to the Immigration Officer. Immigration will issue a form to be retained on board.

Customs broker:

2 copies Master's Oath (Form 1300).

2 copies Crew Lists (Form I-418).

2 copies Crew Effects Declaration (Form 1304).

2 copies Ship's Stores (Form 1303).

2 copies General Declaration (Form 1301).

Agriculture: Will board the ship and probabaly seal meat and vegetable storerooms. Agriculture will issue a Form 288, which must be presented at next U.S. Port. The seal may not be broken.

Customs: Customs will not board the ship.

Departure: A "Traveller" will be issued.

PILOTAGE: Pilotage in and around Golden Gate Region is performed by the San Francisco Bar Pilots who provide service from sea to all ports within the regions, including the Ports of Sacramento and Stockton.

The San Francisco Bar Pilots' Association, maintains a sea station 12 miles outside the Golden Gate, in the vicinity of the large navigation buoy for vessels arriving and leaving the area.

On station around-the-clock. Pilot boats are equipped with VHF radio-telephone, and maintain continuous watch for ship traffic and operate co-operatively with the Marine Exchange Communication Centre and lookout station. The Bar Pilots also carry portable VHF radios.

Some 8,500 ships are piloted annually into and out of the port complex, through the Golden Gate and the 2,000 ft. wide, 55 ft. deep main ship channel across the sand bar about 9 miles outside the Gate.

Considerable Summer fog is experienced on the pilot grounds. In Winter months radiation or tule fogs frequently occur. The tidal prism of hundreds of square miles of inland waters cause unusually swift and changing currents in the area. Pilotage for San Francisco Bar and entrance is compulsory and available 24 hours a day. The pilot boat is at a station 3 miles outside Main ship Bar Channel about 14 miles from San Francisco, VHF Channels 18A and 10 for radio contact. Vessels with a draft of 42 ft. or more are requested to arrive at the pilot station for the inward passage about one hour before high water at the Golden Gate Bridge.

ANCHORAGES: Several anchorages available in San Francisco Bay for any type of vessel up to 50 ft. draft.

The well-protected bay affords excellent shelter and anchorage in all weather. The Captain of the Port (Coast Guard) will assign an anchorage to a vessel upon request. In San Francisco and San Pablo Bays, there are a large number of anchorages available for naval, quarantine, general and explosives.

The specific anchorages available include:

1. *General Anchorage*

(a) No. 5 – found just South of the Richmond-San Rafael Bridge, has no limitations.

(b) No. 9 – found in the South Bay, also has no limitations.

2. *Temporary Anchorage*

(a) No. 7 – found off Treasure Island, has a 12 hour limit. A ship cannot lighter nor bunker at this mooring.

No. 8 – same as No. 7 but has a 6 hour limit.

3. *Explosive Anchorage*

No. 12 – is normally not activated.

No. 13 – found off Larkspur, this mooring is activated only as the need arises.

No. 14 – found in the South Bay, this mooring is always activated.

4. *Naval Anchorage*

No. 10 and No. 21 are the most frequently utilised.

RESTRICTIONS: The San Francisco Bay region is the first on the West Coast to have sea lanes established by the Coast Guard for greater safety in its ocean approaches. Use of the lanes is not mandatory, but is strongly recommended to reduce chance of ship collisions in congested approach and departure areas. The lanes are not intended to supercede or alter applicable rules of the road.

The lanes begin within 6 miles of the San Francisco Lightship, with each lane inbound and outbound separated by a buffer zone. The headings are: North lane outbound, 305°; North lane inbound 120°, main line outbound, 247°; main line inbound, 058.5°; Southern lane outbound, 169°; Southern lane inbound 343°.

The size of the bay and the narrowness of the Golden Gate cause tricky and sometimes difficult tidal and current conditions. The flood current sets into all parts of the bay and causes swirls as far East as Alcatraz and Angel Islands. At the San Francisco-Oakland Bay Bridge there are large current eddies near the foundation piers which may require care to maintain proper course.

The Bar Channel is dredged to 55 ft. MLLW by the U.S. Army Corps of Engineers. Entrance channels to the various ports are dredged to 35 ft., with the exceptions of Sacramento, Stockton and Redwood City, which are 30 ft. Stockton, however, is approved for a 6 ft. deepening, and study of similar deepening for Redwood City is being completed.

MAX. SIZE: The max. permissible draft for tankers at the oil installation is 35 ft., for regular freighters and passenger ships at the San Francisco piers is 40 ft. No restrictions on length or berth. The best time to dock with max. draft is at a rising tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station via RCA – Radio Corporation of America – Station KPH ITT – World Communications – Station KFS.

Safe and efficient navigation for all bay vessel traffic is maintained through a Ship Location and Reporting Service operated by the Marine Exchange. U.S. Coast Guard Vessel Traffic Service on Yerba Buena Island and at Port Bonita maintains 24 hour radar surveillance of all traffic from Golden Gate on the West (with 32 mile capacity beyond) to Oakland on the East, Dumbarton Bridge on the South and Port San Pablo on the North. Vessel Movement Reporting System (VMRS) extends beyond Port San Pablo all the way to the Ports of Stockton and Sacramento. Coast Guard urgently requests that all vessels as specified below, moving anywhere within the VMRS (including all area under radar surveillance), tune to Channel 13 (156.65 MHz., VHF FM): All ships of 300 gross tons and over, passenger ferries for hire over 100 gross tons, and tugs with tows of barges or dredging rigs of over 26 ft. length.

Coast Guard Regulations: Foreign tankers should give 72 hours' advance notice of arrival to ensure that U.S.C.G. has enough time to check the vessel's records for compliance or outstanding violations and to arrange for any onboard inspections required. Failure to provide 72 hours' notice may delay the commencement of cargo transfer while awaiting the required U.S.C.G. inspections. Letter of Compliance inspections must still be arranged through Washington D.C. The statutory notification remains at 24 hours. This notice applies only to the San Francisco Bay area. Any vessel required to have an inert gas system must have its tanks inerted at all times unless they are gas free.

VHF: VTS in operation. Call sign "San Francisco Vessel Traffic Centre", operates on Channels 16, 13, 12 and 18A.

TUGS: Tugs available and normally join the vessel when approaching their pier. Tug's lines are always used, with no extra charge.

BERTHING: No restriction on berthing other than draft limitation and preferable at slack water.

Alameda: (See Plan). (Not part of the Port of San Francisco). Alameda, an island and city across the Inner Harbour channel from Oakland, is the home of Encinal Terminals, the largest privately owned and operated steamship terminal in the United States. There are 6 berths for vessels at Encinal.

Berths 1, 2, 3 and 4: Used for general cargo and bulk liquids. Total berthing length 2,125 ft. Depth 31 ft. to 33 ft.

Berth 5: Used for general cargo. Length 750 ft. Depth 35 ft. Berth equipped with Paceco crane.

Berth 6: Used for receipt and shipment of bulk liquids. Depth 30 ft. Facility has tank storage of 12 million gallons.

Operator: Encinal Terminals, 1521 Buena Vista Avenue, P.O.Box 2453, Alameda, CA. 94501. Tel: (415) 523-8800. Telex: TWX (910) 366-7174.

CONTAINER/BULK HANDLING FACILITIES: *San Francisco Container Terminal - (SFCT) South:* (formerly Pier 94/96).
Container Ship Terminal.
Cargo Way.
Steamship Lines: Evergreen Line, Columbus Line, COSCO/Grancolombiana Line, United Yugoslav Line, Evergreen Line, Zim Container Service, Japan Line.
Assigned to: Stevedoring Services of America.
Dimensions: Total terminal area is 76 acres. Outer apron is 2,456 ft.
Number of berths: Three at 40 ft. MLLW alongside and a design load of 800 p.s.f.
Special Facilities: The ondock Intermodal Container Transfer Facility accommodates up to 20 rail cars on a single switch. Port packers used for yard operations. Elevated control tower with radio and PA communications systems. A maintenance and repair building of 24,000 sq. ft. is sprinklered and has a 5-ton capacity overhead bridge crane. Other buildings include an administration building (14,000 sq. ft.) and gate house/terminal office building (2,475 sq. ft.). 135×240 volt and 32×480 volt reefer outlets.
Lift equipment: 2×30 ton Paceco cranes, and 2×30 ton Starporter cranes, rail mounted. The spreaders can be expanded in order to afford easy accommodation of both 20 ft. and 40 ft. containers. Each crane has a 50 ft. gauge with an outreach of 115 ft., backreach of 30 ft. and an 88 ft. clear hoist above HW (to be upgraded to 103.5 ft. clear hoist above HW). The Paceco can load and off-load containers thwartships. There is also 1×25 ton P&H mobile crane.
Connections: Trucks via Cargo Way; Southern Pacific Railroad tracks. San Francisco Belt RR.

San Francisco Container Terminal - (SFCT) North:
(formerly Pier 80)
Combination Terminal - Container/Ro-Ro/Unitized Break Bulk.
Foot of Army and Marin Streets.
Construction: Concrete pilings, concrete deck.
Steamship Lines: Blue Star Line, National Shipping Corporation of Philippines, ELMA, South Seas Steamship, Tranportacion Maritima Mexicana, Navicana Line, Nedlloyd Lines, Norsul and Ciamar.
Assigned to: Metropolitan California Stevedore Company.
Dimension: Total terminal area is 68.5 acres. The face meas 1,296 ft. North measures 1,138 ft. and South measures 2,657 ft.
Berths: Four at 40 ft. MLLW alongside.
Special facilities: 2 steel-framed transit sheds totaling 396,000 sq 273×220 volt and 36×480 volt reefer outlets and Container Fre Station accommodations. The van yard is fully lighted and compl fenced for security.
Lift equipment: 1×30 ton and 3×40 ton Paceco Cranes, and 1×30 Starporter Crane, rail mounted. All cranes can accommodate 20 ft. a 40 ft. containers. Each crane has a 34 ft. gauge and an 88 ft. clear ho above high water. (2 New Paceco cranes have a clear hoist of 9 above HW). Cranes can load and off-load containers thwartship.
Connections: Via Army Street or Marin Street; SP Railroad tracks.

Pier 70-72: Automobile Terminal.
Foot of 23rd Street.
Assigned to: Wallenius Lines.
Construction: Timber pile, timber deck.
Steamship lines: Wallenius Line.
Dimensions: The total terminal area is 24.5 acres. The face measu 723 ft.
Berths: Two at 40 ft. MLLW alongside.
Special facilities: 22 acres of open storage for car-loading, unload and processing.
Connections: Via Third Street, East on 20th Street.

Pier 50: Combination Terminal.
Container/Ro-Ro/Unitized Breakbulk.
Foot of Mission Rock Street.
Construction: Concrete piles, concrete deck.
Steamship Lines: Various.
Dimensions: Total terminal area is 20.8 acres. The face measu 1,000 ft. North measures 1,480 ft. and South measures 1,100 ft. a 582 ft.
Berths: Four at 35 ft. MLLW alongside.
Special facilities: This pier offers 8 acres of open storage, 4 transit she totaling 274,000 sq. ft. and reefer outlets.
Connections: Via Mission Rock Street; Santa Fe Railroad tracks.

Pier 27 – 29: Newsprint/General Cargo/Containers.
Foot of Lombard Street.
Assigned to: Marine Terminals Corp.
Construction: Concrete piles, concrete deck.
Steamship lines: B.C. Forest Products, Papua New Guinea Line, S Bergesen, Star Bulk Shipping, Atlantic Cargo Services and Scann Sc
Dimension: The face measures 206 ft., North measures 750 ft. a South measures 1,340 ft.
Berths: Three at 35 ft. MLLW alongside.
Special facilities: Piers 27-29 are integrated piers connected by 117,000-sq. ft. bulkhead and 2.5 acres of open storage space. It al offers 601,700 sq. ft of transit shed space.
Connections: Via Embarcadero; Belt Railroad tracks.

Pier 92: Automobile and Bulk Liquids Terminal
Cargo Way.
Assigned to: Baker Commodities (Bulk Liquids) and California Steved and Ballast (Fishmeal).
Construction: Concrete piles and deck, timber apron.
Dimensions: The face measures 702 ft. and 166 ft. This facility also h a transit shed measuring 57,270 sq. ft.
Special Facilities: 10 acres of open storage space for automobil automobile detailing and repair centre, bulk oil processing and stora equipment, and heated and cooled pipe-lines connecting pier with t storage tanks.
Berths: One with 38 ft. MLLW alongside.
Connections: Via Cargo Way from Third Street; Southern Paci Railroad/S.F. Belt

STEVEDORES: Stevedores orders must be placed 1000 hrs. for nig gangs and day gangs. 2×8 hour shifts 7 days a week. Sunday a Sunday night gangs must also be ordered on Saturday 1000 hrs.

MEDICAL: Medical, and all hospital facilities available. No advan notice required.

TANKERS: All major oil companies have their own oil discharging pie which are outside the jurisdiction of the Port Authority. Reducing piec are available. The max. drafts are 35 ft. Tankers arriving with a grea draft are partly discharged in the bay before docking.
Davis Point: Union Oil Co. Oleum Refinery Wharf, depth up to 3 MLW.
Martinez: Shell Oil Co. Wharf, depth alongside 30 ft. – 42 ft. ML
Phillips Petroleum Co. Amorco Wharf, 2 berths, depth 30 ft. – 42 ft. ML
Phillips Petroleum Co. Avon Wharf, depth alongside 35 ft. ML
Urich Oil Co. depth alongside 35 ft.
Ozol: Oil Wharf, depth alongside 39 ft. MLW.
Hercules; Sequoia Ref. Corp. Terminals, depth 35 ft. MLW.

DENSITY: Average density in the bay is 1016.

FRESH WATER: Available at all piers, rate 25 t.p.h. – 50 t.p.h.

FUEL: Fuel available by barge or at the oil companies own pier. Spe blends require some advance notice.

FIRE PRECAUTIONS: Any special instructions are given to the Mas upon docking.

CONSULS: All Maritime countries represented at San Francisco.

REPAIRS: The major yards in the Golden Gate region have equipped machine-shop facilities capable of handling virtually any welding, heavy plate construction, turning, boring, facing, grind milling and rolling.

The larger yards also have facilities for pipe, sheet metal, electr carpentry, painting, rigging, machining and boiler work.

Southwest Marine, Westwinds, Service Engineering, SFW Co Todd and Triple "A" Repair are all located in San Francisco and pro berth space for all types of ship repairs at plant and at any locatio the San Francisco Bay area.

DRY DOCKS: San Francisco Shipyard has 3 floating dry docks, 1 with 22,000 tons capacity and 654 ft. long, 1 of 11,400 tons capacity and 542 ft. long, and 1 of 6,500 tons capacity and 450 ft. long. With a recently completed pier, its tie-up and outfitting space totals 4,271 ft.

Continental Maritime - New floating dock, carrying capacity 22,000 tons, LOA 664 ft., length over blocks 579 ft. clear draft over blocks 34.5 ft., clear width for docking 138 ft. Dock will accept vessels up to 70,000 d.w.t.

Williamette Iron and Steel Company's yard in Richmond has 5 concrete graving docks. 4 of these docks can each accommodate a vessel 600 ft. long with 83 ft. beam, and 1 dock can handle a vessel 750 ft. × 83 ft.

Tonnage capacity is limited only by the above dimensions. Williamette's facilities include 1,500 ft. of concrete outfitting pier for in-the-water repairs. The graving docks are served by 4 gantry cranes of 60 ton capacity and 2 of 45 ton capacity, and the outfitting pier by 3×45 ton cranes. Williamette has fully equipped shops for repair and conversion work, and mobile units for out-of-yard work at all Bay piers.

Hunters Point Naval Shipyard: (Triple A Machine Shop) Under lease from the U.S. Navy, graving docks and repair facilities available to all types of ships. Triple A operates 3 graving docks: (No. 4) 200 ft. beam×1,100 ft. length and 50 ft. depth; (No. 3) 150 ft.×1,000 ft. and 39 ft. depth; (No. 2) 100 ft.×800 ft. and 27 ft. depth, 17 repair berths can serve ships of any length. 12 gantry cranes of 50 ton capacity serve graving docks and repair berths. 50 ft. depth channel from Golden Gate to Hunters Point; unique to West side of San Francisco Bay.

GANGWAY/DECK WATCHMEN: Not required but this service available at Master's request.

OPENING/CLOSING HATCHES: Normally done by stevedores. But crew may open and close before arrival at the dock or after departure.

CUSTOMS ALLOWANCES: Each crew member may land free of duty and/or taxes articles acquired abroad not exceeding $10 in value, plus 50 cigars or 300 cigarettes or 3 lb. of smoking tobacco, and not over 1 quart of alcoholic beverages.

REPATRIATION: All facilities available for crew changes by sea, air or land.

AIRPORT: Distance about 10 miles South of San Francisco and is served by most domestic and international passenger airlines plus 20 international air cargo carriers..

TIME: GMT minus 8 hours. Summertime from first Sunday in April till last Sunday in October – GMT minus 7 hours.

HOLIDAYS: New Year's Day; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday (afternoon); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Admission Day (Calif. only Sept. 9th); Columbus Day (October 12th); Veteran's Day (November 11th); Election Day (1st Tuesday after the first Monday in November); Thanksgiving Day (last Thursday in November); Christmas Day.

When any of the holidays fall on Sunday, the holiday will be observed on Monday.

On a holiday the longshoremen are working at the overtime rate (time and a half) except on the following days when no work will be performed:

1. New Year's Day;
2. Bloody Thursday (July 5th, memory of 3 longshoremen killed during the 1936 strike);
3. Labour Day;
4. Thanksgiving Day;
5. Christmas Day.

POLICE/FIRE/AMBULANCE: Police, tel. 533-0123; Fire, tel. 861-8020; Ambulance, tel. 431-2800.

TELEPHONES: On some piers telephone connections to ships are available, no extra cost for this service.

SHORE LEAVE: Crew members are allowed to go ashore after passing U.S. Immigration at first U.S. Port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

This service can be arranged using skips or pick-up trucks alongside. Collection by appointment. Contact Golden Gate Disposal Co. Tel: (415) 626-6874.

WASTE OIL DISPOSAL: Pick-up by tanker truck or barge at most berths. 24 hour service. H & H Ship Service Co. Tel: (415) 543-4835.

SEAMAN'S CLUBS: Apostleship of the Sea, 399 Fremont Street, San Francisco, California 94105. Tel: (415) 421-7845.

CURRENCY: U.S.Dollar (U.S.$).

GENERAL: Vessels arrival has to be reported to the U.S. Coast Guard 24 hours prior arrival by Agent.

DEVELOPMENTS: The channel over the bar has been deepened to 55 ft. A new channel will be cut 600 ft. wide and 45 ft. deep (at low water), through the upper bay and the channel through San Pablo and Suisun Bays will be deepened to 45 ft. Manoeuvring areas near Richmond and the refinery terminals will be widened. The Stockton Deep Water Channel will be deepened to 35 ft. and the channel alignment improved.

Improvements to Pier 35 – Passenger Terminal: Improvements to the passenger boarding and unloading facilities at Pier 35, including a new Customs area have been completed.

Pier 35 is the major steamship passenger facility in the Bay Area and the point of disembarkation for tens of thousands of cruise passengers who look forward to San Francisco as a port of call or destination. An improved passenger terminal will be beneficial to our city and its tourist industry.

The area involved contains a 200,000 sq. ft. passenger processing facility on the first floor with a 10,000 sq. ft. visitor waiting area on the second floor.

The cost of the initial phase of the improvement is estimated at $1 million.

Expansion of Rail Capabilities to Pier 94-96: New track construction, as well as reconstruction of existing track, from the Terminal to Southern Pacific's mainline track has been designed to allow unit train access onto the Container Terminal.

The Container Terminal is composed of Piers 94-96. This 65 acre three-berth facility is serviced by 4 rail-mounted cranes and represents a $45 million capital investment. An additional 75 acres of expansion area lies adjacent to the Pier.

Direct rail access to this terminal will position San Francisco as a competitive intermodal port offering direct land-bridge and mini-bridge services through Port facilities. By being able to move containers directly from ship to rail, carriers will have the advantages of reduced costs, better control of containers and less damage.

San Francisco will be the first port in California with this capability.

AUTHORITY: Port of San Francisco, Ferry Building, San Francisco, California 94111. *Tel:* (415) 274-0400, 274-0522. *Telex:* 275940 PSF UR. *FAX:* (415) 274-0528. *Cables:* Sfportcomm. *Contact:* Michael P. Huerta, Executive Director. Roger Peters, Director - Cargo Services.

SAVANNAH, Georgia: 32.02 N. 81.07 W. (See Plan)

DOCUMENTS:

3 Crew Lists.
3 Stores Lists.
3 Curio Lists.
3 Manifests.
3 Passenger Lists.

These documents required in order to enter vessel at U.S. Customs.

Direct Foreign Arrival – Quarantine Pratique issued by Public Health Service representative; Cargo on Customs Form 1302, in duplicate with Abstract Manifest of Savannah only cargo; Crew List on Form I – 418, in triplicate; Passenger List on Form I – 418, or other acceptable form, in triplicate; Crew Curio List, in triplicate, with Crew Declaration on Customs Form 1304, or Crew List on Form I–418, in triplicate, with numbers of attached Forms 5129 endorsed thereon for American vessels, List of Sea Stores and Ship's Stores Customs Form 1303, in triplicate; for American vessels, Repair Declaration on Customs Form 226; for American vessels, Certified Crew List; Clearance from Last Foreign Port, if one issued.

Coastwise arrival with Residue Foreign Cargo or Passengers – Form 1301, "Permit to Proceed", in duplicate; Travelling Manifest; Abstract Manifest, in duplicate, of cargo to be discharged in Savannah; Stores List, in duplicate; Crew List, in duplicate; Crew Purchase List, in duplicate, and any Crew Declarations on Customs form 5123 for Savannah for American vessels; Passenger List, in duplicate.

PILOTAGE: Savannah Pilots' Association, 550 E. York, Savannah, Georgia, 31401 (telegraphic); Pilot required all vessels; ETA 24 hours advance notice, change ETA 8 hours; VHF Channel 16 (monitored at all times), 18, 12, 13 – Radio telephone 2182 and 2738 kHz. Pilot boards vessel 1 mile outside Fairway Buoy.

SHIP CHANNEL: Project depth and widths are as follows: Sea buoy to jetties 40 ft. depth×600 ft. width; New Channel Range through Upper Flats Range 38 ft. depth×500 ft. width; The Bight Channel 38 ft. depth×600 ft. width; Fort Jackson Range to Wreck Channel 38 ft. depth×500 ft. width; City Front Channel to Kings Island Channel 38 ft. depth×400 ft. width; Whitehall Channel 35 ft. depth×400 ft. width.

ANCHORAGES: Outside Fairway Buoy, North and N.E. of Fairway Buoy; no anchorages in river.

RESTRICTIONS: 31 ft. at any time; over 31 ft. on incoming tide, no restrictions day or night.

MAX. SIZE: Abbreviation OT: Ocean Terminal. Vessels berthing at OT 14 – 15 – 16 – 17 (slip 1). Vessels 550 ft. to 600 ft. on slack water; vessels less than 550 ft. any time to Berths 14 and 17; vessels docking or undocking at OT 15 – 16, with vessels in OT Berths 14 and 17, can be docked or undocked during slack water.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels route ETA cables to Agents, etc., via Radio Lantana.

TUGS: Tugs join vessels at city front for berths above city; for berths below city, tugs usually meet vessels in vicinity of Fort Jackson or well below berth. Tugs' lines used at all times.

BERTHING: The Georgia Ports Authority operates 12 general cargo berths, 2 tanker berths, 5 container berths and 1 dry bulk cargo berth.

CRANES: *Ocean Terminal:* One 175 short ton gantry crane, one 100 short ton gantry crane, two 50 short ton gantry cranes, one 30 short ton gantry crane, one 100 ton mobile crane, one 30 ton mobile crane. *Garden City Terminal:* Two 35 short ton gantry cranes, one 100 ton mobile crane, one 30 ton mobile crane. Garden City Terminal (container port) – 9×45 short ton container cranes, 9×45 short ton rubber tyred bridge cranes. Other cranes, floating and mobile, are available from various private contractors.

BULK CARGO FACILITIES: Located at the Georgia Ports Authority's Garden City Terminal are 1 dry bulk cargo berth (loading). This facility is suited for the handling of various ores, grains, peanuts, meals and fertiliser materials. The storage at this facility consists of silos for the storage of grain and grain type products as well as flat floor storage for these various other materials.

Colonial Terminals: Kaoline/mineral bulk terminal. Handling rate 800 t.p.h. 12×109 cu.ft. Silos for kaoline. Minerals stored in 8×73,000 cu.ft. storage bays.

SPECIALISED CARGO HANDLING FACILITIES: Located at Container Port, on the up-river end of Berth 60, is a stern Ro-Ro ramp which is situated as to allow a vessel to utilise the Ro-Ro ramp and container cranes at the same time. Accommodating side and quarter ramps also available. At the Garden City Terminal there is a modern cold storage facility. The refrigerated space consists of 3 rooms of approximately 68,000 sq. ft.

BRIDGES: *Eugene Talmadge Memorial Bridge:* 135 ft. vertical clearance for 400 ft. at MHW. Distance between fender uprights – 600 ft. Also see "Developments".

MEDICAL: Agent should be advised as far in advance as practicable for required medical attention. U.S. Public Health Clinic in Savannah, also other extensive medical facilities. Standard information required as to inoculations, vaccinations, etc.

TANKERS: Standard requirements on diameters of load/discharge lines. No facilities for slop (residue) discharge facilities except American Oil Company. A.P.I. of local types of oil is 36 gravity marine diesel fuel. 8 tanker berths in port, max. drafts range from 32 ft. – 38 ft.

DENSITY: Average density of water at 20° Centigrade in channels of Savannah Harbour are:

		High Water	Low Water
Savannah River Entrance			
	Surface	1.0196	1.0090
	Bottom	1.0196	1.0181
Port Area			
	Surface	1.0022	0.99915
	Bottom	1.0120	1.0075

FRESH WATER: Available at all terminals.

FUEL: Marine gas oil (No. 2 Fuel). Marine diesel oil (No. 4 Fuel Oil). All Intermediate grades from Intermediate 30 (=30 centistokes at 50°C) to Intermediate 420 (=420 centistokes at 50°C) Bunker fuel oil (No. 6 Fuel). Advance notice of 24 hours required.

FIRE PRECAUTIONS: No special fire precautions. All tanker berths have water and fire extinguishers on dock. Fire fighting equipment on dock. Fire fighting equipment on tugs.

CONSULS:

Savannah: Brazil (912) 234-2266. Dominican Republic (912) 234-2266. France (912) 236-2491. Germany (912) 236-8165. Italy (912) 232-5581. Sweden (912) 238-2301.

Atlanta: Consulate of Austria (404) 252-7920. Consulate General of Belgium (404) 659-2150. Consulate of Bolivia (404) 320-9312. Consulate of Brazil (404) 659-0660. REPAIRS: All types of deck and engine repairs possible at Sayler Marine. Deck repairs from Diamond Manufacturing Company.

Radar/VHF Repairs: Coastal Electronic Maintenance has qualified radar and RDF, also VHF men available. They can be contacted through ship's Agents or through the Pilots or Atlantic Towing if vessels should require service on arrival.

DRY DOCKS: Sayler Marine Dry Dock 540 ft.×72 ft.×21 ft.

SURVEYORS:

Savannah: Atlantic Marine Surveying, Inc. (912) 354-9938. Coleman Kenney & Silas, Inc. (912) 352-7420. International Adjusters Southern Ltd. (912) 352-7420. International Maritime Services, Inc. (912) 964-8970. Maritime Bureau Incorporated (912) 238-3400. National Cargo Bureau, Inc. (912) 236-1527. SGS Control Services, Inc. (912) 355-4429. L.O. Smith, Inc. (912) 233-9876. Southeastern Marine Surveying Co. (912) 233-4157. J.W. Tarver Jr. (912) 233-6661. Charles T. Theus, Inc. (912) 233-3588.

Atlanta: East Coast Maritime Services, Inc. (404) 252-3990. INA Loss Control Services (404) 292-2363. Marine Associates, Inc. (404) 448-2593.

GANGWAY/DECK WATCHMEN: Garden City and Ocean Terminals of Georgia Ports Authority, East Coast Terminal Company and Georgia Kaolin International require that a watchman, or someone in authority, will be aboard any vessel tied to their facilities at all times.

CERTIFICATES: See "Documents". Current Registry Papers, Load Line Certificates, Certificates of Inspection, etc., are required.

CUSTOMS ALLOWANCES: Tobacco, a crew member may take ashore 50 cigars, 300 cigarettes, or 2 kilos of smoking tobacco, or a proportionate amount of each. An appropriate amount of tobacco products may be held out of bond for use of passengers and crew members while aboard ship when in port. Wine and/or Spirit, a crew member may take ashore one litre of alcoholic beverages for his own use. Container should be opened, that is the seal should be broken. An appropriate amount of wine and/or spirits may be held out of bond for consumption by passengers and crew while aboard ship when in port.

CARGO GEAR: Certified in accordance with U.S. Department of Labor Regulations. Supplied by stevedores.

REPATRIATION: Responsibility of Owner's Agents. Can be arranged to all points.

AIRPORT: Savannah International Airport regularly served by Delta Airlines, Inc. with 7 scheduled flights daily; Eastern Airlines with 5 flights daily; Piedmont Air with 4 flights daily.

TIME: Savannah maintains Romeo or Eastern Standard Time, minus 5 hours, from 0200 hrs. the last Sunday in October, to 020 the first Sunday in April. Quebec or Eastern Daylight Saving Time minus 4 hours maintained from April to October.

HOLIDAYS: New Year's Day (January 1st); Martin Luther K Birthday (January 15th); Lincoln's Birthday (February 12th); Ge Washington's Birthday (third Monday in February); Teddy Gleas Birthday (March 17th); Memorial Day (Last Monday in M Independence Day (July 4th); Labour Day (First Monday in Septem Columbus Day (second Monday in October); Armistice Day (Nover 11th); Thanksgiving Day (Fourth Thursday in November); Christmas (December 24th); Christmas Day (December 25th); New Years (December 31st); Good Friday; one National Election Day annua

No work will be performed on New Year's Day, Independence Labour Day, and Christmas Day.

POLICE/AMBULANCE/FIRE: Police: (Emergency only) Tel: Police, City: Tel: 232-4141 and 233-9321. County Police: Tel: 352-7 Ambulance: Chatham County Emergency Medical Service: Med Tel: 355-7515; Fire: (Emergency only) Tel: 911; City: Tel: 232-512

TELEPHONES: G.P.A., Garden City and G.P.A., Ocean Termi telephones on board can be provided through local Ag S.C.L. Terminal – not available to ship (phones on dock).

STORING: See "Prelims".

1. Yes
2. Yes
3. Yes
4. Yes
5. Usual U.S. Customs Regulations
6. Yes

SHORE LEAVE: Crew members are allowed ashore provided they not detainees.

DELAYS: With reasonable advanced notice of ETA no delay anticip in berthing, loading, discharging or bunkering.

IDENTIFICATION CARDS: Identification required by crew members coming ashore. U.S. Immigration & Naturalisation Service issues landing permit, I-94, to any passenger; and I-95, to any crew member of a foreign vessel who is not considered a security risk. This form must be in man's possession any time he is ashore.

DEVELOPMENTS: Container Berth No. 6 under construction.

New bridge under construction close seaward of Talmadge Bridge with clearance of 186 ft. at H.W.

SHIPMASTER'S REPORT: August, 1980.

Pilotage: Because of difficulties with the port crane and large storing programme we elected to berth starboard side alongside this call.

The Pilot will only undertake this on the flood (since vessel is invariably deep, berthing will only be done on the flood in any case) but because of a delay we were off the berth very nearly at slack water. The Pilot carried out the manoeuvre in the most reassuringly competent manner and I would not hesistate to do the same again if necesary; only with a Pilot prepared to carry out the manoeuvre.

Vessel is swung downriver off the container berth, about 4 cables below the berth.

When landed on starboard side to, it is just possible to plumb the berth with the crane by making the connection to the after crossover.

Discharge: Straightforward; some slight initial delay. Capable of receiving cargo at over 1,000 t.p.h. Our rate 810 t.p.h. overall.

Connection 12 in. 150 ASA. No VRL.

Density 1000 this call.

Storage capacity about 50,000 cu.m. Storage plant only for filling road and rail tankers.

U.S.C.G.: Deck inspection before commencing. Vessel was congratulated on her 'very high standard of equipment and personnel'. Monitoring detail on board throughout. Scuppers unplugged, please.

They are aware of the draft problem at LW and boarded immediately on berthing.

General: Lloyd's Surveyor easily available.

Bunkered lube oils whilst discharging with U.S.C.G. approval.

Can touch up ship's side from quay.

Movements allowed at night, dependent on draft/tide.

Chandler: Southern Marine: Poor service this time despite our cables. This is in contrast to excellent service last time. These services are entirely at the mercy of ship representative.

SHIPMASTER'S REPORT: October, 1980 (updated 1984).

Approach: From East: The coast between Sandy Point to Isle of Palms near Charleston shows up at 40 miles and South of Hunting Island near Port Royal Sound at 35 miles, on radar. Port Royal Channel gives a good radar echo at 15 miles. Soundings give little indication of position until fairly close inshore. Savannah light was observed at 28 miles.

D/F stations at Tybee and Charleston are useful if nothing else is available.

Anchorage: Pilots advise anchoring to N.E. of Savannah Light Beacon. Good holding ground without obstructing arriving and departing traffic.

Arrival Procedure: ETA through Agents.

For deep draft ships proceeding to Ammonia Berth No. 61 about 5 miles above town, Pilot will board between 3 hours to 1.5 hours before HW.

Under 31 ft. can berth/sail any state of tide day or night. Berthing day or night.

Can berth either side to, the generally accepted side to is port side. However, if taking stores try for starboard side as the crane plumbs better, plus the Chicksan arm is in the way of trucks.

For starboard side to, arrive well in time for earliest Pilot boarding time.

The problem is the berth has a reported 36 ft. at LW (actually by lead line we found (Oct. '80) a minimum of 33 ft. 9 in. reduced to datum along the dock face). Therefore before LW you have to pump out about 2,000 tonnes, any delay can be important.

Pilots: Board from large cutter between Savannah Light and Whistle Buoy.

Give plenty of notice as cutter might be lying up-river at pilot station. Based at Cockspur Island in the ship channel. Call "Savannah Pilots".

Pilot ladder must be 8 ft. above water. Side dependent on wind. Berthing Pilot joins from tug using own ladder at Kings Island.

On departure from berth, Pilot requires 1.5 hours notice.

VHF: "Alpha" Channels used frequently.

U.S.C.G. uses 22A, Pilots use 18A, tugs use 19A. Otherwise use 16, 12 and 13.

Channel: The maximum draft of vessels has been 39 ft. with a 6 ft. tide. Normal maximum 37 ft. This can only take place on the flood so as to be on the berth at slack water.

Channel is narrow, less than Houston Ship Canal. Constant dredging is required. From Whistle Buoy to berth is about 3 hours.

Vessel is swung in Argyll Turning Basin off the container quay. 24 hour navigation is undertaken.

From soundings from Savannah Light Beacon to Berth No. 61 proceeding inwards 3 hours before Savannah HW (2.5 m.) a minimum of 1.6 m. under keel was found with draft 11.15 m.

Berth: Depth: See "Plan". Minimum depth reduced to datum found to be 33 ft. 9 in. along jetty face.

Berth No. 61: Owned by G.P.A. and leased to Occidental.

Concrete jetty on piles with centre section connected by roadway to shore, and mooring dolphins either end connected to jetty by catwalk. Length of centre section 266 m. Good fendering.

The upriver dolphin is not used due to damage. Can turn gangway out before arrival.

Pilot with the aid of powerful tugs swings vessel in very competent manner at Argyll Turning Basin.

Density: 1001 to 1002.

Moorings: Basic 3, 2, 2, each end. Forward headlines (3) go to Ro-Ro dock and breastlines to dolphin with springs to main jetty. Due to damage the upriver dolphin cannot be used so all stern and breast lines go to Grain Berth No. 62.

Springs out first, last in. Mooring boat used. Port Authority mooring gang require 4 hours notice.

Tugs: Atlantic Towing Company and Crescent Towing and Salvage Company of Savannah, Inc. based along town water front. Several large and powerful tugs. Two used, one each end, American style, tie up with own lines alongside. One and a half hours notice required.

U.S.C.G.: Very co-operative. Although Agent will try to get them to board in river for pre-inspecton, they board at dock. Carry out Check List and inspection before cargo allowed to be worked. Takes about 30 minutes.

One U.S.C.G. rating on board at all times (8 hour shifts). Strict on pollution.

The U.S.C.G. do not seem to mind which way round the ship is berthed. Scuppers to be plugged.

Discharge: Into mobile Chicksan (as berth only leased). After manifold if starboard side too. Maximum rate about 1,200 t.p.h. but generally nearer 900 t.p.h. to 1,000 t.p.h. Connection 12 in. 150 ASA. No vapour return line. Shore tank capacity 45,000 tonnes, which fills rail and road tankers. Takes about 45 minutes to connect/disconnect. Shore labour assist. Shore personnel always in attendance. Manager very helpful.

In light ship condition we had 18 m. air draft which did not create any difficulties.

General: Lloyd's Surveyor easily obtainable from Jacksonville. Fresh water from jetty, require 6 hours notice, especially at weekends.

Lube oils whilst discharging with U.S.C.G. permission. Stores lorry able to get close alongside ship.

Ship's crane (if starboard side to) will just plumb after end of jetty.

Liferaft service (Beaufort) at Southern Ship Supply – 24 hour service.

Shoreline infested with rats, snakes and big spiders.

Chandler: Southern Ship Service, good fresh produce.

Town: About 5 miles away. Can telephone for taxi – free of charge local calls, from hut at grain berth about 100 yards from gangway.

Airport 6 miles South of town centre with regular flights to Atlanta International, etc.

SHIPMASTER'S REPORT: August 1990.

Charts: B.A.Charts No. 2807 and 2865.

Approaches: New exploration towers around 80° 10′ W., about 45 miles offshore give a guide.

Coastline low, first indications on radar at 30 miles.

Savannah Light good, but Racon not operating (Pilots report that it rarely does).

About 30 miles East of the Gulf Stream axis, a Southerly set of about 1 knot was found.

Pilots: Pilot boards from large fast blue hulled cutter named 'Georgia' or smaller cutter called 'Savannah' at Fairway Buoy. Pilot will advise height of ladder, dependent on cutter.

Pilot Station at Cockspur Island inside breakwater at Lat. 32° 02.05′ N., Long. 80° 54.20′ W. Just West of the Pilot Station is a U.S.C.G. base.

Usual East Coast U.S.A. practice, tug master actually berths and unberths vessels.

Pilotage to Ammonia Berth (No.61) at Garden City is about 2.5 hours.

VHF: Pilots generally use Channel 14.

Anchorage: North of Savannah Light Tower, exposed.

Entry: For gas carriers no night transit inward or outward, unless totally gas-free, between 1600 hrs. (last pilot boarding time) and 0700 hrs. (first pilot boarding time).

U.S.C.G. do not escort vessel, unlike some other U.S. ports.

Channel: The range light at Fort Scriven is conspicuous. Pilots report 33 ft. maximum draft any state of tide, or 39 ft. H.W. to Berth No.61, above this berth to Port Wentworth 20 ft. at L.W. Maximum length 1,000 ft.

Actually found 36 ft. (reduced to M.L.W.S.) as minimum depth to Berth No.61. Least depth about 1 mile seaward of Talmadge Bridge.

New Bridge nearly completed, just seaward of Talmadge Bridge. Completion due early 1991. Vertical clearance MHW – 185 ft. When commissioned, the old bridge will be removed.

Tugs: 9 tugs up to 4,000 i.h.p. available from Atlantic Towing (now under new name) and Crescent. Two tugs and tug's lines generally used. Tugs join just upriver of bridge.

Berth: Ammonia Berth is Berth No.61 at Garden City, just above container quays. Berth is able to take up to 75,000 cu.m. gas carriers, but restricted due to river draft.

Always port side too, head upriver. Vessel swings in adjacent turning basin on departure.

Concrete dock with reasonable fendering. Mooring dolphin either end of dock connected by catwalk.

Mooring leads good (2, 2, 2), if bollards on adjoining docks used. No mooring boat, using wires as head or stern lines takes a long time.

Cargo: Mobile Chicksan which plugs into quay (12 in. 150 ASA coupling). It can take a long time to disconnect, if Chicksan diesel power plant fails to operate, which it is prone to.

Discharge to 45,000 tonne tank behind Soya Bean Silo. Actual pumping distance is about 0.5 miles.

Sometimes VRL from shore used (out of commission this visit).

Fast pumping at around 850 t.p.h. at maximum B.P. of 6.8 kg. (100 p.s.i.), back pressure generally less.

Only NH3 handled, terminal likes product cold – no warmer than −32°C.

Surveyors (Saybolt) prompt and read draft when vessel berths.

Terminal representative onboard throughout discharge, in Cargo Control Room with UHF set.

U.S.C.G. very attentive and always board vessels on arrival.

Pipework checked for soft patches – leaks, if any found, vessel will nearly always be refused permission to discharge.

Facilities: Fresh water available on jetty. Good pressure, no charge.

Stores trucks allowed alongside forward up to Chicksan position.

Bunkers by barge during discharge.

Public telephones near Soya Bean Silo office, or Agent leaves his mobile on board.

Local airport very near at hand with frequent flights to Atlanta International.

Chandler – We obtained some bonded stores from Southern Marine Supplies. Prices high compared with Tampa, and range limited.

AUTHORITY: Georgia Ports Authority and East Coast Terminal. Savannah Port Authority.

The Savannah Port Authority does not operate terminals; however, is engaged in port and industrial development for the City of Savannah and Chatham County, Georgia. Harbour Regulations, pier and bulkhead lines, etc., come under the jurisdiction of this organisation.

Georgia Ports Authority, P.O.Box 2406, Savannah, Georgia 31402. *Tel:* (912) 964-3811. *Telex:* 804782 and TWX 810-784-5634. *Cables:* Gaports. *FAX:* (912) 966-3615. *Contact:* George E.Nichols, Executive Director.

SEARSPORT, Maine: 44.28 N. 68.56 W. (See Plan)

LOCATION: The Port of Searsport is located on Penobscot Bay, approximately 112 road miles East of Portland, and 20 miles from Bangor.

DOCUMENTS:

Clearance from Last Port.
2 copies of Form 1300 (Master's Oath).
2 copies of Form 1301 (General Declaration).
3 copies of Form 1302 (Inward Foreign Cargo Manifest).
NOTE: Form 1302 will only be accepted.
2 copies of Form 1303 (Ship's Stores Declaration)
(Including Narcotic Medicines).
Form 1374 Outward Foreign Manifest.
2 copies of Form 1304 (Crew Effects Declaration).
2 copies of I-418 (Crew List).

Also available: Vessel Register, Safety Equipment Certificate, Load Line Certificate, Certificate of Financial Responsibility, (Oil Pollution), and U.S. Tonnage Tax Receipts.

PILOTAGE: Ship's agent notifies Pilot approximately 48 hours in advance of arrival, correcting at 24 hours. Pilot's boat called on Channel 16.

Vessels from South and West, Pilot boards at Monhegan Island (Buoy 14M). Vessels from East, Pilot boards at Matinicus (Buoy 2WB). The pilot station is located on Matinicus Rock Island. Pilot boards at Wooden Ball Light Bell Buoy "2WB." Lat. 43° 49′ N., Long. 68° 50′ W.

The pilot boat is a fishing boat with a white hull showing the international signals.

Pilot signal: 3 long and 2 short on ship's whistle.

Radio contact: VHF Channel 16 (156.8 MHz).

36 and 24 hours ETA requested, cable "Penbay – Belfast/Maine", via Chatham Radio.

ANCHORAGES: No restrictions on anchoring.

RESTRICTIONS: No restrictions at night. Deep draft vessels brought in only on high water. Draft in concurrence with docks, 32 ft. low water. 10 ft. rise in tide – approach to Searsport 35 ft. – Bay 60 ft. limit.

MAX. SIZE: Size of vessel restricted to 38 ft. draft in harbour area. No outside installations at the port yet.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Searsport Harbour use Channels 16 and 13. Vessels arriving Searsport go through radio station at Chatham, Mass., RCA installation, SSB station or a VHF public correspondence station.

TUGS: Penobscot Bay Towing Co., Marshall Wharf, Belfast, Maine 04915. Tel. (207) 338-3000. 24-hour service. Requested that orders for tugboat service be given during normal business hours, 24 hours in advance.

Tugs: "Patrick McAllister", 1,200 h.p.
"Brian F", diesel 1,200 h.p.
"Roderick McAllister", diesel 1,200 h.p.
"Bronx", diesel 1,800 h.p.

Radio: Ship to ship, VHF Channels 16-13-10.

Sea Pilots dock ship with tug's assistance.

BERTHING: Draft conditions govern arrival and departures.

Bangor and Aroostook Pier: Length 800 ft., width 100 ft. Depth alongside (East side) 34 ft., (West side) 30 ft.

This pier handles a wide variety of cargoes including petroleum, forest and agricultural products, such as newsprint, tapioca, long logs, dimension lumber, potatoes, etc.

Cargoes can be off-loaded or loaded directly from or to railroad cars or trucks. There are 4 warehouses on the facility available for import or export cargoes.

C. H. Sprague Dock: Length 614 ft., depth alongside East side 33.6 ft.

This facility has and can handle many bulk cargoes, including salt, coal, gypsum, potash, bauxite, liquid chemicals, and Bunker C petroleum. There are 3 towers for discharge of bulk cargoes.

Turning basin off docks, depth 34.5 ft. and 1,200 ft. width.

STEVEDORES:

Weekdays:
Order gangs by 1700 hrs. for following day 0800 start.
Order gangs by 0900 hrs. for same day 1300 start.
Order gangs by 1300 hrs. for same day 1800 start.
Weekends:
Order gangs by Saturday 1200 hrs. for a Sunday 0800 start.
Order gangs by Saturday 1200 hrs. for a Monday 0800 start.

MEDICAL: No advance notice required by Agent. 1 hospital, Waldo County, which takes bed patients.

TANKERS: 2 berths at Searsport – 2 for No. 6 oil and 1 for light oi gas. 2×8 in. hoses. 34 ft. LW.

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug h anchorage. Drinking water available at piers.

FUEL: No. 6 oil at C. H. Sprague Dock. Light oils delivered by tank t at dock.

FIRE PRECAUTIONS: At certain oil piers information given Shipmaster upon arrival at pier. Ample fire protection, salt-water li sprinkler system on pier, local fire department.

CONSULS:

French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.
Finnish; Frank W. Bjorklund, 163 Main Street, Norway, Maine.
Italian: Dr. Domenica A. Santoro, 43 Deering Street, Portland, Main
Norwegian: Allan Kjos-Hansen, 30 Mayer Road, Portland, Maine, V Consul.
Panamanian: Mary Navarro de Carrillo, Lafayette Town House, Portla Maine.
Swedish: Martin Johnson, Vice Consul, 443 Congress St., Portla Maine.

REPAIRS: All types of machinery repairs.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew may open hatch a longshoremen boarded ship.

CERTIFICATES:

Load Line Certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. tonnage Tax Certificate of previous trip if have them.
Radio Operator Licence.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. W and/or Spirit allowance 1 bottle per person.

CARGO GEAR: No additional cargo gear necessary.

REPATRIATION: Arrangements must be made with Agent in advan by telegram.

AIRPORT: Bangor International Airport, 30 miles, Delta, United Airlin

HOLIDAYS: New Year's Day; Washington's Birthday; Patriot's D Memorial Day; Independence Day; Labour Day; Thanksgiving D Christmas Day and Veteran's Day. Possible to get gangs to work days except on Labor Day and Christmas.

POLICE/AMBULANCE/FIRE: Police Tel: 548-6372; Ambulan Tel: 548-2900; Fire Tel: 548-2900.

TELEPHONE: Arrangements can be made to have phone put on s but most docks have pay phones.

IDENTIFICATION CARDS: Form I-95 must be filled out on arriv unless seamen has had a prior one made out for a previous arrival same ship (on plastic card).

DEVELOPMENTS: Directly across from the Port of Searsport lies Se Island. A major new cargo facility and industrial park will be construct Emphasis will be directed toward potential user groups, equipme assembly and manufacturing, plus a full spectrum of forest produ storage and shipment.

This development will feature modern container-handling facilities a breakbulk handling capability.

SEATTLE, Washington: 47.36 N. 122.20 W. (See Pla

PORT LIMITS: Port of Seattle limits are co-extensive with t boundaries of King County in which Seattle is situated. A vessel h "arrived" when it has tied-up to a berth.

DOCUMENTS (on arrival from foreign):

Clearance from Last Foreign Port.
2 Crew Lists on Form. I-418.
2 Passenger Lists on Form I-418 (if applicable).
Passenger Declarations if applicable.
2 Stores Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for discharge on CF1302.

If first arrival port on an inward voyage, must also have 2 sets Manifests of complete cargo on 1302, one for Customs at this port the other for use as a "Travelling Manifest" to go forward to ot discharge ports.

(A) – For U.S. Public Health Quarantine Boarding Officer: "Quaran Declaration" on Form PHS.43. (Only required if boarding on ar is necessary) see "Health" before first U.S.A. port.
(B) – For U.S. Dept. of Agriculture Boarding Officer: "Shipmas Declaration and Warning Notice" on Form AIQ.43.
(C) – For U.S. Immigration Boarding Officer:
Crew List on Form I-418 visaed by U.S. Consul abroad.
Passenger List on Form I-418.
Attachment to Passenger List on Form I-92.
Form I-94 for each passenger.

Form I-95 or ID Card (Form 184) for each crewman. (These ar usable for multiple entries, but for seamen on first trip to United St a new Form. I-95 must be ready for presentation on arrival.)

(D) – For U.S. Customs Boarding Officer and Agent or Broker:
3 copies Crew List (Form I-418).
3 copies Cargo Manifest on Form 1302.*
3 copies Stores List – Form 1303.*
3 copies Crew Purchases or Curio List (Form 1304).*
3 Passenger Lists on Form I-418.
For U.S. Ships – Declaration re foreign repairs on Form 3415.
For U.S. Ships – Certified Crew List from last U.S. port before going foreign.

*At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of Lists of Stores and Curios remaining on board.

PILOTAGE: Compulsory for all vessels except those on coasting trade. Pilots may be obtained from Port Angeles Pilots' Association, Seattle, at short notice. Inward, Pilot boards vessel at pilot station off Port Angeles.

Port Angeles Pilots: Pilotage service furnished to any port or place on Puget Sound and its adjacent inland waters.

Pilot stations are located on Ediz Hook, Port Angeles and Seattle Washington.

Vessels desiring a Pilot should proceed to a position 0.25 miles East of Ediz Hook, where Pilot will board the vessel. If a Northwest wind, sea, or swell exists, vessels are requested to proceed to a position inside and South of Ediz Hook to obtain a lee and facilitate boarding.

In clear weather, vessels should indicate their desire for a Pilot by hoisting the International Code Flag "G" and by blowing the whistle signal of 1 long, 1 short and 1 long blast.

In fog or thick weather, the blowing of this whistle signal will attract the attention of the pilot station and repetition of this signal will assist the pilot boat to locate the vessel.

The pilot station is located 1,200 yards, 277° from Ediz Hook Light. At night, the station will show from a mast, 3 vertical lights, the highest and lowest being red and the middle one green, to indicate that the pilot boat is en route to the ship. The pilot station is equipped with radar to locate and track vessels. The pilot boats, 'Juan de Fuca' and 'Puget Sound' are equipped with radar.

Communications: Vessels may ensure prompt service by advising their ETA, Port Angeles, 24 hours in advance, via radio to station KLB, addressed to Port Angeles Pilots, Seattle, Washington. A vessel may also advise the pilot station, Port Angeles, Washington, addressed to "Pilots Port Angeles" of their ETA, and amended ETA, when subsequent conditions make it necessary. The message is transmitted immediately from KLB to Port Angeles via telephone. The pilot station, Port Angeles, monitors VHF Channels 14 and 16 continuously and transmits on Channel 13.

At the time of passing Cape Flattery, inbound vessels are requested to re-affirm their ETA by calling the pilot station directly, using VHF calling Channel 16 and transmitting on Channel 13.

Channel 14 is for Vessel Traffic System only.

Pilot Ladder Requirements:

1. Please contact pilot boat via voice radio (Channel 13) approximately 30 minutes prior to arrival for desired lee.
2. The ladder must be kept clean and used solely for embarking and disembarking Pilots.
3. Rigging of the ladder, along with embarking and disembarking Pilot, must be under supervision of a licensed officer.
4. The ladder must be made in 1 length and not consist of 2 lengths shackled or lashed together, and should be equipped with spreaders about 10 ft. apart to comply with SOLAS Regulation 17, Chapter 5.
5. The pilot boats have their own lights to illuminate the pilot ladder, but a standby light should be ready for an emergency.
6. The area of the deck where the Pilot boards and leaves must be well lighted and the area must be clear of all obstacles to ensure a safe passage for the Pilot.
7. *No tag lines, pull-up ropes, or trailing lines may be attached to the lower ends of the ladder.*
8. Ladders must be rigged well clear of discharge and water outlets and at a place near midship which affords the best lee for the Pilot. At no time should the ladder be rigged near the stern of the vessel.
9. Means must be provided to allow the Pilot to pass safely onto the ship's deck. Where portable stanchions and bulwark steps are used for this, the portable stanchions must be rigidly attached to the ship's structure and not the steps. The bulwark steps must also be securely fastened.
10. The ladder must be in good condition. The treads must remain horizontal when used and the upper surface must have a rough nonskid quality.
11. Manropes approximately 3 in. manila in circumference, a heaving line and a ring buoy with a self-igniting light must be provided.
12. If your vessel is to take a load of logs, make sure the Agent makes arrangements to have a cat-walk to provide safe passage to and from the ladder.

Accommodation Ladders for Embarking or Disembarking of Pilots:

1. All vessels where the distance from sea level to the point of access of the ship exceeds 9 m. (30 ft.) at any time, should carry on each side an accommodation ladder. The ladder is to be so sited that when in use the lower end of the ladder shall rest firmly against the ship's side under all conditions of roll and heel, clear of all discharges, and within the parallel length of the ship.
2. A conventional pilot ladder should be rigged just abaft the lower platform of the accommodation ladder. The pilot ladder should be secured firmly to the lower platform to allow access between the pilot ladder and accommodation ladder. The pilot ladder should extend at least 2 m. (6 ft.) above the lower platform of the accommodation ladder. Manropes to be provided and rigged alongside the pilot ladder.

ANCHORAGES: Extensive anchorage in Eliott Bay, depths of 90 ft.

RESTRICTIONS: Overhead power cables at Burlington Northern Railroad Bridge with a vertical clearance of 155 ft.

MAX. SIZE: Controlled by depth at berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, 2nd tug normally used.

BERTHING: Over 46 berths for ocean-going vessels. Depths alongside, 10.6 m. – 21 m. MLLW.

Terminal No.	*Total Length (m.)*	*Depth (m.)*	*Remarks*
2	244	12.0	Leased to North Star Forwarding – barge berths.
5	537	13.5	3 container berths.
	166	—	Undeveloped berth (one).
18	1,844	12.0 – 15.0	Container, breakbulk, bulk, Ro-Ro, non-petroleum products. 352 reefer plugs.
25	482	15.0	2 container berths. 120 reefer plugs.
28/30	823	12.0	Container and breakbulk.
			2 container berths and 2 general cargo berths.
37	270	15.2	1 container berth. 186 reefer plugs.
42	290	15.2	1 container berth
46	336	15.2	1 container berth. 217 reefer plugs.
48	585	10.6	
66	436	8.5 – 10.6	3 berths. Passenger ship terminal.
86	130	21.0	Export grain terminal operated by Cargill, Inc.
91	3,058	10.66	General cargo, auto import, fruit, frozen meats and seafood. Oil tank farm handles bunker fuel and waste oil products. Chill space 53,802 cu.m. Liquid storage 213,000 barrels.
105	338	12.0	Barge facility.
115	366	12.0	Steel imports, fish and crab processing, general cargo.
	122	4.25	Barge berth.

SPECIALISED HANDLING FACILITIES: Terminals 18 and 20 combined and now designated as Terminal 18. Pipe-lines are available to carry molasses, tallow or other non-petroleum liquid cargo, and has a tank farm for storage.

Terminal 105 – 2 berth, barge operation – Crowley Maritime.

Terminal 115 – 2 berths, capacity, import steel.

Terminal 115 – Jore Corporation Barges, has specialised finger piers, to handle container-to-barge operations.

Terminals 5, 18, 25, 30, 37, 42 and 46 – Container Terminals, equipped with large container cranes and yards to handle van shipments. Depth alongside, Terminals 18 and 25 – 50 ft. Terminals 5, 30, 37 and 46 – 40 ft.

Pier 86 – fully automated, deep water, Grain Terminal. 1 berth, length 600 ft. (Max. LOA 1,400 ft. using dolphins). Depth of water 70 ft. at MLLW. Grain Terminal: capacity 4.2 million bushels, loading rate 3,000 t.p.h. via twin conveyor belts.

CRANES: *Terminal 5:* 5×50 ton container cranes.
Terminal 18: 6×45 ton container cranes and 1×50 ton revolving crane.
Terminal 25: 3×45 ton and 1×33 ton container cranes.
Terminal 30: 1×50 ton gantry, 3×50 ton container cranes.
Terminals 37, 42 and 46: 6×45 ton container cranes.
Terminal 115: 1×50 ton gantry crane.

STEVEDORES: 40 local gangs available. Gang requirements must be made known to the contracting stevedore prior to 1100 hrs. on day before vessel plans to dock. Order before 1030 hrs. on Saturday for Saturday afternoon, Sunday, and Monday.

DENSITY: Salt water in Outer Port. Fresh water inside Canal Locks.

FRESH WATER: Available at all wharves.

BERTHING: *Alaska Railroad Corp.:* 24 hour berthing. Berthing pe required. Advance notice of 48 hours requested.

200 ft. by 735 ft. steel and concrete finger pier.

East Side — 450 ft. long with 35 ft. depth of water (10 ft. out dock face).

West Side — 600 ft. long with 35 ft. depth of water.

South End — 200 ft. long with 35 ft. depth of water.

(East and West Berths serviced by railroad spurs).

Ro/Ro capability provided through a triple deck, articulating ra along West Berth.

CRANES: East and West Dock Face – 2 gantry cranes. Max capacity – 45 short tons, maximum radius – 105 ft. Forklifts ranging to 35 ton capacity.

Operator: The Alaska Railroad Corp., P.O.Box 95, Seward, Ala 99664. Tel: (907) 224-5550.

BULK HANDLING FACILITIES: *Terminal Specifications:*

Unit Train Unloading	3,000 tonnes*/p.h.
Stacking	
Rail-mounted stacker/reclaimer	1
Stacking capacity per hour	3,000 tonnes
Reclaiming capacity per hour	1,000 tonnes
Shiploading	
Fixed position slewing shiploader	1
Loading capacity per hour	1,000 tonnes
Ship berth	1
Maximum d.w.t.	120,000
Maximum draft (MLLW)	58 ft.
Additional Data	
Seward Coal Terminal Area	33.91 acres
Total conveyor length	6,590 ft.
Stockpile capacity	120,000 tonnes
Annual throughput capacity	3,000,000 tonnes

*1 tonne is equivalent to approximately 2,204 lbs.

Operator: Suneel Alaska Corporation, P.O.Box 1789, Seward, Alaska 99664. Tel: (907) 224-3120. Telex: 25353 Suneel Swrd.

City Dock Facilities: City Dock: Located inside Small Boat Harbour. Up to 100 ft. vessels. Depth 15 ft. MLLW.

Fourth Avenue Dock: Up to 300 ft. vessels. Depth 35 ft. at MLLW. Power available. Mobile cranes to 100 tons.

Seward Marine Industrial Centre: Basin is 660 ft. × 1,200 ft. with depth of 21 ft. at MLLW.

Syncrolift shiplift 300 ft. × 80 ft. with 3,600 ton lift capacity.

Adjacent 100 acre industrial site.

Light cargo dock 300 ft. long with 21 ft. at MLLW.

STEVEDORES: Northern Stevedoring and Handling Corporation supply labour force.

MEDICAL: Fully staffed 30 bed hospital. All medical facilities available.

DENSITY: 1.0248 at Mean High Water.

FRESH WATER: Available at East and West berths. 4 in. water line; 67 lb. pressure.

FUEL: Marine Gas Oil available from pipe-line at South & West Berth. Marine Diesel Oil available from same pipe-line during Summer months only (Maritime Oil, Vancouver, B.C.).

REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.

DRY DOCKS: Syncrolift available. See "Berthing".

OPENING/CLOSING HATCHES: Handled by crew, if done before berthing ship. By stevedores if tied to dock.

AIRPORT: 1 mile. 1 flight daily to Anchorage.

TIME: Alaska Standard Time.

HOLIDAYS: All holidays are time and one half. Cargo can be worked on all except Christmas, New Year's and Labour Day.

POLICE/FIRE/AMBULANCE: Tel: 911.

AUTHORITY: City of Seward, P.O.Box 167, Seward, Alaska 99664. *Tel:* (907) 224-2231. *FAX:* (907) 224-3248. *Contact:* Foster Singleton, Harbour Master.

SITKA, Alaska: 57.03 N. 135.20 W. (See Plan)

Located on the Western side of Sitka Sound, Baranof Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

APPROACHES: 3 natural channels: Western, Middle and Eastern.

PILOTAGE: Pilot pick-up point – close vicinity of Eckholm Light.

ANCHORAGE: Jamestown Bay.

MAX. SIZE: Harbour depth 22 ft. MLLW. Tides: diurnal range – 9.9 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs, local.

TUGS: 7 tugs 300 h.p. to 1,200 h.p.

BERTHING: 3 wharves.

1. Conway Dock: Berthing length 160 ft., depth 30 ft. MLLW. No cranes, 3 lift-trucks; 10,000 sq. ft. covered shed space; fresh water.
2. Japonski Dock: Government dock for limited commercial use only.
3. Alaska Lumber & Pulp Co.: (Private) Berthing length 700 ft., depth 35 ft. LW. Walking cranes only. Not less than 12 lift-trucks, 30,000 sq. ft. covered shed space; fresh water. (Located at Silver Bay, Sawmill Cove, 4 miles South of Sitka). 30,000 sq. ft. open storage.

STEVEDORES: 3 gangs.

MEDICAL: Sitka Community Hospital and S.E.A.R.H.C. Hospital on Japonski Island.

DRY DOCKS: 1×400 ton floating dock at Jamestown Bay, approximately 3 miles East of Central Sitka.

REPAIRS: Light repairs only.

FRESH WATER: Available.

FUEL: Not available.

TRANSPORTATION: Air and ferry.

GARBAGE DISPOSAL: 350 gallon dumpsters provided alongside. Charge is U.S.$ 35.00 per dumpster.

WASTE OIL DISPOSAL: A 2,000 gallon tank truck is available for collection service. Contact Sitka Sound oil contractor. Tel: 747-6662.

SEAMAN'S CLUBS: None.

AUTHORITY: City and Borough of Sitka, 304 Lake Street, Sitka, Alaska 99835. *Tel:* (907) 747-3439, 747-3294, 747-3245. *FAX:* (907) 747-7403. *Contact:* Brian G. Bergman, Harbour Master.

SKAGWAY, Alaska: 59.27 N. 135.18 W. (See Plan)

Located at the Northern end of Lynn Canal, 14 miles North of Haines.

DOCUMENTS: See "Anchorage, Alaska".

APPROACHES: Via Lynn Canal.

PILOTAGE: Pick-up point located in vicinity of Point Retreat.

MAX. SIZE: Harbour depth 30 ft. running out to 300 ft. Tides diurnal range 16.7 ft. Also see "Berthing".

ANCHORAGE: In Lutak Inlet, 14 miles South of Skagway.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Customs and Immigration available in Skagway.

TUGS: 2 tugs available at Skagway.

BERTHING: 1. White Pass and Yukon Railroad Dock: Containerised cargo to Vancouver and Whitehorse is the principal use, also used for tankers and cruise ships. 1,240 ft. long, 100 ft. wide; depth at face varies from 20 ft. to 43 ft. No covered storage. Open storage 80,000 sq.ft. 1 fork-lift is available. Containers presently loaded and unloaded with ship's gear. 2 straddle cranes for containers on dock. Deck for 400 lbs. per sq. ft. loading.

2. Skagway Terminal Co.: Ore loading facility. 1,000 ft. berth, fender dolphins, and walkway. 42.5 ft. deep at face. Used for bulk cargo ships and cruise ships. Vehicle ramp available. Adjacent to the berth is a warehouse of 108,000 sq.ft. Also available are 50 acres for open storage. Loading equipment consists of 1 fixed loading spout with a capacity of 1,500 t.p.h.

3. Skagway Terminal Co.: Cruise vessel dock. 960 ft. berth, fender dolphins and walkway (built 1990).

4. State: City joint use ferry pier – barge off-loading facility. Upland storage of 120,000 sq.ft.

5. City of Skagway: Small boat harbour, approx. 100 stalls. Fuel available. Water available in temperate seasons.

STEVEDORES: 3 gangs.

MEDICAL: Medical clinic and one nurse.

REPAIRS: None.

SURVEYORS: Not available locally.

WATER: Available in temperate seasons only.

FUEL: Available at Chevron Dock and small boat harbour.

AIRPORT: One mile from harbour. Scheduled and charter flights available daily. 3,400 ft. paved runway.

POLICE/AMBULANCE/FIRE: Emergency 911. Police Tel: 983-2301. Ambulance Tel: 983-2300. Tel: Fire 983-2300 or 911.

EMERGENCY CO-ORDINATON CENTRE: Skagway Fire Hall, Tel: 983-2300 or 911.

TELEPHONE: Pay phone at top of small boat harbour ramp.

BANKS: National Bank of Alaska, Skagway.

STORING: See "Prelims".

Storing at White Pass Railroad Dock:

1. By truck.
2. No barge storing.
3. Trucks can proceed alongside, except south 400 ft. of dock.
4. Fork lift trucks can be used.
5. Customs perform supervision of loading/unloading of all bonded stores. Customs/Immigration Tel: 983-2325
6. Local riggers are available.

GENERAL: Highways: Klondike Highway open all year round.

AUTHORITY: City of Skagway, P.O.Box 415, Skagway, Alaska 99840. *Tel:* (907) 983-2297. *FAX:* (907) 983-2151. *Contact:* Port Manager or Harbour Master.

SMITHS BLUFF, Texas: 30.00 N. 93.59 W. (See Plan)

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs required berthing/unberthing.

BERTHING:

Sun Co.: Distance from sea 47.6 miles, depth at berth 40 ft.

Sun Marine Terminals:

Operators: Sun Marine Terminals, P.O. Box 758, Nederland, Telex: 77-9469. Tel: 409-727-2301.

Type of terminal: Handling crude oil and lub.

Density: Fresh water.

Controlling Depth: From channel to berth – 39 ft. – 40 ft. Actual depth alongside – 40 ft.

Vertical clearance at HW: 136 ft.

Max. length of berth facility: 150 ft.

Max. length of vessel to be moored safely: 900 ft.

Hoses: 4×12 in. (Crude). 6×6 in. (Lub).

Usual Discharge Pumping Capacity: 50,000 bbls.p.h. (Crude). 2,000 bbls.p.h. (Lub).

Usual Discharge Pumping Capacity: 50,000 bbls.p.h.

Ballast Facilities: Deballasting facilities available with prior notification.

Fresh Water: Available on 24 hour basis.

Fuel: Available ex-wharf.

Tugs: Per Pilot's requirements.

Anchorage: Max. draft 39 ft. (2 anchorages).

Report: Sun Marine Terminals is located on the Neches River 47.6 miles from the Sea Buoy. The terminal is owned, operated and used by Sun Company. The controlling depth of the channel and turning basin is 40 ft. The density of the water at this terminal is 1000. The maximum size vessel normally received at this terminal is approximately 76,000 d.w.t. at Berth No. 1 and 130,000 d.w.t. at Berths No. 2, 3, 4 and 5. Vessels are docked and undocked day or night. Vessels are cautioned to keep mooring lines tight and be on alert for passing traffic.

2 tugs are normally used while docking and 1 while undocking. Sabine Towing requests a 3 hour advance notice when ordering tugs.

Vessels are berthed head upstream port side to with a usual arrangement of mooring lines including 3 forward springs and 3 aft springs. Head and stern lines run by launch. Pilots require one-way traffic and daylight navigation for all vessels in excess of 85,000 d.w.tonnes (83,700 LT). 2 lay-berths are provided across the channel. These consist of trenches dredged into the entrances of an unused ox-bow in the river.

There are mooring points but most vessels lie to an anchor in the trench.
Sun Marine Terminals provides a gangway.
Fuel and fresh water are available at the terminals.
The terminal is fenced and guarded.
Pollution Control: 4,500 ft. of spill boom launch.
Fire: There are foam nozzles and monitors on the dock.
MEDICAL: All facilities available.
DENSITY: Fresh water.
FRESH WATER: Available ex-wharf.
FUEL: Available ex-wharf.
CONSULS: Nearest at Houston.
REPAIRS/DRY DOCKS: See "Port Arthur".
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine or spirits for each man.
IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.
AUTHORITY: *Operator:* Sun Marine Terminals, P.O.Box 758, Nederland, Texas 77627. *Tel:* (409) 727-2301. *Telex:* 77-9469 Sun NDLN.

SOUTH LOUISIANA, Louisiana: 30.06 N. 90.29 W.

LOCATION: The Port of South Louisiana's jurisdiction includes the parishes of St.Charles, St.John the Baptist and St.James, and extends from River Mile 114.9 A.H.P. to River Mile 168.5 A.H.P.
IMTT is located at River Mile 118 A.H.P. (above Head of Passes) on the East bank of the Mississippi River, and is in the port's jurisdiction.
The Chevron facility at Oak Point is in the jurisdiction of the Port of Plaquemines, and is located at River Mile 70 A.H.P. on the West bank of the Mississippi River.
PORT LIMITS: *Port Boundaries:* River Mile 114.9 to 168.5 A.H.P. on the Lower Mississippi River.
ANCHORAGES: See "New Orleans".
RESTRICTIONS: Minimum water depth in main channel is 45 ft.
BERTHING: Please also see Index, as some ports/terminals may also be included in entries at other ports.
General Cargo Terminal:
Riverplex International: P.O.Drawer 559, Reserve, LA.70084. Tel: (504) 536-8900. Fax: (504) 536-8993.
Location: River Mile 138 A.H.P., between New Orleans and Baton Rouge.
Depth alongside: 50 ft.
Use: Shipment, receipt and storage of general cargo and dry bulk cargo.
Description: 200 acre intermodal terminal; wharf 454 ft. long; 43 ft. wide; mooring dolphins 754 ft. centre to centre; upstream buoy 1,000 ft. centre to centre; 2×18,000 lb. Peco gantry cranes, capacity 340 tons per hour per crane; 1×80 ton barge-mounted crawler crane; 1×200 ton barge-mounted Lima crane; conveyor system; 300,000 sq.ft. of covered storage facilities, storage racks, pallet conveyor, climate control, rail docks, truck docks, stacking and reclaiming capabilities; 3 concrete silos; water purification plant; waste water treatment plant.
Rail Facilities: Rail spur; served by Illinois Central and Kansas City Southern Railroads.
Truck Facilities: Site is within 7 miles of Interstates 10 and 55, 2 miles from U.S. 61, 25 miles from New Orleans International Airport.
Also see "Gramercy".
Dry Bulk Terminals: *Port Terminal No. 1:* Louis Dreyfus Corporation, Reserve Grain Elevator, P.O.Box AC, Reserve, LA.70084. Tel: (504) 536-1151. Telex: 784013. Fax: (504) 536-1152.
River Mile: 139.2 A.H.P.
Depth alongside: 50 ft.
1 Berth: 858 ft.
1990 total tonnage: 12,248,216 short tons.
Railroad: Illinois Central.

STOCKTON, California: 37.57 N. 121.19 W. (See Plan)

DOCUMENTS: See "San Francisco".
PILOTAGE: Pilots commissioned by Stockton Port District. Pilots obtained by contacting San Francisco Bar Pilots Association, Pier 7, Buckhead (P.O. Box 26409, S.F., California 94126). Tel: (415) 362-5436.
ANCHORAGE: Emergency anchorage only permitted in Turning Basin, 37 ft. depth.
RESTRICTIONS: Restrictions only in effect if water at flood stage. See "San Francisco".
MAX. SIZE: Draft restrictions of 35 ft. at low tide, 37 ft. at high tide (fresh water). (Also see "Developments").
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Ship to shore Radio (KBP 376 – Marine Channel 18A) enables constant contact with Pilots who therefore aware of any problem that may develop up or down river. Arrangements also may be made for readiness of ordered gangs within 15 minutes of ship's arrival.
TUGS: 2×1,000 h.p. tugs available. Tugs join vessel 0.5 miles up river from Main Channel; generally, ship's lines used, however, tug lines may also be utilised. 2 companies – Stockton Tugboat, Tel: (209) 462-6471 and (415) 846-2320. Sacramento Tugboat Co. Tel: (916) 372-0986.
BERTHING: *Port Stockton Bulk Material Wharf, Berths 12-13:*
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Shipment of dry-bulk commodities, both systems handle the following: coal, petroleum coke, clay, copper concentrates, fertiliser, soda ash, sulphur, and other dry bulk commodities; receipt of liquid fertiliser.
Dimensions: Length of face 850 ft.; lower side 13.5 ft., upper side 13.5 ft.; depth alongside at MLLW 40 ft.; usable berthing space 880 ft.
Mechanical handling facilities: Two bulk handling systems.
(A) Max. vessel loading rate 700 short tons/p.h. Equipped with shiploader, belt conveyor, 360 degree spout trimmer, bottom drop car dump (Max. 7.5 cars per hr.) and truck unloader hopper (Max. 30 trucks per hr.) (B) Max. vessel loading rate 4,000 short tons/p.h. Conveyor system equipped with a 54 in. belt, rotary car dump, loop railroad for unit train.

Port Stockton Wharf, Berths 10-11:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Container-handling dock; receipt of molasses, bulk dry cargo, container cargo and general cargo. Delivery of scrap steel, container cargo and general cargo.
Dimensions: Length of face 810.5 ft., lower side 102 ft.; depth alongside at MLLW 35 ft.; usable berthing space 810.5 ft.
Remarks: Face of wharf is in line and continuous with face of Berth 9 providing a total of 1,455.5 ft. of berthing. This dock has 5.5 acres of open marshalling area. 1×30 tonne multi-purpose bridge crane for handling dry bulk, general cargo, containers. 700 ft. of crane rail. Construction of loop line R.R. track completed.

Port Stockton General cargo Wharf, Berth 9:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo and receipt of bulk cargo.
Dimensions: Length of face 645 ft., upper side 75 ft.; depth alongside at MLLW: Face 37-34 ft., upper side 35 ft.; usable berthing space: Face 645 ft. upper side 110 ft. with dolphin; width of apron: Face 41.25 ft.
Mechanical handling facilities: Forklift trucks and other types of cargo-handling equipment, owned by the Port District and by stevedoring companies, are available as needed.

Port Stockton Wharf No. 8:
Owned by: Stockton Port District.
Operated by : Stockton Port District.
Use: Receipt and shipment of general cargo; Liquid sugar facility and receipt of molasses. Anhydrous Ammonia also unloaded at this dock through refrigerated pipelines.
Dimensions: Length of 396 ft. × 88 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 484 ft. with trestle.

Port Stockton Wharf No. 7:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo.
Dimensions: Length 516 ft. depth alongside MLLW 37-36 ft.: usable berthing space 516 ft.; width of apron 31 ft. with trestle.

Port Stockton Wharf No. 6:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo.
Dimensions: Length 418 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 329 ft.; width of apron 31 ft.

Port Stockton Wharf No. 5:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo.
Dimensions: Length of face 428 ft.; depth alongside MLLW 35 ft.; usable berthing space 429 ft.; width of apron 31 ft.

Port Stockton Grain Wharf No. 4:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo, receipt of bulk cargoes.
Dimensions: Length of face 461 ft.; depth alongside MLLW 35 ft.; usable space 462 ft.; width of apron 31 ft.

Port Stockton Wharf No. 3:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo and receipt of bulk cargoes.
Dimensions: Length of face 461 ft.; depth alongside MLLW 35 ft.; usable berthing space 461 ft.; width of apron 81 ft.
Dock has 30 ton bridge crane capable of handling general and bulk cargoes, as well as containers.

Port Stockton Open Wharf No. 2:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo; shipment of logs, and handling of heavy-lift cargo. Also receipt of bulk cargo.
Dimensions: Length of face 506 ft.; depth alongside MLLW 32-36 ft.; usable berthing space 550 ft.; width of apron: open.
Remarks: Wharf has 39,000 sq. ft. of open storage area and 7 cone shaped buildings for handling inbound bulk cement, with direct belt conveyor from dock to cone buildings, with a capacity of 70,000 short tons to the rear of the dock area. At the Industrial Park approx. 60 acres of open storage area are located South of W. Washington Street; this area can be used for storing or staging import and export cargoes. An additional 45 acres of open storage are located North of W. Washington Street. There is a total of other warehousing with a capacity of 2.7 million sq. ft. of covered storage area comprised of 33 separate units.
Cargo may be transferred from off dock acreage via truck or rail.
This dock also has two Whirley type gantry cranes with a 30 short tons capacity each at 36 ft. offshore reach. Equipped to handle bulk dry materials, containers, heavy lifts, etc.

Continental Elevators Grain Elevator Main Wharf No. 1:
Owned by: Continental Elevators Inc.
Operated by: Continental Grain Co.
Use: Shipment of grain by vessels and by ocean going and inland waterway barges; receipt of grain by self-unloading barges.
Dimensions: Length of face 564 ft., West side 20 ft., East side 20 ft.; depth alongside at MLLW 35-37 ft., usable berthing space 780 ft.; width of apron, open end 20 ft.
Mechanical Handling Facilities: 2 towers on wharf, each with 13 in. diameter, telescopic, mechanically operated, grain-loading spout; loading rate, 900 short t.p.h. (29,877 bu.) at East tower; 800 short t.p.h. (26,557 bu.) at West tower; combined rate, 900 short tons.
Remarks: Grain gallery connecting towers on wharf has a 30 in., electric-belt conveyor; and gallery extending from East tower to grain elevator has 2×30 in. belt conveyors. Grain elevator capacity 6,000,000 bushels.

BRIDGES: Fixed-span high-level toll bridge across Carquinez Strait, with minimum clearance of 134 ft. above MHHW. Southern Pacific Railroad lift span bridge crosses Suisun Bay 6.5 miles upstream from Carquinez Bridge, with minimum clearance above MHHW of 70 ft. when closed and 135 ft. when open. Horizontal clearance on lift span 291 ft. A third bridge, 22 miles above Southern Pacific bridge, is near Antioch. It has a fixed span bridge with minimum clearance above MHW 135 ft.

STEVEDORES: *General Cargo* – For gang start at 0800 hrs., or must be placed at 1600 hrs. of previous day; night gangs mus ordered by 1100 hrs. These times pertain to week-day gangs. For we end gangs, 1100 hrs. Saturday for Saturday night, Sunday mor Sunday night and Monday morning. Day shifts from 0800 to 1700 Night shifts 1700 to 0300 hrs. Arrangements can be made for a spe third shift from 0300 to 0800 hrs. Rates quoted on request.
Bulk Ore and Grain Cargoes – Orders for gangs must be place same time as for general cargo. This operation on 24 hour basis; shift, 0800 to 1600 hrs., night shift 1600 hrs. to midnight, swing s midnight to 0800 hrs. Stop work meeting first Tuesday of each mon
Also see "Radio".

MEDICAL: Arrangements with San Joaquin Medical Society physicians, surgeons and dentists. 5 hospitals within radius of 6 m from port. Ambulance service readily available. Telephone number this service is 948-1334.

FRESH WATER: Available through pipelines.

FUEL: All grades of fuel available with 1 day's advance notice.

CONSULS: See "San Francisco".

REPAIRS: Minor types of repairs carried out.

DRY DOCKS: Nearest dry docks, San Francisco.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessa Available if requested.

OPENING/CLOSING HATCHES: Hatches may be opened prior arr and closed after ship sailed from port; any opening or closing of hatch at dockside must be performed by stevedores.

CERTIFICATES: See "San Francisco".

CUSTOMS ALLOWANCES: See "San Francisco".

CARGO GEAR: Safety regulations require strict adherence max. loading or unloading weight capacity of ship's gear.

REPATRIATION: No facilities in Stockton for effecting crew chang and arranging any necessary repatriations. Special arrangements m be made through Customs.

AIRPORT: Stockton Metropolitan Airport located approx. 6 miles fr port. Serviced by Frontier, Air West and PSA.

TIME: Pacific Standard Time, GMT minus 8 hours; Pacific Daylight Ti goes into effect on first Sunday of April until last Sunday in Octob when clocks are advanced 1 hour.

HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Linco Birthday; Washington's Birthday; Memorial Day; Independence Da Harry Bridge's Birthday; Labour Day; Admission Day; Columbus Da Veteran's Day; Thanksgiving Day; Christmas Eve Day; Christmas D and New Year's Eve Day are all holidays. In addition to above, Gene Election Day, both State and National, as well as any day proclaim by Governor of California or President of United States shall be obser as holiday. Work can be arranged for all holidays except New Yea Day, Labour Day, Thanksgiving Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Security Force on duty 24 hours a d and can be reached by dialling extension 229 for any emergency th might arise.

ELECTRIC CURRENT: At wharves where current available for shi use, it is 110 volt, single phase, 60 cycle for lighting and 440 vo 3 phase, 60 cycle for power.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Available.

SEAMAN'S CLUBS: None.

REGULATIONS: Port of Stockton requests notice of ship's intent come into port at least 7 days prior to arrival; vessels, who have ma prior arrangements, will have precedence over vessels who sail into p without previous notice.

GENERAL: *Railroad Service:* Three transcontinental railroads serve t Port – Santa Fe, Southern Pacific, and Union Pacific with recipro switching privileges.
Truck Scales: Public truck scale available, operated by the Port.

AUTHORITY: Port of Stockton, 2201 West Washington Street, Stockto California 95202. Postal address: P.O.Box 2089, Stockton, Califor 92501-2089. *Tel:* (209) 946-0246. Toll free outside State of Califor (800) 344-3213 or 344-3214. *Telex:* 35-9467 and TWX 510-765-666 *FAX:* (209) 465-7244. *Contact:* Alexander Krygsman, Port Director. Ma Tollini, Manager – Port Operations. Patricia Huff, General Manager Trade and Property Development.

TACOMA, Washington: 47.14 N. 122.28 W. **(See Pla**

DOCUMENTS (on arrival from foreign port):
Ship's document.
Clearance from Last Foreign Port.
2 Crew Lists on Form I-418
2 Passenger Lists on Form I-418 (if applicable)
Passenger Declarations if applicable.
2 Stores Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for Discharge on C.F. 1302.

If first arrival port on an inward voyage, must also have 2 sets Manifests of complete cargo on C.F. 1302, one for Customs at this p and other for use as a "Travelling Manifest" to go forward to oth discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quaran Declaration" on Form PHS.43.
B – For U.S. Department of Agriculture Boarding Officer: "Shipmas Declaration and Warning Notice" on Form A1Q.43.

C – For U.S. Immigration Boarding Officer:
Crew List of Form I-418 visaed by U.S. Consul abroad.
Passenger List on Form I-418.
Attachment to Passenger List on Form I-92.
Form I-94 for each passenger.
Form I-95 of ID Card (Form 184) for each crewmen. (These are reusable for multiple entries, but for seamen on first trip to United States a new Form. I-95 must be ready for presentation on arrival.)

D – For U.S. Customs Boarding Officer and Agent or Broker:
3 copies Crew List (Form I-418).
3 copies Cargo Manifest on Form 1302.
3 copies Stores List – Form 1303.
3 copies Crew Purchases or Curio List – Form 1304.
3 Passenger Lists on Form I-418.
For U.S. Ships – Declaration re foreign repairs on Form 3415.
For U.S. Ships – Certified Crew List for last U.S. port before going foreign.

• At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those under coasting trade on West coast of the United States, including Alaska and British Columbia. Pilots board off Port Angeles Pilot Station.

ANCHORAGE: The depths as a rule are too great for convenient anchorage, but vessels occasionally anchor under the Northern shore about 1 mile Eastward of Brown's Point. Vessels may anchor in about 18.29 m., 450 yards N.N.W. of the outer end of Puyallup Waterway West Jetty.

City Regulations permit anchorage in any part of the bay outside harbour lines so as not to interfere with vessels arriving or departing from their docks.

MAX. SIZE: Length over 305 m. (centre to centre dimensions of mooring dolphins), draft subject to berth depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: Pilots on Channels 13 and 14.

TUGS: Available, join vessel in Commencement Bay, approx. half way between Brown's Point and the designated Dock. Tug's lines are used and there is a charge for tug's lines.

BERTHING: 32 deep water berths. Water depths: 9.15 m. to 21.34 m. below MLLW.

General Cargo: 161,000 sq.m. warehouse space, 91 hectares of open storage paved, lighted, fenced, serving all piers.

Logs are handled at the Port's Blair Terminal, where special shipments of heavy equipment are also handled. Total terminal area is 12 acres with 2 berths totalling 1,200 ft. (366 m.), depth 35 ft. and 32 acres of backup storage space.

Pierce County Terminal at 147 acres, is used for special cargoes and auto imports. It has 2 berths totalling 1,420 ft. (433 m.) and depth up to 45 ft. 1×54 tonne crane available.

BULK HANDLING FACILITIES: 550 m. pier with 12 m. to 15 m. water depth. Bulk unloading crane with 750 to 1,500 t.p.h. capacity; 150,000 tons capacity alumina storage structure with load-out facility.

Bulk Grain Elevator: Continental Grain: 3 million bushel capacity: loading rate: 2,400 t.p.h.; 137 m. dock with dolphins to 244 m.; 21.34 m. water depth.

CONTAINER HANDLING FACILITIES: *Terminal 3 (Maersk):* A 40-acre container terminal with berthing capacity of 950 ft. (290 m.) and water depth of 45 ft. (13.7 m.) at MLLW. The terminal can accommodate the largest container ships, and is located directly adjacent to the Port's North Intermodal Rail Yard. It serves both rail service and over-the-road carriers by use of chassis space. Available container cranes include 2 post-Panamax cranes rated at 66 short tons and 2 container cranes rated at 55 short tons. Other facilities include 3 on-site truck scales, 260 reefer hook-ups and a 7 lane truck gatehouse.

Terminal 4 (Evergreen): A 33-acre container terminal with 2 berths totalling 1,900 ft. (579 m.) and water depth of 40 ft. (13.7 m.) at MLLW. Located directly adjacent to the Port's North Intermodal Rail Yard. Serves both rail service and over-the-road carriers by use of chassis space. Available container cranes include 2 post-Panamax cranes rated at 66 short tons, 2 container cranes rated at 55 short tons and 2 container cranes rated at 50 short tons. Other facilities include 272 reefer hook-ups and a 7 lane truck gatehouse.

Terminal 7: A 79-acre terminal for containers and general cargo. 4 berths, totalling 2,700 ft. (818 m.). Water depth 40 ft. – 50 ft. (12.2 m. – 15.2 m.). 2 warehouses: One transit warehouse with 96,000 sq.ft. (8,918 sq.m.) and one container freight station with 102,400 sq.ft. (9,512 sq.m.). 3 container cranes (50 and 55 short tons capacity) and 2 Whirley cranes (40 short tons). 1 Peiner multi-purpose bulk unloading crane (40 short tons capacity). 36 reefer hook-ups, 1 rail scale, 1 truck scale, 11 truck stations and 7 rail car doors in the warehouses. Direct shipside rail access.

Terminal 7-D (Husky): A 33-acre container terminal with 1 berth totalling 900 ft. (274 m.) and water depth of 50 ft. (15.2 m.). 3 container cranes (55 and 50 short tons capacity). 4 transtainers and 186 reefer hook-ups. Adjacent to Terminal 2, 7 warehouses and direct access to the Port's North Intermodal Rail Yard. Direct rail access to shipside. Berth operated by Cooper T. Smith Stevedoring and International Transportation Service, Inc.

Sea-Land Terminal: A 115-acre container terminal with 2 berths totalling 1,600 ft. (484 m.) and water depth of 40 ft. (12.2 m.). 5 container cranes, 407 reefer hook-ups and 66 hustler tractors. Facilities include operations control tower, administration offices, maintenance shop, container freight station and additional covered storage.

BRIDGES: The 11th Street Bridge: All ships are required to notify for opening 2 hours in advance. The Puyallup River Bridge on 11th Street has been deactivated. The Blair and Hylebos Bridges have no restrictions. Closed periods apply to the 11th Street Bridge and the hours are as follows: 0645 – 0745 hrs., 1530 – 1730 hrs.

STEVEDORES: Jones-Washington Stevedore Company, Eagle Marine Services Ltd., Maersk Stevedore Co., Husky Stevedore Co. and Stevedoring Services of America (SS of A).

Gang requirements must be made known to contracting stevedore prior to 1100 hrs. on day before the vessel plans to dock. (1030 hrs. on Saturdays for gangs on Saturday p.m., Sunday and Monday.)

Stowage of cargo for discharge or load determines the gang size requirements. Sufficient information for intelligent gang orders is a necessity – i.e. advance cargo plans, unusual size and/or weight, etc.

TANKERS: Loading/discharge lines 8 in. and 10 in. 150 ASA flanged connections. Slop discharge facilities not available. Fresh water available. Coast Guard Regulations strictly enforced.

DENSITY: The average density in the port is 1016.8 at 15°C.

FRESH WATER: Available. Delivers to vessel through portable meter hose.

FUEL: Available. Advance notice required.

Grade	*Viscosity at 122°SSF*
Bunker "C"	165 – 175
PS – 400	112 – 116
Bunker Special	50 – 60
PS – 300	32 – 35

FIRE PRECAUTIONS: Very strict precautions in force.

REPAIRS: The largest repair yard in Tacoma can haul out vessels up to 1,000 tons for all kinds of repairs, including electronics, welding, painting and machining; shafts up to 30 ft. in length are machined here. Another plant does shipbuilding exclusively, but will perform topside repairs if needed. Wreckage and salvage facilities are available. Larger vessels go to Seattle for dry-docking. Minor repairs and services for small craft are available at marinas on the City Waterway and the N.E. shore of Commencement Bay.

GANGWAY/DECK WATCHMEN: Watchmen required if detainees are aboard.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. In practice, however, the crew can perform this task while in transit.

CERTIFICATES:
Certificate of Registry.
Certificates for any previous U.S. tonnage tax payments within the past year.
International Load Line Certificate.
Safety Radio Certificate.
Derat Certificate.
Cargo Gear Inspection Certificate.
Certificate of Inspection (U.S. vessels).

CUSTOMS ALLOWANCES: Tobacco and Wine/Spirit: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

AIRPORT: Seattle – Tacoma International Airport is 16 miles North from Port and Tacoma Industrial Airport 8 miles West.

TIME: Local time reference is GMT minus 8 hours. In Summertime it is GMT minus 7, or Pacific Daylight Saving Time, starting the first weekend in April and finishing the last week-end in October.

HOLIDAYS: New Year's Day (January 1st) no work; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th) no work; Bloody Thursday (July 5th); no work; Labour Day (September 1st) no work; Columbus Day (Friday after Thanksgiving); Veterans' Day (November 11th); Thanksgiving Day (November 27th) no work; Christmas Day (December 25th) no work.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers:
Police 593-4911; Fire MA 7-0151; Ambulance 473-1611.

TELEPHONES: Pay telephones available at Piers 4 and 7, Blair Terminal, Pierce County Terminal, Grain Docks 23 and 24. There is no charge for this service.

SHIP SUPPLY SERVICE: Contact: Foss Launch and Tug, 225 East F Street, Tacoma, WA. 98421. Tel: (206) 272-0362.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Service undertaken by City of Tacoma. Tel: 206-591-5544.

WASTE OIL DISPOSAL:
Chemical Processors. Tel: 206-243-6776.
Clean Care. Tel: 206-627-3925.
Northwest Enviro Service. Tel: 206-622-1090.

SEAMAN'S CLUBS: Tacoma Seamen's Centre, 1225 E. Alexander Avenue, 98421. Tel: 206-272-0716.

AUTHORITY: Port of Tacoma, P.O.Box 1837, Tacoma, Washington 98401-1837. *Tel:* (206) 383-5841 or Seattle (206) 838-0142. *Telex:* 32-7473 A/B Port of Tac, TWX: 910-441-2646. *FAX:* (206) 593-4570. *Contact:* Rod Koon, Director – Port Relations.

TAMPA, Florida: 27.57 N. 82.28 W. (See Plan)

DOCUMENTS:

Passports and Seamen's Books.
Vaccination Certificate for each Seaman.
Certified Crew List: must be on American Form and certified by American Consular office at foreign country from which departed.
Crew List.
Ship's Register.
Load Line Certificate.
Certificate of Financial Responsibility (Oil Pollution Certificate).
U.S. Customs requires Inward Foreign Manifest (original and 3 copies). This must describe cargo which is to be discharged this port and/or any other port in vessel's itinerary. It must show:
  Vessel's name and flag.
  Master's name.
  Last foreign port of departure.
  Net registered tons of vessel.
  When and where vessel built.
  Consigned to Agent.
  Bill of Lading Number.
  Marks and numbers (on cargo).
  Complete description of merchandise.
  Weight in kilos or pounds.
  Port of loading.
  Port of discharge.
Stores Lists (original and 3 copies).
Crew Curio List (original and 3 copies).
Narcotics List (original and 3 copies).
*Dangerous Cargo List (original and 3 copies). This should be filled out even if nothing dangerous aboard.
Health officials will board vessel first. Bills of Lading not needed for Customs purposes.

PILOTAGE: Compulsory for all foreign vessels and U.S. vessels under register in the foreign trade. Pilotage is optional for U.S. coastwise vessels drawing over 7 ft. that have on board a Pilot licensed by the Federal government. Pilots board vessels day or night. Vessels entering by Egmont Channel are boarded between the Tampa Bay Lighted Whistle Buoy "T" (Lat. 27° 35.3′ N., Long. 83° 00.7′ W.) and Egmont Channel Lighted Bell Buoy No. 2 (Lat. 27° 35.4′ N., Long. 82° 59.0′ W.). Vessels entering by S.W. Channel are usually boarded between S.W. Channel Buoy No. 2 and Lighted Bell Buoy No. 3, or if desired, at the lighted bell buoy off the entrance to the channel.

Tampa Bay Pilots serve Tampa Bay. Tampa Bay Pilots have 2 launches, *"Manatee"* and *"Tampa Bay Pilot"*, each with a black hull and white deckhouse with the word "Pilot" on either side. Pilot Association monitors VHF-FM Channels 10 (156.50 MHz), 12 (156.60 MHz), and 16 (156.80 MHz) continuously; call-sign, Tampa Bay Pilots. Pilot Association's boats are equipped with VHF-FM Channels 10, 12 and 16 and use Channel 10, 12 and 11 as working frequency. All pilot boats fly the International Code flag "H". For boarding, Pilots request that vessels maintain a speed of 6 knots or less and have the pilot ladder rigged 6 ft. above the water. Vessels are requested to give a 24-hour and a 3-hour advance notice of their time of arrival. Length, beam and max. draft of the vessel should be provided with the first notification. Vessels are normally not moved in dense fog, and during strong North/South winds vessels are boarded inside Egmont Key. In February 1990, the deepest draft entering Tampa Bay was 33 ft. 6 in. Pilots can be obtained by radiotelegraph (cable address: "Tampilot") by telephone (813-248 3732) through the Tampa Marine Operator, or through ships' Agents.

Pilots for St. Petersburg and Port Manatee can be obtained through the Tampa Bay Pilots.

Tampa Bay Pilots – Recommended Navigational Guidelines for Vessels in Tampa Bay (Dated July 1991).

Port Manatee	Vessels with a draft of 27 ft. or less – *Anytime*. 27 ft. to 33 ft. 06 in. – Slack water, high or low. Over 33 ft. 06 in. – Slack water, maximum of 34 ft. plus tide level. Weak and variable tides will be considered in lieu of slack water
Big Bend	Vessels with draft of 33 ft. 06 in. or less – *Anytime*.
East Tampa	Vessels with draft of 30 ft. plus tide level – *Anytime*. Vessel with LOA of 650 ft. may dock at Cargill provided that no other vessels are in the Turnaround area.
Ports of Tampa (including Port Sutton, East Bay and Tampa)	Vessels with draft of 33 ft. 06 in. plus tide level – *Anytime*. Certain berths may have other draft limitations. Please consult Marine Advisory Council Safety Guidelines or contact pilot office for specific requirements. Sparkman Channel requires one-way traffic and vessels with draft restriction of 34 ft. 06 in. plus tide level to a *Maximum* of 35 ft. 06 in.
G – Cut	Vessel draft restriction of 31 ft. 09 in. – *Anytime* to maximum 33 ft. One-way traffic and tug assistance may be required.
Port Tampa	Vessels with draft of 25 ft. or less – *Anytime*. 25 ft. to 32 ft. 06 in. – Slack water. 33 ft. 06 in. – High slack water. Vessel size restricted to 750 ft. LOA. Vessels will be passed only upon agreement of Pilot and Master.
Weedon Island (Florida Power)	Vessels with draft of 29 ft. or less – *Anytime*. of over 29 ft. – less than 1.0 kno current. Maximum allowable draft at berth is 29 ft. plus tide l
Rattlesnake Bayou	Vessels with draft of 12 ft. or less – *Anytime*. Vessels to Misener Marine with draft of 14 ft. plus t level – *Anytime*.
Bayboro Harbor	Vessels with draft of 19 ft. or less – *Anytime*. 19 ft. to 21 ft. – High slack wat
Gadsden Anchorage	Vessels of greater than 675 ft. LOA or 27 ft. draft m not anchor in Gadsden.
Dead ships, Panamax and Larger Vessels	No restrictions other than above harbour restrictions. Vessel movements are also subject to restrictions by U.S. Coast Guard and the weather. These recommendations are guidelines only and are not intended to tell anyone how to load out a vessel.
Tampa Bay	Vessels with draft of 38 ft. 06 in. plus tide level – *Anytime* to a maximum allowable draft of 40 ft. 06 in.

Recommendations are subject to change. Greater restrictions ma defined by the Captain of the Port and/or the Safety Guide Committee.

ANCHORAGES: Vessels with good ground tackle can anchor anyw outside Egmont Bar in depths of 35 ft. to 50 ft. Inside anchora Southward of Mullet Key in depths of 30 ft. to 35 ft.; and S.W. of Gads Point in depths of 29 ft. to 36 ft.

Explosives and quarantine anchorages East of Mullet Key and S of Interbay Peninsula.

(1) Explosives Anchorage, East of Mullet Key. A rectangular are Tampa Bay, approximately 4,459 yd. long and 1,419 yd. wide, begin at Lat. 27° 38′ 30″ N., Long. 82° 39′ 09″ W., and extending N.E. to 27° 39′ 48″ N., Long. 82° 37′ 15″ W.; thence S.E. to Lat. 27° 39′ 17 Long. 82° 36′ 46″ W.; thence S.E. to Lat. 27° 37′ 52″ N., L 82° 38′ 38″ W.; thence N.W. to point of beginning. Anchorage is u by vessels awaiting loading or unloading at Port Tampa where dura of anchorage will exceed 72 hours.

(2) Temporary Explosives Anchorage, South of Interbay Penins Beginning at a point bearing 107°, 1,750 yd. from Cut F Range F Light; thence to a point bearing 125°, 2,050 yd., from Cut F Range F Light; thence to a point bearing 180°, 1,725 yd., from Cut F Range F Light; thence to a point bearing 222°, 2,180 yd., from Cut F Range F Light; thence to a point bearing 251°, 1,540 yd., from Cut F Range F Light; and thence to the point of beginning. Anchorage is used for ves engaged in loading explosives when duration of the anchorage is than 72 hours.

(3) Temporary explosives anchorage off Port Tampa. A circular a with a radius of 200 yd. with the point at Lat. 27° 50′ 22 Long. 82° 34′ 15″ W.

(4) Quarantine anchorage. S.E. of the temporary explos anchorage, beginning at a point bearing 097° true, 4,370 yd., from C Range Front Light; thence to a point bearing 113° 30′, 5,370 yd., Cut F Range Front Light; thence to a point bearing 161° 30′, 3,770 from Cut F Range Front Light; thence to a point bearing 163° 2,070 yd., from Cut F Range Front Light; thence to the point of begin

RESTRICTIONS: Draft recommendation is 33 ft. 6 in. No restrictions with exception of loaded vessels into Port Tampa.

43 ft. harbour deepening project is completed, however only Be No. 31 and No. 220 can accommodate over 33 ft. 06 in. (Call T Operations for soundings).

MAX. SIZE: Max. draft 38 ft. 6 in. MLW. No limit on length and brea Air draft 175 ft. MHW. Skyway Bridge clearance.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Ill Reports made to Miami Quarantine Station.

VESSEL TRAFFIC ADVISORY SYSTEM: The Tampa Port Auth provides a voluntary navigational aid to vessels transiting the bay. VTAS can be reached by calling WHX362 on VHF Channel 12.

TUGS: Positions are:
  Main port area – right past Beacon No. 35
  Port Sutton & East Bay – Beacon No. 29
  Port Tampa – Cut "K"
  East Tampa – Beacon No. 16
Tug's lines only.

BERTHING:

Container Facilities: Containers are handled at several general cargo terminals, but no specialised container facilities are currently in place. *Facilities available for smaller vessels.*

Operator	*Depth*	*Berthing Space*	*Product Handled*
Morton Salt Co.	14 ft.	600 ft.	Salt
Paktank Florida, Inc.	12 ft.	500 ft.	Grain fertiliser, materials, potash, caustic soda, salt.

Also see "General Cargo Facilities", "Specialised General Cargo Facilities" and "Dry Bulk Facilities". Also see "Developments".

GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Tampa Bay International. Terminal Inc. (Port Authority Berth No. 209)	Verger Boulevard, Holland Terminal	600 ft. Marginal Wharf	34 ft.	Fork Lifts: 1×10 tons, 4×8 tons, 5×2.5 tons, 11×4 tons. Mobile shore cranes available 70 – 300 tons
Tampa Port Authority (Berths No. 271,272).	13th and Platt St.	1,200 ft. Marginal Wharf	34 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity.
Spessard L. Holland Terminal (Port Authority Berths No. 201, 202)	Verger Boulevard	600 ft., 900 ft. Marginal	34 ft.	The 100 ft. apron on all berths is public. Cruise Ship Terminal location.
Kreher Terminal Berths No. 223, 224	Carbide Avenue, Hookers Point	1,120 ft. Marginal Wharf	34 ft. (for 720 ft.) 14/16 ft. (for 400 ft.)	Back land leased to GATX Terminals. Wharf apron and docking area is public and subject to preferential berthing rights of one tenant.
S.E.L. Maduro (Florida), Inc.	13th and York St.	1,200 ft. Marginal Wharf	30 ft.	
International Ship Repair Berths 263, 264, 265, 266.	601 N. 13th Street	700 ft. Marginal Wharf	28 ft. – 15 ft.	
Tampa Bay International Terminals. (Port Authority Berths No. 251, 252)	Foot of Grant St.	1,200 ft. Marginal Wharf	34 ft.	Fork Lifts: up to 20,000 lb., conveyor system
Harborside Refrigerated Services, Inc. (Port Authority Berths No. 210, 211)	Verger Boulevard	1,200 ft. Marginal Wharf	34 ft.	Fork Lifts. Mobile shore cranes available 70 – 300 tons.

SPECIALISED GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Commercial Metals Transport Co.	West end of Port Sutton, East side of turning basin	530 ft. Marginal Wharf	30 ft.	Scrap metal loading facility. 4 diesel cranes 3×80 ft. boom, 1×70 ft. boom, each equipped with electric magnets.
Tampa Export	Maritime Boulevard	400 ft. Marginal Wharf	38 ft.	Scrap metal loading facility.

DRY BULK FACILITIES:

Operator	*Lccation*	*Depth*	*Max. L.O.A.*	*Max. Beam*	*Height of Vessel Waterline to bulwark*	*Chute Travel*	*Loading Rate (N)=Net (L)=Long t.p.h.*

Rockport	22nd St. Causeway Boulevard	34 ft.	1,450 ft.*	120 ft.	53 ft.	1,450 ft.	3,000 (N)

*Can load longer vessels by shifting during operation.

Shipmaster's Report: Bulk phosphates are loaded in Port Sutton (one berth) and in the East Bay (two berths: Rockport owned by CSX and Eastern Associated Terminal).

Loading rates: about 1,000 t.p.h. at Port Sutton;
about 3,000 t.p.h. at the two berths in East Bay area.

Trimming: The loading elevators are not equipped with trimming devices. Most cargoes can be trimmed by bulldozers. The bulldozer weighs 5 long tons, and is placed on board with ship's gear. The IMC elevators at Port Sutton and the SCL elevator (Rockport) use shore gear to place the bulldozer on board. A minimum of 8 ft. to 7.5 ft. headroom under the coaming is required for bulldozer trimming.

Topping-off: Topping-off to 41 ft. draft can be arranged at T.P.A. Berth No. 31.

DRY BULK FACILITIES: (continued)

Operator	*Location*	*Depth*	*Berthing Space*	*Handling Equipment*	*Storage Area*	*Produc Handle*
Cargill Inc. (Port Authority Berth No. 256)	North 19th St.	34 ft.	700 ft.	Marine leg for unloading 30,000 bushels/p.h., and spout loader-rate of 600 tons	Capacity of elevator is 1,000,000 bushels; 8,000 ton bulk warehouse; 4,800 ton bulk warehouse.	Grain and dry b agriculture pro
Lafarge	Hookers Point	34 ft.	820 ft. Note that part of above terminals use same piers. Most terminals have residue discharge facilities.

DENSITY: Density is affected by local rains due to Hillsborough River. Seasonal variances too great to allow advance prediction.

FRESH WATER: Available all over port and delivered through ships hoses and meters. Rates of delivery various.

FUEL: All grades and types available, including all types of blended and Bunker "C". 24 hour notice required. All types of lube-oil availa with delivery in bulk or drums – 24 hours' notice is required. Major companies (i.e. Shell, Amoco Oil, Texaco, Gulf, Chevron, Central etc.) represented in Tampa. Delivery ex-pipe-line, barge or truck.

FIRE PRECAUTIONS: No specific precautions other than usual.

CONSULS: The following countries are represented in Tampa:

Colombia	Honduras	Norway
Denmark	Italy	Panama
Finland	Mexico	Sweden
Germany		

REPAIRS: All types are possible.

DRY DOCKS: Graving dock: 900 ft. long × 150 ft. wide, 21 ft. from M to top of keel blocks; 525 ft. long on bottom × 80 ft. wide, and de over keel blocks 16-18 ft. at MHW.

Dry dock: 200 ft. long × 65 ft. wide. There are 2 other dry doc besides those listed above.

GANGWAY/DECK WATCHMEN: Watchmen not necessary, available when required.

OPENING/CLOSING HATCHES: Longshoremen open and clo hatches.

CERTIFICATES:

Documentation Papers.
Load Line Certificate.
Certificate of Safety at Sea (when carrying passengers).
Certificate of Safety Equipment.

CUSTOMS ALLOWANCES: Tobacco, 2 packs of cigarettes per day man; wine and/or Spirit, no set amount. Each boarding officer different views (i.e. German and Scandinavian vessels allowed 2 bot of beer per day per man). Allowances made within reasonable bou at Master's discretion subject to boarding officer's approval.

REPATRIATION: No foreign crew pools in Tampa (located in N Orleans, San Francisco and New York), but crew changes can be ma when Master radios requirements to Agent who arranges with lo Consul or through crew pool in nearest city named above for applica country (if no Consul is available in Tampa). American crew pools all unions in Tampa.

Repatriation available via Tampa International Airport and is hand by Consul or Master.

AIRPORT: Tampa International Airport served by regular airlines located approximately 15 miles from main port area; 5 miles from Tampa and 16 miles from East Tampa.

TIME: Tampa normally on Eastern Standard Time (GMT minus 5 hou with Daylight Saving Time in effect from first Sunday in April till Sunday in October.

HOLIDAYS: New Year's Day, January 1st; Martin Luther Kin Birthday, 3rd Monday in January; George Washington's Birthday, Monday in February; Good Friday; Memorial Day, Last Monday in M Independence Day, July 4th; Labour Day, 1st Monday in Septem Armistice Day, November 11th; Thanksgiving Day, 4th Thursday November; Christmas Eve, December 24th; Christmas Day, Decem 25th; New Year's Eve, December 31st.

When any of above holidays fall on Sunday, they will be observed Monday following. Work on these holidays is by special arrangem only.

POLICE/AMBULANCE/FIRE: Dial 911.

TELEPHONES: Installation of telephone aboard can be arranged by agent.

SERVICES: Compass adjustments available; radio direction finder; radar repairs; tank cleaning.

SHIP SUPPLY SERVICE: Captain Riley F. Bryan, Sea Taxi, P.O.Box 46618, Pass-A-Grille, Florida. Tel: (813) 381-3999.

Suncoast Helicopters, 4111 W. Columbus Drive, Tampa, Florida 33607. Tel: (813) 872-6625.

A. P. St. Philip, Inc., 1305 Shoreline Drive, Tampa, Florida 33605. Tel: (813) 248-1123.

SHORE LEAVE: Immigration Authorities grant Clearance after examination of Passport or bona fide seaman's papers.

DENTIFICATION CARDS: Passports required.

GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany). Garbage disposal is available through the ship's agent. Charges are usually based on tonnage.

Disposall, Inc., 3702 East 7th Avenue, Tampa, FL 33605. Tel: (813) 247-2446.

International Ship Supply, Inc., 2923 North B Street, Tampa, FL 33609. Tel: (813) 651-9840.

UETA, 223 S. 12th Avenue, Tampa, FL 33605. Tel: (813) 223-9155.

Browning-Ferris Ind., 11500 43rd Street North, Pinellas Park, FL 34622-4925. Tel: (813) 572-6800.

WASTE OIL DISPOSAL: Service is available using various local contractors. Ship's agent will usually arrange this on being informed of ship's requirements.

SEAMAN'S CLUBS/SERVICES: No Seaman's club. However, Rev. Ray Mungo runs the Seamen's Ministry and takes care of many of the seamen's needs. He handles international telephone calls, bank runs, trips to Disney World, Busch Gardens and other amusement parks, books, clothing, etc. He also provides church services. His details are:

Reverend Ray Mungo, 1516 Port Avenue, Tampa, FL 33605. Tel: (813) 247-5237.

CURRENCY: U.S.Dollar (U.S.$).

DELAYS: Delay can be expected in loading phosphate rock (1 or 2 days), and same delay applicable for berthing at elevators. Some delay possible in general cargo loading or unloading.

DEVELOPMENTS: Main harbour channel has been deepend to 43 ft. New general cargo berth has been constructed which can structurally accommodate container cranes. This new berth is part of an expansive general cargo complex, which includes Berth No. 202, an 86,000 sq.ft. warehouse, and the recent addition of 52 reefer plugs and 6 acres of heavy paved area for containers. The Port has also recently constructed a dedicated liquid bulk terminal, primarily for the receipt of orange juice concentrate. The Port's huge dockside cold storage facility, Harborside Refrigerated Services, has undergone expansion that bring their total chill and freezer space to 176,000 sq. ft.

Construction of Berth No. 219, a 400 ft. heavy duty wharf to be initially used to handle scrap metal exports, has been completed.

In 1987, the Port constructed its second cruise terminal, a 17,000 sq. ft. facility designed to accommodate the port's growing cruise trade. Planning continues for the eventual development of a major downtown cruise terminal complex.

SHIPMASTER'S REPORT: July 1990 (Updated 1992).

Charts: B.A. Charts No. 3847 and 3848.

Approach: Low lying coastline. Radar picks up 'Sarasota' to South of Tampa Bay at 30 miles.

Anchorage: The Fairway Anchorage is North of Buoy No.1 (45 ft.). Various anchorages inside Tampa Bay with depths up to 30 ft. U.S.C.G. only allow vessels to remain a maximum of 48 hours.

Pilot: Boards at Fairway Buoy from fast black hulled cutter. Pilot Station at 'Egmont Key' South of main ship channel. Call Pilot Station on VHF Channels 16 and 12.

One Pilot takes vessel to berth and docks ship.

Outwards Pilot disembarks at Buoy No.14.

Pilot requires 2 hours notice inwards and outwards.

Channel: The maximum channel draft at present is 39 ft. L.W., even though some berths and channels have well over 40 ft. Patches still require maintenance dredging to 40 ft.

Gas Tankers (Foreign flag) of any size, daylight transit only in loaded condition. Complete passage must be in daylight, but if in ballast 24 hour berthing allowed. Gas tankers allowed to shift berth in loaded condition throughout 24 hours, but only if in Port Sutton Channel.

Oil and chemical carriers over 106 ft. LOA transit daylight only in loaded condition.

Sunshine Skyway Bridge near bay entrance consists of new bridge with vertical clearance of 175 ft. above MHW.

Tugs: 8 tugs in operation, up to 6,000 i.h.p., including 2 'Tractor' tugs.

Generally tie up "American Style" alongside with tug's lines, except 'Tractor' tugs which are on short line.

Tugs generally immediately available in emergency, otherwise require 2 hours notice.

Cancellation without payment, as long as tug has not left its berth.

Two tugs used when loaded, and one tug when in ballast.

Berth: Gas (Ammonia) carriers can discharge at 3 berths, IMC and Seminole in Port Sutton Cut and Royster off 'Cut D'.

IMC: North side of Port Sutton Channel (27°54.25′ N., 82° 22.80′ W.). Jetty set out from Port Sutton Channel. Fendering dolphins each end of jetty.

Berth can take up to 70,000 cu.m. gas tankers. Limiting factor is draft. Presently maximum is 35 ft. plus tide. Fendering good, mooring arrangement good, 3, 2, 2 each end, starboard side alongside, head out. Ship's gangway used. Two public telephones near at hand at dock office.

Fresh water at good pressure. Connection at Chicksan, for which there is a charge.

Seminole: North side of Port Sutton Channel near entrance (27° 54.25′ N., 82° 25.50′ W.). Facility formerly owned by Grace, but sold in 1988.

Jetty set out from Port Sutton Channel. Outlying fender dolphins each end.

Berth can also be used for caustic soda and scrap metal. The Caustic Soda Jetty to the East of the Ammonia Jetty has no fendering, so take care when berthing.

Scrap metal ships often use same berth to load from facility to East of Ammonia Jetty. Check with Agent that dock bottom is clear of scrap before berthing. Apart from above, fendering fair. Berth can take up to 70,000 cu.m. gas carriers with limiting draft of 35 ft. plus tide.

Vessels berth starboard side alongside, head out. Shore gangway used. Nearest public telephone is at IMC to East. Master is permitted to use Seminole office telephone in working hours. Fresh water at good pressure. Connection at Chicksan, no charge.

Royster: Vessels can berth either side of finger pier at Hooker's Point, opposite Peter O.Knight Airport.

About 50,000 cu.m. gas carriers maximum size. Also used for other oil products and chemicals. Position: 27° 55.15′ N., 82° 26.60′ W., North side No. 227, port side too, South side No. 226, starboard side too. Ship's gangway used at both berths. One public telephone near base of jetty. Fresh water near Chicksan, charged.

Lay-By Berth No. 31, Pendola Point: If awaiting discharge berth, a berth attached to a cement silo can be used at South Entrance to Port Sutton Channel at Pendola Point (27° 54.2′ N., 82° 26.0′ W.) with 38 ft. plus tide alongside. Jetty with outlying mooring dolphins. Mooring leads at bow not good. Port side alongside, head out. Ship's gangway used. No fresh water, no telephone. Berth very isolated.

Discharge: IMC: Terminal requires product to be at −32.2°C. or colder. Tank pressures 49.2 mb. although not rigidly enforced.

Average discharge rate is 760 t.p.h., with approximately 6.5 kg./sq.cm. at ship's manifold, equates to 4 pumps.

One 20,000 cu.m. tank for NH3.

Chicksan 10 in. 150 ASA.

Necessary to cease discharge for passing traffic.

Surveyors: Saybolt and Thornton. Saybolt Surveyor may read draft before boarding. Thornton Surveyor uses different Density Tables from ship.

Seminole: Permitted pressure approximately 7.5 kg./sq.cm. at manifold, average discharge rate 535 t.p.h. using 3 pumps.

Necessary to cease discharge for passing traffic.

Chicksan 6 in. 150 ASA.

1×20,000 cu.m. and 1×12,000 cu.m. storage tank immediately adjacent.

Surveyor (Saybolt) reads draft before boarding. Arm drained to shore on completion.

Royster: Average discharge rate 980 t.p.h., equates to 6 pumps.

12 in. 150 ASA Chicksan which can swing either side of pier.

Stores: We used Florida Ship Supply who were helpful, and prices reasonable. Can use midship derrick at all berths, and aft derricks at Royster.

Repairs: Tampa International Ship Repair for repairs. Tampa Electric Motor Co. 'TEMCO' for electric motors repairs.

General: Tampa/St.Petersburg International Airport about 30 minutes from Port Sutton, to N.W. of city centre.

Plenty of shopping malls plus entertainment, such as Busch Gardens and Disney World, near at hand.

SHIPMASTER'S REPORT: October 1991.

Pilotage: Tampa Tri-County Pilots have discontinued service.

For pilot call Tampa Bay Pilots on VHF Channels 10 and 12. The pilot boards and disembarks between Buoys No. 9 and 10 (original entrance to the channel before being extended in 1984). This pilot also berths and unberths the vessel.

There is no longer any restriction on gas carriers, they may now berth and unberth throughout 24 hours.

If the weather is poor (strong Northerly winds), the pilot may embark and disembark near Buoy No. 20, but this depends on the vessel and the Master.

Channel: The Egmont Channel has a projected depth of 50 ft., but is liable to constant shoaling. The distance from the Fairway Buoy to Port Sutton is 41 miles. The maximum permitted draft in October 1991 to Tampa was 40 ft. 06 in. on a rising tide, but this was only to certain berths.

When there is a strong Northerly wind, a heavy swell can form over the Egmont Channel, thereby causing deep draft vessels to bottom.

Anchorage: See B.A. Chart No. 3847. There is no shelter in this anchorage.

Bridges: The old Sunshine Bridge (shown on B.A. Chart No. 3847 as the operating bridge) to the West of the new bridge is finally being demolished and contractors machinery and plant are working on the old spans. The piers for the bridge will be removed to a depth of 42 ft. adjacent to the shipping channel and below small craft draft outside the shipping channel.

Tugs: For vessels proceeding to Port Sutton Channel and berths further North, the tugs join at Beacons No. 25/26.

Tugs are supplied by St. Phillip Towing Co., who operate numerous old tugs and a new tractor type called the "Kingsman Eagle". If the "Kingsman Eagle" is used the charges are double that of the older tugs.

Normally 2 tugs and tug's lines are used.

Berthing: Chemical parcel tankers berth at Boliden Chemical Co. on the South side of Port Sutton Channel (27° 52.2′ N., 82° 24.8′ W.), where the depth reported by the pilots is 31 ft. The berth is a typical tanker 'T' jetty with Chicksan arms and hoses. The berth can accept parcel tankers up to 40,000 d.w.t. The berth is made of a 20 m. 'T' head with breasting dolphins at each end. Vessels generally berth head in, starboard side to. Ship's brow gangway required.

There is a berth at the Western end of Port Sutton Cut at Pendola Point (27° 54.2′ N., 82° 26.0′ W.) which has been dredged to 45 ft. and is used for topping-off bulk carriers loading phosphate.

Cargo: Sulphuric acid discharge: There are 2×6 in. shore hoses for discharge of sulphuric acid to the nearby shore tanks. Sulphuric acid can be accepted at up to 1,000 tonnes/hr.

A shore radio is provided and co-operation with the shore is good.

Ship's air line is required on completion to blow the manifold and line ashore. It is best to have connection ready for ship's own manifold.

Caustic and asphalt also handled at this berth.

Loading Master has a Cellnet telephone which the Master can use for local calls.

Density: 1017.

Fresh Water: Fresh water is available from a stand pipe on the jetty (no meter) at about 20 tonnes/hr. Ship's hoses are used and the rate is lower during the night.

Supplies: There are numerous ship chandlers in the port. We found Florida Ship Supply (Telex No. 52422) very good on our numerous visits to the port. For bonded stores we used Bonnani (Telex No. 6732315).

Storing: Trucks can back-up to within 15 m. of the ship's side.

Telephones: There are 2 telephones on the jetty at the end of Port Sutton Dock which is about 0.25 miles from the berth. The agent will also rent a portable Cellnet telephone to the vessel.

AUTHORITY: Tampa Port Authority, George B. Howell Maritime Centre, 811 Wynkoop Road, (P.O.Box 2192), Tampa, Florida 33601. *Tel:* (813) 248-1924. *FAX:* (813) 247-2352. *Contact:* Joseph L. Valenti, Port Director. Steven L. Fidler, Operations Director.

TEXAS CITY, Texas: 29.22 N. 94.53 W. (See Plan)

DOCUMENTS, PILOTAGE, etc., refer to "Galveston".

RESTRICTIONS: Controlling depth in entrance channel 40 ft. Otherwise restricted by depth available at berth. Vessels enter day and night.

Industrial canal deepened from 34 ft. to 40 ft. in 1981.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required.

Report: *AMOCO:*

General: The Amoco Terminal at Texas City consists of Berths No. 31, 32, 38, 40 and 41 (Berths No. 40 and 41 also used by T.C.T. and Marathon). Distance from the sea buoy to these berths is 15 miles.

Mooring and Berth: Pilot services for the Texas City port are provided by the Galveston Pilot Association.

Products handled at Berths No. 31 and 32 include gasoline, distillate, anhydrous ammonia, crude and also ballast and slops. Anyhdrous ammonia is handled through 1 stainless steel arm, 6 in. flanged connection and maximum pumping pressure of 35 p.s.i. All other products are handled through 8 in. lines with flanged connections. Maximum pumping pressure on all products is 100 p.s.i.

Berths No. 40 and 41 handle the discharge of crude only. Both berths have 2 loading arms. All lines are 12 in. and are quick disconnect-type connections. Maximum pumping pressure is 150 p.s.i. There are no facilities for handling ballast or slops at these berths.

A minimum of 2 tugs are required for docking and undocking. However, the Master of the vessel and the Docking Master may determine actual tug requirements for their vessel based on vessel manoeuvrability and weather conditions.

The normal mooring arrangement at Berths No. 31 and 32 is starboard side to. Port side mooring is done after turning the vessel in the turning basin. 2 head lines, 2 forward breast lines, 2 spring lines, 2 stern lines, 2 aft breast lines and 2 aft spring lines are sufficient for mooring most vessels. Line handlers are supplied by Texas City Boatman Co. This terminal does not furnish a gangway to vessels.

ARCO:

General: The ARCO facility is located toward the North end and on the West side of the Texas City Turning Basin. Berths No. 11 and 12 are the 2 berths at this terminal. The area around these berths is dredged to 40 ft.

The ship dock is a concrete and steel finger pier permitting ve to moor on either side. 2 vessels are the maximum that ma discharged at one time. There is no provision to load vessels a facility and no facilites for dry cargo handling.

Mooring and Berth: Water depth is the factor that limits the si fully loaded vessels that call at the facility. Lightered or partially lo vessels of greater size can be accommodated. Distance from the of a vessel to the centre of its manifold cannot exceed 468 ft. and the centre of its manifold to the stern of the vessel cannot exceed 5 Vessels will be docked bow in unless prior arrangement has been m with facility operators to permit bow out mooring. Should the vess moored bow out, the bow/manifold restrictions become 500 ft. and stern/manifold distance 468 ft.

The pilotage of vessels to Texas City is performed by the Galves Texas City Pilots. This terminal does not make arrangements for P

9 mooring structures are installed at each berth and several lines be secured on each. A boat is required to reach some structures. ship's Agent will be responsible for arranging mooring and unmoo line handlers. The handlers will be under the orders of the Ship's Of regarding the handling of each individual line and location of the s end. The facility has Regulations concerning the minimum numbe lines and the type of lines used.

They are:

Vessels less than 525 ft. LOA:

2 head lines
2 forward breast lines
2 forward spring lines
2 aft spring lines
2 aft breast lines
2 stern lines

Mixed moorings not encouraged or allowed.

Vessels greater than 525 ft. LOA:

3 head lines
3 forward breast lines
3 forward spring lines
3 aft spring lines
3 aft breast lines
3 stern lines

Vessel's mooring lines must be kept taut and secure at all times the vessel moves more than 4 ft. away from the dock or 4 ft. in ei direction along the dock, all cargo transfer operations must be stop immediately, and the proper manifold valves must be closed. Operati must not resume until the condition has been corrected.

Facility will provide gangway. Vessel's crew must attach gangway the vessel and furnish/install safety net under gangway. If it is necess to use vessel's gangway, facility's crew will help position gangway o dock platform.

Aluminium gangways with rotating platforms and feathering treads provided. The shipboard end is designed to attach to the vess gunwhale or over the ship's rail.

Crude is the only cargo handled at this berth. All lines are 16 in. a have hydraulic connections. Maximum pumping pressure is at 175 p There are no facilities for ballast or slops at this terminal.

Municipal Docks No. 16, 18 and 20:

General: Municipal Docks No. 16, 18 and 20 are located adjacen the Texas City Harbour turning basin.

Dock No. 16 has a 140 ft. face, 283 ft. with dolphins; 40 ft. de alongside, deck height of 14 ft. This dock is used for receipt of crude and shipment of petroleum products, chemicals and petrochemicals

Dock No. 18 has an 88 ft. face, 320 ft. with dolphins; 34 ft. de alongside, deck height of 14 ft. This dock is used for receipt of crude

Dock No. 20 has a 98 ft. face, 284 ft. with dolphins; 32 ft. de alongside, deck height of 14 ft. This dock is used for receipt of crude and shipment of petroleum products.

Mooring and Berth: Tug requirements are determined according vessel size, Master's requirements and recommendations of the Dock Master doing the docking.

The normal berthing manoeuvre into Dock No. 16 consists of a t of 140° to port from the Texas City Turning Basin. The berth is on t starboard hand of the basin about 1,500 ft. from the turning ba entrance. Vessels tie up either port or starboard side to manila polypropylene lines are normally used, but wire is permissi No gangway is provided at this berth.

Vessels destined to Berth No. 18, enter the turning basin from t Texas City Channel. Berth No. 18 is at a right angle to the turning ba approximately 2,000 ft. from the entrance to the turning basin. Vess normally turn in the turning basin in order to back into the berth. Nor side to dock is the port side. Berth No. 18 is the first berth on the No side of the municipal dock basin. No gangway is available at this do

Vessels destined to Berth No. 20 enter the turning basin from t Texas City Channel. Berth No. 20 is also at a right angle to the turn basin approximately 2,500 ft. from the entrance to the turning bas Vessels turn bow first into this dock area from the turning basin fo port side docking. Manila or polypropylene lines are used. This is t poorest of the 3 docks. Adequacy of mooring facilities is marg physical condition of the dock is poor, but acceptable. Dock equipm is fair, but acceptable. No gangway is provided at this berth.

Products handled by Berth No. 16 are all handled through 8 in. li with flanged connections at pumping pressures between 20 p.s.i. a 125 p.s.i. Ballast and slops are handled through 8 in. lines wi maximum pumping pressure of 100 p.s.i.

At Berth No. 18 crude oil is discharged through 2×8 in. lines w flanged connections. Maximum pumping pressure is 125 p.s.i. Facil for ballast and slops are available.

Products handled by Berth No. 20 are all handled through 8 in. li with flanged connections at pumping pressures between 30 p.s.i. a 125 p.s.i. Ballast and slops are handled through 8 in. lines wi maximum pumping pressure of 100 p.s.i.

MEDICAL: All medical assistance available.

DENSITY: Brackish.
FRESH WATER: Available at all wharves except Union Carbide.
FUEL: Bunker "C" available to tankers loading/discharging. All grades available by barge from Houston.
CONSULS: See "Houston".
GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.
CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars or 1 lb. tobacco. 1 qt. wine/spirits.
TIME: Central Standard Time GMT minus 6 hours. Daylight saving time effective from April to October.
SHORE LEAVE: No restrictions unless detained by Immigration.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

A garbage collection service is available through Browning-Ferris Industries. Tel: 1-800-637-7339.
WASTE OIL DISPOSAL: Collection of waste oil is available through Malone Company, Texas City. Tel: (409) 945-3301 or 938-1791. This company is licensed by the State to receive and transport hazardous material for disposal.
SEAMAN'S CLUBS: At Galveston and Houston.
CURRENCY: U.S.Dollar (U.S.$).

SHIPMASTER'S REPORT: February, 1979.
Restrictions: Vessels on maximum draft must be clear of Texas City Channel before dark. There is no sailing or berthing during darkness for maximum draft vessels.

For large vessels it is necessary to ballast during discharge otherwise shore connections become too high.
VHF: Channel 13 from sea and Channel 14 for berthing.
Tugs: Usually 4-6 tugs for vessels on maximum draft.
Tankers: Large tankers dock at Docks 40 & 41 usually starboard side to. On either dock it is not easy loading stores from the dock. 2×12 in. connections.
Customs Allowance: All souvenirs to be collected (items intended as presents) and sealed.
Repatriation: As with all U.S. ports must make out Form I-408 – application to pay off or discharge alien crewman.
Airport: At Houston.
Telephone: Pay telephone at bottom of gangway.
General: Will require ship's gangway abaft of manifold if bottom of gangway is more than 115.5 ft. (35.20 m.) abaft after manifold with a freeboard of 23 ft. or more.

AUTHORITY: Texas City Terminal Railway Co., P.O.Box 591, Texas City, Texas 77592-0591. *Tel:* General Office (409) 945-4461. Harbour Master (409) 945-5011. *FAX:* (409) 948-9160, 945-8479. *Contact:* K. L. De Maet, President and General Manager. J. Gilder, Harbour Master.

TOLEDO, Ohio: 41.42 N. 83.28 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: By Seaway Pilots.
RESTRICTIONS: Navigation season from mid-March to end-December, approx. The port is connected to Lake Erie by an entrance channel, depth 27 ft. Vessel's size restricted by Seaway locks.
MAX. SIZE: 730 ft. length; 26 ft. draft. Height restriction of 104 ft. above water-line which applies to grain berths only.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Chicago Quarantine Station.
RADIO: Master must give at least 24 hours' notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours' notice of ETA at first U.S. discharge port is required. Toledo Port can be contacted through Lorain, Ohio or Port Colborne, Ontario.
TUGS: Available. Not compulsory, but sometimes necessary in bad weather.
BERTHING:

C & O Railway Dock: 2,000 ft. long, 26 ft. depth alongside.
Torco Dock: 1,200 ft. long, 26 ft. depth alongside.
Interlake Steel Corporation: 23 ft. depth alongside.
Mid States Terminals: 27 ft. depth alongside.
Cargill, Inc. Elevator: 27 ft. depth alongside.
Port Authority Facility: 4,100 ft. long, 27 ft. depth alongside.
Anderson Elevator: 27 ft. depth alongside.

CRANES: Located at Port Authority Facility No. 1 – electric gantry cranes 72.5 and 110 tons. Four 25-ton gantry cranes.
CARGO HANDLING FACILITIES: 3 grain elevators at Toledo load vessels at 50,000 b.p.h. There are 3 coal-loading machines, each of which can dump 1×100-ton car per minute, also 1 machine which dumps 2 cars simultaneously, for a max. of 6,000 t.p.h.

Iron pellets are received at new Torco Dock from self-unloading lake vessels. Storage Capacity 800,000 tons.

Liquids handled include petroleum products, industrial molasses, trichlorethylene and perchlorethylene.
STEVEDORES: Provided by Toledo World Terminal, Inc. and Consolidated Dock, Inc.
MEDICAL: All facilities available.
TANKERS:

Hocking Valley Pier: 22 ft. depth alongside.
Ashland Oil Company: 22 ft. depth alongside.
Standard Oil Company: 23 ft. depth alongside.

DENSITY: Fresh water.

UNALASKA (Dutch Harbor), Alaska: 53.54 N. 166.30 W. (See Plan)

DOCUMENTS:
Customs:

Master's Oath (1300).
General Declaration (1301).
Cargo Declaration (1302).
Ship's Stores Declaration (1301).
Crew Effects Declaration (1303).
Clearance from Last Port.

Immigration:

Immigration Documentation (I-418).
Crew/Passenger List.
Landing Permit (I-95).
Visaed Crew List for Shore Leave (Supplied by Immigration).
Passport and (or) Seamens' Book.

PILOTAGE: Compulsory. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Unalaska/Dutch Harbor must make prior arrangements at least 12 hours before entering port. The following information must be included:

1. Name/Call Sign of vessel.
2. Nationality.
3. Length, draft and g.r.t.

Pilot Boarding Station:
Lat. 53° 55′ 00″ N., Long. 166° 29′ 00″ W. 1 mile (1.61 km.) East of Ulakta Head. Pilots, tugboats, Harbour Master and shipping Agents standby on VHF Channel 16 (156.8 MHz).

Berthing:

(a) Pilot – Compulsory. Shifting of and EDT requires 1 hour advance notification.

(b) Berths arranged by Agent in advance.

(c) 1 small tug available annually. Circumstances may arise when other tugs are available for ship assistance.

(d) Lineman – Arranged through ship's Agent.

(e) Boatmen – Arranged through ship's Agent.

ANCHORAGE:
Outer Anchorage: Lat. 53° 54′ 00″ N. to Lat. 53° 55′ 00″ N. at Long. 166° 27′ 00″ W., Rocky, Depth 12 fathoms.
Inner Anchorages: Domestic and other vessels which have cleared customs.

1. Dutch Harbor: Lat. 53° 54′ 00″ N., Long. 166° 31′ 20″ W., mud, depth 18 fathoms.
2. Iliuliuk Bay: Lat. 53° 52′ 40″ N., Long. 166° 31′ 10″ W., mud, depth 14 fathoms.
3. Captain's Bay: Lat. 53° 52′ 00″ N., Long. 166° 33′ 33″ W., mud, depth 15 fathoms.
4. Nateekin Bay: Lat. 53° 53′ 00″ N., Long. 166° 37′ 00″ W., mud, depth 17 fathoms.
5. Broad Bay:
   (a) Lat. 53° 55′ 05″ N., Long. 166° 36′ 30″ W.
   (b) Lat. 53° 56′ 05″ N., Long. 166° 36′ 30″ W.

Must check with the U.S. Coast Guard and the Alaska Department of Fish and Game prior to anchoring or placing an oil rig at these locations. More locations may be forthcoming.
Note: When anchoring in Dutch Harbor, no vessel may anchor in the glide path to the airport.

MAX. SIZE: No restrictions except draft at various facilities and through the East Channel 24 ft., Rocky Bottom at MLLW.

RADIO:

(a) Department of Public Safety, Harbour Master, Pilots, Tugs, Shipping Agents and National Marine Fisheries Observer Transfer Station standby on Marine VHF Channel 16. 4125 A kHz.

(b) Alaska Department of Fish and Game and the Alaska Department of Fish and Wildlife, (State Troopers) standby on Marine VHF Channels 6 and 16. 4125 A kHz.

(c) Marine Operator calls vessels on Marine VHF Channel 16 and receives all radio traffic on VHF Channel 28.

(d) All other traffic stands by on Marine VHF Channel 6.

TUGS: Padilla Tug Co. and Dunlap Towing.
Boatmen:
Victory Services – VHF Channel 78.
Ballyhoo Services – VHF Channel 16.

BERTHING:

Berth No.	*Wharf Length* (ft.)	*Depth at MLLW* (ft.)	*Remarks*
1	1144	30	City Dock and Petro Marine tank farm – Warehouse available.

4. Capt. Wolslenholm, P.O.Box 3313, Anchorage, Alaska 99510. Tel: (907) 277-5109.

REPAIRS/SERVICES: Most deck, hull, engine, radar, RT, hydraulic, refrigeration and almost all types of marine electroni electric repairs. Divers available for underwater surveys and repa

GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gan used.

OPENING/CLOSING HATCHES: Stevedores or ship's crew which to ship's advantage.

REPATRIATION: Crew changes and repatriation can be carried ou little difficulty.

AIRPORT: No more than 4.5 miles from any facilities and adjace City Dock. Daily flights to Anchorage with domestic and interna connections. Peninsular Airways, Mark Air and Aleutian Aire Lt charter service state wide.

TIME: GMT minus 9 hours in Winter, and GMT minus 8 hour Summer. First Sunday in April clocks advanced 1 hour. Last Sunda October clocks retarded 1 hour.

HOLIDAYS: New Year's Day, Lincoln's Birthday, Washington's Birth (3rd Monday in February), Seward's Day (last Monday in Ma Memorial Day (last Monday in May), Independence Day, Labor D Alaska Day (18th day in October), Veteran's Day (November 1 Thanksgiving Day and Christmas Day and every Sunday and every designated by public proclamation by the President of the United St or the Governor of the state as a legal holiday.

Port Department on duty from 0700 hrs. to 2400 hrs. every day.

POLICE/FIRE/AMBULANCE: Tel: (907) 581-1233; Emergency 911; VHF Channel 16, 24 hours a day.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard. D – Ask operator for Zenith 5555 or 2182 kHz.

GENERAL: Fishing vessel's wide lights and searchlights must be tur out prior to vessel entering port.

AUTHORITY: City of Unalaska, P.O.Box 89, Unalaska, Alaska 996 *Tel:* (907) 581-1254. *FAX:* (907) 581-2519. *Contact:* Harbour Maste

VALDEZ, Alaska: 61.07 N. 146.21 W. **(See Pla**
Also see "Valdez Marine Terminal".

Located at head of Valdez Arm in Prince William Sound.

DOCUMENTS: See "Anchorage, Alaska".

APPROACHES: Via Prince William Sound to the Valdez Pilot Statio

PILOTAGE: Pilots board approx. 2 miles North of Busby Light.

MAX. SIZE: Harbour depth over 300 ft. Tides: diurnal range 12 ft. A see "Berthing" and also see "Valdez Marine Terminal".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illne Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany)

ANCHORAGE: Excellent, close by dock. Bay is too deep.

CUSTOMS: Quarantine, local. Immigration and Customs fr Anchorage.

TUGS: Limited availability.

BERTHING: Valdez City Dock: 26 ft. MLLW. 600 ft. long by 60 ft. wi Stevedore provides equipment which includes fork-lifts and 2×100 t mobile cranes and 1×150 ton mobile crane.
Floating Quay: Length 700 ft., width 100 ft. Mobile cranes availab Facilities for Lo/Lo and Ro/Ro.

STEVEDORES: 3 gangs.

MEDICAL: 15-bed hospital, 3 doctors and 1 dentist available.

TANKERS: *Tesoro Petroleum, Petroleum Dock:* Length 200 ft., wi 40 ft., depth 36 ft. at MLLW.

Also see "Valdez Marine Terminal".

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Minor repairs only.

TRANSPORTATION: Air; highway to Fairbanks and Anchorage.

GARBAGE DISPOSAL: Service is available, truck or dumps provided. Charges: Non-regulated $ 125.00 per truck load. Regula $ 14.00 per pound (50 pound minimum). Contact Port Director. Tel: 90 835-4313.

WASTE OIL DISPOSAL: Available by contractor. For arrangeme contact Port Director (see above).

AUTHORITY: City of Valdez, P.O.Box 307, Valdez, Alaska 9968 U.S.A. *Tel:* 907-835-4313. *FAX:* 907-835-2992. *Contact:* Thom W. McAlister, Port Director. Tim Lopez, Harbour Master.

VALDEZ MARINE TERMINAL, Alaska:
61.05 N. 146.24 W. **(See Pla**

OPERATORS: Alyeska Pipeline Service Company.

The terminal does not provide any tug, launch or pilotage assistan for the berthing or unberthing of tankers calling at the terminal. The services, as well as any other tanker services, must be arrang separately by tanker owners.

LOCATION: The Trans-Alaska Pipeline Valdez Marine Termina situated on the Southern shore of Port Valdez.

Port Valdez is a natural deep-water fjord located at the N.E. par Prince William Sound which provides access from the Gulf of Alas Port Valdez is about 12 miles long and 2.5 miles wide, is surround by steeply rising mountains, and remains ice free throughout the ye The approach to Port Valdez is by way of Valdez Arm, a deep-wa channel with a minimum width of approximately 3,000 ft.

The overland approach to the site, which is close to the mouth of the Lowe river, is by road about 6 miles long connecting the terminal with the Richardson Highway. The town of Valdez is 14 miles from the terminal by this route. The distance by boat across to Port Valdez is approx. 2.5 miles.

The terminal operates 24 hours per day, 7 days per week, throughout the year.

The administrative offices will normally be open between 0800 and 1630 hrs., Monday through Friday. The office telephone number is (907) 835-6620.

DOCUMENTS:

Certificate of Financial Responsibility.
SOLAS Safety Equipment.
SOLAS Safety Construction, or for U.S. documented vessels: U.S. Coast Guard Certificate of Inspection.
SOLAS Radiotelegraphy Certificate.
Crew Lists.
Derat Certificate.
Clearance from Last Port.

PILOTAGE: The Pilot boards off Blight Reef. Arrangements to be made by vessel's Agent.

ARRIVAL ADVICE: Masters of vessels bound for the terminal must advise the terminal as follows:

Last Port ETA: Tankers en route to the terminal, upon departure from their last port of call prior to Valdez, will send a telegram or telex to Alyeska Pipeline Service Company, Valdez, Alaska, Telex No. 090-26-564 (Answerback: Alyeska Valz) advising the estimated Alaskan local time and date of arrival.

72-hour ETA: Not less than 72 hours, unless transit time is less than 72 hours, prior to arrival at Cape Hinchinbrook, tankers will send a telex or telegram to Alyeska Pipeline Service Company providing the terminal with the following information:

a. ETA at Cape Hinchinbrook.
b. Quantity of ballast to be pumped ashore and grade of last cargo.
c. Quantity of oil to be loaded.
d. Distance from the bow to cargo manifolds.
e. Size, number and type of cargo connections.
} At first call to Terminal. Not necessary on subsequent voyages.
f. Amount of provisions and stores to be loaded.

Final ETA: Tankers will send a final ETA, 24 hours in advance of their arrival. This 24 hour ETA shall be as accurate as possible and tankers will notify the terminal whenever the arrival time changes by more than 3 hours.

Notice of Arrival: After entering the Coast Guard's Prince William Sound Vessel Traffic Service, vessels ready to commence loading or deballasting should give immediate notice to the terminal. This notice is extremely important as it can affect berthing priority.

Coastguard Notification: Terminal will advise USCG at Valdez of all ETAs received.

AMVER Participation: The Notice of Arrival requirement to be given to the U.S. Coast Guard Captain of the Port in Valdez, Alaska, can be met if vessels participate in the Automated Mutual-assistance Vessel Rescue System (AMVER). Participation in AMVER will also make the Coast Guard's Prince William Sound Vessel Traffic Service aware of the tankers that will be entering the service.

Initial Radio Contact: Ship-to-shore radio telephone calls can be made to the terminal, (907)-835-2261, 24 hours a day by normal commercial Channels.

RADIO: All times are GMT – following information produced as a "guide" and subject to change.

(4) RCA – Alascom Juneau (WGG 58). Voice (AM) – 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).
(5) RCA – Alascom Ketchikan (WGG 56). Voice (AM) – 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).

VHF: The Alyeska Pipeline Service Company operates a VHF – FM base station in Valdez, Alaska under the call sign "WAB – 952". This base station is maintained for the purpose of transacting company business with either inbound or outbound vessels and is open 24 hours a day. (Transmit/receive range of this station is limited to Port Valdez.) The official language for all communications shall be English.

Channel	*Frequency*	*Use*	*At*
10	156.500 MHz	Intership and Ship to Coast Guard	A – B – C
16	156.800 MHz	Distress – Safety and Calling	A – B – C
A –		Contingency Management Centre	
B –		Oil Contingency Warehouse	
C –		Operational Control Centre	

The VHF – FM marine radio system utilised by the terminal is compatible with the Prince William Sound Vessel Traffic Service which is operated by the U.S. Coast Guard in Valdez, Alaska. The USCG Vessel Traffic Service will have VHF – FM radio-telephone coverage extending beyond Cape Hinchinbrook and including Prince William Sound, Valdez Arm, and Port Valdez. The tugs available at the terminal will also be equipped with VHF – FM transceivers.

TUGS: 2×7,000 h.p. and 1×9,000 h.p. twin-screw tugs and 2×300 h.p., single-screw mooring launches are on standby at the terminal to provide oil spill containment, cleanup and contingency services and fire fighting services as required by the terminal. The tugs are equipped with telescoping fire monitors and will be capable of providing 3,500 g.p.m. of foam or fire water at 150 p.s.i.g. at an elevation 70 ft. above the tug's waterline. The tugs are equipped with VHF-FM radio-telephone communication equipment. Should tankers desire to contact the tugs, the tugs may be reached by calling on Channel 16 (156.80 MHz).

The tugs and mooring launches are available to provide berthing and unberthing services to tankers calling at the terminal.

BERTHING: *Berth Priority:* Berth priority and berthing order will be determined by the Terminal Marine Superintendent who will use the general guideline of assigning tankers and berths in the order by which tankers enter the Prince William Sound Vessel Traffic Service and are in all respects ready to discharge ballast or load.

Procedures: Tugs will be dispatched by the Marine Shift Supervisor to meet inbound tankers and to assist in berthing at the nominated berth. The Master shall remain solely responsible, on behalf of his owners, for the safety and the proper navigation of his vessel. Manoeuvring power must be available on the main engines during berthing operations. The positioning of the tanker's loading manifold in relation to the metal loading arms has to be carried out to a proper alignment, as required by the berth operator.

Maximum Allowable Berthing Velocities: The following table gives the designed maximum allowable berthing velocities for Berths No. 1, 3, 4, and 5. The velocities are given in inches per second for the various size tankers in the 40% ballast condition:

	Berth No. 1	Berths No. 3, 4 and 5
85,000 d.w.t.	9 in./sec.	12 in./sec.
120,000 d.w.t.	8 in./sec.	11 in./sec.
265,000 d.w.t.	—	7 in./sec.

Note:
(a) 1 knot=20.2 in./sec.
(b) Velocities are given for a line normal (perpendicular) to the axis of the dock or the berthing dolphins.

Mooring Hooks and Mooring Capstans: Each berthing dolphin and each mooring dolphin will be equipped with a mooring capstan and either 2 or 3 quick-release mooring hooks. Berthing dolphins will have double quick-release hooks, and the mooring dolphins will have triple hooks.

The recommended mooring line arrangement diagrams included in the "Plans" show the location of these double and triple hooks. Since Berth No. 1 has no berthing dolphins, the 4 double quick-release hooks are located on the loading dock.

These mooring hooks are designed to service 1 mooring line per hook. Thus, no more than 3 lines should be led to any mooring dolphin nor should more than 2 lines be led to any berthing dolphin. These mooring hooks may be released locally.

Each mooring capstan will be mounted on, and form an integral part of, the associated double or triple quick-release mooring hook. This will provide a mooring capstan to assist in securing mooring lines at every berthing dolphin, mooring dolphin, and on the floating berth loading dock.

These mooring capstans are designed to give a minimum running pull of 2,000 kg. (4400 lb.) at a rate of 30 m. (98.4 ft.) per minute. The capstan will be positioned at a height sufficient to prevent mooring lines and messengers from becoming snarled on the quick-release hooks.

Mooring launches will be used to assist the tanker in running mooring lines to the mooring dolphins at each berth.

The terminal will provide suitable messengers for heaving in mooring lines from the launches.

Mooring Lines: Mooring arrangements shall be satisfactory to the Marine Superintendent. All critical moorings shall be of similar size and elasticity. Ropes of different material from those used to moor the ship may be used for positioning the vessel but shall not count as part of the final moorings. It is required that in ships of 90,000 d.w.t. and greater all final moorings shall be wire rope. Nylon tails may be used if fitted to all moorings. Ships should be outfitted with sufficient moorings of similar material for normal moorings. Ropes of different material may be used in emergency.

Moorings While Alongside Berth: Tankers must at all times remain adequately secured alongside the berth. Moorings must be kept at an even tension, avoiding a slack line or varying tensioning situation. Should such a situation arise and not be immediately rectified by the ship's crew after communication with the deck officer, the berth operator will suspend any transfer operation. All vessels fitted with tension winches should apply brakes once the tanker is moored and shall not leave winches in the self-tensioning position.

Emergency Towing Wires: While at a loading berth, tankers will provide emergency towing wires positioned at both the offshore bow and stern. The wires shall be in good condition, have an eye in each end, and be of adequate strength to move the vessel off the dock. The outboard eye shall be maintained at water level, and slack aboard ship shall be secured with small pieces of fibre line.

Mooring Line Arrangement Diagrams: (See "Plans"). The recommended mooring line arrangement diagrams are provided in the "Plans" as guidelines to acquaint the tanker Master with the general mooring line arrangement for the loading berths at the terminal. These arrangements are indicative of the minimum suggested number of lines and do not preclude the Master from using additional lines.

TANKER REQUIREMENTS: *General:* Certain requirements of governmental agencies are in effect at the terminal in order to minimise the chances for a pollution incident. These requirements apply to all tankers calling at the terminal.

Operations at the terminal are primarily aimed toward the safe loading of tankers and the prevention of collisions and groundings of vessels that call at the terminal. These aims will be met by insisting upon and utilising conventionally constructed tank vessels manned by skilled crews, use of positive vessel traffic control within Prince William Sound and Port Valdez, and use of all traffic advisory and communications services in West Coast ports. The purpose of the following requirements for tankers calling at the terminal is to materially enhance tanker loading and discharge operations and to increase the safety of navigation so that the danger of pollution from oil spills is substantially reduced.

Safe Navigation: Tankers will observe the rules and directions issued by the U.S. Coast Guard as operator of the Prince William Sound Vessel Traffic Service. These rules and directions will pertain to communications check points, ETAs, traffic lane separation, anchorages, one-way traffic, speed, etc.

In addition to the normal instruments used in celestial navigation and piloting (sextant, pelorus, etc.), the following electronic devices must be aboard and in good working order:

a. Fathometer/Depth Sounder.
b. Loran C Receiver.
c. Two Independent Radar Systems. (10 cm. and 3 cm.).
d. Radio Direction Finder.

All vessels must have a qualified Pilot aboard for the transit of Prince William Sound and Port Valdez.

Communications: Tankers calling at the terminal will be required to have the following communications equipment aboard and in good operating condition:

a. VHF – FM radio-telephone with sufficient Channels and speakers to comply with the Prince William Sound Vessel Traffic Service operating rules and the Bridge-to-Bridge Radiotelephone Act.
b. Radiotelegraph.
c. Portable UHF transceiver will be supplied by the terminal.
d. Single sideband radio.

The portable UHF transceiver shall have at least five Channels which are tuned to the berth frequencies listed.

Additional Equipment: Tankers calling at the terminal will be required to have the following additional equipment:

a. Tankers must carry standard 6 in. hose sufficient to make at least 50 ft. in length for emergency lightering purposes.

b. Accommodation ladders and Jacob's ladders must be of sufficient integrity and free from ice and snow to permit safe embarking and disembarking by the Pilot.

c. Mooring lines must be of sufficient size, strength, and quantity to permit safe mooring of the vessel.

d. Manifold reducers, connectors, and extensions must be made of steel. Cast iron reducers will not be permitted.

e. Tankers which call at the terminal will be required to retain all solid waste refuse aboard the vessel, or use a suitable sewage treatment plant before discharge.

f. All ullage caps will remain closed during loading except during gauging or sampling.

g. Prince William Sound emergency towing cable package.

Operational Requirements: The following procedural and operational requirements are listed in order to make tanker Owners and Masters aware of some additional safety and anti-pollution measures in effect at the terminal. These requirements will be restated in the sections pertaining to the pre-loading inspection and cargo loading.

a. No repairs to radars shall be made while a vessel is moored to the loading berth unless authorised by the Terminal Marine Supervisor.

b. The tanker's main CW wireless set must be de-energized switched off while alongside the loading berth.

c. Tank tops shall remain closed during loading opera Petroleum vapours shall be vented through mast risers or stand at an appropriate height above the main deck.

d. Ship's crew will assist with connecting and disconnecting loa arms to and from the vessel's cargo transfer manifold. Assurance the arms are secured properly without damage shall be observed d pre-loading inspection. However, as a convenience the shore crew aid the ship's crew in connecting loading arms to the ship's manifo the shore crew will be more familiar with the shoreside fa connection.

e. All sea valves connected to the cargo piping system sha sealed in the closed position prior to loading oil.

f. Prior to commencement of loading operations, a joint inspec of the vessel and a pre-transfer conference will be held by the Term Marine Supervisor and the tanker officer in charge.

g. No repairs that would result in immobilisation of the vessel s be carried out while alongside of the loading berths unless the Term Marine Supervisor specifically authorises such work.

PRE-LOADING INSPECTION: *Pre-transfer conference and joint sa inspection:* Prior to the discharging of ballast from cargo tanks or loa of oil, a pre-transfer conference and a joint safety inspection wi conducted by the Terminal Marine Supervisor and a responsible officer aboard the tanker who will be in charge of bulk liquid trans aboard the tanker.

The purpose of the pre-transfer conference and the joint sa inspection is to insure that both the terminal and the tanker are suita and ready for safe loading and handling of oil.

The Check List is designed to meet the following requirements:

a. Section 4.4 of the International Oil Tanker and Terminal Sa Guide which relates to the agreed procedures and safety checks p to the commencement of cargo loading.

b. Title 46, U.S. Code of Federal Regulations, Section 35.35 relating to a Declaration of Inspection for Tank Vessels.

c. Title 33, U.S. Code of Federal Regulations, Section 156.1 relating to a Declaration of Inspection prior to the transfer of bulk liq cargo from a shore facility to a large vessel.

The Check List is to be taken aboard the tanker by the Terminal Ma Supervisor and shall be used during the pre-transfer conference a the joint safety inspection of the tank vessel to insure compliance w applicable regulations and safety standards. Columns are provided the Check List for the Terminal Marine Supervisor and the tanker pers in-charge to initial, indicating that the requirements have been met. T original of the check list shall remain aboard the tanker, and a copy s be returned to the Terminal Marine Supervisor for subsequent deli to the berth operator.

Terminal personnel are authorised to suspend oil transfer operati if any of the safety rules listed or on the check list are not observed if any other danger is believed to exist.

The Master of the tanker or his representative has the right to s down loading operations in the event he feels shore operations unsafe.

During the pre-transfer conference, the Terminal Marine Superv shall provide the responsible ship's officer with a printed sheet detai description and location of the fire-fighting system and the ot emergency systems at the terminal in general and at the berth to wh the tanker is moored in particular. The Terminal Marine Supervisor s also advise the vessel if any unusual or dangerous weather conditi are forecast or expected.

As the shifts on the berth change, the relieving Terminal Mar Supervisor and berth operator shall assure themselves that all conditi pertinent to their responsibilities are as previously agreed to, and s sign the copy of the Declaration of Inspection. The relieving offi aboard the tanker shall assure himself that the original conditions exist and shall sign the original of the Declaration of Inspection abo the tanker. These relieving personnel will then become the person charge of the transfer operation for the terminal and the tan respectively.

BALLAST: *Ballast Quantities:* The terminal is to be informed of approximate quantities of segregated clean and dirty ballast in Master's pre-arrival message. This message should also state wh the ballast was shipped and the grade of last cargo.

Ballast Reception Facilities: The terminal facilities will include th 430,000-barrel ballast reception tanks. Discharge of dirty ballast wil by way of the four 12 in. loading arms (Chicksans) on Berth No. 1 the four 16 in. loading arms on Berths No. 3, 4 and 5. These load arms connect to 20 in. lines at the berths and lead into a 42 in. connecting each berth to the ballast reception tanks. Although the sh lines are insulated, they are not heat traced and there are no boos pumps to assist in the discharge of dirty ballast.

No. 5 Berth is situated approx. 1.25 miles from the reception ta and has a possible head of 150 ft. Max. pressure 40 p.s.i. (approx

In the event of any stripping problems, it is recommended that ta containing unpumpable ballast be stripped internally to the slop tank that the Load-on-top procedures be adopted.

Segregated Ballast: Only segregated ballast will be permitted to discharged overboard. Segregated ballast is defined as ballast wh that is introduced into a tank which is completely separated from cargo oil and the oil fuel system and which is permanently allocated the carriage of ballast. The deck log book must record all times of bal discharge and when pumps are started or stopped. This log must indicate whether or not the segregated ballast is being dropped in initial stages to sea level. A close watch must be maintained on overside discharge, with a deck floodlight or portable explosion-pr light being trained on the discharge during hours of darkness. If th are any indications of discolouration or sheen, discharge must suspended and an investigation must be carried out. If there is any do as to the quality of the segregated ballast, all discharge will be mi into the shore reception facilities.

Dirty Ballast: All ballast contained in any compartment or tank used for the carriage of oil will be classed as dirty no matter how clean the ballast may appear to be. No ballast carried in cargo tanks may be discharged at sea or in port.

After the connection of the loading arms has been completed and the suitable valves between the arms and the ballast reception have been opened, permission to commence discharge will be given to the responsible tanker officer by the berth operator who will have received approval from the Operations Control Centre (OCC).

Contact between the tanker and the terminal will be by means of the UHF radio that will be placed on board by the Supervisor. As during all transfer operations, there will be a continuous watch near the ship's manifold. In the event of an emergency on the berth, pressing of the emergency alarm will activate the valve closing mechanism.

On hearing this signal, the Crew member at the manifold must stop the ship's ballast pumps to avoid damage by pumping against a closed valve system ashore. (See "Emergency Procedures"). On commencing discharge of dirty ballast and at frequent intervals during the discharge, a watch will be kept on the area around the sea valves even though the sea valves have been inspected during the initial safety checks and a seal has been placed on them by the inspecting Terminal Marine Supervisor. Any indications of any oily sheen will necessitate a shutdown of the discharge pumps and an investigation to be carried out before any further ballast can be discharged. Thirty minutes before completion of discharge, the responsible tanker officer will inform the berth operator who will in turn advise the OCC and the duty Terminal Marine Supervisor.

On completion of the discharge and after pumps have been stopped, the loading arm(s) used for dirty ballast discharge must be drained back into the slop tank. On vessels with an inert gas system, gauging will be taken by way of the deck purge pipes to determine that tanks are empty. It is not intended that vessels will depressure cargo tanks for visual inspections, nor should tank lids be opened on any compartment that is not gas free.

All safety regulations applicable during the loading of oil will also apply during the discharge of ballast.

Governmental Ballast Discharge Requirements:

State of Alaska: The State of Alaska requires that the Master of a vessel scheduled to take on any petroleum product or cargo, complete and sign the State of Alaska Department of Environmental Conservation Ballast Water Discharge Certificate Affidavit. To support this affidavit, the Master must be prepared to produce both deck and engine room log books and a legible copy of that portion of the Oil Record Book relevant to the sea passage from last discharge port to the terminal.

Federal Requirements: Prior to loading oil on any vessel, the terminal is required by the United States Department of the Interior to obtain from the Master of the vessel a legible copy of that part of the Oil Record Book that pertains to the voyage of the vessel to the terminal from the vessel's last oil discharge port. This legible copy shall be certified under oath by the Master as being true and correct. If the vessel is not required to maintain an Oil Record Book or similar records, the Master of the vessel is required to provide the terminal with an affidavit, duly sworn to and signed, stating any and all facts bearing upon any discharge of oil or oily water from the vessel during its voyage to the terminal from its last oil discharge port.

Should the Master be unable to comply with the preceding requirement or if it appears from the Oil Record Book or other documentation that a vessel has discharged oil or oily water during its voyage to the terminal, the terminal is required to promptly notify the Department of the Interior's representative, the Authorised Officer. Tankers discharging ballast water or other oily mixtures may be subject to penalties.

OIL CHARACTERISTICS: The predominent oil to be available at the terminal is currently North Slope Crude Oil. The following preliminary characteristics of North Slope Crude Oil are given to acquaint the Master and the cargo officers of tankers that will call at the terminal with the general properties of the cargo they will load.

Specific Gravity: 0.8933 at 60°F.
API Gravity: 27.0° API.
Pour Point: + 15°F.
Viscosity: 73.5 SSU at 100°F., 169 SSU at 60°F.
Reid Vapour Pressure: 4.0-4.5 lbs.
Sulphur Content: 0.94 per cent by weight.
Waxing: 85-117°F. (begins to precipitate). 50-55°F. (bulk of wax begins to come out of solution).
Mercaptan Sulphur: approx. 14 parts per million.
Loading temperature: approx. 100°F.
Dissolved H_2S: less than 0.2 parts per million.

LOADING FACILITIES: *General:* All loading operations will be accomplished in accordance with the joint inspection pre-transfer conference. Loading operations cannot commence until the vessel has complied with all State of Alaska and Federal Requirements and all required documentation has been provided.

Crew Responsibilities: Ship's crews will be responsible for assisting with handling the loading arms on board the tanker, furnishing and making the adaptor connections, removing blind flanges, and guiding the loading arms (Chicksans) to the appropriate manifold connections. However, as a convenience, the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection. The Chicksan loading arms and couplings are hydraulically controlled by the berth operator who will be in constant voice communication with the individual responsible for the connection by means of the UHF portable radio that will be supplied to all vessels by the Supervisor.

If required, the terminal will supply 10 in. – 16 in. reducers at Berth No. 1 and 12 in. – 16 in. at Berths No. 3, 4 and 5.

Check List Requirements: After the Terminal Marine Supervisor is satisfied that all the safety requirements have been complied with, permission will be given to commence loading. All operations in connection with starting of loading, switching of tanks, and topping off will be the responsibility of the responsible ship's officers.

Before the maximum pressure or loading rates agreed to at the pre-transfer conference are reached, slow loading will be started and the responsible ship's officer will ensure that the cargo is flowing to designated tanks, thus ensuring that all block valves separating lines are open. On completion of this check and after advising the berth operator, the pressure/rate will be increased to the maximum previously agreed by the Master, or the officer in charge.

A responsible member of the crew will remain near the manifold within sight of the berth operator. This is in addition to the officer on cargo watch who, at frequent intervals, will check the state of loading with the berth operator by means of the UHF radio. This officer will also advise the berth operator when changes in the loading rate are required.

The rate of flow into the tanker can be observed on the large digital readout situated by the berth operator's control position.

Loading Suspension: Terminal: Terminal personnel will suspend loading operations if any safety rules are not followed, or if terminal personnel supervising loading operations believe any other danger exists, providing adequate notice is given to the responsible ship's officer.

Tanker: The Master is required to shut down loading if he feels that shore operations are unsafe, provided adequate advance notice is given to berth personnel.

Emergency Shutdown: In the event of an emergency (See "Emergency Procedures") the following types of shutdown could occur:

(1) "Danger" shutdown.
  (a) All berth block valves close.
  (b) Metering upstream block valves close.
  (c) Berth control valves close – one for each loading arm (in 5, 5.5, 6.0, and 6.5 seconds, respectively, to prevent surge to line).
(2) Fire shutdown
  (a) The preceding valve closures plus fire alarm and start fire pumps.
(3) Emergency shutdown, one per arm, closes control valve only.
(4) Low vapour pressure on any crude tank – initiates (1) preceding.

Pushbuttons for (1) preceding are located in berth area plus one on berth operator's alarm panel.

Pushbuttons for (2) 1 on roadway; 1 on roadway at land; 1 in Power Distribution Cabinet (PDC); 1 in Berth Operator Control (BOC) alarm panel; 1 in loading arm area.

Pushbutton for (3) 1 local at each valve.

Topping Off: Near the end of loading when topping off, the responsible ship's officer will request the gradual reduction of loading rate for topping off operations. This reduction will be achieved by the berth operator slowly closing the berth loading valves. The berth operator will progressively reduce the opening of the berth control valves and will take loading arms out of service, until the point when all berth control valves and block valves are finally closed, when advised by the ship's officer "Shut Down" or "Finished Loading". The loading arms will then be drained into a ship's tank.

Disconnecting: On being satisfied that loading arms and ship's manifold are empty, the order will be given from the responsible ship's officer to the berth operator to uncouple the quick release couplings.

During the period of disconnecting, the USCG Vessel Traffic Control Centre at Valdez will have been advised. Tugs will be on standby, and providing that there are no other ship movements that would interfere with sailing, the "Early Departure System" will be carried out. The actual Bill of Lading figures will be sent to the master by W/T or Telex after departure.

COMPLETION/DEPARTURE PROCEDURE: *Topping-Off:* As the tanker begins the topping off stage, the responsible ship's officer shall notify the berth operator who will in turn keep the OCC informed as the cargo loading rate is reduced. When the ship's officer estimates approximately one hour remains in the loading process, he shall notify the berth operator.

Tug Assistance: After being notified by the tanker that one hour remains in the loading sequence, the berth operator shall notify the OCC and the Terminal Marine Supervisor. The OCC shall continue to monitor the topping off process and the Terminal Marine Supervisor shall place the vessel's pre-arranged tugs on standby. The tugs shall be alongside the vessel after all loading arms have been disconnected and before any mooring lines are let go.

U.S. Coast Guard Vessel Traffic Service: The departure of tankers from the terminal shall be in accordance with the published standard operating procedures for the Prince William Sound Vessel Traffic Service. The Coast Guard Operations Centre located in Valdez shall be the directing authority for the operation of the vessel traffic service. The Terminal Marine Supervisor will notify the USCG-VTS one hour prior to the completion of loading and again when loading is complete. When the Terminal Marine Supervisor notifies the USCG-VTS that loading is complete, he will verify the tanker's status to enter the Vessel Traffic Service and will check on any inbound vessel traffic.

SAFETY: After the tanker is secured, the Terminal Marine Supervisor will board the tanker to contact the Master or his representative to:

- provide information on terminal safety regulations.
- agree on designated smoking areas
- advise ship's personnel on "Work Permit" and "Hot Work Permit" procedures.
- present ship/shore Safety Check List.
- present printed sheet describing terminal emergency procedures and fire fighting capabilities.

The following are **some** of the safety requirements.

Warning Signs, Lights, and Signals – Upon arrival at the terminal, a tanker shall display the following notice at the gangway:

WARNING
NO OPEN LIGHTS
NO SMOKING
NO VISITORS

During transfer of oil, and when in the non-gas free condition a red signal (flag by day and electric lantern at night) shall be displayed so that it is visible from all sides.

Blowing tubes – Funnel uptakes and boiler tubes will not be blown while a tanker is berthed at the terminal.

Use of Tools – No chipping or other operation likely to produce sparks will be allowed in any designated hazardous area. The Terminal Marine Supervisor and the responsible ship's officer shall both be satisfied that there is no such activity on the vessel or on the facility.

Flashlights, Hand Torches, Lanterns – Only self-contained battery powered flashlights, hand torches, lamps and lanterns, approved by USCG will be permitted to be used aboard the vessel or on the berths.

Main Engine – While berthed at the terminal, the tanker's main engines, steering machinery, and other essential manoeuvring equipment shall be maintained on standby status to permit the tanker to move from the berth on short notice.

Communications Equipment – A tanker's main transmitter shall be turned off and the main transmitting aerials shall be grounded whenever a tanker is alongside a loading berth at the terminal.

VHF-FM radiotelephone equipment, both portable and fixed, may be used as long as the equipment is permanently installed or intrinsically safe, conforms to FCC marine requirements, USCG requirements, and operates with a power and output of 1 watt or less.

The preceding requirements do not mean that essential servicing of ship's radio equipment cannot take place while alongside a berth. However, suitable arrangements for insuring safety during this work shall be made between the tanker and the terminal, including the securing of an appropriate work permit.

Operating and servicing of radar equipment aboard a tanker berthed at the terminal shall be agreed to by the Terminal Marine Superintendent or Marine Supervisor and shall be the subject of an appropriate work permit.

Vessels Alongside – Unauthorised craft shall be prohibited from securing to a berth at which a tanker is moored.

No craft shall come alongside a tanker while the tanker is handling crude oil or deballasting without the permission of the Terminal Marine Superintendent who shall instruct personnel aboard the craft that smoking, naked light, and galley fire regulations must be observed.

Designated Smoking Areas: Smoking shall be strictly prohibited within an area enclosing all tanker berths and loading docks and on board any tanker while at a berth, except.

(a) in buildings or other shore locations specifically approved for smoking and with such approval notices posted.

(b) on board a tanker in places specified by the Master, and agreed to by the Terminal Marine Supervisor.

Places designated for smoking shall not be outside of any of the accommodation areas. Special precautions shall be taken during conditions that may suggest danger; in particular, conditions of no wind or any indication of unusually high gas concentrations.

The Master is responsible for insuring that all on board are informed of the selected places for smoking and for posting suitable notices.

Only safety matches are permitted in approved smoking areas. The use of lighters is prohibited.

Galley Fires and Cooking Appliances – Galley burners are to be adjusted to insure efficient combustion and to prevent galley stack fires and sparks from incandescent soot. Flues are to be cleaned at regular intervals. When bottled gas equipment is used, the gas shall contain an additive which will give it a distinctive odour. Sufficient fire extinguishers shall always be provided near the galley. Oily rags and fat shall not be allowed to accumulate, and the exhaust fan ventilators shall be kept clean.

While a tanker is at a berth, the use of galley stoves and other cooking appliances with non-immersed elements such as electric hot-plates and toasters shall be permitted provided that the Terminal Marine Supervisor agrees that no hazard exists and that such use is in the galley, in the pantry, or in designated smoking areas.

Work Permits – If repairs are to be carried out on a tanker alongside a berth at the terminal, the responsible ship's officer must discuss and obtain agreement from the Terminal Marine Supervisor on the details of the work to be done. Certain types of repairs will be the subject of written work permits which shall be completed by the responsible ship's officer and authorised by the Terminal Marine Supervisor at the time of the pre-loading inspection Check List. These types of repairs include but are not limited to:

(a) Repairs to main engine, steering machinery, or other manoeuvring equipment which might immobilise the tanker.

(b) Repairs to tanker's radiotelephone or communications equipment.

(c) Repairs to radar equipment.

(d) Repairs to galley equipment and cooking appliances.

Hot Work Permits – Any hot work done at the terminal, either on the berth or aboard a tanker moored to a berth must be approved by the U.S. Coast Guard Captain of the Port, Western Alaska. This approval will be in the form of a signed Hot Work Permit, issued by the U.S. Coastguard.

EMERGENCY PROCEDURES: Fire: The signal for a fire aboard a tanker moored at the terminal shall be 5 prolonged blasts of the ship's whistle or siren supplemented by a continuous sounding of the ship's general alarm. In the event of a fire within the terminal, the tanker shall be notified by the berth operator and, in addition, the terminal fire alarm will also be sounded.

The initial action required of tankers in the event of a fire within the terminal is to prepare for a shutdown of all loading and ballast water discharge arms. This shutdown will be initiated by the terminal and not by the tanker. In case a shutdown does occur, loading and ballast discharge will not be commenced again until the all clear notification has been received from the Terminal Marine Supervisor.

In the event of a fire aboard the tanker or on the loading berth, the initial actions will consist of shutting down all transfer operations. The standby tug, followed by the other tugs, will be dispatched by the OCC to the appropriate berth and the fire water pump shall be started. If necessary, the tanker will be towed off the berth by tugs, using the emergency tow wires. Each berth is equipped with an independent fire water system which includes a 2,000-gallon-per-minute pump and a liquid foam system. Each berth is also equipped with the followin fighting equipment:

(a) 2 fixed foam monitors.

(b) 2 fixed firewater monitors.

(c) 5 fire hydrants.

(d) 3 hose reels.

(e) 1 shore to ship firewater connection including 75 2.5 in. hose.

Each berth also has the capability to be interconnected with the or with fire trucks to provide increased fire-fighting capacity. The system is designed for coverage of fire on the berths only and normally interconnected for use by shipboard firefighters in the eve a fire.

Note: Regardless of any assistance the terminal may render, ve at the berth are expected to put their own emergency procedures effect whenever required.

Man Overboard: In the event of a man overboard from a ta moored at the berth, rescue efforts will be implemented immedia and the Berth Operator shall be advised by UHF radio. The Term Marine Supervisor shall also be notified by the Berth Operator. standby tug and mooring boat shall be advised by the Berth Ope and shall get underway immediately to attempt the rescue.

Life rings will be in position around the loading berth and also o berthing and mooring dolphins. In case of a man overboard, the me authorities will also be alerted by the Berth Operator.

Oil Spills: The notification requirements for an oil spill are deline by Federal Law. The Federal Water Pollution Control Act (FWP requires persons in charge of vessels (among others) to notify appropriate federal agency whenever an oil spill enters navigable wa or the adjoining shoreline. The appropriate agency designated to rec these reports is the U.S. Coast Guard which can be contacted Channel 16, VHF-FM.

Notification of an oil spill shall be passed by the tanker to the b operator who in turn shall inform the Terminal Marine Supervisor.

The terminal will call other agencies that are required to be noti

The terminal will provide any available containment and clea assistance for any oil spill at the terminal. The terminal will activate oil spill response procedures upon notification of an oil spill and s utilise all available personnel, equipment, and resources to limit minimise pollution.

CHARTS/PUBLICATIONS: The following official charts and publicat are recommended for study when planning a voyage to Valdez, Ala and the Terminal:

(a) National Ocean Survey Charts:

Chart Number		*Title*
Old System	*New System*	
8500	531	Gulf of Alaska – Strait of Juan de Fuc Kodiak Island
8502	16013	Cape St. Elias to Shumagain Islands
8551	16700	Prince William Sound
8520	16709	Prince William Sound – Eastern Entran
8519	16708	Prince William Sound – Port Fidalg Valdez Arm, Valdez.

(b) Nautical Chart Catalogue No. 3 – Alaska

(c) United States Coast Pilot No. 9, Cape Spencer to Beaufort (1964) with current supplement.

(d) Tides Tables, West Coast, North and South America (cur year).

(e) Tidal Current Tables, Pacific Coast of North America and (current year).

(f) United States Coast Guard Light List, Vol. III, Pacific Coast Pacific Islands (current year).

(g) Weekly Notice to Mariners published by Defense Mapp Agency Hydrographic Center (DMAHC).

(h) Local Notice to Mariners issued by Commander, Seventee Coast Guard District, Juneau, Alaska.

(i) Radio Navigational Aids, Pacific and Indian Oceans (Publica No. 117B), published by U.S. Hydrographic Office.

WEATHER: *Wind:* The mountains which surround Port Valdez ten constrain the flow of air to either an Easterly or Westerly direction Valdez Narrows, the predominant directions are Northerly and Southe

Jackson Point experiences stronger winds than Valdez Air however, light winds (less than 13 m.p.h.) occur about 85 per cen the time. The prevailing wind directions are S.W. from May thro September and N.E. from October through April. The N.E. Winter w reach gale force but usually do not prevail for long periods. The si well protected from Southwesterly winds but is fully exposed to Northeasterlies and to winds coming off Mineral Creek, directly Nor the facility, approx. 2.5 miles away across Port Valdez.

The occurrence of winds with speed greater than 19 m.p.h. from direction is less than 7 per cent throughout the year.

A wind chill factor chart is presented for use in conducting operat during Winter seasons. As indicated, combinations of low temperat and high winds combine to provide extremely low equiva temperatures. Outdoor operations under these conditions shoul closely supervised to insure that personnel and crewmen do not s from exposure or frostbite.

Precipitation: Precipitation is abundant during all seasons with majority falling during the months July through November. Valdez an average annual precipitation of 62.37 in. with a mean total of 244 of snow per year. Greatest snowfall in a 24-hour period was 43 February 1928. Precipitation of an amount in excess of 0.01 in. oc an average of 170 days per year. Estimate 1 in. rain = 12-15 in. s

Temperature: The mean monthly annual temperature is 35.7°F. recorded extremes of +87°F. (June 1953) and −28°F. (February 19 The month of January is the coldest with a mean daily minimum of 1 and a mean daily maximum of 26°F. The month of July is the war with a mean daily minimum and maximum of 45.2°F. and 60. respectively.

Visibility: Snow or snow with fog are the major causes of reduced visibility during Winter months. At the Valdez Airport, visibilities of 1 mile or less occur 3.7 per cent of the time, annually. Visibilities greater than 5 miles occur 85 per cent of the time.

Tides: The tide at Port Valdez has a diurnal range of 12 ft. and a mean range of 9.7 ft.

Waves: The port is surrounded by mountains and is well protected from the open sea and the wave action within the port is limited to wind-generated waves which are constrained by the fetch available. The maximum calculated wave height is 9.4 ft. from the East with a period of 4.3 seconds. Waves in the order of 6 ft. could occur from the N.W. quarter. An important exception to this is a Tsunami or seismically generated wave which can be far in excess of the heights quoted above. Investigations in 1968 showed mean wave heights 3 ft. to 6 ft. in Winter (independent occurence 0.7 per cent of time) and 2 ft. to 3 ft. in Summer (0.1 per cent of time). Berths at the terminal are designed to withstand waves of 12 ft. with a vessel alongside and 20 ft. when vacant.

Ice: Valdez is an ice-free port as far as tanker operation is concerned. Light ice forms along the banks and in the small boat harbour at Valdez, but this has not interfered with small-boat operations.

Currents: It appears that surface currents measured during calm wind conditions in Port Valdez often oscillate with the tide, moving generally in and out of the port with maximum speeds of 0.5 knot. The Easterly (flooding) surface current during a falling tide may or may not persist throughout the year. Although Volume 9 of the U.S. Coast Pilot for Alaskan waters describes the current in Port Valdez as "too weak and variable to be predicted", measurements of surface current speeds typically show maximums of 0.5 to 1.0 knot.

It is requested that inbound tankers keep the OCC advised of weather conditions in the Gulf of Alaska, Prince William Sound, Valdez Arm, and Valdez Narrows in order that accurate information may be passed to outbound tankers.

VISITORS: Access to the terminal is limited to terminal personnel, authorised governmental personnel and authorised visitors with valid reasons for entry onto the terminal site.

Visitors to the Valdez Marine Terminal are requested to make arrangements through the Administrative Office in advance of their arrival at the Terminal. Authorised visitors shall be met at the main gate, which provides the only land access to the Terminal and is located at the East end of the Terminal site, and shall be escorted through the Terminal area. All persons passing through the main gate shall sign in and out with the guard. Any visitor who arrives at the main gate outside normal working hours of the Administrative Office and who has not made prior arrangements shall be turned away and requested to contact the Administrative Office during normal working hours.

The guard at the main gate shall ask any visitor desiring to meet a tanker crewman to wait at the gate until the vessel is called and arrangements have been made to meet the visitor.

Small boats and other vessel traffic will not be permitted to dock at the terminal site without the approval of the Terminal Marine Supervisor. Only taxicabs with valid passes will be permitted to enter the Terminal site, and any private or commercial vehicles that are permitted in the terminal area will be subject to inspection on entering and departing.

SHORE LEAVE: If tanker personnel return to the Valdez Marine Terminal site in such a condition that they might require assistance to insure their safe return to the ship, they shall remain at the main gate until the guard grants them admittance. Should an escort be required, it will be provided by vessel personnel.

All tanker personnel transiting the Terminal area will be required to carry their United States Merchant Mariner's Document (USMMD) and company identification of tanker owner for identification. These documents shall be presented to the guard at the main gate whenever tanker personnel enter or leave the Terminal site. Should a crewman present himself without these documents, he will be detained and the Master will be called to resolve the matter.

TIME: Alaska Standard Time (150th West meridian) for a zone description of +9(ZD9). Local time is modified from the first Sunday in April to the last Sunday in October by the use of Daylight Saving Time for a zone description of +8 (ZD 8) for Alaska Daylight Saving Time. This time is 1 hour behind that in Seattle and California and 4 hours behind New York.

To avoid confusion, all communications regarding sailing times, sailing dates, arrival times, arrival dates, etc. are to be given in Alaska Local Time.

FRESH WATER: Only in cases of extreme emergency can potable water be supplied and in a very limited quantity.

FUEL: Not available.

POLLUTION: U.S. Federal Pollution Prevention Regulations and Federal Water Pollution Control Act to be strictly observed.

TELEPHONES: Pay telephones will be located in the vicinity of each loading berth for the use of ship's personnel.

Telephones will not be placed aboard tankships calling at the terminal.

AGENCY: Alyeska Pipeline Service Company will not act as Agent for tankers calling at the Valdez Marine Terminal. Any requirements for such services as ship chandler, etc. must be obtained through the Owner's appointed ship's Agent. For security, the Valdez Marine Terminal must be notified of the appointed Agent.

AUTHORITY: Alyeska Pipeline Service Company, Valdez Marine Terminal, P.O.Box 300, Valdez, Alaska 99686. *Tel:* (907) 835-6620. *Telex:* 090-26564. *FAX:* (907) 835-6078. *Contact:* Larry D. Shier, Marine Operations Manager/Port Captain.

BERTHING FACILITIES: The major ship loading facilities include four independent loading berths, numbered 1, 3, 4 and 5. Berth No. 1 is a floating berth whereas Berths No. 3, 4 and 5 are fixed structures.

	Berth No. 1 See Note 1	*Berth No. 3* See Notes 1 and 2	*Berth No. 4* See Notes 1 and 2	*Berth No. 5* See Notes 1 and 2
Vessel Size (Design) d.w.t.	16,000 – 120,000	16,000 – 250,000	16,000 – 265,000	16,000 – 265,000
Type of Berth	Floating dock	Fixed loading platform	Fixed loading platform	Fixed loading platform
Deck Level of Berth above MLLW	32 ft. 8 in.	36 ft. 7 in.	36 ft. 7 in.	36 ft. 7 in.
Depth Alongside at MLLW (ft.)	125	85	85	80
Loading Arms (Number × Size)	4 × 12 in.	4 × 16 in.	4 × 16 in.	4 × 16 in.
Max. Rate Per Loading Arm (bbls.p.h.)	20,000	27,500	27,500	27,500
Max. Design Flow Rate (per berth) (bbls.p.h.)	80,000	110,000	110,000	110,000
Loading Arm Spacing on Operating Dock (ft.)	11	11	11	11
Maximum Ship Manifold Pressure	Pressure alarm points will be set, based upon information given by ship's officers.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Emergency Shutdown	Can be initiated by berth operator or by OCC shut-down complete within 6.5 seconds after initiation.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Access to Ship	42 ft. aluminium gangway	49 ft. 6 in. aluminium gangway	Telescopic Gantry	Telescopic Gantry

Minimum Ship Manifold Spacing 1	—	—	—	—
2	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
3	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
4	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Quick Disconnect Coupling (QDC) Size (in.)	12	16	16	16
Manifold Size Range Acceptable to QDC (in.)	10 to 16	12 to 16	12 to 16	12 to 16

Note: (1) Although all berths are designed to handle vessels in the 16,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 10 in. in diameter. Normally, vessels less than 45,000 d.w.t. will be handled at Berth No. 1.

(2) Because of mooring dolphin limitations, vessels of more than 180,000 d.w.t. would be acceptable only if their deck machinery and mooring leads allowed an efficient bow and stern mooring line pattern. In addition to this requirement, distance from bow to manifold and prevailing weather conditions would have to be considered before berthing of such vessels would be authorised.

VANCOUVER, Washington: 45.36 N. 122.40 W.

(See Plan)

DOCUMENTS: 3 copies of each of the following:
Cargo Manifest.
Stores List.
Crew Cargo List.
Crew List.
One copy of following:
Clearance from last Port.
Tonnage Tax Certificate.
Copy of Vessel register and itinerary of vessel port by port.

PILOTAGE: See "General-Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Only designated anchorages on U.S. Coast and Geodetic Charts are at Tongue Point (Astoria), Oreg. 2 in number and designated on Chart 6151 Columbia River, Pacific Ocean to Harrington Point, as 1 Lower Tongue Point and 2 Upper Tongue Point. Additional locations on Columbia and Willamette Rivers where safe anchorages can be made upon advice of Columbia River Pilots. Anchorage in Vancouver harbour by permission of Harbour Master.

RESTRICTIONS: No restrictions on night entry. State of tide and draft restrictions not applicable to vessels drawing less than 40 ft.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Vancouver maintained at 45 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Vancouver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

RADIO: Route ETA cables through KBLITT Seattle, Wash.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Normally join vessel at designated berth. Tug lines used at no charge.

BERTHING: No special requirements for berthing and no special arrival times required except under particular circumstances.

7 berths. Total length 4,300 ft. Ro/Ro facilities available.

BULK HANDLING FACILITIES: The grain terminal, owned by the Port and operated by the United Grain Corporation, has about 1,000 ft. (305 m.) of dock available. The 7 vessel spouts load 1 vessel at a time at a combined loading rate of 40,000 bushels per hour. The grain terminal can off-load at 18,000 bushels per hour, and they have a storage capacity for 5,000,000 bushels, dry bulk facility with 50,000 ton capacity covered storage. Bottom dump pit and top unload for gondola railcars. Mineral concentrations such as copper concentrate, quartz silica and zinc concentrate. Covered conveyor to special dry bulk dock.

EQUIPMENT: The Port of Vancouver has 3 Whirley cranes, 1 of which is rated at 50 short tons at 60 ft. (18 m.) and 15 short tons at 130 ft. (40 m.) the other 2 Whirley cranes have a capacity of 34 short tons at 60 ft. (18 m.) and 10 short tons at 130 ft. (40 m.). These 3 travelling gantry or Whirley cranes operate on parallel tracks on the face of the dock in conjunction with the double direct transfer tracks.

Bulk materials make up a sizeable portion of the Port's traffic, and consequently, large crane buckets are available for handling these cargoes. In addition, the Port has a special crane bucket for the successful handling of zirconium – a very fine sand material considered a "problem" commodity for efficient and waste-free handling.

The Port maintains a full complement of support equipment. They have 42 lift trucks with 2 – 3.5 ton capacities, 9 lift trucks with 7.5 – 15 ton capacities, 1 lift truck with a 26 ton capacity, along with various straddle-carriers, conveyors, front-end loaders, jitneys – and a range of special attachments and gear for all their equipment (such as prong-lifts for steel coils, grabs and squeezers for paper rolls, push-pull slip sheets for bag goods, cartons and boxes) to handle any special situations or problem with which they might be confronted.

STEVEDORES: Allocation for gangs Mondays through Saturday must be confirmed at 1100 hrs. to the longshore hiring hall. Allocation for gangs Sunday and Monday are made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. afternoon of night gangs are to work.

Marine Terminal Corporation manages Berths No. 8 and 9.

MEDICAL: Any type of medical treatment can be provided and hospital facilities available.

TANKERS: 1 berth. 3 × 6 in. pipe-lines to 21 tanks. Storage capacity 85,800 bbls.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential.

FIRE PRECAUTIONS: Port fire precautions respecting tankers are administered by U.S. Coast Guard, which enforces shipboard regulations under Code of Federal Regulations, Part 46, Sub-part D, Sections 20 to 40; Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; and Fire Marshal, who exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

CONSULS:
Austria
Belgium
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Germany
Great Britain
Iceland
Italy
Japan
Lebanon
Mexico
Netherlands
Norway
Panama
Peru
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: See "Portland, Oregon".

GANGWAY/DECK WATCHMEN: Services at option of vessel Owner/Agent and available through private firms.

OPENING/CLOSING HATCHES: While ship is at dock, opening closing hatches is work of longshoremen. Ship may open or close hatches while under way.

CERTIFICATES: Registered tonnage certificate.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantity. Wine or Spirit, reasonable quantity.

CARGO GEAR: Valid cargo gear certificate required, acceptab U.S. Bureau of Labor Standards.

REPATRIATION: Any arrangements possible for crew changes or o repatriation.

AIRPORT: Airport 10 miles from town, served by 7 regularly schedu airlines with direct service and/or connections domestically and wo wide.

TIME: GMT minus 8 hours. Daylight saving time becomes effec annually on first Sunday in April through last Saturday in October.

HOLIDAYS: Following holidays are recognised: *New Year's D Lincoln's Birthday (Feb. 12th); Washington's Birthday (Feb. 22n Memorial Day (May 30th); *Independence Day (July 4th); *Labour D (1st Monday in September); Columbus Day (Oct. 12th); Veteran's D (Nov. 11th); Thanksgiving Day; *Christmas Day (Dec. 25th); Statew Election Days. Other legal holidays may be proclaimed by State national authority. When holiday falls on Sunday, following Mond observed as holiday. Longshore work performed on any of above-list days is at overtime, which is one-and-a-half time rate. Days marked are stop-work days, viz., no ships will be worked. This also applies July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police Tel: 693-2555; Fire Tel: 693-144 Ambulance provided by several private firms, but can be obtaine through police or fire number.

SERVICES: All services available such as compass adjusting, major minor repairs either with work barges or at ship repair berths; lay ber available; charts available from private companies; all chandle supplies available.

SHORE LEAVE: Crew members permitted ashore except where vess has made first arrival from Communist-controlled port.

IDENTIFICATION CARDS: Immigration Dept. requires Forms No. 5 and No. 31 (Repatriation). Changes can be effected at any U Consulate and are honoured here.

GARBAGE/WASTE OIL DISPOSAL: See "Agriculture" before fi U.S.A. port (Albany).

Vessels requiring discharge of oily waste or garbage at the Port Vancouver shall inquire of the Port's Operations Department for th names of oily waste or garbage contractors. The vessel shall arrang directly with such oily waste or garbage hauler(s) for such services a equipment. Payment of charges for these services and equipme provided by such oily waste or garbage hauler shall be made directly the oily waste or garbage hauler by the vessel, it's agent, owne charterer, or any other party responsible for such payment of charge by the vessel.

The oily waste or garbage haulers are independent contractors a are not agents or employees of the Port of Vancouver, and as such th Port of Vancouver shall not be liable for any act, omission, or negligen of any such oily waste or garbage hauler. Rates and charges assesse against vessels by the Port of Vancouver for use of its facilities services do not include this service or insurance coverage for a potential liability of any oily waste or garbage hauler permitted by th Port of Vancouver. The discharge by a vessel of oily waste or garbag at the Port of Vancouver shall be allowed only in accordance with th terms of this item and applicable Federal, State and Local regulations

The following contractors may be able to facilitate vessel requirements:

Mark Leichner, Vancouver Sanitary, P.O.Box 4698, Vancouve WA 98662-0698. Tel: (206) 892-5370. Contaminated garbage.

Rim Srote, Thermtech, P.O.Box 1105, Tualatin, OR 97062. Tel: (50 625-7575. Contaminated garbage and medical waste.

Rich Janecek, Burlington Environmental Chempro Divisio 5420 N.Lagoon, Portland, OR 97217. Tel: (503) 283-115 Contaminated garbage, hazardous waste and oily waste.

Jeff Daub, American Environmental Management Corporatio 406 Market Street, Kirkland, WA 98033. Tel: (206) 827-2882. Medic waste.

SEAMAN'S CLUBS: Fort Vancouver Seamen's Center, 712 Wes Evergreen Boulevard, P.O.Box 1102, Vancouver, Washington 98666

CURRENCY: U.S.Dollar (U.S.$).

AUTHORITY: Port of Vancouver, P.O.Box 1180, 3103 Lower Rive Road, Vancouver, Washington 98666. *Tel:* (206) 693-3611 or (503) 28 8824. *FAX:* (503) 285-6091. *Contact:* Byron H. Hanke, Executiv Director.

WHITTIER, Alaska: 60.47 N. 148.40 W.

SHIPMASTER'S REPORT: October 1980. (Updated 1988).

GENERAL: Whittier is a small port in position Lat. 60° 47′ N., Lon 148° 40′ W. The population in October 1984 was 250. There are 2 hotel 3 grocery stores, a school and a post office. The port was construct between 1941 to 1943. It was developed as a main supply depot for th storage of oil for the Anchorage area and also as a transhipment po for produce from other areas in the United States. There is regular bar traffic from Seattle and other West coast ports with ammunition, foo merchandise and motor cars. All these are carried aboard flat top rail wagons which can be loaded or discharged at any state of the tide. Th port is operated by the Alaska Railroad system and there is no sho gear of any kind. Whittier is surrounded by very high mountains a there is no road or footpath in or out. There is a very short landing strip suitable for small aircraft but the normal communication is by rail which goes under the mountains in two long tunnels. The journey takes about 1.5 hours and the timetable is frequent in the Summer when a lot of people visit Whittier for boating and fishing or to get the ferry to Valdez. During Winter however the service is about four times a week, weather permitting.

APPROACHES: *Recommended Route to Whittier Pilot:* British Charts BA. 3363 and 3364.

When Smith Island bears 256°×8 miles, vessels should leave the traffic zone and steer 277° passing 1.5 miles South of Naked Island and 1.2 miles North of Point Eleanor. Then alter course to 281° passing 1 mile South of Mears Point. After passing Mears Point, steer 350° through Ferry Passage and alter to 280° off Point Culrose Light to the pilot station. It is not locally recommended to pass North of Perry Island through the Dutch Group.

PILOTAGE: Pilotage is operated by the Southwest Alaska Pilots' Association who have an office in Valdez, telephone number (907) 835 -2134. They also have an office in Homer, telephone (907) 235 – 8783. Both stations maintain a continuous watch on Channels 10 and 16.

In theory, Pilots embark at Hinchinbrook Entrance. This has not been the practice however, for the last year or so, due to the long sea passage for the small pilot boat and the severe weather sometimes encountered in this area. Pilots normally embark at Blight Reef near Glacier Island. The pilot boat is stationed at Rocky Point some 10 miles away. The normal pilot boat is "Bering" which is a 63 ft. long trawler, capable of 10 knots, with a blue hull and white house. A newer boat is also in attendance. This is a 43 ft. glass fibre boat called "Bernhof" capable of 20 knots. She has a white hull.

No vessel may enter Prince William Sound through the Hinchinbrook Entrance without permission from the Coast Guard at the Valdez Traffic Control Centre on Channel 13 or 16. Large vessels may only transit Prince William Sound in daylight hours.

If permission is obtained, vessels may proceed direct to the pilot station at Whittier, 1 mile South of Point Pigot. See "Approaches".

ANCHORAGE: Anchorage off Whittier may be obtained in 12 fathoms at Pigot Bay (Lat. 60° 50.4′ N., Long. 148° 22.0′ E.).

BERTHS/FACILITIES: The 2 railway berths are only for barges carrying flat top railway cars on which all cargo is carried. The Delong Pier is used for oil tankers. The length of the wharf is 140 m. and the maximum length of ship is about 170 m. The minimum depth alongside is 48 ft. at the West end and 80 ft. at the East end.

Tankers normally berth port side alongside. In October 1980 there was one tug "Avenger" in attendance being 2,000 h.p. A shore gangway is supplied. All manifold connections are 6 in. The ship must supply all reducers. 2 lines are used for kerosene. Jet fuel, Mogas and diesel are imported. The distance to the shore tanks is 1.5 miles. All products are pumped from the storage area to Anchorage. Bunkers are not available for large ships. Provisions and supplies can be purchased in Anchorage and shipped down by rail. There is a small clinic with a physician's assistant. The nearest doctor or dentist is in Anchorage. In an emergency there is an ambulance which can run on the road or rails.

GENERAL:

Weather: The winds are very strong and variable. It is very wet in Summer and has an extremely high snowfall in the Winter months. The port is completely ice free the whole year round.

Formalities: All the usual American forms apply. Customs, Immigration and Coast Guard all come from Anchorage as there are no officials at Whittier.

Joining/Leaving: Crew may sign on and off at all times. During Winter Whittier is often cut off by snow.

Accommodation: Pilot and Agent stayed aboard throughout our 36 hour stay which proved very convenient for clearance and paperwork.

Agent: North Star Terminal & Stevedoring Company, Anchorage, Alaska 95510. Cable: "Norstevco Anchorage". Telex: 26471.

AUTHORITY: Whittier Harbour Commission, P.O.Box 608, Whittier, Alaska 99693. *Tel:* (907) 472-2201. *FAX:* (907) 472-2404. *Contact:* Port Director/Harbour Master.

WILMINGTON, Delaware: 39.44 N. 75.32 W. **(See Plan)**

DOCUMENTS: Handled through local Agents.

PILOTAGE: See "Philadelphia".

ANCHORAGE: At Cherry Island.

MAX. SIZE: Length unlimited, breadth unlimited, draft 38 ft. MLW tide range 5.5 ft.

Chesapeake/Delaware Canal: Max. LOA 760 ft. Max. draft 35 ft. (FW) (Max. draft 27 ft. in report dated January 1990). Height of mast 133 ft. Max. beam 170 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: U.S. Coast Guard, Gloucester, N.J.

TUGS: Available through Wilmington Launch Service Tel: 652-1666.

BERTHING: 3,260 ft. marginal wharf. 20 – 100 ton crane capacity. 400 – 600 t.p.h. bulk unloader. Covered bulk storage of 472,000 sq.ft. Dockside freezer capacity of 1,050,000 cu.ft. at present.

Two multi-purpose bulk/container cranes available, capacity 40 tons, outreach 115 ft.

Roll-on/Roll-off cargoes handled.

DENSITY: Fresh water port. Normal 12 hour tides.

FRESH WATER: Hose connection from dock.

FUEL: Available.

CONSULS: All Consuls are located in Philadelphia, Pa.

REPAIRS: Possible.

DRY DOCKS: Major repairs and dry dock facilities – Penn Ship Yard, Chester, Pa.

GANGWAY/DECK WATCHMEN: Required.

OPENING/CLOSING HATCHES: Optional.

REPATRIATION: Facilities are available and arranged by Agent.

AIRPORT: Philadelphia International Airport, regular service.

TIME: U.S. Eastern Standard (GMT minus 5 hours) and Daylight Time, from first Sunday in April till last Sunday in October.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, Tel: 302-654-5151.

TELEPHONES: Dock-side pay phones.

SERVICES: All services available.

SHORE LEAVE: Allowed unless restricted by Immigration.

IDENTIFICATION CARDS: See "New York".

DEVELOPMENTS: Additional land has been acquired and one new berth along the marginal wharf is being planned.

AUTHORITY: Port of Wilmington, Delaware, P.O.Box 1191, Wilmington, Delaware 19899. *Tel:* (302) 571-4600. *Telex:* TWX 510-666-2181. *FAX:* (302) 571-4646. *Contact:* Kenneth H. Mack, Port Director. John B. O'Donnell, Director of Trade Development. John H. Doherty, Deputy Port Director.

WILMINGTON, N. Carolina: 34.14 N. 77.57 W. **(See Plan)**

PORT LIMITS: A ship is considered an "arrived vessel" upon arrival at Buoy 2CF.

DOCUMENTS:

- 3 copies Cargo Manifest (Forms 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 3 copies Crew Manifest (Curio List) (Customs Form 1304).
- 3 copies Stores List (Customs Form 1303).
- 3 copies Passenger List (Form I-418).
- 3 copies Crew List (Form. I-418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

- Master's Oath (Customs Form 1300).
- All foreign clearances.
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.
- Oil Pollution Certificate.
- General Declaration (Customs Form 1301).
- Load Line Certificate.
- Safety Equipment Certificate.

APPROACHES: The port terminal at Wilmington is located on the East bank of Cape Fear River, approximately 26 miles from the sea buoy at the mouth of the river. Wilmington is 150 miles S.W. of Cape Hatteras and 26 miles North of Cape Fear.

PILOTAGE: Pilots board vessels at Buoy "2CF" off the mouth of the Cape Fear River. Masters should notify local Agents by radio of their ETA at Buoy "2CF" in order that the Pilots may be on station in advance of arrival. Additionally, Masters may communicate with Pilots by radio telephone on 2738 frequency and by VHF Channel 18A. Pilots remain on board until harbour limits of Wilmington, where docking Masters normally board vessels for purposes of docking.

ANCHORAGE: Vessels awaiting Pilots normally anchor in area off Buoy "2CF". There is no safe anchorage in the port of Wilmington for large vessels to be accommodated. Small vessels can be accommodated for brief periods in anchorage basin, although it is necessary to swing with the tide in order to avoid blocking channel.

RESTRICTIONS: The approach channel and basins adjacent to the port are maintained at a depth of 38 ft. MLW.

MAX. SIZE: No limits on length, breadth, and draft limit is present channel project depth of 38 ft. Master should communicate with local Agent regarding stage of tide for passage of vessels drawing 34 ft. or above.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 3 towing companies operate at Wilmington.

BERTHING: A continuous marginal wharf, 6,940 ft. long. Docking at any hour, day and night. Also see "Developments".

SPECIALISED CARGO HANDLING FACILITIES: State Port Terminal: Fully equipped to serve cellular type container ships, for bulk handling; equipped with 6 yard rehandler buckets, receiving hoppers, and paved open storage areas, 2×45 ton, 1×115 ton, 3×40 ton container cranes (2×50 ton under construction), 1×140 ton mobile crane and 1×225 ton gantry crane; 1 berth with tank farm for handling liquid chemicals. 99×480 volt electrical outlets for refrigerated containers (70 additional outlets planned).

Almont Shipping Company: 3 berths, open and covered bulk storage, 2×25 ton cranes and 1×85 ton derrick. No facilities for LPG carriers.

TANKERS: 10 tanker berths with drafts from 30 ft. to 40 ft. MLW. Night berthing at all berths. Fresh water available.

FRESH WATER: Available from shore connections at rates up to 50 t.p.h.

FUEL: Bunker "C" and diesel fuels available locally.

FIRE PRECAUTIONS: Normal precautions observed.

REPAIRS: Minor ship repairs available.

DRY DOCKS: 1×1,000 ton lift floating dry dock.

AIRPORT: New Hanover Country Airport, 7 miles from N.C. State Port Terminal. Served by U.S. Air and American Eagle.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time from first Sunday in April till last Sunday in October.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A. port (Albany).

The Port of Wilmington is a USDA-approved handler of international garbage, whereby drums are provided to the vessel for collection of garbage and subsequent incineration.
WASTE OIL DISPOSAL: The Port of Wilmington has a MARPOL-approved contractor on retainer available to handle this service for the account of the vessel. Direct contact should be made to High Rise Services. Tel: (919) 371-2325.
SEAMAN'S CLUBS: International Seamen's Service, P.O.Box 486, Wilmington, N.C. 28402. Tel: (919) 762-3792. Facilities include chapel and chaplain, bibles, telephone service, books, table tennis, bicycles and free refreshments.
CURRENCY: U.S.Dollar (U.S.$).
AUTHORITY: North Carolina State Port Authority, 2202 Burnett Boulevard, P.O.Box 9002, Wilmington, North Carolina 28402. *Tel:* (919) 763-1621. *Telex:* 510-937-0330. *FAX:* (919) 763-6440, 343-1042. *Contact:* Stephen W. Jackson, General Manager – Port of Wilmington. Karen P. Fox, Manager of Public Affairs.

WRANGELL, Alaska: 56.28 N. 132.22 W. (See Plan)

Located on Wrangell Island. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.
ANCHORAGE: Good anchorage N.E. of Woronofski Island in 22 fathoms of water.
MAX. SIZE: Harbour depth 32 ft. MLLW. Tides: mean range 13.7 ft., diurnal range 16.1 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Immigration, Guard Island or local Customs Office. Quarantine and Customs, local.
TUGS: 9 tugs up to 1,800 h.p. available with sufficient notice.
BERTHING: 4 wharves.

1. Wrangell Lumber Co. Dock: Berthing length 320 ft., 150 ft. wide, depth South end 32 ft. North end 40 ft. LW. Height of pier from zero tide 23.5 ft. Crane – 1 mobile, 8 ton, 6 lift-trucks. No shed space. 3 acres open storage.
2. Alaska Wood Products: Berthing length 300 ft., 50 ft. wide. Depth at LW 32 ft. Height of pier from zero tide 23 ft. No shed space.
3. Port of Wrangell Wharf: 35 ft. depth at both ends. Fresh water available. Lift trucks on rental from local private firms. Dock face 400 ft. with additional mooring dolphins for a total overall length of 700 ft.
4. Barge: Transfer bridge facilities, 17 ft. wide, capable of up to 70 tons (140,000 lbs.).

STEVEDORES: 4 gangs available.
MEDICAL: Small but new hospital.
WATER: Available.
FUEL: Small quantities available.
REPAIRS: None.
TRANSPORTATION: Air and ferry.
GARBAGE DISPOSAL: See "Agriculture" before first U.S.A port (Albany).

Service available. Contact Public Works Office for collection. Tel: (907) 874-3904, or the Port Office, Tel: (907) 814-3736.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: Usual local facilities.
CURRENCY: U.S.Dollar (U.S.$).
AUTHORITY: City of Wrangell, P.O.Box 531, Wrangell, Alaska 99929. *Tel:* (907)874-3736 or 874-2381. *FAX:* (907) 874-3952. *Contact:* David Mork, Harbour Master.

YORKTOWN, Virginia: 37.14 N. 76.30 W. (See Plan)

OPERATOR'S REPORT.

GENERAL: The American Oil Terminal at Yorktown, Virginia is located about 3 miles below the York River bridge on the South side of the river approximately 38 miles from the Chesapeake Bay Sea Buoy "CB". Co-ordinates of the terminal are Lat. 37° 13′ 37″ N., Long. 75° 26′ 23″ W. A 3,000 ft. finger pier ending with a marginal pier, reaches the deepwater channel in the river. Tankers supply the refinery with crude and intermediate feedstocks which are refined into gasolines, fuel oil, liquefied petroleum gas, coke, and liquid sulphur which is distributed by barges and tankers.
APPROACHES: *Cautionary Advice:* RDF stations at Chesapeake Light and Cape Henry provide coverage for position fixing and numerous buoys mark the fairways, channels and obstructions. While proceeding to the pilot station one should be aware of the heavy traffic in this and the ship should stay within the prescribed traffic lane. Ca consideration should be given to the current, which has a velocity to 3.0 knots and higher and which tends to set a vessel out of channel.
PILOTAGE: Pilots board 1.5 miles N.E. of Cape Henry Light. Ves should use traffic lanes as outlined on Chart No. 12221 w approaching the pilot area.

U.S. flag should call the Chesapeake Federal pilot boat approxima 1 hour before arrival to arrange Pilot embarkation. Non-U.S. flag ves should call the Virginia State pilot boat 1 hour before arrival.
ANCHORAGES: *Anchorage and Lightering:* Vessels requ lightering proceed to Hampton Roads where all lightering operations conducted. This channel is well marked and presents no difficu Upon completion of lightering, the vessel must return to Cape He before proceeding to the berth. The bottom of Hampton Roads cons of soft mud and provides good holding ground.
RADIO: ETA messages should be sent to Agent 72, 48 and 24 ho before arrival. Any change in ETA should also be transmitted, as pilot vessel is not continually on station. Advise draft (brackish wate first message.
VHF:

Pilots	Channels 6, 11, 13, 16, 1
Tugs	Channels 9, 10, 12, 13, 1
U.S.C.G.	Channel 16
Marine Operators – Norfolk	Channels 16, 22, 27

BERTHING: The Docking Master boards the vessel from a tug 1 miles East of the Amoco Dock. 2 tugs are generally used for dock vessels over 28,000 d.w.t. may require 3 tugs at the Docking Maste discretion. The vessel makes a normal marginal approach to Dock No with the tugs breasting the vessel alongside and holding it there until secu Vessels generally dock port side to at Berth No. 1. Berth No. 2 is of construction and is located 1,122 ft. to the West of Berth No. When docking at Berth No. 2, vessels approach Dock No. 1 on Southwesterly heading to initially avoid a shoal area located N.N.W. Berth No. 2. When the vessel is within 550 ft. of Berth No. 2, approach is made parallel to the dock face until the vessel is off dock when it is breasted into position port side to by the tugs. Ex caution must be exercised when approaching Dock No. 2 when the is a ship at Dock No. 1. At Dock No. 2, difficulties will be experienc in placing vessel's gangway due to the extremely limited dock spa amidships.

No. 2 Tanker Dock is equipped with 2×12 in. Chicksan arms for cru or No. 6 Oil discharge. Weather conditions are carefully monitored terminal personnel, and vessels are shut down when conditions warr such action.
FRESH WATER: Available.
FUEL: No fuel available at No. 2 Tanker Dock.
GARBAGE DISPOSAL: A dumpster is provided at the end of the doc
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
AUTHORITY: Amoco Oil Company, Yorktown Refinery, P.O.Box 5 Yorktown, Virginia 23690

NOTES

Please also advise Shipping Guides Ltd.

Uruguay

GENERAL:

REGULATIONS: Increased fines became effective in June 1973 in respect of infringements of the Uruguayan Marine Code. There are approximately 119 Articles to the Marine Code, and Owners and Masters of vessels proceeding to Uruguayan ports are recommended to obtain a copy of the Code (which lists port regulations and amounts of fines for infringements, maximum fine being 760 U.R.) prior to arrival. We understand that copies of the Code, entitled "Reglamento Preventivo y Represivo de Infracciones Maritimas, Fluviales y Portuarias", may be obtained from Centro Navegacion Transatlantica, Colon 1486 p. 3, Montevideo.

Freely translated, we give below some extracts of Port Regulations as specifically applicable to Montevideo, but also to all Uruguayan ports in general:

Articles 1 to 8 cover respectively the reasons for setting up this preventive set of regulations; the definition of what a vessel is in terms of the legislation; the establishment and amount of fines (they may be tripled in the event of repeated offences); the fact that very small vessels may only have imposed 10 per cent of the full fine; the jurisdiction for the regulations covering the whole of the Uruguayan coast and river frontage; the stipulation whereby the General Marine Prefecture must send to the Master of the vessel a statement of the offence immediately it is observed and this in triplicate and to the local Agent for the vessel. The actual information which the form must contain is delineated. Notification of offences can be made after a vessel has sailed, this being to the local ship's Agent by phone and confirmed within 24 hours in writing. All Masters must give written consent to their local Agent, and the Agent must accept this in writing, empowering the Agent to act in the Master's name in all cases of fine payment. The Authorities may delay the sailing of a vessel if they see fit in connection with any offence. Finally, Article 8 deals with the right to appeal to the General Marine Prefecture against any fine imposed, this having to be done within 10 days dating from day following personal notification of the offence.

Articles 9 to 119 cover the specific offences subject to fine and indicate individually the full fine imposable in local pesos.

An abridged summary of each of the articles is as follows: No anchoring within 900 m. of the illuminated buoy in the port access channel.

Vessels carrying hazardous cargo must hoist flags according to the International Code of Signals.

Vessels with anyone on board with contagious diseases must hoist appropriate flag (letters "QL").

Flag "Q" must be hoisted and maintained in position until Health Authority has given Free Pratique.

All vessels anchoring in the roads, bay or ante-port must take due precautions not to harm or cause damage to other vessels; the fine will be imposed notwithstanding claims for damages from third parties.

Agents of vessels which may wish to anchor in the Roads must obtain prior permission from the Marine Authority, specifying vessel's measurements and the reason. If authorised, the anchorage to be used will be notified.

No anchoring at the docks unless justified, and anchors must be raised immediately the reason for dropping them has gone. There must be no delay on the part of vessels in complying with the Marine Authorities instructions to change berth or anchorage.

No tying up to other vessels without Marine Authority permission; no attachment to berths which have not been allocated and no changing of berth without authorisation.

No anchoring in places not authorised by the Marine Authority, the maximum fine being applied should this have caused damage to third parties.

No small craft to be tied up obstructing gangway or quays. Where this is necessary for embarking crew members, passengers, provisions, etc., the small craft must be removed immediately the operation has been completed.

Small craft must not be tied up to buoys or beacons. Vessels must not tie up at buoys or beacons.

Maximum speed of vessels in docks is 4 knots.

Navigation in channels of access to ports is governed as follows:

Maximum speed 8 knots.

Vessels must always keep to starboard.

Vessels must not overtake each other, but where this is necessary they must conform to the International Colregs.

No anchorage in channels.

No fishing in channels.

Vessels navigating in channels must keep a distance of 1,000 m. from each other.

Vessels must not cross in front of each other in the fore-ports.

All vessels entering or leaving the ante-port or docks, changing berths or anchorages must be assisted by a Pilot and tug, unless specifically given exception to this rule by the Marine Authority.

No vessel must enter port with damage to hull, machinery or rudder unless prior inspected by the Technical Commission of the Mercantile Marine Directorate.

Any vessel springing a leak whilst navigating in the access channel, and which the bilge pumps cannot overcome, must go aground as quickly as possible outside the channel so as to leave the channel open.

In case of fire on board whilst navigating in the access channel, Masters must observe usual procedure and give signals accordingly.

The strict use of semaphore signals within port must be observed.

When vessels enter the docks or remain in them, Masters, owners or Agents must request permission from the Marine Traffic Office, and report to the Office of Pilotage, and proceed in whatever form they may instruct. On leaving the same procedure must be followed.

Masters and owners of vessels must see that their vessels do not obstruct or cause harm to port works, beacons, buoys, or semaphores and once tied up they must not slacken ropes without permission of the Marine Authority except under conditions covered by items 1, 2 and 3 of Article 64 of the Port of Montevideo Marine Regulations.

No vessel to have badly stowed cargo, excess weight, or evidence of lists due to bad trimming of cargo.

Only those lines necessary for tying up to be used. When 2 or more vessels tie up alongside to load or discharge they are all obligated to ensure that the handling of their respective cargoes does not prejudice the working of the others.

Vessels must take proper precautions when loading or discharging raw material, i.e. sand, bones, ash, coal, etc., by placing suitable planks of wood close together to prevent any such material falling into the water.

No vessel to enter docks with the gangway already rigged.

During unloading operations, no goods to be thrown on to the quay. This must be done manually or mechanically.

During discharge operations, cargo must be so positioned on the quay as to leave adequate passage for vehicular traffic, i.e. Police, Fire Brigade, Health Authorities, Customs and Port Officials.

Planks of wood — when planks are used for any operation, they must not be placed in contact with mooring bitts or cables. When work ceases all pieces of wood, ladders, small trucks, etc, must be removed from quay, and those belonging to the ship must be taken on board, this so as not to obstruct the public path along the quay.

When cleaning or washing ships tied up at quays, no rubbish, water or cleaning material must be allowed to fall on the quay.

A very serious offence is the throwing into the water of any rubbish, sewage or other material susceptible to polluting the water.

Very serious offences are the lightening of ships carrying petrol, crude oil, or the like, likewise the washing-out of tanks, except in authorised zones. The fine is based on the area spoiled by the wrongful discharge.

All ships should have local Agents, otherwise in the case of offences the Master is held responsible and vessels may be detained.

Vessels are responsible to ensure that no damage is made to quay installations by the cargo they load or discharge, and must always leave berths in a tidy and clean state.

Vessels' auxiliary small craft, launches and the like must not hang over the side of the vessel in port, except during operations of launching and reshipping on board, where such operations are conducted at points indicated by the Marine Authority. Such small craft may only be used for the purpose and at the times authorised by the Marine Authority.

Usual regulations concerning carriage of passengers in vessels and heavy fines are imposable for the carriage of passengers or crew members not listed.

Vessels exceeding their navigation limits shown in their Certificate of Navigability are subject to fine.

All vessels must be cleared to sail by the Marine Authority.

Vessels must use their proper name and this must be painted on in letters of minimum of 15 centimetres height and 8 centimetres wide. Letters must be white on black or black on light colour.

Masters, Owners and Agents must report any crew offence or irregularity on board to the Marine Authority.

Vessels in port must hoist the Uruguayan flag.

N.B. It is recommended that Masters correctly establish the prescribed times for raising and lowering the Uruguayan flag, in order to avoid fines.

Vessels must have their gangway equipped with handrails, and the gangway must be clearly lit at night.

All lines to shore must have rat-guards fitted.

When there are hazardous goods on board or when such goods are being worked, the vessel must hoist the International Code Signal letter "B", and at night show a red light on the bow masthead, must always have engines in a state of readiness in case of danger, keep two-thirds of the crew on board, keep watchmen and firemen available (the number of whom will be determined by the number of holds containing the hazardous material), must only work with incandescent lights, and keep a Port Pilot on board if the Marine Authority so directs.

Vessels moored at quays must not move propellers, except under the direction of the Marine Authority.

Vessels must not moor in the port access channel. There must be no improper use of the International Code Signal. Signal flags must not be interspersed with flags of nationality.

If a vessel wishes to dress flags over all, or fly a flag at halfmast due to a bereavement on board, the Marine Authority's permission must be first obtained.

The use of whistles, sirens or any other audible signal within the area of the roads, bay, ante-port or docks, for any reason other than justifiable for navigation is prohibited.

Any vessel anchored, tied up to other vessels or to the shore or quays, must show a white light from sunset to sunrise which can be seen at a distance of 500 m.

In the access channel to Montevideo, no more than 4 vessels may navigate at one time — 2 entering, 2 leaving.

Maximum speed in the Montevideo ante-port is 6 knots. There must be no anchoring in the Free Zone, reserved for the manoeuvring of vessels entering and leaving.

At Montevideo there must be no anchoring along the route leading from the Free Zone to Channel "A", between the quay and the pier of the same letter. Also on the route leading from Pier "A" along a line to 100 m. to the North of the end of the West Jetty.

No anchoring in any area less than 200 m. from Pier "A" in a semi-circular coverage, taking as middle point a position half way between Quay "A" and Pier "A".

All vessels must keep to the right or to the middle when there are no other vessels in the vicinity.

International Regulations for the Prevention of Collisions apply, plus the following:

Vessels navigating along the routes established in the anteport or which have to pass directly through the passage between Jetties "A" and "B", must keep to the right when another vessel is coming in the opposite direction.

Vessels which have to cross the North, the South route or directly between Jetties "A" and "B", must ensure that they pass any other vessel at a distance not less than 50 m.

Any vessel navigating under her own power must give way to a vessel under tow by a tug.

Vessels with tugs following routes which cross one another, thereby creating a collision risk, the one passing to the starboard of the other is the vessel which must take the precautionary measures to avoid collision. If, however, the risk persists, the vessel passing to port of the other must also take measures to increase the distance between the two vessels.

No vessels to pass in pairs or in opposite direction between Jetties "A" and "B"; the semaphore signals transmitted by Quay "A" must be observed. If the signal is "vessel entering from the ante-port to the docks", the vessel in the docks, ready to sail, must wait until the incoming vessel has entered.

If the signal is "vessel leaving the docks for the ante-port" the vessel in the foreport, moving towards Jetty "A" to enter the docks, must wait in the free zone, stop engines, keeping to the right, and drop anchor if necessary, until the outgoing vessel is outside and well clear of Jetty "A".

The same regulation applies to vessels leaving the River Dock. In this case, the vessel leaving Jetty "A" has priority, coming from Docks I and II the first will wait for the second before starting engines.

All vessels navigating in the same direction in the ante-port must keep a distance of not less than 300 m. from each other stern to bow. They must not pass each other or navigate in pairs.

In the event of offences being incurred whilst an Uruguayan Pilot is on board, at the request of the local ship's Agent, the Marine Authority will determine whether the Pilot is responsible for the offence having occurred, and take measures accordingly.

Vessels which load beyond the appropriate load line will be subject to a fine of 1,000,000 pesos.

DOCUMENTS:
Consular Documents: The Consulate in a foreign port from which merchandise is to be shipped to a Uruguayan port must be presented with the following documents:

(a) Cargo Manifest, original and 3 copies.
(b) Crew List, original and 1 copy.
(c) Passenger List (or no-passenger declaration), original and 1 copy.
(d) Bills of Lading, original and 3 copies.
(e) Commercial Invoice, original and 3 copies.
(f) In the event that the vessel is cleared in-ballast, an in-ballast declaration, original and 1 copy.

One copy of each document is filed at the Consulate, and the following are returned, duly visaed:

1 original Manifest, 1 copy of each Bill of Lading, and 1 copy of the Commercial Invoice, in an envelope addressed to the Customs Administrator of the port of destination.

1 copy of the Manifest, and 1 copy of the Bills of Lading, in an envelope addressed to the National Ports Administration.

1 copy of the Manifest, the original and 2 copies of the Bills of Lading, the original Commercial Invoice, the original Crew List, and the original Passenger List (or no-passenger declaration).

Prior to Arrival:
Notification of Arrival – by Ships' Agents.

(a) Container vessels (minimum load 30 FCL and minimum discharge 30 FCL stipulated) and passenger vessels have berthing priority. Agents must notify the arrival of the vessel 10 days in advance to the National Port Administration (ANP) and confirm ETA 2 days ahead of arrival.
(b) For arrival in Uruguayan ports of all other vessels, agents must notify the ANP 48 hours in advance.

All notifications must be made on special forms from the ANP on request for a berth, presenting original and 6 copies, accompanied by a complete set of cargo manifests in Spanish.

For container vessels, Agents must present lists with details of a complete nature covering the containers to be unloaded in Montevideo (prefix, number, contents, gross weight and tare), whether to be discharged to store or to quay, and final destination in the case of transit.

Request for Port Services:

As has been said in the previous section, the berthing request must be presented to the ANP and acts as advice of arrival.

Each morning at 1000 hrs. the ANP designates berthing crews for vessels for the next 24 hours. In the event of there being no berthing staff available, the ANP appoints a place for waiting berthing in turn in accordance with the order of arrival at the port of Montevideo.

On Arrival:

Type of Document			*Number and distribution of documents*				
Basic forms	*Prefectura*	*Customs*	*Im'gration*	*Police*	*Health*	*Agency*	*Total*

(a) Visaed by the Uruguayan Consulate.
(b) For the Postal Service.
(c) The Consulate returns 1 envelope to the Customs Administrator, an to the National Ports Administration (with a copy of Manifests and Bi Lading), and a third to the agency, with the required visaed docume

Other Requirements:

The agency must provide a cargo book (tally book) for each po the National Ports Administration.

Prior to Departure:

24 hours prior to sailing, the vessel must notify the Maritime Prefec and Migration. Representatives of these agencies must receive a c list and check any changes. If the vessel carries passengers, Inspector of the National Migration Administration must prepare a re of a sailing inspection, similar to that required upon the vessel's am

The Maritime Prefecture authorises the clearance of the vessel.

PILOTAGE: Also see "Control". Pilotage is compulsory in all river port zones, except for vessels coming from the East to ports betw La Paloma and Montevideo Roads, or entering Montevideo Roads no commercial reason. All coastal vessels either Uruguayan or fore are also exempt.

Pilotage Zones:

1. RIVER PLATE – Comprises zone between imaginary lines in East from Punta del Este (Uruguay) and Punta Rasa, on C San Antonio (Argentina) and on the West between Colonia San Isidro (Argentina).
2. RIVER URUGUAY – From 56.5 km. of Farallon Channe Uruguayan ports on the River Uruguay.
3. PORTS – Pilotage zones, comprises limits of each port includ its Roads.
4. SBM at Jose Ignacio.

In the River Plate, Pilots presently board to the South of the wreck the *Calpean Star,* approximately 4.5 km. South and lying 70 m. W of the dredged access channel.

Several of the pairs of buoys are missing, and only the Mid Chan Buoy indicating the entrance to the Access Channel, 5 miles South the port, and the 2 pairs nearest to the breakwaters are operating.

When taking tankers, the port Pilot usually goes out to the 5- mark.

There is no more than 30 ft. in the Access Channel at the mome dredging is being carried on, but there are only 2 dredgers opera between the channel and the port of Montevideo itself.

The current is across the channel, running at about 1 knot, changes direction more with the wind than the tide.

Vessels awaiting Pilot should anchor on the West of the channel South of the *Calpean Star;* there is 24 ft. up to 500 m. West of channel. The zone to the East of the Access Channel has subma cables and must therefore be avoided.

Pilots are ordered through the Agent, and have an up to d communications system installed in their office on the 11th floor Custom Building.

Permanent watch is kept on Channel 16 VHF, and operator spe English. It is possible to call "Practicos Montevideo" and ask to connected by phone to the vessel's Agent's office for last min instructions, etc.

Channel	Frequency	Channel	Frequency
9	156.45	11	156.55
16	156.80		

The port is closed when wind force exceeds 43 knots or, at n 37 knots, or if visibility is less than 1 km., but otherwise vessels enter or sail at any time.

There is also a Telex machine with 24 hour watch, over wh messages can be transmitted to Agents out of office hours, ove weekend, for example. Call sign is DGT 843 Pilot CX. This is particula useful for vessels sailing late from Buenos Aires, and the Office will pa on the message to the corresponding Agency by phone.

All Pilots carry a "walkie-talkie" and can communicate either with th office, the Port Authority or the Semaphore Station, using Channel 9 the Port Offices and 11 for the Pilot's Office, 16 being kept for use vessels.

Ordering of River Pilots for Sailings from Uruguayan River Po Although Masters can apply directly for Pilots such applications m be made by telegram addressed to the Practico Mayor Montevideo is preferable for them to keep their Montevideo Agent fully informed leave the latter to order the Pilot.

The opportunity of ordering Pilots at any hour having be discontinued makes it more essential than ever that Montevideo Ag are kept accurately informed regarding expected readiness to Failure to do so will result in unnecessary demurrage being paid to Pi or delay to the ship concerned.

Pilots for Vessels Proceeding from Sea to a Uruguayan Port on River Uruguay: A Uruguayan Pilot must be employed to conduct sh from sea to a Uruguayan Port on the River Uruguay.

Vessels must call at Montevideo Roads to embark Pilot and pay the cost of tug to take out Pilot. They can also, alternatively, take an Argentine Pilot at Recalada who will take the vessel to Intersection, where in either case an Argentine River Pilot will board to take the vessel to the Roads of port of destination, where a Uruguayan Port Pilot will come aboard, this being a simpler procedure and all handled by Agents in Buenos Aires (one radio advice).

Vessels from an Argentine Port bound for Uruguayan River Port: Such vessels are normally taken to immediately off port of destination by an Argentine Pilot, but they must be berthed by a Uruguayan Pilot who has to be sent from Montevideo, thus Montevideo Agents must be kept promptly informed of vessel's position to enable them to order a Pilot to berth ship without delay.

Vessels leaving Uruguayan Port for Argentine Ports on the River Parana: Uruguayan River Pilot supplied from Montevideo must be employed for unberthing, and this Pilot takes vessel to the Bravo Channel off Nueva Palmira, where the Argentine River Parana Pilot, who is normally already aboard, takes over.

The Uruguayan Pilot is paid in accordance with tariff to Nueva Palmira plus an unberthing fee and travelling expenses.

HEALTH: In order to be able to enter port and berth without delay, the Authorities accept a radio, cable or telex request, couched in the following terms (messages must be sent in Spanish).

Vessels Arriving from Elsewhere:

Capitan . . . . solicita libre platica
(here the name of the vessel)
informando proceder de Buenos Aires, siendo su escala anterior . . . .
(here a port in another previous country which could be Santos, Valparaiso, Capetown, etc.)
condicion sanitaria buena . . . . Capitan
(here the name of the Master)

Vessels Arriving from Buenos Aires:

Capitan . . . . solicita libres platica
(here the name of the vessel)
informando proceder de. . . . .
(here a port of origin, say London – Liverpool – San Francisco – Rijeka – Kotka – Tokyo – Oslo, etc.)
siendo su ultimo puerto . . . .
(here say Santos – Valparaiso – Capetown, etc.)
condicion sanitaria buena . . . . Capitan
(here the name of the Master)

There have been cases of delay in delivery of radio messages, even though passed on by phone, but the original message must accompany Agent's request for Free Pratique, hence it is advisable to use cable or telex services if possible. Messages must be sent at least 24 hours ahead, and changes in ETA advised.

Although it is possible to take Pratique in Uruguayan River ports, there is frequently delay there, and since vessels must enter Montevideo to pick up the river port Pilot also, it is advisable in these cases to ask for Pratique at Montevideo as above, and the order from Sanitary Authorities granting Free Pratique will be handed to the Pilot to take on board with him.

In no case, however, does the granting of Pratique by radio modify the inspection in port, where the usual commission must be the first to go on board.

Illness On Board: Any private doctor attending a patient on board must immediately inform the Sanitary Inspector should the disease be contagious.

No patient can be landed without the consent of the doctor of the Health Department with the exception of accident cases that require immediate medical attention, and even in those cases the Health Department Doctor must be informed in order to issue a Sanitary Pass for the Hospital where the man was taken to.

If a Master does not report the existence of illness on board he is liable to fines which are double if patients land without the consent of the Sanitary Authorities.

RADIO:

Notice to Mariners:

Official Uruguayan Notices to Mariners are transmitted in Spanish only preceded by the signal TTT, the number of the Notice, letter R, then contents and are repeated for 15 days. Should there be no Notices to transmit, the wording "no hay avisos para navegantes" will be radioed.

Punta Carreta CWF 2768.5 kHz. A3 0.4 kW. at 0003, 1403 and 1903 hrs. (after the weather forecast).

Cerrito CWA on 4346, 8602,12750, 17208.8 kHz. A1 1.5 kW., also on 421.5 kHz. A1 and A2 5 kW. at 0000, 1400 and 1900 hrs. (after the weather forecast).

Montevideo CX 16850 kHz. A3 10 kW. at 1302 hrs. and 1602 hrs. on working days, at 1700 hrs. on Sundays.

Montevideo	CX 6	659 kHz	A3 2.5 kW.
	CX 26	1050	A3 all transmit Notices to Mariners at 1600 hrs.
	CX 38	1290	A3 5 kW.
	CXA 4	6125	A3 10 kW.
	CXA 6	9620	A3 20 kW.
	CXA10	11900	A3 20 kW.

Weather Forecast: A weather forecast is transmitted in Spanish to cover 3 zones. (See "Plans").

Reference AAA 830 is the Coastal area from Lat. 30° S., Long. 50° W. out to Lat. 30° S., Long. 46° W. and down to Lat. 33° 30′ S., Long. 53° W. and Lat. 35° S., Long. 49° W.

AAA 860, River Plate zone from Lat. 33° 30′ S., Long. 57° W. to Lat. 35° S., Long. 49° W. and down to Lat. 35° 30′ S., Long. 57° W. to Lat. 39° S., Long. 53° W.

AAA 870 Coast of Argentina from Lat. 35° 30′ S., Long. 57° W. to Lat. 39° S., Long. 53° W. and down to Lat. 41° S., Long. 62° W.

Details of all 3 zones are transmitted as follows, valid for 24 hours.

CWA on 421.5 kHz. A1 5 kW. at 0001, 1400 and 1900 hrs.

CWF on 2768.5 kHz. A3 0.4 kW. at 0005, 1405 and 1905 hrs. and in A1 over 4346 kHz, 8602 kHz, 12750 kHz and 17208 kHz.

Time Signals: Are transmitted from 2 stations in Montevideo at 1500 and 2000 hrs. The hour is indicated by 6 dots preceded by a 10 second dash and a 5 second silence. The last dot indicates the hour.

CX 6	on 650 kHz.	A3 25 kW.
CXA 6	9620 kHz.	A3 20 kW.

Standard time is GMT minus 3 hours.

Direction Finding: There are 2 radio beacons specially for maritime navigation. Both operating on circular sweep from the lighthouses at Cape Polonio and Isla de Lobos.

Cape Polonio: Lat. 34° 24′ 00″ S., Long. 53° 47′ 45″ W. frequency 295 kHz. A2 range 380 miles, and 500 kHz. A1 A2.

The signal is "P" repeated 3 times in 10 seconds followed by 18 dashes in 30 seconds, repeat "P" 3 times and 10 seconds silence total period 1 minute. This is repeated 4 times after 5 minutes silence, total 10 minutes.

In good weather transmission must be requested from CWM 21 on 500 kHz. A1 A2. In fog, there is continuous transmission from the hour.

Isla de Lobos: Lat. 35° 01′ 33″ S., Long. 54° 53′ 17″ W. frequency 300 kHz. A2 range 380 miles. The signal "L" is repeated 3 times in 10 seconds, followed by 18 dashes in 30 seconds, repeat "L" 3 times, silence 10 seconds. Total period 1 minute, repeated 4 times, then 5 minutes silence total period 10 minutes.

In good weather this transmission must be requested from CWM 26 on 500 kHz. A1 and A2.

In fog transmission is continuous from 05 minutes in each hour.

There are also the following airbeacons which can be used.

		S.	W.	kHz	
Colonia	COL	34° 27′ 33″	57° 45′ 49″	203	A2 0.075 kW. cont.
Montevideo	CAR	34° 46′ 15″	56° 01′ 28″	380	A2 0.05 kW. cont.

Punta del Este	CB	34° 55′ 00″	54° 55′ 00″	325	A2 occasional only.

GENERAL INFORMATION:

River Uruguay

Rises in Brazil, and later separates Argentina and Uruguay. Its right bank is generally low, wooded and swampy, the left bank high and hilly. Preparatory work has commenced on a large hydro-electric dam to be built at 332 km., above Concordia, which will take some years but will contribute to a regularisation of the river, which at present rises and falls twice every year, with the varying rainfall seasons in its basin, so that approximately half the year the water is low, usually from January to April and again in August. However, the wind also affects the depth of the water as in the River Plate, so that any seasonal forecast is impossible. A safe year round draft to Concepcion del Uruguay can be taken at 20 ft. 6 in., though vessels from time to time load to 22 ft. 6 in.

The Ministry of Marine publishes fortnightly a bulletin with all information on depths of water in the channels, as well as of changes in buoys, lights, etc.

Two new bridges communicating with Argentina now span the Uruguay River at Fray Bentos and Paysandu. The bridge at Fray Bentos has a clearance of 36 m. over zero, and a main span of 220 m.

CARGO

Movement of Cargo

Once stevedores have come aboard, no cargo, either for the port or in transit, may be handled by the crew, as otherwise the vessel will be called on for high extra wages to stevedores. This also affects the lashing of transit cargo on deck.

Stevedores will not work in the rain, except when loading meat, earning double wages while doing so. They can also be persuaded to handle baggage or mail.

When handling dusty cargo in general, or which gives off ammoniacal, nicotine, or organic emanations, masks must be provided for stevedores' use.

Overcarried Cargo

Cargo for Montevideo is often overcarried to Buenos Aires with the consequent delays in delivery and expenses for the vessel. Holds should be carefully inspected as soon as discharge is said to have been finished to avoid possible overcarrying.

Clean Receipt

Agents will advise if they wish to receive any cargo for which a clean receipt cannot clearly be given, otherwise the cargo should be rejected. Mate's receipts cannot be claused to cover any damage from rain, wetting or other causes which might be sustained after the cargo is received on ship's tackle.

Bulk cargoes falling or drifting into water or on dock

When handling bulk cargoes vessels must place between the vessel and the dock side a wooden scaffolding, with lateral boards, or strong canvas to collect all material which is liable to fall into the water or on to the Dock during handling. There is a heavy fine for non-compliance. This should be remembered when writing charter parties, especially under FIO conditions, as this should be for account of shippers or receivers.

Delivery of cargo from vessels

The cargo is discharged direct to Fiscal Warehouses, to lorries, lighters or wagons. When the cargo is delivered to Fiscal Warehouses, receipt for this is given to the vessel's Agents by the Custom House official in charge of the Warehouse. If discharged to lighters the lighterman obtains receipt from the Custom House official once the cargo is received in warehouse. When the cargo is delivered direct to Consignees' lorries, the receipt is given by special Custom House officials called "Cargo Receivers".

The goods are delivered by the Custom House officials to the Consignees against the presentation of the "transferencia" (transfer ticket) signed by the Agents of the vessel. The Agents sign the "transferencia", extended on stamped paper, against the Original Bill of

Lading, which must be legalised by the Uruguayan Consul at the port of loading.

The steamship Agents must keep a special register of all "transferencias", and are responsible to the Authorities for keeping this register. Agents must retain Original Bill of Lading for cargo discharged, as it must be shown to the Customs Authorities immediately if demanded.

When the Consignees have not received the original documents and they wish to take delivery of the goods from the Custom House they must present a Bank guarantee, drawn up in accordance with the form approved by the Shipagents Association.

Cargo manifested to this country in transit to other countries without documents for Uruguay may not be re-shipped to other countries without government permission.

Marks on goods imported to Uruguay

By a Decree dated 30th January 1939, the Uruguayan Government decided that:

"Packages entering Bonded Warehouse, excepting those containing provisions or beverages, and excepting also 'Barraca' articles, shall be marked with the gross weight, the nett weight and corresponding measurement, in a clear and legible manner. These marks may be either 'fire-branded or printed'.

"The 9th August 1939, the Customs Authorities requested that marks and numbers of cases entering Montevideo warehouses should be placed on the extreme ends".

The Customs Authorities have also made known that it is necessary for the packages entering the warehouse to show their weight and measurement in the decimal-metric system.

The inspection of potato cargoes can be effected on board the carrying vessel, and if found in good sanitary condition, can be discharged direct to shore.

Opening and Closing of Hatches

This can be carried out by either crew or stevedores, and hatches must be kept closed when not in use.

Shipments of Meat

These are controlled by the Ministry of Agriculture, whose inspectors check ships' holds before shipment can commence. Holds must be clean and disinfected and temperature controlled to minus 1° to a maximum of plus 1° Celsius for chilled meat, or minus 10° for frozen meat.

Chilled is to be hung on hooks adjustable for height and space and stow of frozen must give a uniform distribution of weight. Alternatively, special cuts are packed and shipped in cartons.

Containers

Use of containers is very limited, since these must be opened up and emptied on the dock alongside, or even on board the vessel. The container itself is considered as part of the vessel's gear, and must be re-shipped without delay.

On rare occasions the Armed Forces have had containers moved out to their barracks.

Consular Dues

All ships arriving at Montevideo must pay Consular dues, with the following exceptions:

Ships that due to a change en route, or by special call of their Agents in Uruguay, during passage, arrive at Montevideo with the sole purpose of receiving orders, as long as no commercial operations are effected.

Ships arriving in distress and which leave port without effecting operations.

Ships arriving for the sole purpose of landing or embarking Pilot.

The Ministry of Foreign Affairs consider bunkering as an operation, therefore ships calling at Montevideo for bunkers must pay Consular dues.

Consular value of the Uruguayan Peso – For the payment of fees abroad, the Executive Power will fix periodically the respective values of the peso, in accordance with exchange fluctuations.

Hours of Attendance at the Uruguayan Consulates – The Office hours of the Consulates will be those fixed by the Government in agreement with the Consuls in each country, endeavouring in each case to have the same working hours as those of the Custom House and other Public Offices of each City. Outside these hours, overtime is charged.

Consular dues on Bills of Lading – When vessels load cargo for Uruguay at ports where there is no Uruguayan Consulate, these dues are collected when the vessel arrives at Montevideo or at any other Uruguayan port. The Agent then recovers these charges from the Consignees.

CREW:

Deserters – Masters and/or Agents must report any deserters when the vessel sails. The Maritime Authorities give intervention to the Police Department, and if the men are located, the Agents must hand them over to the respective Consuls. However, the Agents continue to be responsible before the Authorities for the ultimate repatriation of the men, which must be done at first opportunity.

Vessels are subject to a fine per man. The Agents have also to pay repatriation expenses, in cases where the respective Consuls will not do so.

They must also deposit a guarantee which can be used for repatriation expenses in case the deserter stays in the country for more than 15 days.

Time limit for getting crew members left behind out of the country – According to law, Agents must arrange that such crew members leave the country within 15 days. This period of grace commences as from the date of vessel's departure in respect of deserters and for those disembarked for medical treatment as from date on which they are medically certified as fit for travel.

Upkeep of men left in hospital or temporarily disembarked and traced deserters – The Agents are responsible for the maintenance of men disembarked for medical treatment, or temporarily with a special Immigration permit, and for deserters, until they leave the Country.

Stowaways – Masters of vessels having stowaways on board report them to the Authorities, stating their name and po embarkation. The stowaways must be kept on board. If they escap are found after the vessel sails, Agents will be responsible for repatriation and upkeep charges until they leave the Country. As deserters, vessels with stowaways on board are liable to a fine per if this regulation is not complied with.

Agents must also deposit a guarantee per man, amount to be for repatriating the stowaway or for conveyance to the po embarkation.

Landing members of crew – Paying off crew for other than me assistance is not permitted, but exceptions are granted in special ca An application must be presented by the Agents to the Immigr Department, and if the permit is granted, a formal declaration is si by the Master of the vessel, the Agents, the Immigration Inspector the person wishing to disembark, setting forth length of time he is g to remain in the Country and conditions of departure. The pers documents of the person allowed to land, remain in charge of Immigration Board.

If any member of the crew is landed for medical treatment or pa without the corresponding permit, the vessel will be fined.

Gangways and Rat-Guards

A gangway must be placed and ready after a vessel comes along the quay, but this must not be presented before coming in to the q Authorities will only come aboard by the gangways.

Gangways must also have a lifebuoy with suitable line attached handy, and a safety net must be placed under the gangway, other shore labour will not board vessels, with consequent delay.

The gangway must also be brightly illuminated at night; an oil la is not sufficient.

As soon as vessel is securely moored, regulation size (not less t 80 cm.) rat-guards must be placed on all ropes, wires, fenders, l and hoses.

Heavy fines are imposed for non-compliance with any of these other regulations.

Overside Discharges

All overside discharges from latrines, bathrooms, gallery, scupp engine room, etc. must be screened or covered when vessel is alongs the quay, as vessels will be fined if the discharge falls on the doc gangway.

Adjustment of Compasses

Vessels proceeding through Magellan Straits – The disposition iss by the Chilean Shipping Authorities on 13th April 1953, states:

"When a foreign ship arrives at the Magellan Straits and applies a Pilot, official or private, for navigating the Channels, the Pilot must check the compass for deviations of more than 5°, and if such devia has been determined more than 6 months ago, especially in a pl with great difference of latitude or different hemisphere, compensa of compass is obligatory when not in true order, and a written declara to this effect will be made in the pilotage agreement. The Authorities also send an officer to verify that the compass is in satisfactory condi before entering the Straits".

To avoid probable delays, ships heading for the Straits can make necessary compensation in the Port of Montevideo or in the ante whilst waiting for orders for departure. This port is most convenient this class of compensation because at the present moment there is magnetic variation and also because it is a quiet harbour with suffic depth for turning. A compass adjuster may be obtained at any time

200 Mile Limit and Fishing

Uruguay has declared sovereignty over 200 miles off shore, reserv all fishing and undersea exploitation rights. A number of foreign vessels fishing without permits have been seized and heavily fined, t catch and gear being confiscated.

Permits are obtainable, but in no case for vessels over 500 tons gro to operate within 60 miles from shore, while all activity in territorial wa (200 miles) is forbidden in the months of May and June.

Garbage

Garbage is collected every morning by truck. There is a st prohibition of dumping anything into the port, and oil tanks must no cleaned within 30 miles of the coast, and on a falling tide.

Old dunnage should not be dumped or sold, without permission f the Authorities, through Agents.

Ships' Boats

Use of ship's boats is forbidden within the port, unless they are be lowered, with prior permission, for maintenance or exercises.

Fenders

All vessels must have at least 2 large fenders, to keep them 5 f more off the quay. If the vessel has no fenders, or due to deck ca cannot use them Agents should be warned in advance to rent necessary equipment and have it ready on arrival.

Dropping Anchor when Berthing

If an anchor is dropped when approaching a dock to berth, to co the vessel as she moves in, it is essential that the anchor should hove in again once the ship is moored. Port regulations require this any damage to other craft, real or imaginary, through fouling anchor chain, would cause considerable trouble.

SYSTEM OF CONTROL CENTRES AND MARITIME INFORMATIO (COASTAL STATIONS FP-FT-FW, VHF-FM):

Legal Basis

(a) System of Control and Information of Movement of the Por Montevideo and its zone of influence made operative on 9/4 (Maritime Regulation No. 1).

(b) Control Centre and Information of the Maritime Movement of Port of Colonia and its zone of influence made operative 23/9/76. (Maritime Regulation No. 3).

(c) Control Centre and Information of the Maritime Movement of Port of Nueva Palmira and its zone of influence made opera on 1/10/76. (Maritime Regulation No. 4).

(d) Control Centre and Information of the Maritime Movement of the Port of Punta del Este and its zone of influence made operative on 2/1/77. (Maritime Regulation No. 5).

(e) Control Centre and Information of the Maritime Movement of the Western Coast and its zone of influence made operative on 27/4/78. (Maritime Regulation No. 11).

(f) Control Centre and Information of the Maritime Movement of the Port of La Paloma and its zone of influence made operative on 1/11/78. (Maritime Regulation No.12).

Note: In all the creations of the Control Centres, due account was taken of Programmes 1.09 and 3.08 corresponding to Law 14.106 and Sub-Programmes: "Maritime Police" and "Direction of Mercantile Marine".

(g) Control and surveillance of fishing vessels in the various fishing areas within the waters in the jurisdiction of the P.N.N. – Sources: Laws Nos. 14.145, 14.521 and 14.106 of the P.N.N. – Programme 1.09. (Maritime Regulation No. 2).

(h) Equipment which fishing vessels under the Uruguayan flag must possess when they operate in the common fishing zone between the Eastern Republic of Uruguay and in the Uruguayan fishing areas proper.

Sources: Maritime Regulation No. 2 of the 23/7/76. Decree of Co-ordination of Punta del Este of 27/1/76 (P.N.N. – P.N.A.). (Maritime Regulation No. 6).

(i) Equipment which vessels and/or craft in the coasting trade, pleasure craft, passenger vessels and working boats must carry where they operate in the Ports of the Republic and Navigate in the River Uruguay. (The zone between International Bridges and the Salto Grande).

Sources: Appendix 18 MAR 2 of the Radio communications regulation of the UIT and the Agreement arising from the meeting between Uruguay and Argentina (Buenos Aires 9/76) in respect of the use of VHF and FM channels and Maritime Regulations No. 1 to 6 of the P.N.N. – (Maritime Regulation No. 7).

(j) Law covering the control of pollution: Sources: Law No. 13.833 of the 29/12/69 and in particular articles 2 and 12 of the said Law. Chapter IX Pollution – (Articles 47 to 52) of the Treaty of the River Plate and its Maritime Frontage and Regulation of 28/10/74 of the Prefecture of the Port of Montevideo (Maritime Regulation No. 8).

(k) Zones for lightening ships and complement of cargo: Sources: Resolutions No. 2 and 4 of the Administrative Commission of the River Plate of dates 30/9/77 and 26/10/77 as laid down in Article 28 of the Treaty of the River Plate and its River Frontage and established transitorially in the Article 88 of the said treaty (Maritime Regulation No. 9).

(l) "LASH" – Type Operations: Sources: Resolution No. 1/2/78 of the Administrative Commission of the River Plate, Chapter IV. Articles 24 and 27 (Port Facilities, lightening operations and complements of cargo) of the Treaty of the River Plate and its maritime frontage (Maritime Regulation No. 10.).

(m) Agreement on the International Regulation for preventing unauthorised boarding.

(n) The Treaty of the River Plate and its Maritime Frontage.

(o) The Statutes of the River Uruguay.

(p) The International Agreement for the Safety of Human Life at Sea – 1974.

(q) Regulation of Radio-communications of the International Union of Telecommunications (UIT) and nomenclatures.

Particulars of the System

1. AIMS OF THE SYSTEM OF CONTROL CENTRES

(a) To effect positive sovereignty over the Area of the System:
 1. Territorial Sea
 2. River Plate
 3. River Uruguay
 4. Merin Lagoon

(b) To offer support to the National Mercantile Navigation and of third parties, complying with the objectives as propounded by the International Maritime Organisation (IMO) and by the International Telecommunications Union (UIT).

(c) To serve as a chain of Control Towers, effecting control and information of Movement of vessels and Port Operations.

(d) To co-ordinate with Public and Private Institutions who operate within the Ports of the Republic, to facilitate and activate port operations, avoiding delays and inconvenience.

2. GENERAL FUNCTIONS

The General functions of the Centre are:

(a) To maintain real and efficient control of the movement of vessels, in the area of application of the system in order:
 1. To prevent collisions between vessels.
 2. To alert the systems of Search and Rescue and/or Salvage in the event of vessels requiring assistance.
 3. To facilitate BYR operations.

(b) To maintain real and orderly control of the operations in the ports to:
 1. To prevent groundings and collisions with obstacles in port works:
 2. To have prepared emergency plans for cases of disasters and maritime accidents within the Ports and International Bridges (River Uruguay).

(c) To maintain up-to-date information concerning the state of the weather, lighting and all other matters contributing to the safety of navigation and operations in the area.

(d) To maintain up-to-date information for Maritime Agencies and/or Owners, providing such information to facilitate and activate port operations to be effected by vessels, obviating delays and inconvenience at all times.

(e) To serve Public and/or Private Institutions who operate in the Ports, collecting, classifying, analysing, evaluating and disseminating all the necessary information for the better fulfilment of port service.

(f) To comply with all other functions which are specified by the Mandate and to co-operate with Public Authorities and organisations in all matters relating to its functions.

3. CONTROL AND INFORMATION FROM THE CENTRES

The system belongs to the National Navy and is controlled by the National Navy Prefecture. It is directed from the Montevideo Control Centre.

(a) Control of Movement of Vessels – Control of vessels navigating within the Vessel Movement Areas.

(b) Control of Port Operations – Control of vessels manoeuvring within the ports of the Republic, including roads and access channels.

(c) Control of International Bridges – Control of vessels navigating in the International Bridges Zone – Gral. Jose Artigas Bridge at Paysandu, and Gral. San Martin Bridge at Fray Bentos.

(d) Vessel Movement Service – Maritime Mobile Safety Service, between coastal stations and vessels or between vessels, where the messages refer solely to vessel movement.

(e) Port Operation Service – Maritime Mobile Service in a port or in its district, between coastal stations and vessels, where the messages refer solely to vessel operations, movement and safety and, in the event of emergency, to safeguarding persons.

4. ZONES OF CONTROL AND INFORMATION OF THE CONTROL CENTRE SYSTEM

(a) Port of Montevideo (Deep Sea – Coasting – Fishing).
 1. "Alpha" – Control and information of vessel movement.
 2. "Bravo" – Control and information of port operations.

(b) Port of Buceo (Pleasure Craft).
 1. "Oscar" – Control and information of port operations.

(c) Port of Santiago Vazquez (Pleasure Craft – Coasting).
 1. "Papa" – Control and information of port operations.

(d) Port of La Paloma (Fishing Centre).
 1. "Kilo" – Control and information of movement of vessels.
 2. "Lima" – Control and information of port operations.

(e) Port of Punta del Este (Fishing – Pleasure Craft).
 1. "Golf" – Control and information of vessel movement.
 2. "Hotel" – Control and information of port operations.

(f) Port of Piriapolis.
 1. "Tango" – Control and information of port operations.

(g) Port of Colonia (Passage port to Buenos Aires).
 1. "Charlie" – Control and information of vessel movement.
 2. "Delta" – Control and information of port operations.

(h) Port of Sauce (Coasting).
 1. "Uniform" – Control and information of vessel movement and of port operations.

(i) Port of Nueva Palmira (Deep Sea).
 1. "Echo" – Control and information of movement of vessels.
 2. "Foxtrot" – Control and information of port operations.

(j) Port of Carmelo (Pleasure Craft – Coasting).
 1. "Quebec" – Control and information of port operations.

(k) Port of Fray Bentos (Overseas – Navigation – International Bridges).
 1. "India" – Control and information of the movement of vessels.
 2. "Juliet" – Control and information of port operations.

(l) Puerto Paysandu (Overseas – Navigation – International Bridges).
 1. "Mike" – Control and information of the movement of vessels.
 2. "November" – Control and information of port operations.

(m) Puerto Salto (Coasting – Pleasure Craft – Passages).
 1. "Romeo" – Control and information of the movement of vessels.
 2. "Sierra" – Control and information of port operations.

5. COMMUNICATIONS

All Centres maintain permanent listening on Channel 16 (VHF – FM).

(a) *Language:* The language used in communication is Spanish.

Vessels who have difficulty in communicating in Spanish may do so in English, and if there are problems in hearing properly they may use the groups of the International Code Signals, Tables of Spelling equivalents and Numbers, or "Q" Code.

(b) *Channels – Frequencies and Usages:* There will be those as defined by Appendix 18 Mar 2, of the Radiocommunications Regulations of the International Telecommunications Union, published by the General Secretary of the UIT in Geneva 1976 and the points agreed in the Uruguay – Argentina Meeting, carried out in the City of Buenos Aires 9/76, use of the VHF Channels (Band 156 – 174 MHz.).

Channel	*Frequencies*	*Usage*
6	156.300 MHz.	Bridge to Bridge.
8	156.400 MHz.	Port Operations.
9	156.450 MHz.	Port Operations.
11	156.550 MHz.	Transmission from the Centres in fulfilment of objectives.
13	156.650 MHz.	Transmission from the Centres in fulfilment of objectives.
15	156.750 MHz.	Meteorological Bulletins and Warnings to Navigators.
16	156.800 MHz.	Calling up and Security.
18	156.900 MHz. Reception	Jose Ignacio Oil Terminal.
	161.500 MHz. Transmission	Jose Ignacio Oil Terminal.

Should problems arise with VHF equipment on vessels (the range of same, out of service, etc.) communications should be effected on MF or on HF with the Safety Coastal Stations of the P.N.N.

The services and frequencies of the Coastal Stations are described in the tables at the end of "Uruguay General" Section.

Vessels who, for some reason or other cannot effect communications by radiotelephone (VHF, HF, MF), should do so by radiotelegraphy through the intermediary of the Coastal Station (open to public correspondence) Cerrito Radio CWA.

Radiotelegrams should be sent in time to the telegraphic address Comopre.

(c) *Listening Out by Vessels:*

1. *All vessels* in Uruguayan judicial waters must maintain permanent listening watch on Channel 16 (VHF – FM) except when they are moored in port. If there are problems on VHF they should listen out on 2182 or 4125 kHz.
2. When a vessel cannot, due to any fault of whatever nature, maintain listening watch on Channel 16, she should pass to Channel 11 or 13, but advise the Control Centre first.
3. In the various zones, the vessels must use as a working channel to communicate with the Zone Centre, the frequency which the Control Centre will indicate to them on Channel 16.
4. In all the ports of the Republic, vessels and/or craft in the coasting trade, pleasure craft (Categories A and B), passenger craft and traffic units (tugs, dredgers, launches, lighters, etc.) must be equipped with a VHF – FM transmitter and receiver for local communications with Port Controls, Appendix 18 Mar 2 of the Radiocommunication Regulations of the International Telecommunications Union.
5. *All vessels or craft* navigating or carrying out operations within 25 miles or more of the coast, must be equipped with a BLU transmitter and receiver (with corresponding frequencies) of 150 watts effective power and A3A and A3J type transmission.

(d) *Services and Frequencies of the FP, FC and FW Dependent on the P.N.N.*

Coastal Station (FC), Station for Port Operation (FP), Station for Service of Vessel Movement (FT), Station which is both for Port Operations and for Service of Vessel Movement (FW).

(e) If in fulfilment of the regulations set out by this System, vessels on calling up the Control Centre cannot obtain a reply, they should immediately make the communication in question to the Director of the System (telegraphic address: Comopre) by radiotelegraphy or radiotelephony via Cerrito Radio (CWA) or Punta Carretas Radio (CWF) respectively.

Communications to Centres:

1. From Vessels in the Zone.
   - (a) Position on entering and leaving each Zone of Vessel Movement (Flag, Name, International Call Sign, Where From, Where Bound, Latitude, Longitude, Course, Speed and Maximum Draft).
   - (b) ETA at next port.
   - (c) Problems with characteristic aspects during navigation.
   - (d) If anchoring or raising anchor at any point in the Control Zone of Vessel Movement, it is necessary to ask for authorisation when this is done within Port Operation Zones, and also whenever any manoeuvre is intended to be carried out, and this authorisation expiring within twenty (20) minutes from its request.
   - (e) Any damage suffered by the vessel.
   - (f) Assistance given to damaged vessels or those in difficulty.
   - (g) Any indications of dangerous obstacles to navigation which are not duly indicated by buoys and lights.
   - (h) Any serious reduction in visibility.
2. Pilotage:
   - (a) Whatever is specified in the General Pilotage Regulations.
   - (b) Time of embarkation and/or of disembarkation.
   - (c) Request of Master concerning change, mooring, etc.
   - (d) Difficulties in pilotage.
3. Concerning the Owner or Agent:
   - (a) Monthly list of expected vessels.
   - (b) Confirmation of arrival of vessels 24 hours in advance.
   - (c) News concerning vessels being delayed or arriving early.
   - (d) Information if the vessels are carrying hazardous cargo (explosives or inflammables) 24 hours in advance of arrival, including any such cargo in transit, mentioning:
     - (i) The amount and location of such cargo.
     - (ii) The correct technical name of the substance (the designation used for transportation purposes), the UNO number (if this is given), classification in the IMDG Code (if this is given), the flash point (if applicable) and quantity.
     - (iii) The presence or otherwise on board of a Certificate which is valid showing the ability of the vessel in respect of the cargo which it is carrying (only for hazardous substances carried in bulk);
     - (iv) The stowage of hazardous cargo on board, indicating those which have to be unloaded and those which have to remain on board;
     - (v) The condition in which the hazardous cargo is and any defect which is known in respect of packages or drums, together with the system of containing and handling of the cargo, of the equipment and instruments used (when hazardous bulk cargo is involved), which may engender excessive risk.
     - (vi) Any known defect which may effect considerably the safety of navigation.

(f) *Communications from the Centres:*

1. To vessels (navigating towards Uruguayan Ports).
   - (a) The quay at which they will berth.
   - (b) The Pilot who will assist the vessel.
   - (c) Any information from the Maritime Agent with regar future operation.
2. To the Pilot:
   - (a) Tugs and cable launches who will assist him.
   - (b) Defences on the sea wall.
   - (c) Bitts which the vessel will use.
3. To the Owner or Agent:
   - (a) Position of their vessel.
   - (b) ETA.
   - (c) Conditions of cargo.
   - (d) Time at which the Pilot will go on board.
   - (e) Time of berthing.
4. To the Centre Director of the System (Control Centre an Information of the Maritime Movement of the Port of Montevideo) immediately any information is obtained wi regard to:
   - (a) A BYR incident or any difficulty which is presented t vessel.
   - (b) A deep sea or coasting vessel (data concerning Nava Messages in accordance with the Abbreviated Code)
   - (c) A fishing vessel, with the Naval Message data being follows:
     - – Where from, Flag, Name, International Call Sign, Month, Day and Hour of sailing, Position (for Custo Clearance), Month, Day and Hour of Position, Activ (fishing or bound for Port).
     - – Arrival, Flag, Name, International Call Sign, Month, Day and Hour of Arrival, Port of Arrival.
     - – Fishing or within the Zone, or the Port, Flag, Name, International Call Sign, Position, Month, Day and H of Position ETA (if it is within the Zone or the Port).

(5) To the adjacent Control Centre:

When a deep sea or coasting vessel sails from a port contro by the Control Centre, or when this vessel effects a passag the Vessel Movement Zone controlled by that Centre, this m be informed to the adjacent Control Centre (according to course of the vessel) stating ETA and the Zone of Ves Movement of this adjacent Centre.

Note: The Control Centres will effect communications by Na Message. These Naval Messages must be sent immediately a receipt from vessels or when such information comes to h from other sources.

(Naval Messages in this context will have Priority Preceden

(6) Command of to the Naval Control of Maritime Traffic Uruguay (Contramu). Immediately on receipt all informat specified in item (f) – Number (4).

(g) *Communications from Coastal Stations (Vessel Movements – MF-HF)*

1. To the Centre Director of the System (Control Centre a Information of the Maritime Movement of the Port Montevideo). Immediately on receipt all information speci in Item (f) Number (4).
2. To the Control Centre with responsibility over the zone which a message refers.

The same as those quoted in the preceding Number 1.

6. FISHING VESSELS:

(a) All fishing vessels clearing entry or departure from any natio port towards the different Fishing Areas must communicate to Maritime Authority the following:

1. On Sailing:
   - a. Flag (FL)
   - b. Name of Ship (SHP).
   - c. International Call Sign (IND).
   - d. Port of Departure (DEP)
   - e. Month, day and hour of departure (TOD).
   - f. Destination (Indicate Fishing Zone and Position) (DST)
   - g. Month, day and hour estimated at arriving at the Fish Zone (ETA Z/P).
2. On Arrival:
   - a. Flag (FL).
   - b. Name of Ship (SHP).
   - c. International Call Sign (IND).
   - d. Port of Arrival (PORT).
   - e. Month, day and hour of arrival (ARR).

(b) All fishing vessels *navigating* must communicate every 6 ho with the Safety Coastal Station of the National Naval Prefect of the Eastern Republic of Uruguay which is nearest to them to which they are listening) giving the following information:

1. International Call Sign (IND).
2. Position in Latitude and Longitude (POS).
3. Month, day and hour of the position (DHPOS).
4. Port of Destination (DET).
5. Activity: (Fishing – Coming to Port – Going to Zone) (ACT

(c) *Normal Fishing Zones:*

1. High Seas Zone (Altamar): Zone which is outside the jud waters and within the Common Fishing Area.
2. Common Fishing Area (ZOCOPES): Art. 73 of the River Pl and Territorial Sea Treaty.
3. The Zone of the River Plate (RIPLATA).
4. The coastal Zone of the Atlantic Ocean (COSATLAN): Z included between our coast on the Atlantic Ocean and a 12 miles out.
5. Zone of the River Uruguay (RIURU).
6. Zone of the Merin Lagoon (LAMERIN).

(d) Uruguayan Fishing Vessels which are *navigating* in the Common Fishing Area (Uruguay – Argentine) within the Sector of Argentine Jurisdiction are obliged to communicate its position to the Argentine Maritime Authority. Communications will be made on frequency 3860.6 kHz. to the Coastal Safety Station of the Prefecture of the Mar del Plata.

(e) *Note:* Information to be communicated: All the communications as specified in (b).
All fishing vessels must *listen out permanently* on Channel 16 (VHF – FM), except when they are moored in port. If they are at a distance from the coast which prevents a safe communication on VHF, listening must be effected on 2721.5 kHz. Those effecting operations 25 miles or more from the coast, must be equipped with a BLU transmitter and receiver (with the corresponding frequencies) with 150 watts effective power and type of transmission A3A and A3J, and also fishing vessels must be equipped with a receiver on 2721.5 kHz.

(f) Vessels, after prior request to the Control Centre covering them, may pass to Channel 6 or 8, and keep on those *only for the necessary time* for Fishing Manoeuvres, after which they must return to Channel 16, and advise the Centre accordingly.

7. HYDROCARBONS: It is prohibited to pour hydrocarbons or residual matter arising from the washing of tanks, clearing of bilges and ballast in general or any other action capable of having contaminary effects in waters within the territorial sea of Uruguay with the exception of the zone which is:
(a) Outside the limits of the River Plate.
(b) Outside 100 miles of the Uruguayan Territorial Waters, i.e. 100 miles out from the Atlantic Ocean coast.
(c) Outside the Prohibition area for contaminatory action (Article 78 of the River Plate Treaty).

8. ZONES OF OPERATION FOR LIGHTENING AND COMPLEMENT OF CARGO:
The zones of operation for lightening and complement of cargo are as follows:
Zone "A": Between the Parallels of Lat. South 35° 04′ and 35° 08′ and between the Meridians of Long. West 56° 00′ and 56° 02′.
Zone "B": Between the Parallels of Lat. South 35° 30′ and 35° 33′ and between the Meridians of Long. West 56° 30′ and 56° 38′.
Zone "C": Between the Parallels of Lat. South 35° 35′ and 36° 06′ and between the Meridians of Long. West 56° 30′ and 56° 38′.
Zone "D": Between the Parallels of Lat. South 35° 04′ and 35° 06′ and between the Meridians of Long. West 56° 11′ and 56° 16′.

9. OPERATIONS OF LOADING AND UNLOADING "LASH" TYPE VESSELS:
The operation of loading and unloading "LASH" type vessels for the national territory, on the one hand may be effected apart from within the lightening and complement of cargo areas in ports, also in the corresponding roads.

10. TRANSFER OF VESSELS:
The transfer of vessels between roads and lightening areas and for complement of cargo purposes, will be effected under pilotage and tug control using the Port Services from which the barges in question have come.

CONTROL CENTRES:

Control Centre and Information of Maritime Movement of the Port of Colonia.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.
(a) The Centre is controlled from the Prefecture of the Port of Colonia, within the free zone of the Port, located in the main building of the free Port zone of Colonia (Latitude 34° 28′ 28″ S., Longitude 57° 57′ 38″ W.).
(b) The call sign of the Control Centre is CWC 23, and for calling up purposes it is possible to use CONTROL COLONIA PREFECTURE.
(c) The Control Centre of the Port of Colonia is located in the Prefecture of the Port of Colonia.
The Prefecture of the Port of Colonia is a dependency of the National Naval Prefecture (2nd Circumscription).
Telephone No. of the Control Centre – 688.
Address – Boulevard Espana 2054 (Department of Colonia).

AREAS OF CONTROL.
(a) The Control Centre and Information of Maritime Movement, covers:
1. Zone "CHARLIE". The area of the River Plate marked by the Meridians which pass through Martin Chico Point (Longitude: 58° 12′ 30″ W.) and Punta Rosario (Longitude: 57° 21′ W.) and the middle line equidistant from both coasts (Law 14.145/74 – "Treaty covering the Limits of the River Plate"), with the exception of the area of water included between the imaginary line which joins San Carlos Point; Lopez West Island; Farallon Island; the Green Buoy of Vienna, Parallel 34° 30′ S., the Meridian which passes through Riachuelo Point Longitude: 57° 43′ 18″ W., and the coast ("DELTA" AREA).
2. "DELTA" area. Area of the River Plate, limited by the imaginary line which joins San Carlos Point; Lopez West Island, Farallon Island, the Green Buoy of Vienna, Parallel 34° 30′ S., the Meridian which passes through Riachuelo Point Longitude: 57° 43′ 18″ W., and the coast.
(b) The Control Centre and Information of Maritime Movement of the Port of Sauce covers:
1. "UNIFORM" zone. The area of the River Plate included between Meridians 57° 25′ 48″ W. and 57° 33′ W., the coast and the parallel Latitude: 34° 29′ 18″ S.

COMMUNICATIONS TO THE CENTRE.
(a) From vessels.
1. In zone "CHARLIE". The Control Centre must be informed when the following points have been passed:
Punta Rosario
Puerto Sauce
Roca Barriles
Puerto Colonia
Km. 56.5 (Farallon Island)
Km. 71.3 (San Pedro Bar)
Km. 101 (Martin Chico Point)
In both Zones of Control the communications as designated in following tables, must be effected.
(b) From the Director of Hydrographic Studies of the MTOP.
1. The place assigned for berthing or mooring.
2. Guard and order tugs (when these exist).

Control Centre and Information of the Maritime Movement of the Port of Fray Bentos

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.
(a) The Centre is controlled from the Prefecture of the Port of Fray Bentos (Latitude: 30° 06′ 50″ S., Longitude 58° 18′ 27″ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Fray Bentos is CWC 25. When calling up it is possible to use CONTROL FRAY BENTOS PREFECTURA.
(c) The Control Centre of the Port of Fray Bentos is located in the Prefecture of Fray Bentos (5th Circumscription P.N.N.).
Telephone No. of the Control Centre is 321.
Address: Luis A. de Herrera 1249 on the corner with 25 de Agosto, Fray Bentos Department of Rio Negro.

CONTROL AREAS.
(a) The Control Centre Information of the Maritime Movement of the Port of Fray Bentos covers:
1. Zone "INDIA" The area of the River Uruguay marked by the parallel 33° 30′ S. (Punta Amarilla Km. 46) and the parallel 32° 50′ S. (Roman Island) navigable areas of the Rio Negro and San Salvador and the middle line equidistant from both coasts; with the exception of the Port of Fray Bentos and the area of water marked by the port and maritime constructions (zone "JULIET").
2. Zone "JULIET". The port of Fray Bentos and the areas of water marked by the port and maritime constructions.

COMMUNICATIONS TO THE CENTRE.
(a) From vessels:
1. In zone "INDIA". The Control Centre must be notified during navigation when the following crossings are made:
Km. 46 (Punta Amarilla)
Km. 61 (Riacho Yaguari)
Km. 83 (Paso Barrizal)
Puerto Fray Bentos
International Bridge "General San Martin"
Km. 122 (Nuevo Berlin)
Km. 140 (Roman Island)
In both Areas of Control the designated frequencies are shown in following tables.

THE BRIDGE ZONE
All vessels of 100 tons or more gross registered tonnage must comply with the following instructions:
(a) Navigation day and night in both directions will be made under the bridges by the marked channel, in the central arch, between piles 10 and 11 in the Bridge "Libertador General San Martin".
(b) It is prohibited to cross or overtake between Km. 100 and Km. 102.5 and for this purpose the following passage priorities are established:
1. Those navigating downstream over those navigating upstream.
2. Convoys with a tug either pulling or pushing have priority over all vessels which include those that are navigating downstream.
(c) The vessel or convoy which has to give way will wait outside the limits indicated in point (b). Between those limits it is prohibited to anchor for any cause, even though the channel is left free.
(d) Between the limits indicated in point (b), speed must be reduced to the minimum compatible with good steering and manoeuvring.
(e) In the zones included between the limits indicated in point (b), it is prohibited to effect any form of dredging operation across the whole width of the river.

Control Centre and Information of the Maritime Movement of the Port of La Paloma

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.
(a) The Centre is controlled from the Prefecture of the Port of La Paloma (Position: Latitude 34° 39′ 30″ S. and Longitude 54° 08′ 28″ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of La Paloma is CWC 30. For calling up purposes "CONTROL LA PALOMA PREFECTURA" may be used.
(c) The Control Centre La Paloma is located in the Prefecture of the Port of La Paloma (8th Circumscription P.N.N.)
Telephone No. of the Control Centre – 16.
Address – Avenida del Navio (Puerto de La Paloma) – Rocha.

CONTROL ZONES.

(a) The Control Centre and Information of the Maritime Movement of the Port of La Paloma comprises:

(1) Zone "KILO". Zone of the Atlantic Ocean (Territorial Sea) situated between the meridians 50° 50' and 54° 15' W., limited by the straight line 128° of the Chuy Lighthouse (lateral maritime limit with the Federal Republic of Brazil – Law 14.163) and to the South by the lateral maritime Argentine–Uruguay limit (Law 14.145/974). – "Treaty of Limits of the River Plate". Art. 70), with exception of the Port of La Paloma, between the coast and an imaginary line which goes between the end of the breakwater towards the Eastern point of the Costa Azul (Zone "LIMA"). Zone "LIMA".

(2) Zone "LIMA". Port of La Paloma, zone situated between the coasts and an imaginary line which goes from the end of the breakwater to the Eastern point of Costa Azul.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels to:

(1) In Zone "KILO" – The Control Centre must be informed during navigation when the following points are crossed:
The Lighthouse Chuy
The Lighthouse Cabo Polonio
The Lighthouse Santa Maria

(2) In Zone "LIMA"
During navigation in the Access Channel and within the Port when the Port jetty small light is passed.

Also, in both control zones the communications shown in the following tables must be effected.

(b) From the Hydrographic MTOP Directorate:
(1) Place assigned for berthing or mooring.
(2) Guard or order tugs (when they exist).

Control Centre and Information of the Maritime Movement of the Port of Montevideo.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS

(a) The Centre is controlled from the National Naval Prefecture, located on the Floors 11, 12 and 13 of the General Command Tower of the Navy (Customs Building Lat. 34° 54' 03" S., Long. 56° 12' 44" W.)

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Montevideo is CWC 39. In calling up it is possible to use "CONTROL MONTEVIDEO PREFECTURA".

(c) The Call Sign of the Control Centre of the Port of Buceo is "CONTROL BUCE PREFECTURA".

(d) The Call Sign of the Control Centre of the Port of Santiago Vazquez is CWC 38.
In calling up it is possible to use "CONTROL SANTIAGO VAZQUEZ PREFECTURA".

(e) The Control Centre of the Port of Montevideo is located in the building of the Navy General Command.
Telegraphic Address – "Comopre" (Control Montevideo Prefectura).
Telephones – 95.51.01 – 95.24.77 – 95.62.53.
Telex UY 929
Address – Rambla 25 de Agosto de 1825.

ZONES OF CONTROL.

(a) The Control Centre and Information of the Maritime Movement of the port of Montevideo covers:

(1) Zone "ALFA". Zone of the River Plate situated between the meridians 55° 30' and 57° 21' W., and to the South to the limit of the River Plate with the Argentine Republic (Law 14.145/74 "Treaty of Limits of the River Plate").
With the exception of the areas of water included:
(a) Between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01' S. (Zone "BRAVO").
(b) Between the meridians 56° 00' and 56° 09' W. and the parallel 34° 57' S. (Zone "OSCAR").
(c) Between the meridians 56° 20' and 56° 40' W. and the parallel 34° 56' S. and the coast (Zone "PAPA").

(2) Zone "BRAVO". Zone of the River Plate included between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01' S., including the Access Channel to the Port of Montevideo, Foreport, Docks, Channel or Inflammable Cargo Docks (ANCAP).

(b) The Control Centre and Information of the Port of Buceo includes:
(1) Zone "OSCAR". Zone included between the meridians 56° 00' and 56° 09' W. and the parallel 34° 57' S.

(c) The Control Centre and Information of the Maritime Movement of the Port of Santiago Vazquez includes:
(1) Zone "PAPA". Zone included between the meridians 56° 20' and 56° 40' W. and the parallel 34° 56' S. and the coast. It includes the Port, Anchorages and all areas of water.

COMMUNICATIONS FROM THE CENTRE

(a) To the National Administration of Ports (A.N.P.).
(1) Time of arrival of each vessel (ahead of time or delayed).
(2) Movement of tugs.
(3) Information from Masters of vessels on his cargo or changes in his berth.

(b) To the Argentine Naval Prefecture:
(1) ETA of vessels which are going to Argentine Ports or to Coastal Ports.

COMMUNICATIONS TO THE CENTRE.

(a) From the National Ports Administration (A.N.P.)
(1) Designation of berths prior to 1700 hrs. on the previou
(2) Tugs and launches for guard and order purposes.
(3) Departures for Deep Sea and Coasting vessels.

(b) From the vessels:
(1) In Zone "ALFA". The Control Centre must be informed du
navigation when the following points are passed:
(a) To the West of the Access Channel to the Port of Montev
1. By Middle Channel:
The *Graf Spee*
The Panela Lighthouse
The Uruguayan Banco Ortiz Buoy
The Argentinian Banco Ortiz Buoy
2. By North Channel:
The *Graf Spee*
The Panela Lighthouse
The Jesus Maria Buoy
The Arazati Point
The Puerto Rosario.
(b) To the East of the Access Channel to the Port of Montevi
Punta Brava
Isla de Flores
(2) In Zone "BRAVO".
During navigation in the Access Channel:
The Eje Buoy
The Jetty

In both areas of control the communications as designated on
following tables should be effected.

Control Centre and Information of the Maritime Movement of Port of Nueva Palmira.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Control Centre is controlled from the Sub-Prefecture Nueva Palmira (Position Lat. 33° 52.7' S., Long. 58° 25.3' W

(b) The International Call Sign of the Control Centre and Informa of the Maritime Movement of the Port of Nueva Palmira is C 31 and when calling up it is permitted to use "CONTROL NUE PALMIRA PREFECTURA".

(c) The Control Centre of the Port of Nueva Palmira is located in Sub-Prefecture of Nueva Palmira.
The Sub-Prefecture of Nueva Palmira is a dependency of Prefecture of Colonia (2nd Circumscription P.N.N.).
Telephone No. of the Control Centre – 139.
Address – Port Area – Nueva Palmira – Department of Colo

AREAS OF CONTROL

(a) The Control Centre and Information of the Maritime Movem of the Port of Nueva Palmira cover:

(1) Zone "ECHO". Zone of the River Plate and the River Urug is marked by the meridian 58° 12.5' W., (Punta Martin Ch Km. 101) and the parallel 33° 30' S., (Punta Amarillo Km. and the middle line equidistant from both coasts with exception of the Port of Nueva Palmira and the area of wa limited by the port constructions (zone "FOX-TROT").

(2) Zone "FOX-TROT". The Port of Nueva Palmira and the ar of water limited by the port constructions (official quay, Bed of the Company Navigen and the Higueritas Dock).

COMMUNICATIONS TO THE CENTRE:

(a) From Vessels:
(1) In zone "ECHO", the Control Centre must be informed du
navigation of the following crossings:
Km. 101 (Punta Martin Chico),
Km. 121 (Sola Island).
Puerto Nueva Palmira.
Km. 22 (Punta Arenal Grande).
Km. 46 (Punta Amarilla).

In both Areas of Control, the communications as shown following tables must be effected.

Control Centre and Information of the Maritime Movement of Port of Paysandu.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Por Paysandu, located in the main Customs building (32° 18' 06" 58° 05' 08" W.).

(b) The International Call Sign of the Control Centre and Informa of the Maritime Movement of the Port of Paysandu is CWC and when calling up it is possible to use "CONTROL PAYSAN PREFECTURA".

(c) The Control Centre and Information of the Maritime Movem of the Port of Paysandu is a dependency of the Prefecture of Port of Paysandu (6th Circumscription P.N.N.).
Telephone No. of the Control Centre – 3099.
Address – Presidente Viera and Avenida Brasil – Paysa (City).

CONTROL AREAS:

(a) The Control Centre and Information of the Maritime Movement of the Port of Paysandu covers:
   (1) Zone "MIKE". The area of the river Uruguay marked by the parallel 32° 50′ S. (Roman Island) and parallel 31° 53′ S. (the mouth of the Malo Stream Km. 257 approximately) and the middle line equidistant from both sides with the exception of the zone included between the parallel 32° 20′ S. (the mouth of the Stream "Sacra") and the parallel 32° 14′ S. and the mouth of the Stream "San Francisco". (Zone "NOVEMBER").
   (2) Zone "NOVEMBER". The area of the River Uruguay limited by the parallel 32° 20′ S. which passes through the mouth of the Stream "Sacra" up to parallel 32° 14′ S. which passes through the mouth of the Stream "San Francisco".

COMMUNICATIONS AT THE CENTRE:

(a) From vessels:
   (1) In zone "MIKE" – The Control Centre must be notified during navigation when the following crossings are made:
      Km. 140 (Roman Island)
      Km. 160 (San Javier)
      Km. 183 (Concepcion del Uruguay)
      Punta "N" Almiron Island
      Puerto Paysandu
      International Bridge "General Artigas"
      Punta Piedras
      Arroyo Malo

In both Areas of Control the communications are shown in the following tables.

THE BRIDGE ZONE.

All vessels of 100 tons or more gross registered weight must comply with the following instructions:

(a) Navigation both by day and night in both directions will be made under the bridges by the marked channel, in the central arch, between piles 11 and 12 in the bridge "General Artigas".
(b) It is prohibited to cross or overtake between Km. 208 and 211. For this purpose the following passage priorities are established:
   (1) Those navigating downstream over those navigating upstream.
   (2) Convoys with a tug either pulling or pushing have priority over all vessels which include those that are navigating downstream.
(c) The vessel or convoy which has to give way will wait outside the limits indicated in point (b). Between those limits it is prohibited to anchor for any cause, even though the channel is left free.
(d) Between the limits indicated in point (b) – speed must be reduced to the minimum compatible with good steering and manoeuvring.
(e) In the zones included between the limits indicated in point (b) – it is prohibited to effect any form of dredging operation across the whole width of the river.

Control Centre and Information of the Maritime Movement of the Port of Punta del Este and Piriapolis.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Port of Punta del Este (Lat. 34° 57′ 48″ S., Long. 54° 57′ 06″ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Punta del Este is CWC 34.
   For calling up purposes it is possible to use "CONTROL PUNTA DEL ESTE PREFECTURA".
(c) The Call Sign of the Control Centre of the Port of Piriapolis is CWC 33.
   For calling up purposes it is possible to use "CONTROL PIRIAPOLIS PREFECTURA".
(d) The Control Centre of the Punta del Este is located in the Prefectura of the Port of Maldonado (3rd Circumscription P.N.N.).
   Telephone No. of the Control Centre – 4.18.84.
   Address – Calle 8 and 13 (Department of Maldonado).
(e) The Control Centre of the Port of Piriapolis is located in Sub-Prefecture of the Port of Piriapolis (3rd Circumscription P.N.N.). The Sub-Prefecture of Piriapolis is controlled by the Prefecture of Maldonado.
   Telephone No. – 18.
   Address – Avenida Piria and Calle Maipu (Piriapolis).

ZONES OF CONTROL

(a) The Control Centre and Information of the Maritime Movement of the Port of Punta del Este covers:
   (1) Zone "GOLF". Zone of the River Plate, Atlantic Ocean (Territorial Sea) situated between the meridians 55° 30′ and 54° 15′ Longitude West, the imaginary line which joins the Punta del Este with Punta Ballena and in the South by the continuation of the limit of the River Plate with the Argentine Republic and the Territorial Sea (Law 14.185/974 "Treaty of the Limits of the River Plate"), with the exception of the extent of water included between meridians which pass through Punta Iman (55° 16′ 08″ W.) and Punta Raza (55° 14′ 00″ W.) and the meridian of 34° 56′ 30″ S. (Zone "TANGO") – Piriapolis.
   (2) Zone "HOTEL". The Bay of Maldonado and the Port of Punta del Este.
      (a) The Bay of Maldonado: Zone situated between the coast and the imaginary line which joins Punta del Este with Punta Ballena, includes also "Boca Grande" and "Boca Chica".
      (b) The Port of Punta del Este: Zone situated between the coast and an imaginary line which goes from the end of the jetty to a point which limits to the North of the Mansa Beach. It includes all the mooring areas.
(b) The Control Centre and Information of Maritime Movement of the Port of Piriapolis comprises:
   (1) Zone "TANGO". Zone of the River Plate included between the parallels which pass through Punta Iman (55° 16′ 08″ W.) and Punta Raza (55° 14′ 00″ W.) and the meridian 34° 56′ 30″ S.

COMMUNICATIONS TO THE CENTRE

(a) From Vessels
   (1) In zone "GOLF". The Control Centre must be informed during navigation when the following points are passed:
      The Isla de Lobos (Wolf Island)
      The Punta del Este Lighthouse.
   (2) In zone "HOTEL". During navigation in the Access Channel and within the Port:
      When the Bajo del Monarco Buoy is passed, and
      When the Isla de Gorriti Small Lighthouse is passed.
      Also within both Control areas the communications indicated in the following tables must be effected.
(b) From the Hydrographic Directorate of MTOP.
   (1) The place assigned for berthing or mooring.
   (2) Guard and order tugs (when they are present).

KEY TO LITERAL AND NUMERICAL REFERENCES USED IN THE COASTAL STATION NOMENCLATURE

(a) To transmit meteorological bulletins in accordance with the requirements of List VI of RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.
(b) To transmit Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.
(c) To transmit medical advice on request of navigators.
(d) To transmit urgent messages to Mariners immediately on receipt and to repeat them 3 minutes past every hour and at the normal times of transmission of messages to navigators.
(e) To participate in operations of Search and Salvage.
(f) To alert the Centre's Co-ordinator of Search and Salvage.
(g) To direct the system of Control Centres and Information of Maritime Movement and Port Operations. (FP, FT and FW).
(h) Receive meteorological observations (SHIP) made on the high seas by Masters of vessels.
(i) To effect special transmissions relating to hydrographic and mareographic Information.
(m) To receive reports from fishing vessels (National, Argentine and third nations who are authorised to operate within the area) and to remit them to the Director of the Control Centre System (CONDI) obligatorily in accordance with Maritime Legislation No. 6 P.N.N.
(n) To effect control and facilitate information within the area, receiving reports from vessels navigating within it (obligatory for vessels in accordace with IMP Uruguay).
(o) Effect control and facilitate the supply of information from the port.
(p) Receive by telex or radio requests for pilotage service.
(q) Radiogoniometric Service on VHF (RG).
1. Call up and listening service on a permanent basis and for announcing in advance the intention to transmit.
2. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 156.800 MHz (Channel 16).
3. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by the FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 2182 kHz (Simplex) and 4419.4 kHz (Duplex C.421).
4. Frequency used for the transmission of radiomedical advice on request.
5. Frequency used for operations of Search and Salvage.
6. Frequency used for reports from national fishing vessels.
7. Frequency for Coastal working purposes.
8. Frequency used in common with the Argentine Republic (Naval Prefecture) for the control of fishing vessels of both nations.
9. Provisional working frequency.
10. Working frequency for control and zonal information (Vessel Movement Service).
11. Working frequency for control and Port information (Port Operation Service).
12. Port operation frequency (tugs, traffic launches, tugs and control centres).
13. Duplex frequency Band from 4 to 23 MHz of the Mobile Maritime Service Section 17 REV. RR of the UIT.
CO – Station open exclusively to official correspondence.
CR – Station open to restricted public correspondence.
H24 – Continuous service, day and night.
HX – Intermittent service, day and night or station which has no fixed operating timetable.

Key:
Key to numerical references used in the nomenclature of radio-determination stations and stations which offer special services.
METEOROLOGICAL BULLETIN
(Forecast of weather within the 4 Maritime Areas)

1. SYNOPIS: Inform in clear Spanish text for the 4 Maritime Areas No. 1, 2, 3 and 4 stating:
   (a) General
      1. Name of Station
      2. Validity
      3. Significant Phenomena
      4. Weather Notices
      5. Synoptic Situation
   (b) By Area
      1. General Conditions (Phenomena or general character of the current weather)
      2. Winds (direction and speed)
      3. Sky
      4. Horizontal visibility
      5. Air temperature
      6. Strength of the sea
      7. Wave height
   (c) Reading of radio messages for Coastal Traffic and Radio Messages for local purposes (Notices to Mariners) per area.
2. Messages concerning water height.
3. Offer on request of a vessel, a weather forecast, height of water and local radio messages (Messages to Mariners).
4. The station transmits at any time meteorological safety messages preceded by the Safety signal (SECURITE) and repeat them after periods of silence and during normal transmission periods.
5. Meteorological bulletins, radio notices for coastal traffic (Notices to Mariners) and local Radio notices (Notices to Mariners), announcing the fact previously on frequency 2182 kHz, 4125 kHz Simplex and 4419.4 kHz (C.421) Duplex.
6. Meteorological bulletins, radio messages for coastal traffic (Notices to Mariners) and local Radio messages (Notices to Mariners) announcing the fact previously on Channel 16 (156.800 MHz).
7. For services being offered, listening and working frequencies see Nomenclature of Coastal Stations.
8. Radiogoniometric station on VHF.
   (Station of Radiodetermination which uses the receipt of radio-electric waves to determine the direction of a station or of an object).

COLONIA: 34.28 S. 57.51 W. **(See Plan)**

LOCATION: Lat. 34° 28′ 28″ S., Long. 57° 50′ 38″ W.

On the River Plate 92 miles from Montevideo and 27 miles in a straight line E.N.E. of the City of Buenos Aires.

DOCUMENTS: Vessels entering the port must provide the following: Machinery, Hull, Safety, Freeboard and Derat Certificates, Stores List, Crew List, List of Passengers or Negative, Cargo Manifest, Declaration of Transport of Inflammables or Explosives, or where not carried a certificate to that effect.

PILOTAGE: No port or river Pilot is required for coasting vessels.

ANCHORAGES: In the Roads with a depth of 10 ft.

In the foreport with a depth of 8 ft., for shallow draft vessels.

RESTRICTIONS: The port will be closed for all vessels when the wind intensity is 70 knots or more. Also all operations are prohibited in the port shelter area.

The port will be closed for vessels of all kinds when the visibility is 500 m. or less due to fog, squalls, etc. Under these conditions vessels are prohibited to carry out any kind of operation within the shelter area.

HEALTH: Inspection is by a Health Doctor, and is carried out jointly with Immigration, Police, Customs, and Naval Prefecture officials.

RADIO: VHF equipment. Operates permanently on Channel 16.

VHF: All communications are carried out by VHF, the call sign being CWC 23 and that for working Control Colonia Prefecture. Channels used are 6, 8, 9, 11, 12, 14, 15, 16, 25, 26, 68, 69.

The Control Centre listens out permanently on Channel 16, whose frequency is 156.800 MHz.

RADAR: Range 16 miles. Does not give service to vessels.

TUGS: There is no tug service.

BERTHING: Union Quay: Running East to West with a length of 178 m., equipped at its two ends with ramps for landing and shipment of cars and lorries.

Coastal Quay: Running North to South, with a length of 111 m.

Ultramar Quay: Running North to South, with a length of 142 m.

These quays are provided with water hydrants and electricity supply points, the Coastal Quay also having a fuel point for operation of tankers.

Warehouses: For general cargo, the National Port Administration has warehouses within the port area.

CRANES: On the Overseas Quay there are two mobile cranes on rails, with 3 tons and 5 tons capacity.

STEVEDORES: There is no permanent service of stevedores, and such requirements must be applied for in advance by the ships' agents at Nueva Palmira.

MEDICAL: 300 m. from the port is the local hospital with a First Aid room and ambulances.

TANKERS: Operate at the Coasting Quay with a watchman and a fireman on board.

FRESH WATER: Supplied by the National Port Administration.

FUEL: Supplied by road tankers.

FIRE PRECAUTIONS: There is a fire fighting pump with a pressure of 8 kg./sq.cm.

CONSULS: Argentina and Italy.

REPAIRS: Not possible.

GANGWAY/DECK WATCHMEN: There is a watchmen service administered by the Prefecture of Colonia.

CUSTOMS ALLOWANCES: Tourists from neighbouring countries may bring in: 5 kilos of food, 1 carton of cigarettes, 1 litre of alcoholic drink.

No products derived from meat can be brought into the country (cold meats, sausages, etc.), nor any plants or seeds.

REPATRIATION: Only to Buenos Aires.

AIRPORT: Located on Highway 1 linking Colonia with Montevideo, 7 km. from Colonia.

TIME: Local time is GMT minus 3 hours.

HOLIDAYS: 1st and 6th January, Carnival, Touriso, 19th April, 1st May, 18th May, 19th June, 18th July, 25th August, 12th October, 2nd November, 25th December.

POLICE/AMBULANCE/FIRE: Police Tel: 2962; Hospital Tel: 2994; Fire Brigade Tel: 2577; Prefecture 2020.

TELEPHONES: No arrangements for connecting the telephones on board vessels, but there are telephone boxes for communications within and outside the country.

SERVICES: Bureau de Change via a branch of the Banco Republica. There is a bus service with international service, working in conjunction with arriving and departing vessels, connecting Colonia with the rest of the country.

Post Office: 200 m. from the port.

Mooring Gangs: Provided at the request of the ships' Agents by the National Port Administration.

AUTHORITY: See "Montevideo".

FRAY BENTOS: 33.06 S. 58.18 W. **(See Plan)**

LOCATION: Km. 95 River Uruguay. On the right bank of the River Uruguay from seaward 213 miles by river from Montevideo or 145 miles from Buenos Aires.

PORT LIMITS: A vessel is considered to have arrived when she leaves the channel and goes to the berth.

DOCUMENTS: Same requirements as for the port of Montevideo.

PILOTAGE: Obligatory, except where bilateral national agreements exist concerning navigation of the River Uruguay, and the Pilot must be taken on board in Montevideo.

ANCHORAGE: Between the channel and the port.

RESTRICTIONS: When the port is closed due to bad weather, also the draft depends upon the depths of water in the "El Marques" and "Punta Caballo" passages.

MAX. SIZE: Controlled only by the draft of the vessel and the length of the berth. Max. draft 26 ft. (FW), water depends upon the river conditions.

HEALTH: Same requirements as for Montevideo.

RADIO: The call sign is CWC 25 "Control Fray Bentos Prefectura".

VHF: Port works on the following frequencies:

(a) Channel 16: frequency 156.800 MHz; Usage: Calling-up and safety.
(b) Channel 9: frequency 156.450 MHz; Usage: Port operations.
(c) Channel 11: frequency 156.550 MHz; Usage: Central Control broadcasts on safety.
(d) Channel 13: Frequency: 156.650 MHz; Usage: Central Control broadcasts on safety.
(e) Channel 15: frequency: 156.750 MHz; Usage: Meteorological bulletins and Notices to Mariners.
(f) Channel 17: Usage: P.N.N.: Maritime Safety.
(g) Channel 68: Usage: P.N.N.: Maritime Safety.

Furthermore, on entering the area between Km. 6 and Km. 165 of the River Uruguay, the vessel must communicate to the Fray Bentos Prefecture Control:

(a) flag.
(b) name.
(c) destination.
(d) position.
(e) course and speed.
(f) max. draft.

And on leaving this area:

(a) accident or fire occurred on board the vessel.
(b) whether vessel has given assistance to another vessel which is damaged or in difficulties.
(c) whether she has sighted any dangerous object to navigation and which is not marked.
(d) any serious reduction in visibility.

RADAR: None.

TUGS: None.

BERTHING: There are two types, quays for deep-sea vessels and for coasters, both being of cement and wood.

Type	Deep-sea	Coasting
Length	125 m.	250 m.
Direction	East – West	N.W. – S.E.
Average depth	7 m. – 8 m.	5 m. – 6 m.
Signalling lights	Green light – West side Red light – East side	
Fresh water	2 connections	3 connections
Electricity	1 point A.C., 3-phase 220 V. South side quay in shed 3 points 220 V. D.C. (cranes)	3 points 220 V. D.C. (cranes)

Also there is the Anglo Quay with a maximum depth of 26 ft., normally used for meat.

CRANES: There are in the port 3 cranes of 3 tons each and 1 of 5 tons which can move about the port. It is possible to use ship's derricks and shore cranes at the same time.
BULK HANDLING FACILITIES: There is a silo with a conveyor belt, having a storage capacity currently of 14,500 tons, and the conveyor has a loading or discharge rate of 100 t.p.h. See "Developments".
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Can be requested in advance or when the vessel arrives in port. The work is controlled by the following time table: order 0630 hrs., commence work 0700 hrs.; order 1230 hrs., commence work 1300 hrs.; order 1830 hrs., commence work 1900 hrs.
MEDICAL: Doctors and hospital facilities available.
DENSITY: 1000.
FRESH WATER: On the Deep Sea Berth there are 2 connections and on the Coasting Quay there are 3 connections controlled by the ANP. Cost of U.S. $1.20 per 1,000 litres.
FUEL: Not available.
FIRE PRECAUTIONS: Fire Brigade present.
CONSULS: Argentina, others at Montevideo.
REPAIRS: Only minor repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Same as for the port of Montevideo.
HATCHES: If steel, handled by vessel's crew. If wooden, handled by stevedores.
REPATRIATION: See "Montevideo".
AIRPORT: None, only Montevideo.
TIME: See "Montevideo".
HOLIDAYS: The following dates will be used as national holidays of a traditional character:

1st January; 6th January; Monday and Tuesday of Carnival Week; the 6th week following Carnival, which will be called Tourism Week; 1st May; 2nd November; 25th December.

The following dates will be celebrated as national holidays as they are linked with patriotic exaltation and commemoration.

19th April; 18th May; 19th June; 18th July; 25th August; 12th October.

With regard to the holidays of 1st May, 19th April, 18th May, and 12th October, these will follow the undermentioned plan:

(a) If they occur on Saturday, Sunday or Monday, they will be observed on those dates.

(b) If they occur on Tuesday or Wednesday they will be transferred to the immediately preceding Monday.

(c) If they fall on Thursday or Friday, they will be transferred to the Monday immediately following.

POLICE/AMBULANCE/FIRE: National Prefecture: Tel: 321. Police: Tel: 201. Fire Brigade: Tel. 35. Hospital: Tel: 533.
TELEPHONES: Not possible.
SERVICES: None.
SHORE LEAVE: See "Montevideo".
IDENTIFICATION: Seaman's Book sufficient.
DELAYS: Normally there is no delay.
DEVELOPMENTS: Increase in the storage capacity of the silos of the Ministry of Agriculture and Fisheries by 5,500 tons, and increase of the capacity of the conveyor belt to 400 t.p.h.
AUTHORITY: National Port Administration, Herrera and 25 de Mayo, Fray Bentos, Uruguay.

Also see "Montevideo".

JOSE IGNACIO: 34.54 S. 54.43 W.

SBM: Position Lat. 34° 53′ 43″ S., Long. 54° 42′ 45″ W.
PILOTAGE: Compulsory. Pilot boards at the Fairway Buoy in position Lat. 34° 57′ 14″ S., Long. 54° 40′ 06″ W.
RADIO/VHF: Call sign "Control Punta del Este", Continuous watch on VHF Channel 16. Intership working on Channel 6.
GENERAL: ANCAP have installed a Single Buoy Mooring, 3,600 m. from the shore in 16.8 m. (55 ft.) depth of water. Vessels of 150,000 d.w.t. can be handled and the average rate of discharge of crude oil is 5,000 cu.m./hr.

The shore terminal receives, stores and pumps the crude to the refinery at Montevideo.

A River Pilot must be ordered from Montevideo for securing to the buoy, and he remains aboard until the vessel sails.

Five days before arrival, Agents must request Free Pratique from the Health Authorities in Montevideo, and the Customs, Prefecture and Immigration Officials, from Punta del Este.

AUTHORITY: Prefectura del Puerto de Maldonado, Calle 8 y 13, Punta del Este (Maldonado), Uruguay. *Tel:* 41884, 41967. *Contact:* Port Captain.

MONTEVIDEO: 34.55 S. 56.13 W. (See Plan)

Also see "General" at beginning of Uruguay section.
DOCUMENTS:
Health:
Maritime Declaration of Health.
1 List of Passengers Disembarking.
1 List of Crew Members.
1 Derat Certificate.
1 List of Crew International Vaccinations.
Immigration:
1 copy of Crew List.
2 Lists of Passengers Disembarking.
2 copies of List of Passengers in Transit.
Police:
2 copies of List of Passengers Disembarking.
1 copy of Crew List.
2 Lists of Passengers in Transit.
Prefecture:
2 Lists of Passengers in Transit.
1 Visaed copy of List of Passengers with Port of Origin.
2 Non-visaed copies of List of Passengers.
1 Passenger List – or Negative – from all ports visited.
1 Non-visaed Crew List.
1 Cargo Manifest for Montevideo.
1 Manifest for Cargo in Transit.
1 List of Inflammable Cargo or Hazardous Goods – visaed or straight.
1 List of Vessel's Data.
Customs:
1 Visaed Manifest
1 copy of Ballast loaded at each port.
1 Negative discharge statement for each port.
If there is no Consul in previous ports, the last port where there was one.
2 Stores Lists.
2 Lists of Cigarettes and Whisky.
2 Lists of Personal Effects.
3 Lists of Bunkers on Arrival.
1 copy of Passenger List for those disembarking, or negative, and their baggage in the same list (drawn up and signed by the passengers themselves).
Agents:
2 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
2 Crew Lists.
2 Stores Lists.
2 Manifests, including Inflammable Cargo.
2 Cargo Plans.

NOTE: The manifest must have a special section with all effects in transit or otherwise, for the free zones of Colonia and Nueva Palmira.

Crew Lists, amended Crew Lists and Inflammable Cargo Lists must be visaed at ports of sailing or loading.

ANTEPORT: The Anteport is to the North of the entrance, between the breakwaters, and has a depth of 33 ft. – 36 ft. Sufficient room for 10 vessels, depending on size.
PORT: The port is formed by the North side of the Montevideo Peninsula and the "Dique de Cintura", a breakwater running parallel to the coast, about 870 m. distant.

It consists of 3 basins, 2 of which are for ocean-going vessels and 1 for river traffic.

Basins 1 and 2 have a depth of 33 ft., and the basin for river traffic 15 ft.

APPROACHES: The Roads of Montevideo consist of the Outer Roads situated to the South of the bay and Inner Roads situated outside the Western breakwater.

Both anchorages are very exposed and vessels are recommended to enter the anteport.

The entrance channel has 36 ft.; the channel to Ancap's wharf (La Teja) 30 ft. 6 in. Basins 1 and 2 have a depth of 31 ft., and the River Traffic Basin, 15 ft. These depths depend on dredging being maintained, but even so vessels often "drag" when on the higher marks; the bottom is fine soft silt.

PILOTAGE:

1. The Pilot must be requested via the Agent 24 hours in advance, giving ETA in the roads by W/T (Cerrito Radio – CWA on frequency of 500 kHz). It is not possible to elect a Pilot for the area of the port of Montevideo, except where the vessel exceeds 10,000 tons.

2. On entering into the system of the Control Centres, communication must be made with them, giving the information laid out in the "Basic Rules of the System of Control and Information of Maritime Movements". See "Control" in General Section before first Uruguay port.

3. By VHF on the Channels stipulated in "Basic Rules of the System of Control and Information of Maritime Movements".

4. Channel 11 must be used to communicate with the pilot vessel. The vessel is a powered craft painted reddish orange, with white deckhouse with the inscription "Practicos". During daylight hours, it flies the pilot flag, HOTEL (white and red), and at night it is necessary to have white and red lights indicating "I have a Pilot on board". Where a vessel does not have VHF, light signals must be used to communicate with the pilots' launch.

Should this launch be out of service, Pilots are transported by tugs of A.N.P. and/or BEYLA.

5. The Pilot will await the vessel near the Axis Buoy located at Lat. 35° 00′ S., Long. 56° 14′ W.

6. In the event of bad weather the vessel must anchor near the Axis Buoy.

7. To take the Pilot on board, the gangway must be positioned on the side which gives most advantage *vis-a-vis* wind and sea.

ANCHORAGE: Vessels may anchor near the Axis Buoy with a draft of 30 ft. at zero tide. The sheltered anchorage is located in the foreport inside the shelter of the breakwaters. To gain access to it, the Pilot must be on board and the permitted draft will be that specified previously.

RESTRICTIONS:

1. The port is closed when winds are up to 60 km.p.h. However, up to 80 km.p.h. the Prefecture may authorise manoeuvres. The port is also closed when there is fog, channel obstruction or any other problem which may make manoeuvring difficult.

2. Vessels will not be handled when there is serious damage to engines, hull or rudder.

MAX. SIZE:

1. The largest vessels operating in the port, are of the LASH type, with dimensions approx. as follows:

Overall length 272.22 m.; Beam 30.48 m.; Draft 28 ft.

2. Tankers which berth at the inflammable dock A.N.C.A.P.:

Overall length: 241.50 m.; Beam 32.33 m.; Draft 28 ft.

With regard to the dimensions of the vessel, the state of the tide and time will be considered, the Pilot will advise the Master of the best measures to adopt.

Report: March 1982.

Max. draft to reach Montevideo safely is 31 ft.

HEALTH: The procedure is as follows:

1. Request the Owner or Agent to obtain Free Pratique which will be done via Cerrito Radio Station – call sign CWA.

In the event of there being any suspected illness or fever on board, the vessel must anchor in the roads to await instructions, at the same time communicating this to her Agent/Owner.

RADIO: Cerrito Radio Station CWA operating on 500 kHz, 421.5 kHz, 4346 kHz, 6434.5 kHz, 8602 kHz, 12750 kHz, 17208.8 kHz and 22563 kHz.

Timetable for broadcasting information to Mariners:

	Frequency	*Times*
Cerrito CWA	4,346 kHz	1100 hrs.
	8,602 kHz	1600 hrs.
	12,750 kHz	2100 hrs.
	16,871 kHz	
Sodre (CX 6) Coastal Station	650 kHz	0900 hrs.
Punta Carreta CWD	2,768 kHz	1103 hrs.
		1603 hrs.
		2103 hrs.

RADAR: Port Radar Control available. Additional coastal radar stations to be installed.

VHF: The Control Centre has a range of 60 miles on VHF. It also effects communications by "Phone-Patch" between the vessel and or Agent or Owner; this, from their office or private address.

All the operations of the Centre of Control and Information of Marine Movement of the Port of Montevideo are set out in the booklet "Basic Rules of the System of Control and Information of Maritime Movements".

On entering waters of port jurisdiction, communication must be made with La Paloma Control, then Punta del Este Control and the Centre of Maritime Control of the National Naval Prefecture.

TUGS: 8 tugs owned by Port Authority, 1×4,000 h.p., 1×1,1950 h.p., 1×1,680 h.p., 1×1,100 h.p. and 4×500–700 h.p. Beyla S.A. (Private) operate 5 tugs of 250 h.p.–750 h.p. Tugs come alongside in the foreport. Lines are to be supplied by the vessel, and this is not optional. In the event that the vessel has no tug cable, this will be supplied by the tug at a cost of approx. U.S. $500 (as per tariff TM/6).

BERTHING: The berth will be allocated by A.N.P. and is to be requested by the Agent. Vessels may berth or unberth at any time of the day or night, except when the port is closed or due to lack of available berths. Generally, there are fenders placed along the berths. In the event that the vessel requires this service, it must be requested in advance via the Agent.

When berthing or unberthing, the gangway must not be in position due to the proximity of the cranes.

Anteport: 7 anchorage berths in 28 ft. depth. However in practice there is rarely room for more than 5 vessels to anchor. Basin No. 1: 7 berths, 28 ft. to 33 ft. depth alongside. Basin No. 2: 4 berths, 28 ft. to 33 ft. depth alongside. La Teja: Ancap Basin with berths for 2 tankers 30 ft. depth in basin and entrance channel.

Berths are allotted by the Port Authorities in the order of arrival of the vessels and according to their category, as follows:

1. Mail vessels.
2. Regular Line vessels carrying immigrants.
3. Cargo vessels.
4. Sailing vessels.

The Authorities allocate the deposit at which vessel must discharge or load.

Port Authorities give preference at Deposit No. 10 to ships operating with refrigerated cargo from this Deposit; and at Deposit No. 11 (Florida Wharf) to tankers discharging to the pipe-line situated there. Conditional that they vacate the berth within 2 hours' notice, to permit berthing a preference vessel, other ships may operate at either berth.

Muelle de Escala: On the pier head, formed by the Southern side of the River Traffic Basin, and running Westwards, a quay has been built, known as "Muelle de Escala", 288 m. long, originally constructed for berthing passenger liners and war vessels, but now used as a container terminal.

The berth is very exposed to wind and swell, and Masters are recommended to take every precaution to ensure their vessels are strongly moored and a lookout kept for changes of weather which, locally, are very sudden.

The depth of water alongside depends on dredging, but generally is over 33 ft.

1×40 tonne container gantry crane installed in 1986.

River Traffic Basin: This basin is situated on the Western side of Pier "A". It is 400 m. long and has a passenger landing station on one side. The opposite side of the basin is used by the Navy.

2 warehouses, called Warehouse "A" and Warehouse "B", have been built on the East side of this basin and are serviced by 3 electric cranes.

These berths can only be used by light-drafted vessels, as depth of water is around 16 ft.

Basin No. 1: This basin is situated between piers "A" and "B". Its entrance between the "Dique de Cintura" and the pier head "A" is about 150 m. wide. It encircles a total mooring space of 1,093 linear metres and 7 vessels can comfortably berth along the quay walls.

Pier "A" is 382 m. long on the West side; 306 m. on the East side, and 50 m. wide at the Northern pier-head.

On this pier 2 brick and concrete warehouses, Nos. 1 and 2, have been constructed, consisting of a ground floor, 3 storeys and a basement.

On the City side of Basin 1, length 493 m., there are 3 brick warehouses, numbered 3, 4 and 5, consisting of a ground floor of between 17,800 cu.m. and 19,600 cu.m. capacity.

On the Western side of Pier "B" facing Basin No. 1, there are 2 brick and concrete warehouses, Nos. 6 and 7, with a ground floor and 1 storey having a capacity of 30,174 and 33,140 cu. m. respectively.

In Basin No. 1, Berths No. 1, 2, 3, 4 and 5 are generally used for the discharge and/or loading of liners running to timetable.

Depths alongside vary, as it depends upon dredging.

Basin No. 2: This basin is situated between Pier "B" and the foot of Florida Street. The entrance to this basin is also about 150 m. wide. It has a total mooring space of 722 m. and it can accommodate 4 vessels.

Pier "B" is 294 m. long on the Western side, 328 m. long on the Eastern side, 148 m. at the Northern pier-head and 13 m. wide on the bend at the Western corner of the pier-head.

At the Northern end of pier-head "B", livestock is embarked. This berth is also used for general cargo operations in times of congestion. Moorings must be strong and carefully watched as the berth is very exposed to wash of passing vessels.

There are 2 warehouses on this pier, numbered 8 and 9, facing Basin No. 2, built of brick and concrete, with a ground floor and 1 storey and with a capacity of 33,320 cu.m. each. Warehouse 11 has 3 cold storage rooms with a total capacity of 26,000 cu.m. for storage of frozen meat, chicken and fish products at −30°C.

Depths of water alongside vary, depending upon intensity of dredging but are generally 28 ft. to 30 ft.

Coasting Quay Wall: From Florida Street to Mole F, which is the end of the Port, and over a distance of 1,900 m., there is a quay used for coastal craft, and on part of which a fish-receiving and industrialising plant is being opened; depth in this zone is 15 ft.

A floating dock is also anchored in the N.E. part of this section.

Basin For Inflammables "La Teja". (Also see "Tankers".)

On the North side of the Bay, the National Administration of Alcohol, Cement and Fuels, known as A.N.C.A.P., has a basin with concrete walls for the discharge of tankers arriving with oil to their consignment. This basin is known as the "Darsena de Inflamables", and has 1 berth for tankers on the North side in 30 ft. 6 in. and for liquid gas discharge on the Southern side, max. draft 22 ft., while on the West or land side there is a berth for coastal vessels. Width of the basin here is 147 m., which is the same as the entrance, while the South berth is 248.75 m. long. On the North berth the jetty protrudes 34 m., and is 96 m. long.

Vessels berth bows to shore, and on leaving turn immediately outside the basin, if draft is less than 22 ft., otherwise they must reverse back down the narrow access channel.

The North berth has separate lines for Crude, 10 in. and 12 in. maximum pressure 105 lbs. Fuel oil, 8 in. and 10 in. with a pumping rate of 300 t.p.h. at temperatures between 40°C and 70°C. Diesel/Gas Oil/ Kerosene 6 in. connections and pumping rate of 300 t.p.h. Naptha 8 in. Lube oils 6 in. lines, 150 t.p.h. and a line for Alcohol 6 in. There is no line for Gas. There are 3×5 ton electric cranes and 1×12 ton diesel crane. Coal and Cement are also discharged at this berth, the coal to Decauville cars and the Cement to trucks, handling 750 tons per 8 hour day, with 5 gangs.

At the South berth the oil lines are identical, and there is also a 6 in. connection for loading or discharging Super Gas, at 200 t.p.h. There are no cranes at this berth.

The Western berth has the same installations except for Super Gas and Alcohol.

There are 3 in. water lines at each berth, and use of 2 tugs is essential for berthing or unberthing. At the North berth, vessels fully loaded often lie up to 15 m. out from the quay, owing to accumulation of mud, and will gradually close in as the vessel lightens. Access gangways are placed by the Port.

Railway Connections: Basins 1 and 2, River Traffic Basin and also Deposits "A" and "B" have railway lines on all sides, belonging to the Port Administration, which are connected with the main lines of the Uruguayan State Railways.

The Port Administration has 2 electric locomotives used exclusively in the port.

Cranes: The Port Administration has 2 heavy-lift floating cranes of 80 tons and 200 tons capacity, a mobile crane of 20,000 kilos, also 46 movable electric cranes of 5,000 kilos each; 5 movable electric cranes of 1,500 kilos each; 1 fixed electric crane of 4,000 kilos; 33 of the aforementioned 5,000 kilos cranes, are placed alongside the quay walls for vessel's operations.

There are also 24 electric trolleys of 1,500 kilos, and one of 1,000 kilos. There is a fixed crane for 200 tons on Muelle Escala.

Fiscal Lorries: The Port Administration has purchased special lorries and 12 auto cranes for receiving cargo, as the railway wagons available are not sufficient to carry all the cargo that is at present being handled at this port.

Loading Operations: Loading is effected from carts, lorries and/or wagons and the cargo is hoisted on board with the cranes. Cargo is also loaded from lighters.

Grain Loading: There are 2 mobile grain vacuvators, each of which can load bulk grain at around 60 t.p.h, also 10 smaller machines that can each load around 20 t.p.h.

Fumigation: Montevideo is the only port in Uruguay at which vessels can fumigate, using the cyanide method. The tariff is per cubic metre fumigated over a basic charge which varies according to n.r.t. There are surcharges for overtime.

Disinfection of Mail Bags: To avoid delay through disinfection mail bags can be fumigated on board in a 10% formalin solution and kept in a closed space for 4 hours before vessel gets into port. The closed space will be opened in the presence of a Health Officer who will verify the use of formalin. When in doubt, fumigation will be carried out again and exposed for 2 hours.

Height of Quay above Water: Tide being very small, the height of quay above water only varies from 8 ft. – 10 ft. at LW to 10 ft. – 12 ft. at HW. Wind influence is felt even in the bay, as a South wind will raise water as much as 5 ft., or a Northerly wind reduce it 2 ft. or 3 ft.

PORT EQUIPMENT: *Shore Cranes:*

Berth No.	*No. of Cranes*	*Capacity tons*	*Type*
Muelle de Escala	1	40	Portainer
A – West	3	5	Demag
A – East (1/2)	7	5	Skoda
3–4–5	9	6	Duro Felguera
B – West (6/7)	2	40	Takraf
	4	12.5	Takraf
B – (Front)	4	5	Demag
B – East (8/9)	9	5	Demag
11 – 12	5	6	Duro Felguera
	1	200	Floating

Mobile Cranes/Fork Lifts:

Type	*Capacity tons*	*No.*	*Type*
Fork Lift	2	56	Komatsu
Fork Lift	1	27	Komatsu
Fork Lift	3	10	Komatsu
Fork Lift	12	2	Komatsu
Fork Lift	2	16	Toyota
Fork Lift	1	10	Toyota
Fork Lift	4.5	2	Clark
Fork Lift	28	5	Kalmar (with spreader)
Fork Lift	12	3	Kalmar
Container Crane	60	4	Bellotti
Mobile Cranes	40	2	Poclain
Mobile Cranes	20	2	Poclain
Mobile Cranes	30	1	Bucyrus
Mobile Cranes	1.5/6	13	
Container Trucks	50	12	

STEVEDORES: Working hours: 1st shift, 0700 to 1300 hrs.; 2nd shift, 1300 to 1900 hrs.; 3rd shift, 1900 to 0100 hrs.; 4th shift, 0100 to 0700 hrs.

Normal capacity per gang per hour: *(a)* Rice – about 80/90 tons per gang/hour. *(b)* Meat – about 60/100 tons per gang/hour.

Overtime is compulsory if port is congested.

Lavatory Conveniences for Shore Labour: Each vessel must furnish conveniences for all shore labour employed on board. Work has been stopped until such conveniences are installed. It is advisable, therefore, for vessels calling at Montevideo to be equipped with 2 spare lavatories, 1 for tally clerks and 1 for stevedores, etc.

MEDICAL: Any urgent case must be advised in advance. In normal cases, the Health Service Doctor in the port will visit. For this purpose there are Clinics and Hospitals with optional assistance. Vaccination Certificates are issued by the Port Health Service. There are also private health and medical services which give on-board treatment.

TANKERS: Dirty ballast can be discharged depending on whether or not there is a berth at La Teja, Inflammable Materials Dock. A.N.C.A.P. have the necessary reducers for any type of operation.

Diameter of pipes: Crude – 12 in.
Fuel oil – 8 in.
Dirty ballast – 8 in.
Berth depths: North Quay – 29.6 ft.
South Quay – 22 ft.
West Quay – 14 ft.

DENSITY: This varies according to wind and tide (1006 – 1002). The degree of salinity (max. 10 gm. per litre) is broadcast daily in the weather reports by radio, and varies from fresh to brackish to sea water. Steady South winds give the highest degree of salinity.

FRESH WATER: Fresh water is supplied by the Port Authorities at all quay berths. Request must be made through the Agents, vessels supplying their own hoses where possible. It is important that the water meter should be read together with the Port official both at connecting and disconnecting to verify the exact quantity. Loading rate 20 cu.m./hr. Water also available by barge (capacity 170 tons) loading rate 18 t.p.h. – 20 t.p.h.

FUEL: This can be taken on board whilst anchored in the foreport via two barges, one of 595 tons delivering at a rate of 250 – 350 cu.m./hr., the other of 310 tons at the rate of 200 to 250 cu.m./hr.

Also available from the Uruguayan tanker "Valiente" (capacity 1,337 cu.m. of fuel, rate of 700 cu.m./hr.) or 196 tons of water at the rate of 70 cu.m./hr. This service can be effected outside the port.

A.N.C.A.P. Information: All grades subject to confirmation, the request being made via the Agent 15 days in advance.

Maua	Length	79.25 m
	Length on stocks	74.42 m
	Depth of water	12 ft
	Width of pontoon	15.25 m
	Capacity of operation	2,000 tons

GANGWAY/DECK WATCHMEN: Shore watchmen are compulsory. Arranged by Agents. 1 required on deck and 1 for each gangway. Vessels carrying dangerous cargo must also employ a guard of the Prefectura.

Vessels calling for supplies only, for orders, in distress or to land sick crew members or to enter dry dock, need not employ Watchmen. Repairs afloat require a watchman, if they do not carry out commercial operations.

Shifts are of 8 hours, commencing at 0700 hrs. Vessels under repair and those at ANCAP moles may fix 12-hour shifts, paying a shift and a half.

If special watchmen are required for goods or working equipment application must also be made to the Union.

If watchmen are needed in the holds, same applies.

Regulations also require a watchmen in the holds wherever the ship has a crew member, cadet or officer permanently on watch to prevent pilferage. However, where ship's personnel are in the hold to watch the stowage of the cargo, no extra watchman is required. Masters should therefore, advise Agents if they intend to place crew members permanently in the holds during discharge, so that Agents can advise the Association before they make their claims.

Care must also be taken on arrival, since the watchman is on duty from 0700 hrs. on, whereas it may be necessary to place the gangway safety net, etc., before that time, so that Pilot may disembark.

Only those involved in this operation should go ashore. The Receiving Commission may ask for the gangway to be opened before 0700 hrs. which is in order, but no one else should use the gangway to avoid claims from the Union.

Vessels lying in the anteport must provide launches for the transport of watchmen employed.

REPATRIATION: There are facilities for exchanging crews.

AIRPORT: Located 30 minutes away by car. There are various regular services to all parts of the world.

TIME: GMT minus 3 hours. (However changes are possible).

HOLIDAYS: 1st January (New Year); 6th January (Epiphany); 3 days in February (Carnival); 7 days in March or April (Tourist Week); 1st May (Labour Day); 18th May (Battle of the Stones); 19th June (Artigas' Birthday); 18th July (Swearing of the Constitution); 25th August (Declaration of Independence); 12th October (Day of the Race); 2nd November (All Souls'); 25th December (Christmas Day).

On these days, work will always proceed when the Agent or Owner requires it or also if the Port Authority requires it, should there be a number of vessels anchored in the Roads awaiting a berth.

POLICE/AMBULANCE/FIRE: Port Police (Immigration): 95.21.51; Fire Brigade: 91.51.51 to 56 – extensions 139/337. Ambulance: 91.51.51 – extensions 272/382.

Prefecture of the Port of Montevideo: 95.21.27 – 95.21.77, 95.54.05, 95.52.01, 95.22.27, 95.24.27 ext. 07, 91.51.51 ext. 199, 91.93.03, 91.53.71 ext. 199.

TELEPHONES: There are services on all quays. Telephones can be requested by the Agent from the Port Authority.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: The prefecture issues identity cards. Crew not allowed ashore without card.

DEVELOPMENTS: A container park and fish quay have been built alongside the Eastern Quay and in the Mantaras Zone respectively.

A battery of silos will be constructed at C.M.B. (between Warehouses 7 and 8) which will facilitate the loading and unloading of grain.

SHIPMASTER'S REPORT: July 1983 (updated 1990).

Documents: As per "Guide to Port Entry".

Pilotage: Compulsory. Pilot boards at Sea Buoy. 24 hours' notice required.

Anchorages: As per B.A. Chart 2001.

Restrictions: Max. draft 28 ft. Possible to depart/enter 24 hours a day.

Max. Size: Largest vessels using the port are LASH vessels, length 272 m., beam 30 m. – 40 m., max. draft 28 ft.

Health: Inform Agents of vessel's state of health and request Free Pratique.

Radio: Cerrito Radio Station.

VHF: Vessels must abide by Uruguay Regulations as per Radio Signals Volume 6, Part 2 otherwise will be subject to very heavy fines.

As soon as vessel is inside Territorial Waters, i.e., S.W. of a line bearing 128° from Chui Lt. and West of 50° 50′ W., they must report to the appropriate station on VHF.

Pilots and Port operate on Channel 16.

Tugs: Available.

Berthing: Vessel berthed at Darsena/Muella A. Least depth in channel from sea to berth was 30 ft., distance between sea and berth being 6 miles. Mean tidal range at berth is 2 ft. Nature of bottom at berth – mud.

Cranes: Sufficient quay cranes of 4 tons capacity available. One floating crane of 200 tons capacity available.

Equipment and storage available for breakbulk/palletised cargoes.

Stevedores: Stevedores were very helpful.

Medical: Doctor and hospital available.

Density: 1002.

Fresh Water: Available.

Fuel: Bunker fuel and diesel oil available.

Repairs: Can be undertaken.

Dry Docks: Available.

Surveyors: Lloyds' Surveyor based at the port.

Airport: Available.

General: Fresh provisions, meats, groceries and laundry services available.

AUTHORITY: Administracion Nacional de Puertos, Rambla 25 de Agosto de 1825 No. 160, Montevideo, Uruguay. *Tel:* 96-07-34, 95-03-58. *Telex:* Naveanp Uy 22351. *FAX:* 95-85-35. *Contact:* Ing. Euclides Cotignola, General Manager.

NUEVA PALMIRA: 33.53 S. 58.25 W. (See Plan)

LOCATION: Situated on East bank of Uruguay River, 155 miles above Montevideo. Km. 0 on River Uruguay.

DOCUMENTS: The following documents are required for Port clearance:

Cargo or Ballast Manifest.
Negative Passenger List or List of Passengers, visaed by the Consul.
Crew List.
Stores List.
List of Personal Effects.
Register.
Maritime Declaration of Health.

PILOTAGE: The information required from vessels navigating within the area of the Port Control are:

Time of entry and leaving the area.
International call sign.
Name of vessel.
Flag.
Estimated course.
Latitude.
Longitude.
Port of destination.
Estimated time at port of destination or other point of call.

The area appointed for effecting change of Pilots is the Port Roads. The Pilots arrive at the vessel in a launch 10.6 m. overall length, with cabin, painted orange, owned by the Uruguay Pilots' Corporation.

ANCHORAGE: The area designated for anchoring is located within the roads, depth being between 30 ft. and 45 ft.

RESTRICTIONS: There are no restrictions for berthing in the port, except those imposed by weather conditions (winds, etc.). Vessels berth without the aid of tugs.

MAX. SIZE: *Old Port:* Max. draft 23 ft.

New Port: Max. draft 26 ft. 6 in.

Also see "Berthing".

HEALTH: The Health Authorities will require a Crew List and Maritime Declaration of Health. In the event of disease being detected on board, the Health Official will proceed to inform the Aid Centre who will arrange for a doctor to attend on board, with the vessel placed in quarantine or the patient will be transferred to hospital, depending upon the illness discovered. To date, no such occurrence has arisen in the port.

RADIO: VHF equipment with permanent listening out on Channel 16.

RADAR: There is no radar equipment.

VHF: All communications are effected by means of VHF equipment. The call sign is CWC 31 – "Control Palmira Prefecture", and the following Channels are used: 6, 8, 9, 11, 12, 13, 14, 16, 25, 26, 68 and 69. The station operates permanently on Channel 16, the frequency being 156.800 MHz.

TUGS: The service of a tug is not necessary for berthing vessels.

BERTHING: The port has the Official Quay and the quay owned by Navios.

Official Quay: Length 240 m., length of the head 80 m., width in the centre 40 m.

Navios Corporation Transfer Station: Navios Corporation is a private company that owns and operates a Transfer Station located in Nueva Palmira Free Zone.

Facilities: Unloading, storage and loading of materials in bulk, like ore and grains. For these services, it has 2 docks (one for barges and the other for vessels and barges), cranes, conveyor systems, warehouses and stockpile.

Unloading: It is possible to unload vessels up to 22 m. breadth and 13.5 m. depth by crane and clamshell in the exterior dock. The unloading rate is 300 tons/hr. for wheat, and it varies with the stowage factor of different commodities.

For unloading barges, Navios has 2 docks (exterior and interior). The exterior one, with Marion crane, can unload grains at 300 tons/hr. and ore at 400 tons/hr. The interior one (1991 investment), with Liebherr crane, admits simultaneous work with 2 barges on both sides of the dock (this avoids losing barge shifting time). Cleaning of barges and vessel's holds is performed by the Navios payloader.

Storage: Stockpile for ore with a capacity of 50,000 metric tons.

Three warehouses divided into 11 silos for grains (total capacity: 75,000 metric tons).

Goods' identity (classified by customer) is maintained to preserve quality and quantity.

Loading: Vessels must be ocean bulk carriers up to Panamax size (225 m. length, 32 m. breadth, 18 m. depth), and appropriate for being loaded by conveyor with flexible spout that is provided by Navios. Trimming and spout position will be carried out by Navios personnel. No manual trimming is performed. The vessel must shift from stern to bow by her own means and at her own expense. Loading rate from silo to vessel (grains) is 400 t.p.h. and 700 t.p.h. from stockpile to vessel (for ore).

Mooring Conditions: With Uruguayan "Rio Uruguay" Pilots and without tugs (bow towards North position).

Navios dock draft: 28 ft. below Chart Datum (the water level is almost always 2 ft. above zero). Vessels can arrive from Martin Garcia Bar (max. 21 ft.).

Sailing draft: 27 ft. across Parana River and Mitre Channel.

Transhipments: It is possible to load vessels directly from barges from both docks for grains and also for ore.

Conveyor System: It permits combined operations, including vessels, barges, trucks, stockpile and silos, in all imaginated combinations.

It is possible to work simultaneously by loading a ship from silo or barges, and unloading from the other dock to silo or stockpile avoiding the river transportation's delay.

Labour Rules: Navios does not use stevedores as it uses its own personnel. If customers require, it is able to work 24 hours a day, including Sundays and labour holidays.

Supplies: Navios supplies fresh water free of charge.

Operator: Corporacion Navios Sucursal Uruguaya, Zona Franca de Nueva Palmira, Nueva Palmira, Uruguay. Tel: (598-544) 6183, 6491. Fax: (584-544) 6492.

Montevideo Office: Juan Carlos Gomez 1445, Esc. 701 Esquina 25 de Mayo. Tel: (598-2) 956509, 964273, 963310. Fax: (598-2) 962874. Telex: 22041 Navigen Uy.

CRANES: The Official Quay is equipped with 3 cranes of the National Port Administration. They are mobile cranes on rails. Two are for 3,000 kg., and the third is for 5,000 kg.

STEVEDORES: As soon as the vessel communicates the ETA at the port, the Agent will make all necessary arrangements for stevedoring services to commence work as soon as the vessel has obtained Free Pratique. These services will be made available dependent upon the tasks required to be fulfilled.

MEDICAL: The local Public Health Aid Centre is entrusted with furnishing any medical aid which may be necessary on board.

BULK HANDLING FACILITIES: There are no tanks, but there are warehouses for storing grain and general cargo. These warehouses belong to the National Port Administration and to the Free Zone, and are located within the port area.

FRESH WATER: Fresh water is supplied by the National Port Administration.

FUEL: There is a fuel storage depot within the port area, and should it be necessary to supply bunkers to a vessel, application has to be made to ANCAP who will supply via tanker trucks.

FIRE PRECAUTIONS: Fire Station and fire engine available.

CONSULS: There are none at local level. In the town of Carmelo, 21 km. from Nueva Palmira, there is the Consulate of the Argentinian Republic.
REPAIRS: Minor repairs possible.
SURVEYORS: None available.
GANGWAY/DECK WATCHMEN: The service of watchmen is not necessary, unless the vessel is carrying flammable cargo.
HATCHES: Opening and closing of hatches is normally carried out by stevedores. MacGregor hatches opened/closed by crew.
CUSTOMS ALLOWANCE: Each crew member is permitted to carry out of the bonded ship's store, 5 kg. tobacco, 2 cartons of cigarettes and 2 bottles of wine.
CARGO GEAR: Normally, loading and discharge are effected by means of land-based equipment.
REPATRIATION: There are facilities for changing crews, and to effect any repatriation necessary. In both cases, the arrangements are carried out with the participation of the Immigration Authorities and the Maritime Agency concerned.
AIRPORT: There is the airport of Zagarzazu located between Nueva Palmira and Carmelo, approximately 15 km. from this town. Local airport for small airplanes (Suarez Noya) is 8 km. from city.
TIME: Local time is GMT minus 2 hours.
HOLIDAYS: 1st January, 19th April, 1st May, 19th June, 18th July, 25th August, 12th October, 8th December, 25th December. Holidays do not interrupt operations on vessels.
POLICE/AMBULANCE/FIRE: Police: Tel. 544-6042, Ambulance: Tel. 544-6082. No fire brigade.
TELEPHONES: It is not possible to have telephones installed on board vessels.
SERVICES: There are stevedoring services, Maritime Agents and Customs Clearance Agents.
SHORE LEAVE: Once Free Pratique is granted, there are no prohibitions for crew members going ashore.
DEVELOPMENTS: The lengthening of the head of the Official Quay by 200 m. to the North is planned. Grain Silo with capacity of 25,000 tons to be built.
AUTHORITY: El Sub-Prefectura de Nueva Palmira, Nueva Palmira, Uruguay. *Tel:* 544-6139. *FAX:* 544-6194.
Also see "Montevideo".
AGENT: Antonio Vico y Cia., Gral. Artigas 1171, 70101 Nueva Palmira, Uruguay. Tel: (0544) 6037, 6765. Fax: (0544) 6426. Telex: 29015.

PAYSANDU: 32.18 S. 58.06 W. (See Plan)

LOCATION: Situated on the East bank of Uruguay River, 380 km. above Montevideo. Km. 204 on River Uruguay.
DOCUMENTS/PILOTAGE/HEALTH/RADIO: See "General" at beginning of Uruguay section.
RESTRICTIONS: River navigation controlled by depth in the passes at Almiron, Vera and Urquiza. Since river conditions vary from season to season, Agents should be consulted beforehand regarding available draft at any particular time.
ANCHORAGE: Off Montevideo.
MAX. SIZE: Up to 15 ft. draft fresh water, depending on river conditions.
TUGS: Available.
BERTHING: Grain Elevator Berth: 20 ft. depth alongside at zero tide. Coastal Berth: Length 300 m. Depth 11 ft. at zero tide.
ANCAP Pier: 1 berth for tankers, 30 ft. depth at zero tide.
There is 1×5 ton crane on the grain quay and 3×3 ton cranes on the coastal berth. Loading on the ANCAP berth is by lorry.
STEVEDORES: Working hours: 0800 – 1200 and 1430 – 1800 hrs. Saturdays: 0800 – 1230 hrs.
MEDICAL: All assistance available.
FRESH WATER: Available at all berths.
FUEL: By negotiating through the intermediary of the Customs Clearance Agent the required quantity is delivered.
REPAIRS: Minor repairs can be effected.
CONSULS: Local representation for Argentina, Brazil, Italy and Paraguay. All other Consuls at Montevideo.
GENERAL: Refer to "Montevideo" for all general information.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Vanuatu

PORT VILA: 17.45 S. 168.18 E. (See Plan)

PORT LIMITS: A line drawn between Pango Point and Devil's Point.

DOCUMENTS:

Last Port Clearance.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores Lists.
Log Book, Derat and usual Ship's Certificates to be available for inspection.

PILOTAGE: Compulsory for all vessels over 60 m. in length. Pilot boards 2 miles West of the Fairway Buoy, on the leading lights. Pilot launch displays the Pilot (H) flag by day and white over red light at night when engaged on piloting.

24 hours' notice of ETA to be given.

Telegrams/Telex for Pilot should be addressed to Harbour Master, Vila, or advise through Agents. ETA messages for night arrivals, weekends and public holidays must arrive during office hours, Monday to Friday. VHF watch is kept on Channel 16 during working hours. Contact normally made 2 hours before arrival at pilot station.

ANCHORAGES: When a vessel has to await a berth or tide, the Master may anchor in the main bay North of the leading lights (1,200 m. from lower lead) and well clear of vessels leaving Pontoon Bay; or as directed by the Harbour Master.

RESTRICTIONS: No restrictions except that no services will be provided after 2300 hrs. and before 0500 hrs., unless in emergency or by prior arrangements.

MAX. SIZE: Governed by berth size and max. LOA 250 m.

HEALTH: Pratique messages should be addressed to Harbour Master. If vessel not healthy, medical advice should be requested through Agents.

Pratique messages will not normally be responded to if the vessel is healthy.

RADIO: Messages or communications possible via Port Vila Coastal Radio. Call sign YJM.

VHF: Port and radio station keep watch on Channel 16 during working hours.

RADAR: No radar services.

TUGS: One tug available for berthing/unberthing. 780 h.p., 14 tons bollard pull.

BERTHING:

Main Government Wharf: Steel pile and concrete decking construction; with bollards 30 m. from each end of the wharf. Length of wharf 212 m, width 9 m. and depth 10.7 m. alongside. Loading/discharging by ship's gear.

Transit storage 2,000 sq.m.; open storage 1,000 sq.m. Can take Ro/Ro traffic.

Arammadi Wharf: Privately owned. Length 55 m., depth 8.2 m. alongside. Vessels of 150 m. length can berth safely. Ample open storage, but no closed storage.

Town Wharves: 2 small wharves on town waterfront, depth 2.5 m. alongside. Also see "Tankers".

CRANES: None available.

STEVEDORES: *Working Hours:* Monday to Friday: 0700 – 1100, 1300 – 1700, 1800 – 2300. Saturday: 0700 – 1500. Sundays and Public Holidays: No cargo work. Gangs to be ordered previous day by Agent.

MEDICAL: Government hospital with full facilities. Private doctors and dentists available. Arrangements may be made in advance with Agent by telex or on arrival.

TANKERS: Tankers anchor using a "Mediterranean moor" with 2 lines to the shore. Due to bar at entrance to bay, entry is made at HW only with controlling draft of 7 ft. plus height of tide. Max. size 1,500 d.w.t.

There is an overhead power cable between Iririki Island and the mainland with a vertical clearance of 19 m.

DENSITY: 1025.

FRESH WATER: Available at main wharf at a filling rate of about 38 t.p.h. At the Star Wharf fresh water available at a filling rate of about 2 t.p.h. Water is good quality and potable.

FUEL: Fuel can be supplied by Shell, Mobil and B.P. by road tanker.

CONSULS: Australia, China, France, New Zealand, Papua New Guinea, Sweden and U.K. are represented.

The E.E.C. and E.S.C.A.P. also have resident representatives.

REPAIRS: Small repairs can be undertaken.

DRY DOCKS: None.

SURVEYORS: Classification Societies' Surveyors can be brought from Fiji and New Caledonia at short notice.

GANGWAY/DECK WATCHMEN: Not available or necessary.

OPENING/CLOSING HATCHES: Hatches are normally opened and closed by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes or 100 cigarillos or 50 cigars or 250 grammes tobacco. 2 litres of wine and 1.5 litres of spirits.

CARGO GEAR: Ship's gear used for loading/discharging. 11 forklifts from 2 – 20 tons, 1×22 ton flat-bed truck, 1 flat-bed truck with 19 ton crane, 1×8 ton tipper truck, 1 prime mover, 1×20 ton semi-trailer, 1×10 ton tilt trailer, 3×3 ton trucks and 1×20 ton container top lift frame (20 ft. containers) available.

REPATRIATION: Arranged by Agent.

AIRPORT: Bauerfield International Airport in Vila about 5 km. from port. Daily services to Noumea. Regular services to Fiji, Auckland, Sydney, Brisbane, Honiara, Papua New Guinea and Naura.

TIME: GMT plus 11 hours. GMT plus 12 hours from late September to late January.

POLICE/AMBULANCE/FIRE: Police, Tel: 22222; Ambulance, Tel: 22100; Fire, Tel: 22333.

TELEPHONES: Available on board at Main Government Wharf through Agent.

SERVICES: Diver available. Tinned, frozen meat and vegetables available, also bonded stores.

BANKS: Available.

SHIP SUPPLY SERVICE: Tug "Roimata" and pilot boat "Tekoni II" can be used in an emergency for transport of personnel/essential stores. There are various charter boat operators who can be mobilised through the Department for Emergency Operations.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Collection service available if requested through ship's agent.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Usual local facilities.

CURRENCY: Vatu.

REGULATIONS: No special regulations.

DELAYS: Only when more than one ship in port.

GENERAL: *Charts:* B.A. 1493 and 1494 cover this port.

DEVELOPMENTS: The privately owned 50 m. wharf to be extended by 40 m. and strengthened for container handling. No date yet fixed for commencement of construction.

AUTHORITY: Ports and Marine Department, Private Bag 46, Port Vila, Vanuatu, S.W. Pacific. *Tel:* 22339. *Telex:* Vangov 1040 N.H. *Contact:* Captain Leith Nosak, Principal Marine Officer/Pilot, Tel: 23646 (home). Paul Peter Lenis, Harbour Master, Tel: 24389 (home).

SANTO: 15.31 S. 167.11 E.

The Port of Santo is sometimes referred to by the name of the old town 'Luganville', but nowadays the port and the town are usually called 'Santo'.

PORT LIMITS: The Port of Santo includes that area of the Segond Channel bounded in the East by a line running due North from Black Rock Point on Aore Island (from the 'Black Rock' on B.A. Chart 1736). This is known as Pointe Chapuis on French charts. It is bounded in the West by a line running due East from the Renee River on the island of Espiritu Santo.

DOCUMENTS:

Last Port Clearance.
2 Cargo Manifests.
1 Crew Declaration.
2 Animals Lists (Nil if none aboard).
2 Prohibited and Restricted Goods (Arms and Ammunition).
2 Lists of Ship's Stores (Cigarettes, Tobacco, Alcohol, etc.).
6 Crew Lists.
All the above can be provided on ship's paper.
The following is a Vanuatu form which can be filled in on arrival:
Ship's Report and Arrival Declaration (Vessel's Details).

PILOTAGE: Telegrams for the Pilot should be addressed 'Harbour Master Santo' or advice passed through Agents. ETA messages for night-time and week-ends must arrive during office hours Monday to Friday.

Ships calling at Port Vila first, may pass ETA Santo through the Harbour Master at Vila.

VHF watch is kept during office hours on Channel 16 and for 2 hours prior to all advised arrivals. Pilot boat also watches Channel 16.

The pilot boat is a 12 m. boat with white hull and superstructure. She has 'Pilot' in black letters on the cabin and exhibits a pilot jack. She carries a red flashing light with her pilot lights at night.

The pilot station is 1 mile East of Black Rock Point at the Eastern entrance to the Segond Channel. By day and in good visibility the Pilot may board or disembark at the South-Western end of the Segond Channel South of Georges Philippar Pass, though this is not normal and should be by prior arrangement.

Pilot ladder should be rigged in accordance with the S.O.L.A.S. convention.

ANCHORAGES: Vessels may anchor anywhere in the Segond Channel except in the 'Prohibited Anchorage' close off the Main Wharf (which is shown as 'Dock No. 3' on B.A. Chart 1736). There is a patch with a least depth of 14 fathoms 1 mile S.S.W. of the main wharf which is recommended for anchoring, especially for smaller vessels seeking shelter from the S.E. trades. A strong tidal current, normally up to 3 knots, runs in the channel and vessels should give plenty of scope.

RESTRICTIONS: There are no restrictions on entry. However, as stevedores do not work from 2300 hrs. to 0700 hrs., vessels due to arrive between these times are *recommended* to slow down, save fuel and arrive at the pilot station at 0530 hrs. or 0600 hrs. to berth in daylight.

MAX. SIZE: Governed by berth size only.

HEALTH: Pratique messages should be addressed to Harbour Master with ETA message. If vessel is *not* healthy, Harbour Master will advise action to take. Pratique messages will not normally be responded to if vessel is healthy. Vessels arriving from Port Vila do not require Pratique.

RADIO: Message should be sent via Port Vila radio, call sign YJM.

VHF: A port watch is kept on Channel 16 during office hours Monday to Friday and from 2 hours prior to advised ETAs. Call 'Harbour Master Santo'. The pilot vessel also watches Channel 16 VHF when on pilotage duty.

RADAR: No radar service.

TUGS: None, but one may be obtained in emergency from Port Vila.

BERTHING: Salt water Berth 140 m. long with a depth of 10.5 m. at LWS, and this is the maximum draft. Vessels can, and usually do, overhang the ends of the wharf with lines on dolphins or bollards on the shore. Dolphins are situated 22.5 m. East and 35 m. West of the Wharf.

Also see "General".

CRANES: None.

BULK CARGO FACILITIES: Stevedores are currently interested in experimenting with bulk loading of copra (rather than from bags) and various methods are used to suit different ships. All methods, however, require lifting by ship's gear. There is interest in the construction of a small coconut oil mill, storage tanks for which are already constructed.

BRIDGES: None.

STEVEDORES: Stevedores work 0700 hrs. to 1100 hrs., 1300 hrs. to 1700 hrs. and 1800 hrs. to 2200 hrs. Advice given at least the previous day by Agents should be sufficient. Stevedores do not work on Sundays, or if avoidable on public holidays.

MEDICAL: Medical attention can be arranged after arrival and there is a hospital in Santo. However, medical treatment that is not of an emergency nature should be sought elsewhere.

TANKERS: Tankers berth at the main cargo wharf. The discharge line is 8 in. and the rate of discharge is 150 tonnes per hour.

DENSITY: 1025.

FRESH WATER: Vessels can take up to 500 tonnes if 2 working days' notice are given. Otherwise the maximum amount may be as little as 50 tonnes. Water is good though a little hard.

FUEL: Small quantities can be arranged by truck. Large quantities can be delivered by the 8 in. tanker discharge line, but must be by prior arrangement with Shell or Mobil. Santo is not normally a bunkering port.

FIRE PRECAUTIONS: All normal precautions only.

CONSULS: None.

REPAIRS: No shore facilities suitable for larger vessels.

DRY DOCKS: None. Slipway for vessels up to 50 m. length.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Not considered necessary.

HATCHES: Hatches are opened and closed by either crew or stevedores. Recommended that crew carry out this operation on copra loading ships.

CUSTOMS ALLOWANCES: (Per crew member) 200 cigarettes or 100 cigarillos or 50 cigars or 250 grammes tobacco. 2 litres of wine and 1.5 litres spirits.

CARGO GEAR: Ship's gear only. Ashore: 5 forklifts (from 2.5 to 22 tonnes), 2×3 tonnes flat trucks, 1×6 tonnes dump truck, 8 tractors, 100×2 tonnes trailers and 1×22 tonnes container carrier are available. No lighters available.

REPATRIATION: Possible from Santo Airport via Port Vila.

AIRPORT: Santo International Airport is about 6 km. from town.

TIME: GMT plus 11 hours. GMT plus 12 hours from late September to late March.

HOLIDAYS: Holidays vary from year to year. It is recommended to seek advice of local Agents. It is not normally possible to work cargo on public holidays or Sundays.

POLICE/AMBULANCE/FIRE: Police tel: 222; Fire tel: 316; Health Officer tel: 419.

Police station is close to the wharf. There is no ambulance service. The fire service consists of 1 fire tender operated by Public Works Department. The Harbour Master has some hoses and a small foam generating machine stationed on the wharf.

TELEPHONES: There is a public telephone in the Post Office near the wharf.

SERVICES: None.

STORAGE: General cargo sheds of 6,000 cu.m.; 9,000 cu.m. of copra storage. Container yard for 200 TEUs. There is a minimum of 1,600 cu.m. of open storage.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No club. Some local facilities.

CURRENCY: Vatu. U.S.$ 1.00 = 100 Vatu (approx.).

DELAYS: Only for stevedores non-working times or when there is more than 1 ship present in the port.

REGULATIONS: No special regulations.

GENERAL: Tidal stream in the Segond Channel can reach as much as 4 knots, the Westerly flood stream being predominant and the East going ebb stream occasionally absent. The flood stream can set in a North-Westerly direction at the main wharf, thus setting a vessel down onto the wharf and making an apparently simple berthing manoeuvre a little difficult. It is recommended that when S.E. trades are blowing, and a vessel has to berth port side to in order to stem the tide, the starboard anchor should be laid off whilst berthing with about 5 or 6 shackles leading 2 points for'd of the beam. This is to heave the bow away from the wharf on departure.

AUTHORITY: Department of Ports and Marine, Box 148, Santo, Vanuatu. *Tel:* 739 (office); 454 (home). *Contact:* Captain M. Toa, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Venezuela

GENERAL:

BERTHING PRIORITY: The Venezuelan Ministry of Communications has decreed, through the Directorate General for Transport and the Port Captaincies, the following new docking priority system:

1. Vessels owned by the C.A. Venezolana de Navegacion or chartered by that company.
2. Venezuelan vessels belonging to private companies.
3. Vessels of other countries.

Previously, vessels chartered by the C.A. Venezolana de Navegacion did not get priority treatment and it is understood that, with these new priorities, the number of vessels with docking privileges has been tripled, thus resulting in greater delays for vessels operated by foreign companies.

DOCUMENTS: *Prior to Arrival:*

Arrival Notice: The Agent must submit 24 hours in advance of the vessel's arrival, a letter-notification indicating date and time of arrival, name and nationality, name of Master, length, gross and net registered tonnage of cargo for the port, origin, destination, shipper and agency, in 16 copies, with the following distribution:

Captain of the Port, Customs (2), The National Institute of Ports-INP (3), Armed Forces of Cooperation, National Guard, Police Intelligence Service Bureau-DISIP, National Bureau of Identification and Alien-Immigration, Interpol, Ministry of Health and Social Welfare-Public Health Unit, Ministry of Agriculture and Livestock-Animal and Plant Health, Post Office and Chamber of Commerce.

Information on Cargo and Passengers for the Port: The agency must receive by airmail, sufficiently in advance, the following documents to be submitted to the authorities at least 24 hours before the vessel's arrival:

Documents	*Captain of Port*	*Customs*	*INP*	*Agency*	*Total*
Cargo Manifests(a)	–	1	3	3	7
Correction Letter to Manifest	–	1	–	1	2
Bills of Lading	–	–	2	1	3
Stowage Plan(b)	–	–	1	2	3
Cargo List	–	–	10	–	10
Container List	–	–	12	–	12
Dangerous Cargo List	2	–	1	1	4
Passenger List	–	–	–	1	1
Mail List	–	–	1	–	1

(a) As of January 29, 1979, the Cargo Manifest may be submitted on LAFTA/OAS Form 2, instead of on the Venezuelan Freight List (Sobordo).

(b) The Venezuelan Shipping Association is negotiating to have the stowage plan submitted to the National Institute of Ports on the vessel's arrival, instead of 24 hours in advance.

Request for Port Services: 24 hours before the vessel's arrival, the agency must submit to the Captain of the Port the request for pilotage, towage and berthing.

At the same time, it must request permission to disembark and embark passengers and cargo and unload merchandise, on a form addressed to the Customs Administrator, with copies to the INP and the National Guard.

Additional Requests: The agency must draw up and submit to the National Institute of Ports, 24 hours before the vessel's arrival, 12 copies of the cargo index, a document corresponding to tally books.

On Arrival:

Type of Document	*Number and distribution of documents*						
Basic forms	*Captain of Port*	*Customs*	*INP*	*National Guard*	*Public Health*	*Others*	*Total*
General Declaration	1	1	1	1	1	2(a)	7

Narcotics List	–	2	2	1	–	–	5
Firearms List	–	2	2	1	–	–	5

(e) DISIP, Bureau of Military Intelligence, Interpol, Identification and Tourism.
(f) When a vessel returns to the country goods missing in unloading other vessels, it shall submit, in addition to the cargo manifest a return cargo manifest containing the data required for the manifest and the name of the vessels on which the goods were originally manifested (Organic Law of Customs).
(g) Eliminated by the Organic Law of Customs.

Prior to Departure:

Clearance Documents: At least 6 hours in advance, the request for the clearance permit must be submitted to the Captain of the Port.

Request for Pilotage: Also 6 hours in advance, or more, the request for pilotage must be submitted to the Captain of the Port.

SHIPMASTER'S REPORT: July 1982 – WARNING.

You may wish to caution all seafarers who may in the future trade to Caripito, and the other similar jungle areas. The problem in this area used to be mosquitoes, but although they are still around, the problem that we have recently experienced is a moth locally known as 'Palometas'. One doctor referred to it as an insect 'Hylesia Canitia'.

My information is limited, due to language difficulties, but the problem is very real, and I cannot caution the unaware strongly enough to take precautions. The vessel has traded to Caripito frequently over the past two years, and this would appear to be the first experience as I can find nothing about these moths in writing and our first warning was given when an Agent saw some of these moths onboard. This type of moth appears suddenly from the jungle with no regular cycle, and like other moths is attracted at night by lights, be they from vessels, homes or berth installations. They are about *one inch* in length, their bodies about pencil thickness and filled with eggs. They flutter in vast numbers around the lights, and it would appear that the dust, pollen, hair or whatever comes off them, falls onto the ship's structure or persons nearby. They do not bite and therefore I assume the dust, breathed in or landing on the skin causes a red pimply rash which gradually spreads over the whole body. It affects everyone differently, some crew were covered in a very heavy bumpy red rash within a few hours of exposure, others only in small patches on the arms which spread over the body taking several days, but in all cases causing extreme discomfort due to the itching and constant desire to scratch. At first it was only crew who were on deck that were affected, but as I assume the dust was brought into the accommodation by clothing, fans and the moths which got past the doors, the engine and catering crew were similarly affected.

Over two thirds of the crew were treated locally within 24 hours, with injections, tablets, lotions & creams but this only brought temporary relief. Rashes picked up 10 days ago with the first incident are now clearing up, but fresh rash areas appeared when we visited the Caripito area 3 days ago. We are on a weekly schedule, and one would hope we will build up a resistance to this problem. The local people also suffer from this rash, but the ones I met only had a very light rash on arms, neck and body. They cannot say how long the moths will be present, varied reports of two weeks to months. However, we are now adopting the following anti-moth measures:

1. Put the air conditioning on recirculation, ensure all openings are closed.
2. At night when underway, blackout the vessel as much as possible. During the San Juan River passage to Caripito, navigation lights only situation if possible.
3. When you anchor in San Juan River to wait for the tide or berth at Caripito, blackout the vessel and allow no one outside if possible at night, anchoring or picking up by torchlight. Having anchor lights on at night is debatable, the local dredger does not.
4. Wash the vessel down completely at daybreak, and sweep all dead moths off the deck.
5. For night mooring/deck operations, have as few lights on as safely possible, all exposed crew should cover themselves completely, particularly around the neck area.
6. After clearing the Maturin Bar (river entrance) wash down the whole ship. The dust off the moths is still active days after leaving the area. Wash all filters of air conditioning units.

Knowing about this problem could have reduced exposure to what is an extremely unpleasant experience, and I have urged the local installation to include a warning in their Port Information Guide.

AMUAY BAY: 11.46 N. 70.15 W. (See Plan)

OPERATORS: Lagoven, S.A.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Amuay Bay. During hours of darkness all vessels must identify themselves on arrival either by radio-telephone or Aldis, preferably the former.
2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Amuay Bay, certain information must be radioed prior to arrival to avoid heavy fine and/or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Ballast disposal facilities are available at Amuay Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and for movements inside the bay.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by ships anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's chest must be presented to Authorities on arrival.
7. Emergency fire signal is 5 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.
8. Ratguards must be in place on all mooring lines.

LOCATION: The port of Amuay Bay is located on the Gulf of Venezuela, on the West Coast of the Paraguana Peninsula, Venezuela. The sea buoy marking the entrance to the bay is located in Lat. 11° 44′ 25″ N., Long. 70° 14′ 50″ W.

DOCUMENTS: Inward Clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from Last Port.
Ballast Certificate from Last Port.
Crew Lists (5 copies).
Passenger Lists (5 copies).
Baggage List (3 copies).
Lists of Personnel Effects (3 copies).
Stores Lists (3 copies).
Lists of Slop Chest (3 copies).
Sailing Permit (Zarpe).

Vessels arriving with cargo to discharge, will also require:

Manifest (Sobordo) (1 original and 2 copies from each loading port).
Bills of Lading, 1 original and 5 copies from each loading port.
Tally Books (6 from each loading port).
Commercial Invoices (3 from each loading port).

Although vessels proceed directly to Amuay Bay, clearance documents should be prepared showing the port as Las Piedras, Paraguana (Amuay Bay). Failure to observe this requirement may result in penalties up to a maximum of Bs.2,000.

Admeasurement Certificate: All ships calling at a Venezuelan port for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, or any other certificate with which Venezuela is in agreement, which is used as a basis for recalculating tonnage under the Venezuelan Regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call. Vessels registered in the following countries are excluded from the above regulations: Denmark, France, Germany, Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to "Lagomar-Judibana" prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival.
Last port of call
Port for which originally cleared
Grade and quantity of cargo to be lifted.

This information is required in order to make in advance special arrangements for Inward Clearance, to avoid payment of fine.

Outward Clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form, delivered on board on arrival, must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information by the Captain of the Port.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Marine Department will arrange for Pilots to board all vessels as necessary.

The Pilot acts in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

ANCHORAGES: For vessels awaiting berth, there is a good anchorage about 1 mile N.W. of the sea buoy in 8 to 12 fathoms with a sand and mud bottom. Ship Masters are requested not to anchor at a distance greater than 3 miles from the sea buoy.

RESTRICTED AREA: A restricted fishing area has been established by the Venezuelan Government which is prohibited for mechanically propelled vessels drawing more than 5 ft. This zone lies within the area off the Paraguana Peninsula from Punta Macolla, Lat. 12° 5′ 32″ N., Long. 70° 12′ 55″ W., to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the positions below indicated: Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.; Lat. 12° 03′ 15″ N. Long. 70° 19′ 23″ W.; Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

MAX. SIZE: Length 1,000 ft.; draft 43 ft. Also see "Berthing".

HEALTH: *Sanitary Inspections:* A close control of veneral diseases has been put into effect by the Government Sanitary Office.

Immediately after docking a Sanitary Inspector will board the vessel and all Crew members will be checked before going ashore.

Those persons found with infection must be sent to the Government Anti-venereal Clinic for proper medical attention and return to vessel before sailing. 20 Bolivares per ship.

Shore passes will be granted to all healthy persons.

Masters are required to co-operate in this campaign.

RADIO: The cable and telegraphic address for the Lagoven S.A. at Amuay is "Lagomar Judibana". Radio messages to and from ships at sea are routed through "Shipward 2 New York" for retransmittal through Aircon system to Judibana (Amuay Bay).

Radio Notice of Arrival should be sent 72 hours prior to arrival at Amuay. The message should include the following:

(1) Vessel's name.
(2) Flag.
(3) Last port.
(4) Next port.
(5) Crew List to include name/nationality/Passport number/time onboard/home address.

Ship-to-shore telephone: Radio-telephone listening watches a maintained on a 24-hour basis in the Marine Office on the follow frequencies: 2182 kHz.; 156.8 MHz.

International telephone: International telephone calls are route through Caracas, Venezuela. Telephone number is Punto Fijo area 08 51557 (It is usually difficult if not impossible to complete a call.). Tele 54193 Lagoven.

Also see "Documents".

TUGS: Tug assistance is considered essential and is afforded all vessel entering, leaving or shifting in the harbour by 2 × 1,600 h.p. tug Disposition and manoeuvres of tug-boat are directed by the Pilot, wh uses a "walkie-talkie" to convey orders to the tugs.

BERTHING: 4 finger piers provide 8 berths, numbered 1 to 8, from Sout to North.

Berth	1	2	3	4	5	6	7	8
Max. Arrival d.w.t. (m.t.)	70	92	24	44	16	30	16	30
Max. departure d.w.t. (m.t.)	112	112	48	48	38	38	94	94
Max. Draft (S.W.)	43′	43′	*37.6′	*37.6′	*37.6′	*37.6′	*37.6′	43′
Max. Length Ship	1000′	1000′	650′	700′	700′	700′	856′	856′
Max. Beam	Unl.	Unl.	Unl.	†	†	†	†	Unl.
Bow to manifold distance	495′	495′	300′	320′	330′	330′	340′	340′

Ballast line, fresh water and all grades bunkers at all berths.

*The max. draft will be increased to 40 ft.

†Max. beam permissible varies dependent upon the beam of vess berthed on other side of the slip.

The use of an anchor when docking is permitted at all berths. It considered prudent to have the outboard anchor hove-out prior entering the harbour in order to facilitate speedy release if necessa while docking. The Pilot will advise whether the ship is to be berth port or starboard side to the dock.

Products handled:

Berths No. 1 & 2: F.O., heating, heavy distillates, TJ-102, topp crudes, all crudes.

Berths No. 3 & 4: Lubes, F.O., LCT asphalts (penetration).

Berths No. 5 & 6: Naphtha, jet fuel, crudes, F.O., heating, MC/F asphalts, kerosene, TJ-102, topped crudes, LCT (pref.).

Berths No. 7 & 8: Naphtha, kerosene, heating, F.O., jet fuel, MC/F asphalts, all crudes except TJ-102.

LOADING: Loading rates particulary for low-flash products load during the hours of darkness or when topping-off cargo tanks, will reduced by the terminal to meet existing conditions.

All loading and discharging will be stopped during the passage of electric storm, and ullage covers must be closed and dogged dow During periods of calm, loading of gasoline or other similar low-fla products may be loaded at reduced rates or loading stopped if the hea vapours are not being dispersed quickly enough to prevent hazards fro accumulated gas pockets. Ship's officers are cautioned to be on th guard during such conditions.

Loading rates will be reduced when topping-off, if requested by ship's officer.

Some of the fuel cargoes are loaded from fuel reservoirs throu certified positive displacement meters, and shipping documents a prepared on the metered figures. All reconstituted crudes are l blended with conditions recording of component rates and quantiti Actual loading rates of both this crude and metered fuel cargoes a available at any time upon request of the standby.

Instructions as to grade or grades of cargo, and the approxima loading rate anticipated, will be given to the Master on completion Inward Clearance. Supplementary information including number a size of lines and hoses will be furnished to the Chief Officer befo loading commences.

If vessel's loading orders from owners or charterers do not agree w the terminal's orders, either as to grades or quantity, the mar representative should be advised immediately. The terminal authorised to load 10% more or less than the quantity nominated; if t cargo to be lifted will be more or less than this 10% limitation it necessary to cable New York for confirmation.

A terminal employee is stationed at each pier during the entire ti the ship is discharging ballast, bunkering, or loading cargo. Fifte minutes "stand-by" notice should be given to this man prior to complet of ballast, bunkers, or cargo.

Vessels loading Liquid and Flaked Sulphur: *For vessels loadi Liquid Sulphur, the following applies:*

Location: Pier 2, Berth 3 at Amuay Bay.

Draft – 40 ft., length overall – 700 ft., beam – no limitation.

Loading will be at the rate of 400 long tons per hour through a 6 line and rubber hose.

Maximum cargo size – 25,000 long tons.

Normal loading temperature is 275°F. (Minimum – 265°F. Maximum 295°F.). Density at normal loading temperature is 112 pounds per cu Viscosity at same temperature is 8.5 centipoises.

Safety precautions/provisions: Molten sulphur classified as "Grade Liquid" by U.S. Coast Guard. No naked light, open flames or spar should be permitted near any tank openings. Molten sulphur combustible but is handled at temperatures below its flash point (32 370° F) and ignition temperatures (476-502° F).

For vessels loading Flaked Sulphur, the following applies: Physi characteristics of the loading facilities:

(a) Location: Lat. 11° 44′ N., Long. 70° 14′ W. Anchora approximately 2,000 ft. South Punta Adaro with a depth of 33 400 yards offshore and dropping off to 50 ft. 1,000 yards offshore the rare event that the wind is Westerly vessel would anchor furth offshore.

(b) No draft, length or beam limitation. (Vessels loading up to 24 draft may be anchored inside the bay).

(c) Loaded barges whose overall dimensions are 200 ft. × 42 ft. × 17 ft. will be brought alongside with the aid of tugs and removed when required, barges will be equipped with fenders. The hoppers are 160 ft. × 37 ft. × 14 ft. Loading from barges to ship will be done using ship's gear and clam shells of 1.25 ton capacity. Clam shells will be furnished by Lagoven free of charge. Personnel (stevedores) to carry out the loading operation will be supplied by Lagoven or the ship's crew can be used if this is set forth in the charter party. Loading rate 1,000 long tons per day.

(d) The anchorage is sheltered in the lee of the Adaro Peninsula. Wave heights vary between 1 ft. and 2 ft.

(e) Normal Maximum parcel size – 10,000 tons loaded at a rate of 1,000 tons per day, however, an additional 2,500 tons can be supplied at a loading rate of 500 tons per day.

(f) Flaked Sulphur when stored in large quantities varies in density from 55 to 90 pounds per cu.ft. Average density is anticipated to be 70 lbs./cu.ft. Individual flakes are of irregular shape and are less than 0.5 sq.in. in area and less than 0.0625 in. thick. This size data is not a specification nor guarantee and is provided only to indicate the order of magnitude dimensions.

General:

Fee of Bs. 200 will be charged for trips between the Terminal and the anchorage by launch or tug for delivering personnel.

Method of cargo quantity determination: Barge drafts are marked to the nearest inch and capacity tables prepared by Charles Martin. The draft prior to commencement of and upon completion of discharging are noted. The amount transferred is obtained by consulting the tables. The quantity arrived at by totalling the amounts from the barges used is compared to the ships figures and reconciliation reasoned.

BALLAST: Vessels should arrive with sufficient ballast to permit safe handling. The Pilots require a draft of minimum 8 ft. forward, 18 ft. aft, on a T-2 or similar size tanker, 11 ft. forward and 20 ft. aft on a 26,000 d.w.t. or larger vessel. Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously.

Absolutely oil-free ballast may be discharged overside. All dirty ballast must be pumped ashore. A 30 in. ballast line, 2×60,000 and 1×120,000 barrel slop tanks and separator system are available.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the Lagoven concession, operated by the Society of Catholic Medical Missionaries. Several dentists are located in the area.

Italian Crew members covered by Casa Maritime insurance receive medical attention from the appointed medical representative in Punto Fijo.

Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

DENSITY: The usual density of sea water at the berth is 1025, temperature ranges from 78°F. to 85°F.

FRESH WATER: Fresh water can be supplied if necessary; however, supplies are limited to essential requirements. All fresh water is piped from distant sources. Loading rate is about 10 t.p.h.

FUEL: Ship's requirements specifying grade and quantity desired are to be given to the Marine Representative boarding the vessel on arrival. All grades of bunker fuel, intermediate fuels and Diesels are available except Esso diesel. Bunker delivery rates average 2,500/3,500 barrels per hour. Bunkers are loaded through meters which automatically register quantities on bunker receipts.

It is the responsibility of ship's engineer to give "standby" notice to the terminal employee and advise him when to shut down.

CONSULS: Brazil, Great Britain, Italy, the Netherlands, and Norway have consular representatives in the area.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while the ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

While the vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in the officers' mess-room, to avoid difficulties.

TIME: GMT minus 4 hours.

SHORE LEAVE: Also see "Health". Shore passes will be granted to all healthy persons. A representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the Pilot undocking the vessel. Vessels are not permitted to sail until all Crew members are on board, unless hospitalised or prior arrangements made for disembarking. A letter to this effect is required from the Master.

REGULATIONS: (i) *Pollution:* The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with the greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require that a written report be submitted by the ship involved in the event of an oil spill.

(ii) *Gangways:* All vessels using the port of Amuay must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations, and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(iii) *Passengers:* Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

(iv) *Visitors:* All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

(v) *Rats:* Rat guards required at all times.

GENERAL: *(a) Weather Conditions:* There is little rainfall at Amuay Bay; annual precipitation averages 12 in. The so-called rainy season usually coincides with the Caribbean hurricane season, from August to November, although Amuay lies South of the usual hurricane track. During these months calms are often experienced and winds from a Westerly direction may be expected. Normal winds are steady from the N.E., average Force 4, Beaufort Scale, with a max. of Force 8. Temperatures average about 85°F., with little variation from day to night or season to season.

(b) Tides: The normal range of the tide is about 12 in.; however, a 28 in. range has been observed during spring tides.

(c) Lubricating oil: Supplies of Essomarine lubricating oils are available. Requirements should be given in vessel's radio notice of arrival.

(d) Bonded Stores: Cigarettes or other stores in bond are not obtainable in Amuay Bay.

(e) Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's ETA radio, to permit delivery on board on arrival.

(f) Charts: No supplies of charts or sailing directions are available at Amuay Bay.

(g) Laundry: A 6 hour laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

(h) Mail: Itemised lists are required for ship's mail, to be signed by the Master. Unless other instructions are given, ship's mail received after sailing, or for vessels on which no advice has been received, will be held for 30 days and then returned to Owners or Operators at ship's expense.

(i) Inspection – Petroleum Products: Chas. Martin & Co. and E. W. Saybolt, petroleum inspectors, are available if specified. Telephone numbers, Chas. Martin 44665, 44650 and 44211; Saybolt 44639, 44645 and 44227.

(j) Norwegian Government Seamen Service: A field representative of the above service is stationed at Amuay providing Norwegian and Swedish film exchange and other usual services. His telephone number is 51459.

(k) Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seamen, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

(l) Provisions and Stores: Provisions and stores in limited quantities are available, the prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc. are competitive; dry stores are considerably higher than in most ports. The Port Steward will assist in filling requisitions.

(m) Radar and Radio: Radar and radio repairs can be effected in Amuay. A service repair man is available, but spare parts are limited.

(n) Repairs: Shore facilities are available only for emergency repairs of a minor nature. The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

(o) Surveyors: There are no appointed surveyors to American Bureau of Shipping or Lloyd's in the area. However, with sufficient advance notice, arrangements can be made to have their nearest representatives come to Amuay to attend surveys.

(p) Walport Film Exchange: Subscribers to the Walport Service may exchange films at the Marine Office.

(q) Plimsoll Marks: The Captain of the port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(r) Landmarks: Three conspicuous radio towers, 350 ft., painted alternate red and white bands, with red flashing aircraft warning lights, are located in the refinery area, 1 mile East of the docks.

ATTENDANCE: Representatives of the Marine Department board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ship's requirements. The Marine Office Building is located at the Pierhead Trestle and personnel are available for assistance at all hours. Telephones are located on all docks and the Marine Shift Supervisor can be called on telephone No. 444475 or 444465.

CARIPITO: 10.09 N. 63.02 W.

Also see "General – Shipmaster's Report, July 1982".

OPERATOR: Lagoven, S.A.

LOCATION: Caripito is located on the West bank of the San Juan River in Lat. 10° 09′ 25″ N., Long. 63° 02′ 01″ W.

Also see "General" before first port.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send to Caripito their ETA Guiria at least 3 days in advance followed by confirmation 48 and 24 hours before arrival.
2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Caripito, certain information must be radioed to Caripito prior to arrival to avoid a heavy fine and/or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Limited ballast facilities are available at Caripito Terminal.
4. Vessels calling at Caripito must obtain Government Pilots at Guiria.
5. The Venezuelan flag must be displayed during daylight hours while vessel is within port limits.
6. The emergency fire signal in Caripito dock area is 6 short blasts and 1 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.

DOCUMENTS: (Also see "Radio").

1. *Clearance (inward and outward).* Inward Clearance is effected at Caripito. The Sanitary Inspector boards vessel at anchor or at berth depending on tidal conditions and/or the availability of a berth. The Customs and other Government officials usually board at the berth. However, should there be a delay awaiting berth or tide, the entry will be granted while vessel is at anchor, in which case accommodation ladder must be rigged.

It is necessary that the following documents be ready on arrival:

Ballast List (1 original).
Passenger List (5 copies).
Baggage List (5 copies).
Crew List (7 copies).
Sailing Permit from Last Port (1 original).
Stores List (5 copies).
List of Personal Effects (3 copies).
List of Contents of Slop Chest (3 copies).
List of Passengers in Transit (5 copies).

Cargo documents. These are normally placed on board prior to departure, but in some cases when it is imperative to leave because of the tide, they are delivered at Marieta Pt. while vessel is at anchor awaiting tide to cross the Maturin Bar.

APPROACHES: The traffic in San Juan River is restricted to one-way from Marieta Point to Caripito. Therefore, instructions are issued at Guiria to incoming vessels relative to what action to take on arrival at Marieta Point. Outbound traffic is controlled so as not to conflict with these instructions.

1. Guiria: The town of Guiria is located on South coast of Paria Peninsula on N.W. shore of Gulf of Paria. When approaching from East a signal tower will be observed on a bluff slightly to North of town.
2. Maturin Bar: Buoy E-1, marks the entrance to Maturin Bar Channel and is located in position Lat. 10° 18′ 57″ N., Long. 62° 28′ 16″ W. (approx.) and displays a flashing white light every 5 secs.
3. Channel: Maturin Bar Channel is 14 miles in length and 400 ft. in width. The tidal range over the bar varies from 4.6 ft. to 5.7 ft. with currents up 3 knots. The average salinity of water is 1.009; however, this may vary considerably between wet and dry seasons and spring and neap tides dredging of channel to 32 ft. (MLWS) has recently been concluded. Maximum draft permitted by Venezuelan regulations is 34 ft. in fresh water. There is a restriction of 6 in. less for all motor tankers. On leaving Maturin Bar Channel the San Juan River narrows from approximately 1.25 miles in width to about 0.7 miles with slight variations in width up to Marieta Point where it narrows to about 1,200 ft. and varies between 800 ft. and 2,000 ft. up to Caripito. Marieta Point marks intersection of Cano Frances and the San Juan River. It is also at this point that course of San Juan River changes approximately 100° to starboard and it is the beginning of one-way traffic. Frequently, incoming vessels are requested to anchor below this point to await outbound traffic. There are 32 lights marking strategic points in San Juan River between Maturin Bar and Caripito Terminal. These light towers are painted aluminium and are easily visible during daylight hours.

PILOTAGE: Pilots are employees of Venezuelan Government and act in an advisory capacity. The Master retains responsibility for ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

Pilots are compulsory and are embarked and disembarked at port of Guiria through a sub-Agent. Vessels should proceed to the Guiria Sea Buoy (position Lat. 10° 33′ 25″ N., Long. 62° 15′ 05″ W., displaying a flashing white light every 5 secs.), and await instructions. If arriving during the hours of darkness, certain instructions are usually transmitted by light signals from the signal tower. Voice radio communications can be established at any time with Guiria or Lagoven Caripito frequencies 2182 kHz, 2638 kHz and 2738 kHz. The launch wh embarks the Pilot will also deliver instructions to the Master relative the movements of his vessel en route to Caripito, port regulation facilities, etc. The regular pilotage fees cover the area from the entra to Maturin channel to and from Caripito. The Pilot is to be provided w sleeping quarters and food, equal to that provided for the officers abo ship. (A representative from Port Services will assist as interpre whenever necessary.)

Note: Complaints or observations concerning the Pilot's handling vessel should be noted on back of pilotage ticket.

TIDES: The normal range of tide in the dock area is about 12 ft. w currents up to 3 knots during the flood and 4 knots during the ebb rainy season (May-December). The normal current is 2.5 knots dur the flood and 3 knots during the ebb.

ANCHORAGE: For vessels awaiting berth, there is an anchorage abo 1,000 m. up-stream from the Caripito Terminal. Vessels awaiting cle channel may at times be requested to anchor at Punta Marieta. Vesse awaiting high tide anchor at Punta Marieta or off Punta Gorda.

MAX. SIZE: Vessels up to 660 ft., 61,000 d.w.t. and max. draft *33 (FW) at Berth No. 2 and LOA 775 ft., 61,000 d.w.t. and max. draft *33 (FW) at Berth No. 3 when vessels are loaded. No restriction on vessel beam at the berths.

*Safe draft per tide tables.

RADIO: The cable and telegraphic address for Lagoven at Caripito "Lagomar – Caripito". Messages to and from ships at sea are route through the Government Radio Station at Maiquetia (La Guaira), ca letters "YVG". This station operates on a 24-hour continuous watch, the following frequencies:

Listening Frequencies: Low frequency, 500 kHz; high frequen 4178, 6267, 8356, 12534, 16712, 22225 kHz. Transmitting Frequencie Low frequency, 500, 472, 464, 417 kHz; high frequency, 4322, 435 6505.5, 6519.5, 8722, 8730, 12817.5, 17141.6 kHz. Radio Notice Arrival should be sent 72 hours prior to arrival at Guiria and correcte if weather or other conditions delay the vessel.

Radio telephone listening watches are maintained on a 24-hour bas at Guiria and at Caripito on 2182 kHz. The following frequencies a available for communications after contact: 2638 kHz and 2738 kHz.

All vessels en route to Caripito may also communicate with Amua or La Salina Marine offices and request that message dealing wi corrected ETAs, Pilots and other business be relayed to the Carip Marine Office.

Vessels that were originally cleared for another foreign port, or anothe Venezuelan port, and were subsequently diverted at sea, should rad the following information to Lagomar Caripito prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival
at Caripito
Last port of call
Port for which originally
cleared
Grade and quantity of cargo
to be lifted

This information is required in order to make in advance spec arrangements for Inward Clearance, to avoid payment of a fine. It necessary in such a case that the following documents be ready arrival:

Crew List (original and 6 copies).
List of Personal Effects (original and 2 copies).
List of Contents of Slop Chest (3 copies).
Stores List (original and 1 copy).

Also required are the original and 2 copies of the radiogram instructi Master to proceed to Caripito. Outward Clearance documents are place on board the vessel prior to departure from the Caripito terminal.

Masters should bear in mind that while vessels are within Venezuela territorial waters, Government Authorities do not permit the use of shi radio equipment. Cables and radiograms should be handed to th company representative for transmittal via shore radio communicatio system. Caripito has also radio telephone communication with Nor and South America and Europe. For further information contact Po Services Section in the terminal building, telephone 2335/2336.

BALLAST: Ballast is not required when mooring. Any ballast carrie should be in a minimum number of tanks, and all other tanks stripped so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks lines can contaminate crude and cause operating problems for th refiners. It is important therefore to strip tanks and lines as dry possible.

Vessels provided with completely segregated ballast system a permitted to discharge ballast and load cargo simultaneously. All balla clean or dirty must be pumped ashore. Contaminated residues may pumped ashore, where facilities are available for receiving up to maximum of 20,000 barrels.

A considerable number of vessels are now participating in th programme to eliminate pollution of the seas. Under this programm vessels may arrive carrying quantities of oil/water emulsion. If it desired to follow the "load-on-top" procedure in such instances, it requested that the Marine Representative be informed on arrival.

BERTHING: The Marine Office Building is located on the West bank the San Juan River upstream from the berths. Representatives of th Marine Department board vessel immediately upon arrival and it particularly requested that Masters indicate at that time all shi requirements. Personnel are available for assistance at all hours.

Lagoven maintains a deep water terminal, consisting of 2 ocean tank berths, Nos. 2 and 3. These are T-type piers with breasting dolphi located approximately 10 ft. off the face of each pier.

All terminal facilities are under the control of Lagoven, S.A. The po is open for navigation during day and night. All ocean tankers are moo at Berths No. 2 and 3 on the flood tide only. Vessels may sail from Be No. 3 at any stage of the tide. Sailings from Berth No. 2 are restric to flood tide only when Berth No. 3 is occupied.

A vessel entering or leaving port must be assisted by the same Government Pilot taken aboard at Guiria. A Custom guard will board at the same time and remain with the vessel. A Lagoven Representative will deliver to the Master his loading and docking instructions together with any other information pertinent to the vessel's call. He will also sign the Notice of Readiness if requested. The vessel will proceed to anchor to await flood tide to dock, to await berth, or will swing to the flood tide in the turning basin and proceed directly to the berth depending on circumstances.

LOADING: Loading rates, particularly for low-flash products loaded during the hours of darkness or when topping off cargo tanks, will be reduced by terminal to meet existing conditions.

All loading and discharging will be stopped during passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calms, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazard from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from Owners or charterers do not agree with terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than 10% limitation consultation is necessary.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the concession. Several dentists are located in the town of Caripito. Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: Fresh water is available in any quantity. Delivery is made through 2.5 in. national standard fire hose thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: IFO-180, IFO-380, Marine Diesel and Gas Oil are available. It is the responsibility of ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

CONSULS: There are no consular representatives in the area. Vessels bound for U.S.A. or British Caribbean ports will be provided with a letter stating this fact.

REPAIRS: Only minor repairs of an emergency nature can be made. There are no electronic repair services available in the area.

CERTIFICATES: All ships calling at a Venezuelan port for the first time must be measured for tonnage by Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued is forwarded to the Owners. A fee is charged for this certificate, which is payable only on ship's first call. Vessels registered in following countries are excluded from above regulations: Denmark, France, Germany, Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officals during regular meal hours. Masters are requested to give them the privilege of eating in the officers' messroom, to avoid difficulties.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed 1 per officer, nor can ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to the Lagoven Despatcher undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking.

TIME: Local time is GMT minus 4 hours.

GENERAL:

Gangways: Gangways at Berths No. 2 and 3 are provided by the terminal.

Plimsoll Marks: The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

Surveyors: There are no appointed surveyors to the American Bureau of Shipping or Lloyd's in the area. With 48 hours' notice, non-exclusive surveyors can be obtained from Caracas, or at times from Puerto La Cruz, or qualified Masters or chief engineers may be available for appointment as surveyors when required.

Bonded Stores: Cigarettes or other stores in bond are not obtainable at Caripito.

Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's radio ETA, to permit delivery on board on arrival. Cash returns can be accepted only during the normal working day – 0700 to 1600 hrs. Sundays and holidays excluded.

Provisions and Stores: Provisions and stores in extremely limited varieties and quantities are available at prices considerably higher than in most other ports.

Charts: No supplies of charts or sailing directions are available at Caripito.

Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seaman, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

Laundry; Laundry service is available.

Lubricating Oil: Supplies of marine lubricating oils are available from Puerto La Cruz. Quantities required should be included in the ETA cable.

Mail: Any pending ship's mail will be delivered on board by the marine dispatcher on arrival at Caripito. At the same time he will receive any ship's mail to be dispatched. The marine dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises postage by signing 7 copies of the Company Post Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter. Copy of this will be returned aboard vessel when leaving this port outward bound. If not ready on time, it will be air-mailed to the vessel's next port of call.

Inspection – Petroleum Products and Crude Oil: Inspecciones C.A., AIVEPET, C.A., Caleb-Brett, C.A. and SGS (Redwood), C.A. petroleum inspectors are available from Puerto La Cruz if specified.

Visitors: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

Pollution of Harbour and Coastal Waters: The laws of Venezuela are strict in regard to pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The authorities require that a written report be submitted by the ship involved in the event of an oil spill. Incidents of this nature should be reported immediately, either by VHF or telephone, to the Port Services Section.

AUTHORITY: Petroleos de Venezuela, S.A., Apartado 169, Caracas 1010-A, Venezuela. *Tel:* 708-4111. *Telex:* 21890, 23489, 24477 PDVSA VE. *Contact:* Lermit Rosell, Marine Corporative Manager.

EL CHAURE: 10.15 N. 64.37 W. (See Plan)

OPERATORS: Corpoven S.A.

LOCATION: El Chaure Marine Terminal is located on the South shore of the head of Bergantin Bay. 1.8 miles N.E. of Puerto La Cruz: Lat. 10° 14′ 50″ N. Long. 64° 36′ 57″ W.

This terminal is also considered to be Berth No. 6 of 'Puerto La Cruz' which also see.

DOCUMENTS: To avoid penalties, ships clearing for Venezuelan Ports must present certain papers herein set forth for arrival and clearance after docking. The Clearance is made by Government officials accompanied by a company representative.

The following documents must be presented:

1 copy of Ship's Register
Clearance from Last Port
1 copy of Ballast Certificate
6 copies of Crew List
5 copies of Passenger and Baggage List
2 copies of List of Passengers in Transit
4 copies of List of Personal Effects
4 copies of Stores List
2 copies of List of Slop Chest
Sailing permit issued by Marine Authority of last port of call.
Dispatch issued by Venezuelan Consul at last port.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Company will arrange for Pilots to board all vessels as necessary. Whenever it might be deemed necessary for the Master to disregard the Pilot's advice in order to ensure the safety of the vessel, a written report must be submitted by the Master to the Venezuelan Port Captain, explaining the reason for such action.

West Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and West berths and at a distance from it equal to the distance of the North buoy. Drop the port anchor at the point of intersection of the ship's fore with a line formed by the two West shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the West berth. Drop the starboard anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by the Pilot and with the help of the ship's engines and tugs under Pilot's instructions.

General: Chicksan loading arms with 12 in. connections, 2 for Fuel oil, 1 for diesel products, 1 for leaded and 1 for unleaded gasolines. All dirty ballast to be pumped ashore through the fuel oil loading arms.

Mooring Lines to be used: Vessels of any deadweight must secure with at least:

Forward: (a) 2 breast lines
(b) 2 springs
Aft: (a) 2 breast lines
(b) 2 springs
(c) 1 seabuoy line

All ropes must be fibre, polypropylene or wire of 1.25 in. minimum diameter each connected by a 2.5 in. shackle.

LOADING:

Cargo Information: On completion of Inward Clearance, information regarding the number of Chicksans, loading rate, temperature and API from cargo will be given to the Master and Chief Officer. A 15 minute stand-by is required prior to finishing any grade. During ballast discharge, supplementary information will be given to the Chief Officer.

Draining Chicksans: Chicksans are drained by gravity on all products (except iso-butano, tel, benzene, ortho-xilene). Ships personnel must cooperate with Terminal personnel in this operation to ensure complete draining of Chicksans into ship's tanks.

Scuppers: Loading will not be started until all deck scuppers are properly sealed to the satisfaction of the Terminal.

Simultaneous Deballasting and Loading: Vessel's equipped with separated and completely segregated ballast tanks, lines and pumps which are never used for oil may be permitted to discharge ballast and load simultaneously, providing approval has been obtained from the Terminal.

Chicksans: There are 6 Chicksans on each berth. Loading arm connections are 12 in., except for iso-butane, benzene and ortho-xilene, which are 8 in. and tel, which is 4 in.

The products benzene, ortho-xilene and tel can be loaded only on Berth No. 2.

Approximate Gravities and Temperatures of Products to be delivered or received:

Product	*API Specific Gravity*	*Temperature (approx.)*
Iso Butane	0.564	−11.5°C
Alquilate	70.8	86°F
Fuel Oil	11.5	140°F
Diesel Oil	32.0	90°F
Crude	28.0	90°F
Gasoil	36.5	90°F
Premium Gas	64.0	86°F
F.C.C.	58.0	105°F
U/L Gasoline	63.0	84°F
V.G.O.	23.5	117°F
Jet Fuel	45.5	95°F
Natural Gas	82.0	80°F
Benzene	0.8833	83°F
Ortho-xilene	0.8828	85°F

Loading Rates:

Product	*Loading Rates* bbls./hr.
Alquilate	7,500
Fuel Oil	18,000
Diesel Oil	8,500
Crude	22,000
Gasoil	8,500
Premium Gas	7,000
F.C.C.	7,000
U/L Gasoline	8,000
V.G.O.	6,500
Jet Fuel	8,000
Natural Gas	6,000
Benzene/Ortho-xilene	1,800

BALLAST: Due to the exposed location of the oil piers, vessels are required to be ballasted with minimum ballast necessary for safe berthing manoeuvres at El Palito.

This minimum ballast consists of approximately 25% of their respective Summer deadweight.

The ballast quantity should be carried in a minimum number of tanks, in order to minimise deballasting time whilst alongside.

Vessels equipped with a special separate and clean ballast system or segregated ballast can discharge their ballast into the sea, after first being inspected and passed by Terminal representative. According to regulations, a maximum of 20 ppm is permitted.

Dirty ballast must be pumped ashore. El Palito facilities can handle a maximum of 20,000 bbls.

MEDICAL: Medical and dental treatment and hospitalisation, if required, are available in Puerto Cabello. Authorisation for any medical and/or dental treatment must be made by the Master through the Agent.

FRESH WATER: Not available.

FUEL: Bunkers are available only for vessels loading or discharging cargo.

Bunker supply should be arranged between owners and Corpoven's Head Office prior to vessel's arrival. A telex must be received by El Palito Terminal indicating quantity and gravity of the bunkers to be received.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore.

Cigarettes in cartons, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel), should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest which will be sealed for the duration of the vessel's stay in port.

CONSULS: French, Norwegian, Danish, Italian and Panama Consulates are represented in Puerto Cabello. There is no American Consulate. It is necessary for Masters of Panamanian flag vessels to visit the Panamanian Consulate at Puerto Cabello to present documents and receive dispatch as required by law. Regular office hours are from 0800 to 1200 hrs. and from 1400 to 1700 hrs. Mondays through Fridays; any dispatch issued outside of regular office hours is billed at double fees. Agent will arrange transportation to Puerto Cabello upon request.

REPAIRS: Emergency and minor repairs only are possible.

DRY DOCKS: The nearest dry docks are located at Puerto Cabello, 8 miles East from El Palito, and Curacao.

HOLIDAYS: *National Holidays:* By order of the local Port Authorities, it is requested that all ships in port be fully dressed on the following holidays: January 1st (New Year's Day); April 19th (Declaration of Independence); June 21st (Merchant Marine Day); July 5th (Independence Day); July 24th (Birth date of General Simon Bolivar); October 12th (Columbus Day); December 25th (Christmas Day).

REPATRIATION: The documents and personal effects of seamen left ashore for hospitalisation, repatriation or other reason, must be delivered to the Terminal Office before sailing. A letter from the Master is required advising the maximum amount of advances to the seaman and any other instructions concerning his repatriation. All expenses incurred by the seaman, including the cost of repatriation, are for the vessel's account. Venezuelan law at all times holds the Master, Agent or Owner responsible for any seaman left behind in Venezuela.

AIRPORT: Distant about 4 miles.

TIME: Local time is GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes.

Vessels are not permitted to sail until all crew members are on board, or special permission has been obtained to sail without a crew member.

GARBAGE/WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Bolivar. U.S.$ 1.00 = 67 Bolivars. No local currency restrictions.

REGULATIONS:

Engines: No engine repairs will be made while the ship is in dock. Engines are to be kept at standby at all times while the ship is in port.

Rat-guards: Vessels must use rat-guards on all mooring lines.

Visitors: All visitors to vessels are prohibited, without written permission in each case by the Port Captain or Terminal Office.

Petroleum inspectors, dispatchers, and terminal employees may board ship in performance of their duties.

Pollution: The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast or oil is to be pumped or allowed to escape over the side. No engine-room or pump-room bilges may be pumped overboard. All pump-room sea suctions and overboard discharge valves must be secured prior to loading or discharging cargo. Loading must be conducted with the utmost care and vigilance so that errors or delays may not result in spills. All deck scuppers must be plugged tight before loading so that in the event of a spill pollution of the harbour may not result.

Garbage: No garbage is to be thrown over the side while the vessel is in port.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include this information in his ETA.

Firearms: Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while the vessel is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody.

Alcoholic Drinks: We would kindly request Masters to advise their crew members that the introduction of alcoholic drinks through the company's gates is strictly prohibited.

If anyone found with alcoholic drinks within the company's area, it will be confiscated without payment of indemnities. Drunkards are not allowed to board any vessel, unless accompanied by an authorised ship's officer.

Bar Service: Please be advised that we have received instructions from the Custom Authorities, that all vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep this "Bar" closed during the vessel's stay in port.

Photographing: Photography within the boundary fence of this Terminal is prohibited. Taking cameras inside refinery's installation is likewise prohibited.

Fishing and Painting: Fishing and painting of ship's side from the piers is strictly forbidden while tied up at El Palito.

WEATHER: Winds are normally from the N.E. with an average Beaufort Scale Force of 2-3. Average temperature about 85°F.

The months of December, January, February and March have the roughest sea and swell, and vessels may not be able to dock due to the weather.

TIDE: The normal range of the tide is 1 ft.

GENERAL:
Bonded Stores: No cigarettes or bonded stores are available at El Palito.
Cash Advances: Cash advances are available in Venezuelan Bolivares only and should be included in the vessel's radio ETA, to permit delivery on board on arrival.
Charts: No charts or sailing directions are available at El Palito.
U.S.S. Club: There is no U.S.S. Club available at El Palito or film exchange service.
Inspection of Petroleum Products: Outside inspectors of petroleum products are available in the area. However, inspectors shall be nominated by shippers/suppliers/owners prior to vessel's arrival, and notice shall be given to El Palito Terminal, in order to permit access to nominated inspectors.
Laundry: Laundry facilities are available at El Palito.
Lubricating Oil: Certain types of Corpoven lube oils only are available. Requirements should be sent by radio with ETA to Agent.
Mail: Mail service posted from El Palito arranged by Agent.
Provisions: Provisions are available at El Palito.
Radio and Radar: Repairs possible through Agent.
Gangways: Gangways are provided by El Palito Terminal.
AGENCY: Corpoven S.A. does not, as Operator of the Terminal, act as Agent for any vessel or for firms or agencies engaged in coastwise or international transportation operations. All services in connection with the arrival, loading, or departure of vessels are performed as a representative and for the account of the shipper in the case of cargoes loaded, and as the consignee, in cases where cargo is received.

SHIPMASTER'S REPORT: July 1988.

Two tugs are used for berthing, one astern on tug's line and the other to illuminate the forward buoy and push as required.

The aft buoy line is the first line sent away and is used to check the vessel's swing into the berth.

There is a constant swell running, and positioning vessel in the berth is very long and drawn out as the loading arms are restricted in vertical and horizontal movement.

The swell causes the ship to move out of position, all moorings need to be adjusted simultaneously and with the small numbers onboard this was very difficult.

Leaving the berth was fairly straightforward, with one tug on aft main deck to pull vessel off while recovering anchors.

Chart B.A. 1966 leaves a lot to be desired for approaching a port. El Palito Terminal can be identified by 3 towers, each with a high intensity light near the top and a flare. There is a mass of background lights and the navigational lights are completely obscured. Coming from the North, these lights are visible at 20 miles and with the flare make the pattern, light, flare, light, light from port to starboard. The berth is situated right below these lights.

The radar picture shows 2 similarly shaped jetties, so the lights are a good guide to the correct berth.

AUTHORITY: Corpoven, S.A., – Refineria El Palito, P.O.Box 102, Puerto Cabello 2023A, Edo Carabobo, Venezuela. *Tel:* (041) 421110, 421005, 304249, 304250, (042) 612433, 612434. *Telex:* 28013, 23571. *FAX:* (041) 304381. *Cables:* Corpoven-El Palito. *Contact:* Jorge T. Segnini, Terminal Supervisor.

GUANTA: 10.15 N. 64.35 W. (See Plan)

SHIPMASTER'S REPORT: 1978.

LOCATION: Lat. 10° 15′ N., Long. 64° 35.5′ W. About 5 miles East of Puerto La Cruz.
DOCUMENTS:
6 Crew Lists.
6 Passenger Lists (or negative).
6 Ship's Stores Lists.
6 Crew Personal Effects Lists (well detailed).
1 Declaration of Health.
Clearance from Last Port.
Cargo Manifests.
Full set of Manifests and B/Ls.
Entry Formalities: Normally carried out after docking unless there are no berths available; then vessel can be cleared at anchorage in Bahia Pozuelos, during daytime. At night only in case of emergency.

Accommodation ladder must be rigged.

Hours of entry: From 0700 – 1100 hrs. and from 1300 – 1700 hrs. Overtime outside these hours.
APPROACHES/PILOTAGE: A vessel bound for Guanta has to enter Bahia Pozuelos as she must first call at Puerto La Cruz to embark a Pilot. The anchorage area for waiting berth turn is also in Bahia Pozuelos. This anchorage is in depths of 48 ft. to 80 ft. and is well protected from swell by surrounding islands. No size limitation.

Bahia Pozuelos is the anchorage and Pilot embarking area for 3 ports: Puerto La Cruz, Guanta and Pertigalete.

The use of Government Pilot is compulsory for all vessels docking or undocking. ETA: 48 and 24 hours in advance via the vessel's Agent.

Pilot boarding hours: From 0530 – 1700 hrs. every day. Vessel cannot dock after sunset. Sailing may be arranged at any time.
HEALTH: All vessels boarded by Port Doctor. No automatic Pratique.
RADIO: Curacao Radio PJC. No local station.
VHF: All Agencies maintain radio watch on Channel 16 during office hours. Tugs and launches also equipped with VHF (call: "Ramrey").
TUGS: 3 tugs available: 1×1,700 h.p. and 2×1,200 h.p. All privately owned. Sometimes vessels bound for Guanta or Pertigalete have to wait for 2 or 3 hours as these private tugs have contracts with oil companies in Puerto La Cruz and are available only when no tanker is docking or undocking. Tug's lines used. Normally tugs join the vessel inside Guanta Bay.
BERTHING/MAX. SIZE: One concrete pier on piles, 763 ft. in length where vessels normally dock starboard side to. The apron is 20 ft. wide in centre, 42 ft. at ends.

One modern concrete pier on piles, 1,056 ft. in length where vessels normally dock port side to. The apron is 115 ft. wide in centre and 85 ft. at ends. The piers are well fendered with rubber hoses and used tyres.

Height of piers above HW: 10 ft. Mean tidal range: 1 ft. 6 in. Max. draft alongside small pier: 23 ft. 08 in. Minimum draft alongside long pier: 26 ft. 08 in. Depths varies from a minimum of 27 ft. to a max. of 34 ft. at the Western end of the long pier.
CARGO HANDLING FACILITIES: All cargo normally discharged by vessel's own gear, directly on to truck or trolleys. The piers are not connected to the railroad. No floating crane.

The following mobile cranes are available in the port area: 1 crane max. 120 tons; 1 crane max. 30 tons, with telescopic extension boom, max. 60 ft.; 2 small cranes max. 6 tons with a boom length of 30 ft.

Forklifts: 15 forklifts capacity 3.5 tons; weight 5.2 tons with fixed counterweight. To use these forklifts on board, the hoisting gear should lift over 6 tons.

2 forklifts capacity 5 tons, weight 12 tons; 1 forklift capacity 20 tons, weight 25 tons, specially for containers.

Flatbed trolleys: 30 trolleys capacity 8 tons; 1 trolley capacity 70 tons.

No lighters available.

All discharging gear normally supplied by Agency. For heavy lifts, it is recommended to have special slings on board.
BULK CARGO FACILITIES: On the Eastern side of the Guanta Bay, there is a berth for loading coal by means of a fixed chute. Depth alongside 30 ft.
Grain Cargo: Receivers supply suction machines. There are 2 machines available, capacity 1,000 tons per machine during 24 hours. Grain vessels work round the clock.
Liquid Cargo: Sometimes tallow and liquefied gas are handled. Discharged by vessel's pump into tank trucks. Hoses normally supplied by vessel.
CONTAINER HANDLING FACILITIES: No container berth. No crane. 1 forklift capacity 20 tons. There is a small container stacking area.
STEVEDORES: Normal working hours: 0700 – 1100 hrs. 1300 – 1700 hrs. (Monday to Friday); 0700 – 1100 hrs. (Saturdays).

Overtime: Monday to Friday, 1800 – 2300 hrs. (night shift); Saturday, 1300 – 1700 hrs.

Normally port does not work after 1700 hrs. on Saturdays or Sundays.

Ordering of gangs: For 0700 hrs. requested previous day before 1500 hrs. For 0900 hrs. requested same day at 0700 hrs.

Overtime rates: 50% for the night shift (Monday to Friday); 100% for Saturday afternoon shift.

The gangs consist of 12 longshoremen and 12 stevedores, including 2 winchmen, 1 signalman and 1 checker.

Capable supervision only available from Agency.

Rigging or cleaning gangs are available.
MEDICAL: Private hospitals at Puerto La Cruz. Private doctors generally do not visit ships. If medical attention is required on board, the Port Doctor will attend patient, unless he authorises another doctor to make the visit.

In case of emergency, when the vessel is anchored in Bahia Pozuelos, a launch can be arranged to pick up the sick crew member.
DENSITY: Salt water all the year round.
FRESH WATER: Available at 5 Bolivares per ton at the main pier only. Hoses supplied by ship. Rate: about 5 t.p.h.

Presently there is no water available at Berth No. 3 (Western end of pier).
FUEL: No Bunker "C".

Diesel: Delivered by trucks; arrangement must be made at least 24 hours in advance.

Gas Oil: Delivered by trucks under previous arrangement.
CONSULS: See "Puerto La Cruz".
REPAIRS: Only minor engine or electric motors can be repaired.
DRY DOCK: Not available.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Not available. No shore gangway available.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle spirits.
REPATRIATION: Can be arranged. No special requirements.
AIRPORT: At Barcelona, about 15 miles by road. 3 flights daily to Caracas.
TIME: 4 hours slow of GMT, all the year round.
HOLIDAYS: New Year's Day, Holy Thursday, Good Friday, Holy Saturday, April 19th, May 1st, June 24th, July 5th, July 24th, October 12th, November 24th, Christmas. No labour available on these days.
TELEPHONES: No facilities at Guanta. Private calls can be made from the central office at Puerto La Cruz (5 miles) during the following hours: 0700–2100. Long distance calls dispatched quicker from the Hotel Melia at Puerto La Cruz.
SHORE LEAVE: From a ship anchored in Bahia Pozuelos: Allowed if the vessel has been cleared and if every crew member has shore pass. One private launch available but very expensive.

From Guanta berths: Allowed with shore passes.
IDENTIFICATION CARDS: Passes for shore leave are issued by officials of the Port Captain's Office, when boarding the vessel for clearance. These passes should be filled out on board. They are valid for the duration of the vessel's stay in port only and have to be returned before sailing.

In order to comply with Immigration Regulations, crew should be carefully checked before departure and any missing seaman reported to the Agent. The same applies to passengers in transit.
GARBAGE DISPOSAL: No facilities.
DELAYS: Presently, Guanta is somewhat congested and the waiting time varies from a few days to 15 days, especially during the rainy season.

GENERAL: Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast or throwing garbage or dunnage in territorial waters. Heavy fines are imposed for pollution of waters and sometimes fishermen are quick to report any infringement.
Berthing Turn: On the basis "first come, first served" but Venezuelan vessels have some priority.
Supplies and Laundry: Several private firms based at Pto. La Cruz. Nearly all kinds of fresh provisions are available.

Laundry service available; may be completed in 8 to 10 hours.
General: Guanta is a natural harbour surrounded by mountains which protect the bay completely in bad weather. The port has never been closed for bad weather.
Venezuelan Flag: Upon arrival at Pozuelos Bay ship should display the flag from the foremast at all times. When anchored or docked, the flag should be displayed only between sunrise and sunset.
Warehouses and Cargo Sheds: No transit cargo shed. No refrigerated storage available.

There are 5 warehouses with a total floor space of 75,000 sq.ft.

Open Space: A total of 5.7 acres, mostly covered with asphalt or concrete.
Weather: The rainy season starts in mid-May and ends in November or December. During the rainy season it is usually calm in the early hours of the day followed before mid-day by light Westerly or variable breezes. In the afternoon the breezes change to North-Easterly at about 12 knots until midnight. During the dry season the cycle is similar but the North-Easterly wind may reach 25 knots. This can prevent all communications between anchored vessels and the shore.
AUTHORITY: "INP" Instituto Nacional de Puertos.

SHIPMASTER'S REPORT: 1975.

LOCATION: Lat. 10° 14.7′ N., Long. 64° 35.5′ W.

Guanta is located in the Bay of Guanta. It is a well protected port against currents and winds.

The port is entered between 2 well lighted islets.
DOCUMENTS:

Maritime Declaration of Health (together with inoculation list of crew).
10 Passenger – (or non-passenger) Lists.
10 Transit passenger – (or non-transit passenger) Lists.
10 Crew Lists.
4 Personal Effects Lists. (new clothes, etc., to be mentioned).
4 Ship's Stores Manifests.
Clearance from Last Port.

PILOTAGE: Government pilotage is compulsory. Pilot is embarked and disembarked near the Sea Buoy of Puerto La Cruz, in position: Lat. 10° 15.5′ N., Long. 64° 41′ W.
ANCHORAGE: On the Pto. La Cruz Roads.
RESTRICTIONS: Entering: In daylight hours only: 0600 – 1800 hrs.

Sailing: Day and night.
TUGS: One powerful tug available, compulsory to use when ship's length more than 90 m.
BERTHING: New Pier: Length 322 m. Old Pier: Length 233 m.

Water Depth: According to Pilots information: Old Pier: 29 ft. New Pier: 34 ft.
STEVEDORES: *Working Times:* Monday to Friday: 0700 – 1100 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. Saturday: 0700 – 1100 hrs., 1300 – 1700 hrs. Sunday: No work is done.

Gangs have to be ordered by 1500 hrs. the day before required.
FRESH WATER: Ships can replenish their fresh water tanks without charge (Included in port charges). Own hoses to be used.
OPENING/CLOSING HATCHES: Opening/Closing hatches, setting derricks: Special Rigger gangs take care of this. It is absolutely forbidden for ship's crew to touch these kind of jobs.
GENERAL: *Waste Water:* Special care should be taken to prevent waste water, from sanitary or engine-room systems fouling the jetty. Heavy fines are made in case this happens and a special shore gang might be ordered to clean same.
Customs: 2 Customs Officers have to be provided with food.
OPERATORS: Servicio Portuario de Guanta.

GUARANAO: 11.40 N. 70.13 W.

SHIPMASTER'S REPORT: January 1983.

LOCATION: The port of Guaranao is located on the Gulf of Venezuela on S.W. coast of the Peninsula de Paraguana, Venezuela. It lies between Amuay Bay to the North and Punta Cardon to the South.
DOCUMENTS: Inward Clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department.

The following documents must be ready on arrival:
Clearance from Last Port.
Crew Lists (7 copies).
Passenger Lists if any (5 visaed copies).
Baggage Lists if any (3 visaed copies).
List of Personal Effects (4 copies).
Stores Lists (2 copies).
Sailing Permit (Zarpe).

APPROACHES: Masters when approaching the coast should keep a sharp lookout for fishing boats, nets, small craft or sunken wrecks. From Punta Zarobon the coast, which is bordered by cliffs from 85 ft. to 65 ft. (25.9 m. to 19.8 m.) high, trends about 2 miles SSW to Punta Gorda.
PILOTAGE: Compulsory. Vessels have to wait for Pilot about 0.5 miles offshore at anchorage. Ship's can make contact with pilot station by VHF on Channel 16 or 12.

Also see Punta Cardon (Pilotage – Shipmaster's Report dated January 1989).
ANCHORAGE: Generally ships must anchor about 0.5 miles offshore to wait for Pilot. Good anchorage is obtained in depths of 28 ft. (8.5 m.) muddy bottom and depths of less than 18 ft. (5.5 m.) extend up to about 0.25 miles offshore in this bay, and depths of less than 36 ft. (11 m.) extend about 7 cables NNW from Punta Zarobon (Guaranao).
RADIO: Arrival notices and radio messages to and from ships at sea are usually transmitted through Curacao (PJC) and routed through Agent's head offices at Caracas, Venezuela. The port radio control is Las Piedras Paranagua.
TUGS: One tug is available to assist with berthing/unberthing.
BERTHING: A pier extends about 3 cables Westward from shore at Salinas, Guaranao, and the Southern half of this pier is for Ro-Ro vessels stern to. A floating pier about 1 cable distance South of and parallel to the former, extends Westward from shore about 810 ft. (247 m.) and is 164 ft. (50 m.) wide.
CARGO HANDLING FACILITIES: There are fork lift trucks of all sizes, 6 mobile cranes at the floating pier, and some towing vehicles.
MEDICAL: Services available.
FRESH WATER: Not available.
FUEL: Available if advance notice is given. Fuel/diesel oil and lubricating oil can be obtained from either Amuay Bay or Punta Cardon.
FIRE PRECAUTIONS: This port is used for discharging general cargo, especially waste paper and timber. Waste paper is considered as dangerous cargo, therefore Masters are called to pay attention to their fire-fighting equipment and to have it ready during discharging waste paper.
WATCHMEN: Not available.
SHORE LEAVE: Permitted, but shore passes must be carried and passes returned before the vessel sails.
GENERAL: *Stores:* Provisions, deck and engine stores available but not bonded stores.
Garbage Disposal: No facilities.

SHIPMASTER'S REPORT: December 1990.
Tanker of length 135 m. berthed port side alongside.

Vessel arrived with clean ballast with the intention of discharging ballast to sea. Port authorities advised that this was not permitted even though the ballast was clean. The shippers arranged and received the ballast by shore trucks of 44 cu.m. capacity each. Deballasting (780 cu.m.) into the trucks took 26 hours and involved 19 trips by the trucks.

Cargo was delivered to the pier by trucks and was pumped on board by 2 small portable pumps through 2×4 in. diameter hoses. Loading was eventually reduced to one pump due to the viscosity of the cargo.

Final cargo figure was 6,000 tons short of the 10,000 tons that the vessel had expected to load and the 4,000 tons that was loaded took 120 hours.

AUTHORITY: Las Piedras-Guaranao Port Captaincy, P.O. Box No. 2, Codigo Postal 4102-A, Edo. Falcon, Venezuela. *Tel:* (069) 451921. *Telex:* 54119. *Cables:* Capipuerto Las Piedras. *Contact:* Captain Oscar Ibarra Lavado, Harbour Master.

JOSE TERMINAL: 10.06 N. 64.51 W.

FLAG: Venezuelan flag must be displayed from the foremast when entering Pozuelos Bay and when manoeuvring or docking, regardless of the hour; however, while at anchor or while moored at berth, it needs to be displayed only between sunrise and sunset.
LOCATION: The Terminal of Jose is located West of Pozuelos Bay at Lat. 10° 06′ 19″ N., Long. 64° 51′ 10″ W. on the N.E. coast of Venezuela. The usual hurricane path is several hundred miles to the North.

The lighthouse marking the entrance to Pozuelos Bay is located at Lat. 10° 18′ 18″ N., Long. 64° 41′ 07″ W. Visibility is 20 miles.
DOCUMENTS: Arrival Clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company. The following documents are required and should be prepared prior to arrival.

Ship's Register.
Ballast Manifest (1 copy).
Crew List (6 copies).
Passenger and Baggage List, if any (5 copies).
List of Passengers in Transit, if any (5 copies).
List of Personal Effects (4 copies).
*Stores List (5 copies).
List of Slop Chests (4 copies).
Sailing Permit issued by Marine Authority at last port of call.

*Store List should indicate separately all deck, engine and cabin stores.
APPROACHES: Puerto Jose is approached through a channel 150 m. wide, with a minimum depth of 13.6 m. There is a turning area 460 m. in diameter.
PILOTAGE: The use of Government pilots is compulsory for all vessels docking or undocking. This service will be arranged at all times. If it becomes mandatory for the Master of the vessel to disregard Pilot's order in order to ensure safety of the ship, a written report in Spanish shall be submitted promptly by the Master of the ship to the Government Port Captain.
RESTRICTIONS: No restrictions are made on arrival/sailing time.

MAX. SIZE: The loading facilities consist of one Berth.

The docking characteristics are as follows:

Max. Deadweight	42,000 tons
Max. Ship Capacity	75,000 cu.m.
Min. Ship Capacity	11,000 cu.m.
Max. Draft	39 ft.
Max. LOA	800 ft.
Max. Lightship weight	22,000 tons

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

RADIO: Masters are requested to advise Corpoven Puerto La Cruz by radio 72 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship and dates that ships' certificates expire. Vessels may contact the terminal of Puerto La Cruz by radio-telephone on 2182 kHz, SSB and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channels 6, 12, 13, 16, 17, 73 and 74.

Ship-to-shore radios are installed on the oil dock and on both tugs.

TUGS: There are 2 tugs at the port for mooring or unmooring and use is compulsory for all vessels. The tugs available are radio equipped and are 3,000 h.p. or more. Generally the Government Pilot will not begin manoeuvers until he is assured that the tugs are on stand-by.

BERTHING: *Arrival at Dock:* While alongside the berth the following rules must be observed:

(a) Master must ensure that mooring lines are properly tended, and that sufficient personnel are onboard at all times to handle lines. Loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore loading arms by company personel. Vessels are requested to have their derrick and gangway ready for use.

NOTE: Vessels normally dock with starboard side to dock, unless advised otherwise.

(c) While docked, the discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(d) Rat-guards must be placed on all ropes connected with the shore.

(e) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(f) Meals must be provided in officer's messroom for Venezuelan National Guard personnel who may be assigned to the vessel during her stay in port.

(g) Masters are requested to display on top of mast a red flag in day-time and red light at night indicating that ship is handling dangerous cargo.

(h) Unregulated crafts should not be allowed to come alongside ship moored at Terminal without the permission of the Terminal Operator. It will be the responsibility of the ship's Master to ensure that this regulation is obeyed.

LOADING: *Products Handled:* Natural gas, propane, isobutane, normal butane and pentane.

Loading rates:

Propane	12,000 gallons p.m.
Butane	6,000 gallons p.m.
Gas/Pentane	4,150 gallons p.m.

Only one commodity handled at one time.

After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions with respect to the cargo.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo, cargo lines are displaced at controlled rates prior to disconnecting.

Shortly after completion of loading, company personnel and an independent inspector, together with a vessel's officer, will take ship's ullages and later, deliver cargo and sailing papers to the Master of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage in Pozuelos Bay.

For information regarding completion of loading, the dock supervisor can be contacted by telephone from telephone booth at berth.

BALLAST: There are no facilities for deballasting.

MEDICAL: All requests for medical or dental treatment must be accompanied by a written request from the Master to the vessel's Agent.

FRESH WATER: Not available locally.

Fresh chlorinated water is available in limited quantities at an average rate of approximately 2 tons per hour at the Puerto La Cruz Terminal.

FUEL: Bunkers are not available at this Terminal.

Bunker "C" and Heavy Diesel Fuel and a complete range of intermediate fuels are available in reasonable quantities at Puerto La Cruz Terminal, subject to safety and operational restrictions. Delivery rates to the ships are approximately as follows:

Bunker "C"	200 t.p.h.
Heavy Diesel	150 t.p.h.
Intermediate Fuels	100 t.p.h.

Meters are installed in all bunker systems and are calibrated in net barrels; except diesel meters which indicate gross barrels.

The dock valves on the bunker lines on the docks of Puerto La Cruz Terminal will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

SURVEYORS: 1. Saybolt, Caleb Brett, Chas Martin, AIVEPET cargo inspectors available at Puerto La Cruz.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I available at Puerto La Cruz or from Caracas via the ship's agent.

CUSTOMS: Crew members should be warned against taking knives or other lethal weapons ashore, as this is strictly prohibited. All firearms and ammunition must be noted on Stores List. They cannot exceed 1 per officer and 18 cartridges per gun. No arms may be carried while ship is in Venezuelan waters or tied up at dock. Contraband of any description will be confiscated. Each man is allowed 1 package of cigarettes on his person and this package must be opened. No liquor is to be taken ashore. It is prohibited to carry liquor from shore to ship without authorisation from Master of vessel. It is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. However, upon written request to the National Guard contingent on the oil dock, special permission may be obtained. This is subject to 2 limitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Netherlands
Norway
Spain
Sweden

Vessel's Agent should be appraised of vessel's consular requirements promptly upon docking.

REPATRIATION: Seamen discharged from hospital for transfer to another port, seamen arriving from another port or those being repatriated are handled by the vessel's Agent, who must comply with all Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation. Venezuelan regulations, at all times hold the vessel responsible for a seaman during his stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

TIME: GMT minus 4 hours all year round.

EMERGENCY CO-ORDINATION CENTRE: Seccion de Seguridad, Busqueda y Salvamento Maritimo. Telex: 31154. Tel: (02) 513395, 512156.

TELEPHONES: There is a telephone booth on dock. The supervisor on duty may be contacted at any time.

IDENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs Authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent.

Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

REGULATIONS: *Excessive Smoke:* It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's dock. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. The loading operation will be immediately shut down.
2. Vessel will be subject to fine.
3. Vessel may be removed from dock.
4. Ship's Agent will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution: Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany, Netherlands, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL: *Dockmaster's Office:* Loading and marine personnel offices of Corpoven S.A. are located at the entrance of the dock. Any matter concerning loading and/or bunkering, is handled through this office, which is open 24 hours every day.

The Documentation Section is located at the Puerto La Cruz Terminal.

On the dock there is a telephone booth and the supervisor on duty can be contacted at any time.

Cash: The local currency is the "Bolivar". Foreign exchange may be secured from local banks. Local banks are open Monday to Friday 0830 – 1130 hrs. from 1400 – 1630 hrs. except holidays.

Ship's Requirements: All ship requirements such as chandlery supplies, mail, cash advances, medical attention, dental care, consular services, repair work, laundry service, bonded stores, transportation, etc., should be obtained through the vessel's Agent.

No charts or sailing books are available in the Terminal. These should be forwarded by airmail to the vessel's Agent for delivery to the ship.

Movement of Passengers: Inasmuch as the Company's Terminal is not a public port, only bona fide crew members and Corpoven employees are permitted to join or leave ship in Jose.

AGENCY: All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

Corpoven as operator of the Terminal charges a fixed fee for General Services such as:

Complete documentation service.
Preparation of disbursement accounts for the Agent of Vessel.
Dispatch of vessel.
Control over marine units which service vessel.
Assistance and supervision in docking of vessel. Supervision over connecting of loading system and related cargo facilities.

Offices of Corpoven loading and marine personnel are located on the first floor of the building between Berths No. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours of every day. On the ground floor of this same building is the Documentation Section.

OPERATOR: Corpoven S.A. *FAX:* (081) 603099.

LA GUAIRA: 10.36 N. 66.56 W. (See Plan)

PORT LIMITS: Between the points 10° 37′ 40″ N., 66° 48′ 30″ W. and 10° 37′ 40″ N., 67° 07′ 07″ W. and the coast line.

DOCUMENTS:

Sealed envelopes for Customs.
Visaed B/L and Sobordos not in envelopes.
Despatch from last Venezuelan port, if any, or
Zarpe from last foreign port, if arriving directly from abroad.
Fumigation Certificate.
Bill of Health.
Vaccination Certificates of Crew.
4 Stores Lists (with arms and narcotics).
4 Lists of Personal Effects.
6 Crew Lists.
12 Lists of Passengers for La Guaira, or negative Passenger List.
8 Lists of Passengers in Transit.
2 Lists of Luggage (only for passenger luggage).
1 Master's Declaration.
1 List of Stowaways, if any.
8 Cargo Lists.

PILOTAGE: Compulsory and vessels have to wait for Pilot in the pilotage zone N.W. of the entrance. Ships can make contact with the pilot station by VHF Channel 16 or 12.

ANCHORAGES: Generally ships must anchor in the N.E. area of the entrance, the depth varies from 8 to 20 fathoms. The bottom is sand and occasionally rocks.

RESTRICTIONS: There are no restrictions imposed upon entry.

MAX. SIZE:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
01-E	176	10.95	Roll-on/Roll-off
01-D	176	10.95	General Cargo
01-C	176	9.55	12 ton electrical cranes
01-B	176	8.55	12 ton electrical cranes
01-A	176	8.80	12 ton electrical cranes
01	155	9.15	12 ton electrical cranes
02	155	9.75	12 ton electrical cranes
03	160	9.45	Grain Berth
04	136	5.50	General Cargo
05	161	8.50	General Cargo

19-A	72	4.55	Passenger Berth
20	150	3.00	Fishing Berth
21	290	6.10	Warship Berth

HEALTH: Ships from Venezuelan ports obtain Free Pratique. Ships from abroad must send a cable to Health Authorities requesting Free Pratique, or advising illness.

RADIO: In order to enable Agents arrange for quick entry and berthing, Masters should give their ETA message at following intervals, via Curacao Radio (ITT): 72, 48 and 24 hours prior to arrival, indicating in the 48-hour message, the quantity of parcels (or tonnage if bulk cargo) per hatch. This is imperative for applying for the necessary personnel of the Instituto Nacional des Puertos (I.N.P.). Also, draft, passengers, requirements for bunkers, fresh water, provisions, repairs, medical assistance, etc. This telegram the Master to sign with his full name.

VHF: Communication with the Port Authorities and the pilot station are possible by VHF. Ship must make contact on Channel 16 and change after to some Channel between 1 and 70, Channel 12 is normally used for this manoeuvre.

TUGS: The use of tugboats within the port is compulsory, both for entering and leaving port, as well as for manoeuvres in the port area. Ships longer than 139 m. must be assisted by 2 tugboats.

Ship's lines are used in the manoeuvre. The Port of La Guaira has 2 tugboats of 1,800 h.p. each. Normally they join the vessel at the entrance of the port.

BERTHING: Normally a minimum of 24 ocean-going vessels can berth at one time. Berths No. 01-E, 01-D, 01-C, 01-B, 01-A, 01, 02 and 03 are along the Breakwater Pier East-West, parallel to the coast. At Piers No. 01-C, 01-B, 01-A, there are 12 electrical cranes of 12 tons. At Pier No. 03 ships discharge grain directly to a silo by 2 grain towers, average daily rate 2,000 tons. Silo capacity 12,000 tons.

Within the port is a finger pier, parallel to the Breakwater Pier, with 2 Customs warehouses alongside, with berths North and South, 2 each. The main pier is parallel to the coastline, East-West, with Berths No. 10, 11, 12, 13, 14 and 15,, along which piers there is ample Customs warehouse space, including outdoor space on the roofs as well as ample uncovered storage area. There are 15 × 6 ton electrical cranes at this pier.

The Passenger Terminal is on a finger pier, in direction North-East with its land end in the corner of Berth No. 15. There are 2 berths each side, namely Nos. 16 and 17 in the inner basin and Nos. 18 and 19 in the outer basin.

Passenger vessels have priority for berthing and they have to leave port within 24 hours.

BULK CARGO FACILITIES: Bulk carriers only discharge, at Piers 01-D, 01-C and 03. There are no facilities for cargo.

SPECIALISED CARGO HANDLING FACILITIES: The only berth specially equipped for Roll-on/Roll-off traffic is Pier 01-E but Pier Nos. 04, 09 and 16 are also used for this kind of cargo.

There is no fixed equipment for handling containers but the Instituto Nacional des Puertos has some mechanical equipment for handling containers.

This port does not have any other facilities for specialised cargo handling.

BRIDGES: There are no bridges.

STEVEDORES: Supplied exclusively by Instituto Nacional des Puertos at costs per weight of cargo in accordance with governmental decrees.

The Port Agent applies for the necessary number of gangs per ship. Each gang consists of 11 stevedoremen (estiba) and 11 longshoremen (caleta).

Switching of gangs from one hatch to another is not permitted.

There are no longshoremen costs for cargo handled during straight time, but only for that handled during overtime.

(a) *Straight time*

Monday – Friday	0700 – 1100 hrs.
	1230 – 1630 hrs.
Saturday	0700 – 1200 hrs.

(b) *Overtime*

Monday – Friday	1800 – 2300 hrs.

(c) *Saturday afternoon* work is not permitted, but if a vessel could terminate operation and sail within a maximum of 3 additional working hours, a special permit would be granted by Customs and Port Authorities. In such a case, the additional working hours are considered as overtime.

(d) *Work on Sunday* is not permitted except for passenger vessels (officially those carrying 69 passengers, but exceptionally vessels with fewer passengers might occasionally obtain same consideration by authorities).

EQUIPMENT:

(a) *Electric Shore Cranes:* Berths 01-C to 01-A have 12 electrical cranes on rails of 12 tons capacity each. Berths 10 to 15 have 15 on rails of 6 tons capacity each. The Instituto Nacional des Puertos allow 2 × 12 tons cranes to lift pieces up to 20 tons or 9 tons weight. At Pier 10 the arms of the cranes reach the roofing of the warehouses.

Use of shore cranes is not compulsory, unless the Technical Board of the Instituto Nacional des Puertos rules to use them. Other piers have no shore cranes.

(b) *Diesel-Driven Rolling Cranes:* There are a considerable number of these cranes which can lift heavy pieces of about 17 tons.

(c) *Floating Cranes:* Not available.

(d) Special lumber carriers of about 20 tons capacity.

(e) Tow trucks, fork-lifts, trucks and trailers up to 10 tons capacity.

LOADING/DISCHARGING: Cargo is discharged on the pier, when free it is taken away by fork-lifts and/or other mechanical equipment supplied by Instituto Nacional des Puertos. The use of such equipment is included in the handling fee for weight.

There are 2 grain towers on Berth No. 3 leading via conveyor belts to storage silos of 12,000 tons capacity. Average daily discharge rate 2,000 tons approximately.

At Berths No. 10 to 15 discharge to the roof of the warehouse or on the pier is possible.

MEDICAL: There are several hospitals in the town and all the medical attention necessary. Should medical assistance be needed on board contact the Agent.

DENSITY: The average density of water in the port is 1025.

FRESH WATER: Available through pipe-line on the pier, day or night by water trucks of up to 10 tons capacity in day time only.

CONSULS: The following countries have consuls in La Guaira; Belgium, Germany, Mexico, Norway, Panama and Sweden. The following countries have Vice-consulates; Denmark, Italy, Portugal and Spain.

REPAIRS: All kinds of deck and engine repairs are possible.

DRY DOCKS: There are no dry docks in this port. (The nearest is a Puerto Cabello).

SURVEYORS: All Classification Societies and P&I Clubs are represented in the port.

GANGWAY/DECK WATCHMEN: The watchmen service is not necessary. It is recommended to use a seaman as watchman.

OPENING/CLOSING HATCHES: Not performed by the Instituto Nacional de Puertos but by either the ship's crew, or the assistance labour of the Agent.

REPATRIATION: There are all kinds of facilities for making crew changes and arranging any necessary repatriation.

AIRPORT: The distance to the International Airport at Maiquetia is 10 km., this is served by different regular airlines.

TIME: GMT minus 4 hours. No change.

HOLIDAYS: January 1st, (New Year); February 18th/19th, (Carnival); April 3rd/4th (Easter); April 19th, (Independence Day); May 1st, (Labour Day); June 24th, (Carabobo Battle); July 5th, (Independence Day Declaration); July 24th, (Simon Bolivar's Birthday); September 4th, (Public Funcionary Day); October 12th, (America Discovery); December 25th, (Christmas).

POLICE/AMBULANCE/FIRE: *Police:* 26148, 26347 and 27098. *Ambulance:* 22165. *Fire:* 22165 and 22587.

TELEPHONES: It is not possible to place telephones on board, however calls can be made in the "CANTV" office.

SERVICES: There are no special services available. Radar repairs possible.

SHORE LEAVE: Crew members can go ashore with shore passes issued by the Port Authorities.

IDENTIFICATION: Shore passes are sufficient to go ashore.

REGULATIONS: *Dangerous Goods:*

1. Dangerous goods should be discharged directly to trucks.
2. When goods are grain or powder in bags, these should not exceed 50 kg.
3. Cargo with damaged packing will not be discharged and it should be repacked on board.
4. Cargo should be duly identified and with their dangerous goods labels.
5. Cleaning of the piers after loading or unloading should be done by the importer or exporter, otherwise they should cover the expenses if the INP has to do this cleaning.

OFFICIALS: Once the vessel is anchored at La Guaira, Representatives of Customs, Port Captain, National Guard, Health Service, Immigration and Agency board the vessel.

DEVELOPMENTS: Increase in draft to 35 ft. expected.

AUTHORITY: Harbour Master, Capitania de Puerto, Terminal de Pasajeros de La Guaira.

GENERAL: The following "Depth Bulletin", dated June 1978, was received from a Shipmaster in February 1979.

REPUBLIC OF VENEZUELA
NATIONAL INSTITUTE OF CANALIZATIONS
ZULIA ZONE

Depth Bulletin No. BP – 6-78 Dated: 13-06-78

The following data represents the latest information reported and refer to the date shown for each section of the channel. Depths are expressed in metres and are related to the same level of the local Navigation Charts 1001, 1002, 1003 and 1004 of the M.M.M. Mean Monthly Lowest Low Water.

The controlling depths refer to the centre area of the channel demarked by parallel lines on either side at a distance of 60 m. in the outer channel and 45 m. in the rest of the channel. The Puerto Miranda Channel is of 30 m. The theoretical position of the buoys in the aforementioned navigation charts are located at a distance of 30 m. from the edge of the channel.

Main Channel

Channel	*From*	*To*	*Date*	*Depth* (m.)	*Remarks*
Outer Section	B – 1	B – 28	19-05-78	12.8	
Inner Section	B – 28	T – 56	10-05-78	12.8	
SOUTH PROLONGATION	T – 56	B – 59	28-04-78	12.8	Entrance to Puerto Miranda (B – 59)
	B – 59	B – 66	26-04-78	12.8	Entrance to La Estacada (B – 66)
	B – 66	B – 76	10-03-78	12.8	Entrance to the Port of Maracaibo
	B – 76	B – 86	24-05-78	13.1	Entrance to Bajo Grande (B – 86)
	B – 86	B – 96	07-02-78	13.1	Entrance to La Ensenada
	B – 96	Parallel 10° 22′ N	14-02-78	12.8	Entrance to La Salina Channel (B – 97 and 10° 22′ N)
	Parallel 10° 22′ N	M – 1	14-02-78	13.1	Entrance to Lake Main Channel (M – 1 and M – 1)
Puerto Miranda Channel		AP – 2	11-05-78	11.6

Zulia Zone

(N.B. Certain information common to all Vessels entering Maracaibo Lake is given below. For specific details of ports/terminals within the Lake, see relative Section as indicated above).

FLAG: Local authorities require that the Venezuelan ensign be flown at vessel's masthead, from the time of entering the outer channel until clear of the outer channel outbound.

DOCUMENTS: *(a) Inward Clearance for Scheduled Vessels:* Vessels arriving in ballast or with cargo in transit require following documents:

1 copy Sailing Permit from Last Port.
2 copies Ballast Certificate.
4 copies Passenger Lists.
4 copies Baggage Lists.
4 copies List of Passengers in Transit.
4 copies List of Slop Chest.
4 copies List of Personal Effects.
4 copies Stores Lists.
5 copies Crew Lists.

Vessels arriving with cargo should have, in addition to the foregoing:

4 copies Sobordos (Venezuelan Inward Manifests).
6 copies Bills of Lading.
2 copies Inward Manifests.

(b) Inward Clearance for Diverted Vessels: Vessels diverted to Maracaibo Lake Ports to load cargo, should submit all documents indicated above, except consular mail, which they will not have.

Vessels diverted at sea to Maracaibo Lake Ports which do not have a Venezuelan clearance on board, must advise loading port via radio to arrival, the name of vessel, Master's name, vessel's flag, Venezuelan net tonnage (if available, if not, the registered net tonnage), last port of call, destination port for which originally cleared, ETA San Carlos Pilot station and grade and quantity of cargo to be lifted. This information is required in order that Inward Clearance may be arranged with government officials in ample time prior to vessel's arrival. Also 3 copies of the Diversion Telegram received by vessel and signed by Master, together with copies of those documents listed under *(a)* should be presented to the Port Authorities upon arrival at Maracaibo. In the absence of this information, or of presentation of each of these documents to the Port Authorities the vessel will be subject to a fine. Please note, that the documents covered under *(a)* have to be presented upon arrival, regardless, if the vessel is not arriving with Consular Clearance or arriving after being diverted at sea.

(c) In Maracaibo 2 Clearances from Custom's authorities are needed: One for proceeding from Maracaibo to loading berth, and another after loading for proceeding from Maracaibo to destination. For this reason Custom Dispatch charges may be incurred twice.

(d) American Crew List. All non-American vessels loading for a U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service Form No. I. – 418 (Crew List Manifest) and should contain 2 sections:

Section 1 should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 should list, in the alphabetical order of their last names, those alien crew men who lack United States visa documentation and therefore require inclusion in the visa of the Crew List.

Only one name may be placed on each line of the Crew List. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the Crew List presented must be legible. Occasionally the names of the crew men included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition.

The information requested under columns 1, 2 and 3 should be filled in completely. Column 1 should always contain the complete first name and middle initial of the crew man. Column 2 should show the nationality of each crew member and the number of his travel Document. Column 3 should always include the name of the port where the crew man was shipped, not simply the country.

At the time of vessel's first application for a Crew List, the Crew List must be presented in four copies: Original and 1 copy should contain only information requested under Columns 1, 2 and 3. 2 copies must include following information of those crew men to be included on Crew List Visa. Column 4 should list date, city and country of each crew man's birth. Column 5 should show place of issuance of Seaman's Travel Document and name of Government which issued travel document. (It is not necessary to list date of issuance of travel document).

Below is a sample line correctly entered on the Master Crew List.

(1)	(2)	(3)	(4)	(5)
Bello, Tomas E.	Z.23455 Venezuelan	Maracaibo Venezuela	December 8, 33 Caracas, Venez.	Cabimas, Venez

Upon subsequent Crew List applications by same vessel within same year, the Crew List need be presented in duplicate only, and the information in Columns 4 and 5 need be provided only concerning any new crew members who require visa documentation. When twelve months have elapsed since presentation of Original Crew List, a Crew List should again be prepared in 4 copies and should contain all the information required in columns 1 – 5. Such a Master Crew List is required after each 12 months' period.

APPROACHES: Also see "General" above. The channels leading to the Lake of Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel. The controlling depths of the Outer Channel, Inner Channel and the channel Southward to Buoys M1 and M2 are normally 45 ft. At certain times the controlling depth may be less. At such times suitable notices are published advising mariners of these temporary reductions of controlling depth.

Outer Channel. The Outer Channel starts at the E.M. Buoy in position 11° 13′ 47″ North and 71° 33′ 31″ West. The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles. The distance from E.M. Buoy to the Southern end of the Outer Channel, marked by Buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and has a normal controlling depth of 42 ft. minimum monthly observed lowest water (MMOLW) with tidal range varying about 2 ft. 3 in. This depth is maintained by periodical dredging. Tankers are required to have a keel clearance of at least 2 ft. and dry-cargo vessels a keel clearance of at least 3 ft. Vessels navigating the channel at the maximum allowable draft are confined from 2 hours before to 2 hours after high water. There are no turns in the channel and the course is 189°.

There is a breakwater 0.5 mile East of, and parallel to, the Outer Channel and extending 1.6 miles Northward from the North side of Zapara Island. The end of this breakwater is marked with a skeleton steel tower with a light 27 ft. above sea-level. Light characteristics – flashing white light every 8 seconds; visibility about 3 miles.

On Zapara Island there is a skeleton iron tower with a height of 136 ft. above sea-level.

Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at low water when the cross currents are strong. Overtaking at these points should be avoided.

There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge.

Inner Channel. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. Entire length of the Inner Channel is about 12 miles.

The beginning of the Inner Dredged Channel is marked by Buoys B – 29 and B – 30. Channel is marked by beacons, and terminates at beacons T – 55 and T – 56. The channel is 800 ft. wide and the normal controlling depth is 43 ft. MMOLW with tidal range varying from 1.5 ft. to 2.5 ft.

The channel from beacons T – 56 to Maracaibo Harbour is a dredged channel, the end of which is marked by Buoys No. B – 73 and B – 74.

About 0.2 mile South of Buoys B – 29 and B – 30, there are located 2 towers – 1 on each side of the channel, and about 1 mile further South are 2 more towers. These 4 towers are marked E – 31 and E – 32 (North) and E – 33 and E – 34 (South). Towers No. E – 31 and E – 32 are of single steel pipe construction on a concrete pile base. Towers No. E – 33 and E – 34 are of skeleton steel construction (former oil-well derricks) each mounted on 4 concrete piles. The characteristics of these towers are:

Tower No.	*Height above LWS (ft.)*	*Light*
E – 31	43	Green – Fl.
E – 32	43	Red – Fl.
E – 33	123	Green – Fl.
E – 34	128	Red – Fl.

Vessels are not allowed to overtake each other in the Inner Channel between Buoys B – 29 and B – 30 and Light Beacons T – 25 and T – 26. Vessels may overtake each other in the Inner Channel between Light Beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight.

Lake Channel. The channel starting at Light Beacons T – 39 and T – 40 and leading to Maracaibo Roads is called the Lake Channel. This is a natural channel 3,000 ft. wide and 11 miles long.

The Main Channel through Maracaibo Lake is approximately 83 miles long, not less than 244 m. wide and with a greater depth than the outer channels.

The access channels to the various ports and terminals branch off from the main channel as described under Section for each port.

CHANNEL NAVIGATION:

(a) Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

(b) Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

(c) Vessels should pass as close as possible to the channel's ed on starboard side. Loaded vessels have preference.

(d) Approaching vessels are to reduce speed in order to minimise th suction force of the displacing waters.

(e) Vessels must maintain a distance of 5 ship's lengths by day an 8 ship's lengths by night from other vessels navigating in the sam direction.

(f) No vessel should start to manoeuvre to overtake another vess before having received clearly the affirmative signal from the ship to b passed.

(g) A grounded vessel is not allowed to start any manoeuvre whe another vessel is passing.

(h) Dredgers are frequently at work in the channels and caution shou be exercised in passing them. Signals used by the dredgers are a follows:

Daytime

Black cylinder hoisted on side of yardarm: You can overtake me o the side on which the cylinder is shown.

Two black balls over the bridge: The channel is blocked.

Night

Green light on side of yardarm (a white light on mast-head helps t show on which side the green light is placed): You can overtak me on the side on which the green light is shown.

2 red lights over the bridge: The channel is blocked.

The tidal range is 4 ft. at neaps.

(i) Maximum speed for vessels navigating in lake channels has bee limited to 10 knots. Masters should exercise the utmost care in complyin with this regulation as heavy fines may be imposed to offending vessels.

PILOTAGE: (N.B. Maracaibo Pilotage Regulations require that inbound tankers, in ballast, while crossing the Bar, shall not have greater tha 8 ft. difference between fore and aft draft. The Government Pilot will no take the vessel if this requirement is not met, unless he is satisfied tha the actual draft of the vessel will permit safe navigation through th Outer and Inner Channels).

Every Master of a vessel navigating in Lake Maracaibo who desires to enter the main ship channel in Pilotage Zones No. 1 or No. 2 mus first ensure that said Channel is free of traffic.

The limits of the Main Ship Channel in Pilotage Zone No. 1 are from Buoys B1/B2 located at the entrance to the Outer Bar Channel and Buoys B73/B74, of the city of Maracaibo. Pilotage Zone No. 2 begins approximately 1 mile below Maracaibo and extends Southward t Lightfloats M36/M37. All other channels are considered as access channels to their respective port zones and subject to special local rules Every vessel navigating to or from any port in Lake Maracaibo mus follow the prescribed routes through the main and access channels leading to or from such ports, (unless special permission has bee granted to do otherwise).

(a) Pilots are employees of the Venezuelan Government and act i an advisory capacity; the Master retains responsibility for the ship at al times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master mus prepare a full written report of the circumstances, for delivery to the Captain of the port.

(b) Inbound vessels have the option at present to embark governmen Pilot at the following areas:

- *(i)* In the channel off San Carlos Pilot Station between Buoys B – 24 and B – 26.
- *(ii)* Anchorage area approximately 5.5 miles N.E. of Pilot station, Sa Carlos Island. Position 11° 04′ 22″ N., 71° 33′ 48″ W. East o Buoy B – 17. This area is demarcated with green light buo equipment with radar reflector.
- *(iii)* At the E.M. Buoy.
- *(iv)* At Punta Cardon. See "Note", "Agent's Notice" an "Shipmasters' Reports" – August 1979, July 1981, August 198 and June 1991.

(c) The Port Captaincy of Maracaibo is unable to guarantee embarking or disembarking Pilots at the E.M. Buoy or at anchorage area position For this reason Masters should communicate with San Carlos Pil Station for necessary instructions as to where to pick up Pilot, wh usually embarks between Buoys B – 24 and B – 26. The communicatio system between San Carlos Pilot Station and vessels will be by Morse lamp and radio-telephone. The stand-by frequency at San Carlos i 2182 kHz. Other existing frequencies are 2120 kHz and 2080 kHz; 156. and 156.8 MHz. Each pilot launch has a radio-telephone with 2182 kHz frequency. The launch that leaves San Carlos Pilot Station with Pilot fo ship, takes approximately 20 to 30 minutes to cover distance, an distance between buoys and San Carlos is approximately 6 miles o 10 km.

(d) Pilot Permit to navigate the Outer Channel without aid of Government Pilot will be granted to those Masters who desire to obta same. In order to fill the application required, a blank sealed paper an 3 copies should be signed by Master on arrival. Copy of this solicitud duly endorsed by Port Captain of Maracaibo, will serve the Master a temporary permit until the official one has been received. Masters i possession of permits to cross the Outer Channel without a Pilot, ha the option to enter channel either at the E.M. Buoy or between any othe buoy, taking into consideration the heavy traffic of the channe Government pilotage through the Inner Channel is compulsory at a times.

(e) Outbound vessels will receive Pilot in Maracaibo, who will Pil vessel up to San Carlos area approximately between Towers E – 3 and E – 33, where he will disembark. The Port Captain of Maracai has instructed that all Masters should always in ample time iden themselves with the San Carlos Pilot Station by radio-telepho regardless of time of day. While inbound – between Buoys B – 17 an B – 19 and sailing outbound – between Markers T – 42 and T – 4 These instructions are obligatory and are required in order for the Pi service to be aware, at any moment, of any emergencies which ma arise, and also to avoid, especially during the night, the launch depar with an official Pilot aboard believing that the ship in sight needs t

services, in which case, even though the launch or Pilot services are not rendered, the same will be charged to the company owning the ship, or its representative.

Note: A Master approaching the port for the first time must pick up a Pilot in Punta Cardon before entering Maracaibo Lake Channel. In the case of contravention the vessel will be intercepted by San Carlos Pilot Station and returned to Punta Cardon with a resulting loss of at least 1 day and the Master may also run the risk of a possible fine.

Furthermore, the Master should cable ETA via Curacao Radio 72, 48 and 24 hours before arrival in order to allow sufficient time for Agents at Maracaibo to send a Pilot to Punta Cardon.

Agent's Notice: September 1987.

Subject: Pilot Service from/to Punta Cardon.

Harbour Master's Office has issued new regulations mentioned below.

1. Pilot service from Punta Cardon is only compulsory when Masters are crossing the channel of Lake Maracaibo for the first time. If this is not the case, the pilot should be then embarked at San Carlos.
2. Upon your request this pilot service can be arranged by the agency.
3. On departure, pilot service to Punta Cardon is not required.
4. If official pilot is unable to disembark at San Carlos due to difficulties on board or by Force Majeure, or if you decide to change the instructions given to the agency with regard to Pilot to disembark in San Carlos, a letter addressed to the Harbour Master stating your reasons should be handed to the Pilot before he disembarks in Cardon.

TONNAGE: Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e.:

(a) On Registered Net Tonnage. Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement. As of this date, such countries are:

Denmark
France
Germany
Great Britain
Ireland
Netherlands
Norway
Portugal
Sweden
U.S.A.

(b) On Venezuelan Nett Tonnage. Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

(c) In practice, the procedure for stating the tonnage of all ships entering the Lake of Maracaibo is as follows: The inward Pilot boarding the ship presents Master a form on which among others the Master should fill in the tonnage of ship. Pilotage charges are based on this tonnage given by the Master. Master's attention is drawn to the fact that the Venezuelan nett tonnage is usually higher than the International nett tonnage. Care should be taken if an old Venezuelan Nett Tonnage Certificate is on board, because the country in which the ship is registered might later have signed the reciprocal tonnage agreement with Venezuela. If the pilotage charges are made on basis of a higher tonnage than the one that should be applied, it is later very difficult, if not impossible, to get a refund.

CUSTOMS: *(a) Customs Watch.* While vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with customs regulations. The Law requires meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in officers' messroom, to avoid difficulties.

(b) Firearms and Ammunition. Firearms must not exceed one per officer nor may the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be carefully declared on Stores List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

(c) Contraband. Strict compliance with the Customs law of the country is enforced by the authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to very strict enforcement of the Customs regulations, it is recommended that no goods be carried which are not shown on Stores List. Any new articles (clothes, shoes, etc.) should be included in Stores List and marked as personal belongings. If during a check-up by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS: The following nations maintain consular representative in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Netherlands
Nicaragua
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
United States of America

TIME: Local time is GMT minus 4 hours.

VISITORS: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

POLLUTION: The Laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require a written report to be submitted by the ship involved in the event of an oil spill.

PASSENGERS: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

SEAMAN LEFT BEHIND: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

SHIPMASTER'S REPORT: August 1979.

MARACAIBO/EL TABLAZO AND APPROACHES

Approaches: If making for the "EM" Buoy direct, positions can be a bit vague due to the low lying coast.

A distance off the coast can be obtained before the "EM" Buoy but no real firm position.

Often there is a strong N.E. wind.

Pilot: In the 'Pilot Book', etc., mention is made of picking up the Pilot at Punta Cardon.

From the Pilots and Agent I have a clearer idea of the official viewpoint and requirements.

There is NO compulsion to take a Pilot before San Carlos.

If you are unsure of the area and the visibility is poor from all sources and in my personal viewpoint it is advisable to take a Pilot at Punta Cardon, giving ETA 12 hours in advance.

If vessel is to pick Pilot up at San Carlos send cable 24 hours beforehand through Curacao "PJC" to 'Piloto San Carlos' requesting permission to use Canal Exterior, ETA at "EM" Buoy and at San Carlos. Reconfirm 12 hours before "EM" Buoy and by VHF an hour before arrival on Channel 12.

The difficulty lies in language, although there is meant to be a traffic control system in Canal Exterior it is only in Spanish and the Co-ordinator speaks little English. Little information is required or given if you only speak English.

The Punta Cardon Pilot costs about U.S.$150 extra plus transport charges and entails extra distance of 70 miles from the West and 15 miles from the East.

The San Carlos Pilot boards from a fast launch at "B28" Buoy and usually leaves just before the buoy. He will use hoist, in spite of official regulations which require gangway ladder arrangement, and leaves on port side outward (boards on starboard side inward). This is nearly always the case with situation of pilot station and wind, but may change.

Communications: Venezuelan station La Guaria (YVG – ALRS 6225). Most vessels use Curacao "PJC", very good. Agents reply through "PJC". Telex very good.

VHF: Call 'Piloto San Carlos' on Channel 16 (working Channel 12). Agent at Maracaibo on Channel 16 (works Channel 14, only during office hours). Agent at La Salina on Channel 16 (works Channel 14, 24 hour service but very distorted at El Tablazo).

Canal Exterior: Leads from "EM" Buoy to San Carlos pilot station. A speed of 10 to 12 knots essential to keep vessel in channel on account of strong N.E. winds and currents across channel. Takes about 1 hour 10 minutes from "EM" Buoy to San Carlos.

The least advertised depth at LW is 12.8 m. but shoals quickly at sides of channel. We found 11.0 m. LW to West side of channel at "B18" Buoy.

Buoys "B14", "16" and "18" had shifted about 200 m. to West (August 1979). On the outer section of channel between "B4" to "B8" Buoys a Westerly set right across channel very apparent and near Malecon Breakwater. At "B22" Buoy an Easterly set experienced. Wind N.E. 4 – 5 tide 1 hour before and 1 hour after HW Malecon both cases.

The "E 34" pylon light off Pta. Diablo is very conspicuous. A new dredger 'Wado' works this section with North end Canal Interior. A large suction dredger, pulls to side of channel to let vessel pass. Only Spanish and German spoken. The old 'Zulia' dredger has stopped working. Another dredger is being completed for the Government.

Canal Interior: About 1.5 hours pilotage to Puerto Miranda, speed above manoeuvring. This channel is generally deeper than Canal Exterior. The advertised depth of 12.8 m. seems reliable. Pilot told me they hope to get both channel Interior and Exterior deepened to 15 m. LW in the near future.

Pile Light Beacons "T46" and "T40" have been replaced by buoys.

Pratique: Given on berth.

Notice of Readiness: Can be tendered on arrival at berth. It is finally brought down with Bill of Lading on completion. This is normal practice. As we were cooling down it was received at completion of cooldown. Normally on berthing with lines connected.

EL TABLAZO:

Pilot: A Docking Pilot boards just before berthing and unberthing of vessel.

Tugs: 2 tugs of 1,800 h.p. Secure in "American" style using their lines.

Situation: For all intents and purposes part of Puerto Miranda but operated by different company.

Located just S.E. of Puerto Miranda berths. El Tablazo consists of 3 piers. Bulk, liquid and a small soda pier.

Anchorage: At El Tablazo – off berth, just East of main Maracaibo channel. Good holding – 3 shackles.

Pier: The bulk pier handles bulk and bagged urea fertiliser through 4 shiploaders fed from a conveyor. Three on the South side and 1 on the North side. Two of the loaders on the South side handle bagged urea down corkscrew chutes.

The liquid pier is to the South of bulk pier – berth both sides and handles ammonia, butane, propane, propylene.

Two Chicksans each side. The inshore being of 10 in. both sides and seaward being of 8 in. but fed by 10 in. line. Couplings are 300 ASA but 150 ASA spool pieces generally fitted.

Vapour lines are flexible stainless braided with rubber covering – ship's derrick required, 300 ASA coupling with 150 ASA spool piece. All berths – head IN. On the South side the outer edge of the dredged channel is marked by buoys.

All berths have good rubber fenders. Liquid pier outer end has two full faced mooring dolphins connected to main pier by catwalk. The least depth at all berths at LW is 6 fathoms, except small soda berth which has 2 fathoms at LW.

Moorings: 2-3-1 each end. Ship put alongside pier before moorings out. Plenty of mooring gangs. Very particular on position to within 0.5 m. Gangway no problem.

Fresh Water: At 15 t.p.h. from pipe at manifold amidships. There is a pumped supply at 70 t.p.h. used for loading small tankers to take to outports where supply is limited.

Operations: Language problems. There is one Loading Master who speaks good English. Surveyor on arrival and departure. Very co-operative. Venting allowed up riser.

Vapour return line goes to flare at ship's expense and can only be used if 100% product.

Max. rate ammonia 500 t.p.h., but initially can get plenty of stops. S.G. given at 15°C. The control of the rate is not very fine. You can get down to 20 t.p.h. but increase very broad. Usual notice for completion.

Dock Density: 1003.

Documentation: Carried out at berth inward, sometimes vessel taken off berth outward to local anchorage and clearance given there. Sometimes in the past Inward Clearance done at Maracaibo, NOT NOW.

There is much written in publications and passed around about visaed Crew Lists and deviation cables. I have tried, in talking to the Agent and to the Authorities to clarify the situation.

Visaed Crew Lists are NOT required now. But there is still a requirement that because the ship has no visaed Crew List she must have deviated on passage.

Basically what is required is that the ship should be cleared on sailing for Venezuela to say, Trinidad, for orders or Curacao not Maracaibo, then on passage receive a message deviating her to Maracaibo. If she does not have Deviation Message a fine could be imposed but the Agent says all ships have required cable so do not know of fine being imposed.

Required:

7 Crew Lists.
3 Stores Lists. Victualling only, can include bond.
3 Slop Lists. Could probably combine with above.
2 Ballast Lists. To give amount and cleanliness.
1 Vaccination List.
3 Crew Manifests.
1 Health Declaration.

I cabled in a Pratique message as a matter of practice.

Shore Passes: Given by Agent for each crew member, no photos needed. Not required to be handed back on departure. Valid 3 days. After completion there seems to be a normal documentation delay to obtain clearance of up to 12 hours.

Shore Leave: The Agent will lay on a launch, but not really necessary as at El Tablazo liquid berth vessel is near the boat pier and fast launches run frequently to Maracaibo (takes 15 minutes). Arrange through Loading Master.

Can change sterling or dollars in local hotels, rate 4.3 Bolivars to the U.S. dollar.

Films: Change Walport films at Puerto Miranda. Agent will send launch. Crew member has to go with films to change.

Agent: Only Agent on departure – no officials. Bill of Lading given by Terminal before Agent arrives.

SHIPMASTER'S REPORT: July, 1981.

Experienced following when entered Maracaibo Lake, mid-July, 1981.

Arrived EM Buoy and obtained permission from San Carlos Pilot Station via VHF to enter outer channel and pick up Pilot at Buoy No. 26. During the piloting the Pilot asked asked me whether I had previously entered outer channel, which I confirmed with the remark *many years ago.*

After berthed my Agent informed me that a new regulation required Ship Masters to pick up Pilot at Punta Cardon inward bound, unless the Master with said vessel had actually entered Maracaibo Lake *within the past 6 months,* for which he was automatically permitted to enter outer channel and pick up Pilot at Buoy No. 26.

Fines might be enforced upon Masters neglecting this new regulation.

SHIPMASTER'S REPORT: August, 1981.

If the Master of a vessel enters the channel for the first time, or even if *more than six months* since the last visit, he must embark the Pilot close to Punta Cardon. The distance between Punta Cardon and "EM" Buoy is approximately 80 miles.

If less *than six months* since the last visit, Master is authorised to pick up the Pilot when passing Buoy No. 26.

In the first case 24 hours prior notice should be given to the Pilot, and when approaching Punta Cardon vessel should call "Marina Cardon" on VHF Channel 16.

SHIPMASTER'S REPORT: June 1991.

Pilotage: At present, all foreign flag vessels bound for ports in the Maracaibo Lake have to pick up Pilot off Salina Guaranao in position Lat. 11° 40′ N., Long. 70° 15.5′ W. Call Guaranao Pilots on VHF Channel 16.

Upon departure, pilot service up to Salina Guaranao is compulsory. The above pilot service is necessary every time a vessel is bound for Maracaibo Lake, and not just for the first visit.

Section A

BAJO GRANDE: 10.29 N. 71.38 W. (See Plan

(1) OPERATOR: Maraven, S.A. Oil Terminal.

(2) OPERATOR: Maraven, S.A. Natural gas liquids processing facilities.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

(1) **OPERATORS:** Maraven, S.A.

LOCATION:

Maracaibo: On the North-Western shore of the Lake Maracaibo Position: Lat. 10° 40′ N., Long. 71° 38′ W.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at terminals in the Lake of Maracaibo. Upon arrival at Maracaibo, a representative of the appointed Agency will go on board to assist vessel.

Bajo Grande: Loading Pier: Position: 10° 30′ 50″ N., 71° 36′ 8″ W. about 8 miles (12.8 km.) South of Maracaibo on the Western shore of the Lake and about 9,000 ft. (2,743 m.) offshore with its centre line North South. Three vessels can berth simultaneously. Two outside at Berth No. 1 and Berth No. 3, and one inside at Berth No. 2, to load different cargoes. Except for the Boscan Crude, two vessels can load at same time.

DOCUMENTS: The following documents should be presented by the Master:

Clearance from Sailing Port with the following attached:
- Stores List.
- Crew List.
- Slop Chest Inventory.
- Ballast Certificate.

Special ballast report made up by Master.

The Maracaibo Port Captaincy, requires that the Masters of all vessels entering this jurisdiction, deliver to the Maracaibo Port Captain's representative, during his visit to ships in the Port of Maracaibo, a report which must answer the following questions concerning ballast:

(1) Port or place where ballast was taken.
(2) Quantity taken.
(3) Type of ballast and condition of same.
(4) Where deballasting operation was or is to be carried out.
(5) Approximate deballasting time.
(6) Any other pertinent information that may be required.

Crew List.	6 copies
Stores List.	6 copies
Slop Chest Inventory (Deck, engine and cabin stores listed separately).	6 copies
List of Personal effects.	6 copies
Derat Exemption Certificate.	Original
Venezuelan Net Tonnage Certificate.	Original
American Crew List. (If required: See under "American Crew List").	4 or 2 carbon copies

Boarding Party: The boarding party usually consists of the following persons:

One Quarantine Official.
Two Customs Officials.
One Sanitation Department Official.
One Port Captain's Representative.
One Foreign Service Department Official.
One Vessel's Agent.

American Crew List: All non-American vessels loading for U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The Crew List should be prepared on Immigration and Naturalization Service Form No. 1–418 (Crew List Manifest) and should contain two sections:

Section 1 – Should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 – Should list, in the alphabetical order of their last names those alien crewmen who lack United States visa documentation and therefore require inclusion in the visa of the Crew List.

Only one name may be placed on each line of the Crew List. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the Crew List presented must be legible (Occasionally the names of the crewmen included on the carbon copies of some Crew Lists presented at the consulate are blurred beyond recognition).

The information requested under column 1, 2 and 3 should be filled in completely.

Column 1 – Should always contain the complete first name and middle initial of the crewman.

Column 2 – Should show the nationality of each crew member and the number of his travel document.

Column 3 – Should always include the name of the port where the crewman was shipped, not simply the country.

At the time of the vessel's first application for a Crew List, the Crew List must be presented in 4 copies:

Original and 1 copy – Should contain only the information requested under Columns 1, 2, and 3.

Two Copies – Must include the following information of those crewmen to be included on the Crew List visa.

Column 4 – Should list the date, city and country of each crew member's birth.

Column 5 – Should show the place of issuance of the Seaman's Travel Document and the name of the Government which issued the Travel Document. (It is not necessary to list the date of issuance of the travel document).

Cargo documents:

1. *Master's copy of Bill of Lading* – The Bill of Lading form used is the usual Warshipoilvoy form. Masters wishing to use another form should furnish 20 blanks on arrival in Bajo Grande. Master is requested to sign 3 negotiable Bills of Lading (Originals).
2. *One copy of the Certificate of Quantity and Quality (Q. & Q.).*
3. *One copy of the Ullage Report.*
4. *Time Sheet.*
5. *Certificate of Origin.*
6. *Cargo Manifest.*

Outward Clearance:
Following documents are delivered on board by the local Agent before sailing:

1. *Customs Clearance* – Duplicate of "Conocimiento de Embarque" and Duplicate of "Manifiesto de Carga". (Both stamped and signed by Customs) or any other document specifically requested by the consignee or nominating source.
2. *Communication* – A letter from Maracaibo Customs Authorities to Authorities in port of destination.
3. *Zarpe* – Permission to sail signed by Maracaibo Port Captain. This is brought on board in Bajo Grande by the outbound Pilot.

Customs Guard: The Customs Guard will request Master to countersign his time on board the vessel. This is counted from the time the first hose was connected until all hoses were disconnected, regardless of whether the vessel was receiving cargo or not.

Accommodation Ladder: Vessels must provide an accommodation ladder. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations. Port authorities will board only by means of an *accommodation* ladder. it is recommended to rig this in advance in order to avoid unnecessary delays.

In order to guarantee the security and safeguard the lives of the officers that board the vessel inbound in Maracaibo, it is imperative that Masters strictly comply with the following precautionary measures:

(1) Each of the components and functional parts that holds together or supports the gangway ladder must be maintained in excellent condition.
Therefore, wire ropes, guide blocks and bolts etc., found to be defective or in bad condition must be immediately replaced.

(2) For maximum security, each time that your vessel arrives in this jurisdiction, the above mentioned mechanisms should be thoroughly checked and tested by the personnel aboard vessel before the gangway ladder is used by the boarding party.

APPROACHES:
Channels leading to Lake Maracaibo: The channels leading to the Lake Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel.

Outer Channel: The Outer Channel starts at the E.M. Buoy position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. and ends at the Zapara Island, a distance of 14 miles. (About 22 km.).

The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles.

There are no turns in the channel and the course is 189°. The channel is 100 ft. wide and has a normal controlling depth of 44 ft. LWS with tidal range varying about 2 ft. 3 in. Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at LW when the cross currents are strong. Overtaking at these points is forbidden. There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

The Southern end of the Outer Channel is marked by Buoys B – 27 and B – 28.

Inner Channel: The beginning of the Inner Channel is marked by Buoys B – 29 and B – 30. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°, The entire length of the Inner Channel is about 12 miles. Beacons T – 55 and T – 56 mark its Southern end. The normal controlling depth is 44 ft. LWS. The channel is 800 ft. wide. Vessels are not allowed to overtake each other in the Inner Channel between Buoys B – 29 and B – 30 and light beacons T – 25 and T – 26.

Vessels may overtake each other in the Inner Channel between light beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight. From Beacon T – 56 to Maracaibo harbour the channel is 800 ft. wide, depth 44 ft., its end is marked by Buoys B – 73 and B – 74.

Navigation through Channels:
Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

Approaching vessels are to reduce speed in order to minimise the suction force of the displacing waters.

Vessels must maintain a distance of 1 nautical mile (1,852 m.) by day, or night from other vessels navigating in the same direction.

No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

A grounded vessel is not allowed to start any manoeuvre when another vessel is passing. Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime: Black cylinder hoisted on side of yardarm:
You may overtake me on the side on which the cylinder is shown.
Two black balls over the bridge:
The channel is blocked.

Night:
Green light on side of yardarm (A white light on mast head helps to show on which side the green light is placed).
You can overtake me on the side on which the green light is shown.
Two red lights over the bridge:
The channel is blocked.

The tidal range is 4 ft. at neaps. Observed squat in the channels is about 1 ft.

Maracaibo Lake Channel Guard Service Corps have had evidence of vessels travelling out of the navigation channel in the vicinity of Buoys B – 3, B – 5 and B – 7; this risky procedure is considered very dangerous to the safety of the channel buoys and its installations.

Masters of all ships are reminded that all vessels inbound or outbound *must* pass the EM Buoy on the port side. This operation will be registered and controlled by their electronic devices installed at San Carlos Pilot Station.

Violators of this regulation, in addition to being economically responsible for damages to the buoys and related accessories, will be prosecuted in accordance with Article 118, Section I of the Venezuelan Law of Navigation.

In view of the above, and keeping in mind the protection of the interests of your owners, we ask that you comply at all times with this regulation emanated from the Port Captaincy.

PILOTAGE: Compulsory. Vessels proceeding direct to the Bajo Grande Terminal must enter outer channel and embark Pilot between Buoys 25 and 27. After vessel arrives in vicinity of channel entrance, Master must contact *San Carlos Pilot Station* by radio telephone on Channel 16 requesting Pilot at Buoys 25 – 27. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance, between Buoys and San Carlos is approximately 6 miles (10 km.).

Master must advise Maraven, S.A. and Agent ETA Buoys 25 – 27, 72, 48 and 24 hours prior to arrival there.

Masters of Vessels entering Lake Maracaibo for the first time must cable their Local Agent notifying this fact, in order that the Agent may comply with the Port Regulations. This security measure makes it necessary for the ship to pick up a Pilot at Punta Cardon.

The Master should notify Agent or contact Maraven, Punta Cardon by radio on Channel 12. As no Pilots are available at Punta Cardon, the Local Agent for the vessel requires 48 hours' notice in advance to facilitate making arrangements to fly a Pilot to Cardon and then have Maraven place the Pilot on board the ship.

The co-ordinates of Punta Cardon are approximately Lat. 11° 36′ N., Long. 70° 15′ W. Maraven will charge approximately Bolivares 1100.00 for this service. In addition, the ship will have to pay air fare, hotel expenses, and a higher Pilotage fee for this service. However, if the Master of a ship has previously entered the channel as an officer of a ship, he is not required to pick up a Pilot at Punta Cardon.

Masters are reminded that Pilots are authorised to leave the Jurisdiction, only when they are disembarked in Venezuelan ports. With this understanding, when special circumstances arise in which the Pilot cannot be disembarked at San Carlos and the ship is unable to enter the nearest Venezuelan port to disembark the Pilot, in this case the port of "Las Piedras", it is required that the Agent as well as the Master of the vessel, forward to the Port Captaincy at the earliest opportunity a detailed report giving the reasons that compelled the Master to take the Pilot abroad.

Pilots act in an advisory capacity only, and therefore the Master of the vessel retains full responsibility at all times. In the event it becomes necessary to disregard the Pilot's instruction in order to ensure the safety of the ship, Master must forward to Local Agent a full written report on the circumstances for delivery of same to port authorities.

The Venezuelan Pilotage Law stipulates that Pilots must be provided with the same lodging as is given an officer. In case no extra officer's cabin is available, suggest the hospital be used by the Pilot. Also, Pilot should be seated at the officers' mess for his meals.

In case of accident to Pilot while performing his duty on board, it is the responsibility of the Master to furnish the Pilot with a full written report on the accident before the Pilot leaves the vessel. The Pilot must be able to present such a report in case of a legal claim.

Note: According to new Port Regulations for vessels proceeding to the Bajo Grande Terminal, the Official Pilot (Conduct Pilot) will board to conduct the vessel to Bajo Grande and disembark; vessel will then pick-up the other Official Pilot (Docking Pilot) for berthing manoeuvres.

As a result of accidents that caused the loss of lives, the Maracaibo Port Captaincy issued a Regulation with the view of safeguarding human life at sea and other navigable waters; Official Pilots that must embark on or disembark from undocked ships, must use an automatic-inflated type life vest. This procedure is also compulsory for all persons from private or public entities that are required to go aboard vessels that are anchored, stopped or navigating in the waters of Lake Maracaibo. Likewise, at the side of the boarding ladder where the Pilot boards or disembarks, a hoist or boatswain's chair shall be placed there, and within it a life line and a gas light ready to be used in case it becomes necessary. The Port Captaincy will see to it that this Regulation is strictly complied with.

Docking Pilot: The Government's Pilot will assist in docking operations. It should be borne in mind that Pilot acts as adviser only. The Master retains full responsibility at all times. Any damage incurred to vessel or loading platform which may be deemed to have been caused by the Mooring Pilot's fault or negligence, may be held against the ship.

Undocking: Government's Pilot will assist in undocking. Two tugs will be used as for docking and undocking.

Pilot Ladder: All vessels with a freeboard over 9.0 m. must supply a combination of pilot ladder and gangway (SOLAS 74, Rule 17).

ANCHORAGE: The Pilot will not manoeuvre the ship into anchorage, but will indicate the proper location to anchor. Care should be taken because of small boat traffic.

MAX. SIZE: The following restrictions in size and draft upon loading exists for vessels docking at Bajo Grande:

	Maximum Loading Draft	*Maximum Vessel Size (tonnes)*	*Max. displacement upon Berthing (tonnes)*
Outside Berth (No. 1)	39 ft. 06 in.	*55,000 d.w.t.	42,000
Inside Berth (No. 2)	32 ft. 00 in.	36,000 d.w.t.	20,000
Berth (No. 3)	39 ft. 06 in.	85,000 d.w.t.	105,000

* Vessels up to 61,000 tonnes d.w.t. will be accepted as long as they do not exceed other characteristics.

Also see "Berthing".

RADIO: *Information to be cabled to Local Agents 3 days prior to arrival:*

1. *Flag:* If the vessel has loaded in Bajo Grande before or is listed in the Tanker Register published by H. Clarkson & Company Ltd., London, the nationality of the vessel need not be cabled.

2. *Sailing port and at which other port vessel will call in this area:* For clearing the vessel in and out of Maracaibo, local ship Agents must know beforehand from where the ship comes and which other port it will call in this area. Therefore, it is of importance to inform Agents whether the vessel will load part cargo or bunker, at which terminal, and whether inbound or outbound.

3. *Port for which vessel is cleared:* In case the vessel was diverted *en route* and consequently is not cleared for Maracaibo or one of the terminals in the Lake of Maracaibo, the Local Agents must obtain from authorities special permit for the vessel to enter the Lake of Maracaibo.

4. *Ballast Certificate:* If the vessel arrives in ballast a "Ballast Certificate" is mandatory. A fine against the vessel will issued by the Port Authorities if vessel does not have this certificate.

5. *Estimated Time of Arrival:* Cable ETA San Carlos Pilot Station Buoys 25 – 27 (See "Pilotage") or, if the vessel is taking part cargo or bunkering inbound, cable ETA, bunker or first loading port. Please use local time if possible (4 hours behind GMT).

6. *Tonnage:* If the vessel has not loaded at Bajo Grande before, also cable the Gross and Net Tonnages. To determine whether the International or the Venezuelan tonnage should be mentioned, see General – "Tonnage Applicable".

7. *Master's Full Name:* Please sign your first message with Master's name and surname, which is also needed to clear the vessel in Maracaibo.

8. *Changed ETA:* An additional cable should be sent about 48 hours and 24 hours prior to arrival at pilot station Buoys 25 – 27 stating ETA.

Proper use of Radio Frequencies: We have received several circulars from the Maracaibo Port Captaincy, requesting Terminal Operators to caution all Masters of vessels calling at Bajo Grande Terminal on the improper use of the International Distress Frequency of (2182 kHz) for personal conversations. This procedure is contrary to the security of vessels.

A letter containing such caution will be delivered to the Master of each vessel loading at Bajo Grande by the Agent, requesting that the Master sign a copy signifying his acknowledgement of said letter of notice.

The International Distress Frequency was established specifically and exclusively for emergency calls such as shipwreck, fire and accidents. It is also used by ships and shore stations to make first contact (VHF Channel 16) but immediately after contact is made, the operator should switch to one of the 52 Channels available.

9. *Compulsory use of Single Side Band Radio:* A circular letter from the Venezuelan Ministry of Communications, states that no licence will be granted for the installation of radiotelephone stations of modulated amplitude (A3). The installation and use of Single Side Band radiotelephone equipment is obligatory.

In consequence, the Ministry has requested that the terminal inform all users of Double Side Band (A3) radiotelephone equipment in order that they proceed immediately to install in their ships, launches and all other marine vessels Single Side Band equipment with the same frequencies that are presently in authorised use, which is VHF Channel 16.

The listening and Safety Station YXW – 3 installed at the Venezuelan Nautical School is equipped to answer any calls on the International Distress Frequency with their transmitter of 1 kW.

As a result of the foregoing, a letter containing the above information has been prepared by the Terminal which will be delivered to the Masters of all vessels calling at the Bajo Grande loading terminal. The Masters of all vessels are required to sign a copy of this letter in acknowledgement of receipt.

TUGS: The Venezuelan Government has ruled mandatory the use of 2 tugs for docking and undocking. Vessels over 60,000 d.w.t. will use 3 tugs for docking and undocking.

NOTICE OF READINESS: Masters are free to tender their ships as being ready to load at any place and time which, in their opinion, conforms with the terms of the charter party. Terminal personnel authorised to countersign the Notice of Readiness have been instructed to indicate the time vessel was all fast. This does not imperil in any way the rights of the shipowner in his negotiations with the charterer and it limits the Terminal's liability to the consignee.

BERTHING:

Berth No.	*Dock Length* (ft.)	*Vessel Nominal Length* (ft.)	*Max.Draft Arrival* (ft.)	*Minimum Depth* (ft.)
1	929	751	35.0	40.0
2	929	751	32.0	35.5
3	898	853	39.5	40.0

CARGO OPERATIONS:

Loading Arm System:

Berth No.	*Loading Arm* No.	*Diameter* in.	*Boscan Crude and Products*	*Connection*
1 and 2	1 Black	8	Asphalt Cement (PAS), Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Vacuum Gas Oil, Distillated Oils.	Flange 8 in. 150 ASA
	2 Black	8	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 8 in. 150 ASA
	3 Black	8	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 8 in. 150 ASA
	1 White	8	Gasoline Leaded, Catalytic Gasoline.	Flange 8 in. 150 ASA
	2 White	8	Gasoline Leaded, Light and Heavy Naphtha.	Flange 8 in. 150 ASA
	3 White	8	Light Gas Oil, Industrial Gas Oil, Jet A-1.	Flange 8 in. 150 ASA
	Bunker	6	Bunker "C", Intermediate Bunker Fuel (IBF), Marine Gas Oil (MGO).	Flange 6 in. 150 ASA
3	1+2	10	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 10 in. 150 ASA
	Bunker	6	Bunker "C", Intermediate Bunker Fuel (IBF), Marine Gas Oil (MGO).	Flange 6 in. 150 ASA

Inert Gas System: The use of an inert gas system will be compulsory for all vessels fitted with the system, whilst operating at the Terminal.

Deballasting Facilities: A Circular letter from the Venezuelan Ministry of Communications, Maracaibo's Port Captaincy, states that as of October 1976, no ballast (either clean or dirty) can be discharged into Lake Maracaibo waters. Therefore, all ballast must be pumped ashore to the petroleum terminal on which vessel is to take cargo. Heavy fines are assessed for vessels violating this law and therefore we strongly recommend Masters to be particularly careful in this regard.

Shore deballasting facilities are available at Bajo Grande and are subject to no special regulations and procedures as yet. Tanker ballast water is pumped through 2×8 in. hose connections into 1×24 in. line of about 9,000 ft. in length to a 90,000 bbls. receiving basin situated on shore at a maximum rate of 2,000 tonnes/hr.

The deballasting basin is limited to receiving *only* petroleum hydrocarbons and petroleum hydrocarbons derivates. Emulsifiers, caustics, acids and chemical slops are absolutely unacceptable. Contamination of Lake Maracaibo waters with oily or chemical materials of any nature is strictly prohibited by Venezuelan Laws. The terminal is required to report to the Authorities any such contamination by vessels docked at Bajo Grande. HEAVY FINES ARE THEN ASSESSED AGAINST THE SHIPS. Vessel's cooperation is requested to prevent contamination from tank overflows, bilge oil, line leaks or from any other source.

Tank Cleaning and Drying: Precautions as are common for any heavy oil should be taken to ensure that no ballast is left in any tank. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lbs. per 1,000 bbls. for every 0.10% contamination by sea water. All cargo compartments must be stripped extremely dry.

Cargo pipe-line should be drained and or purged of water. On standard T – 2 type vessels, this can be done by draining the fore and aft main cargo lines, both suction and discharge sides, into the pump room bilges followed by opening of main suction valves on each individual compartment, thereby releasing water retained in dead and transverse lines. After this procedure is completed, each compartment should be restripped with stripping pumps and lines, followed by draining the stripping line to pump room bilges. On other ships equipped with looped systems it is possible to blow the system with air and drain water into the bilges. In other situations, fresh water might be used to flush cargo piping systems of salt water and in turn strip salt water and fresh water as outlined for T – 2 vessels. All deck scuppers should be securely plugged and all precautions should be taken to avoid pollution of lake.

Inspection of Tanks: Before loading can commence, tanks and loading system must be inspected and passed. This is usually done by the Terminal's own Cargo Inspector but, if consignee so requests, third party inspection can be arranged.

Inspection Companies available in Maracaibo are the following:

Chas. Martin Venezolana de Inspecciones
E. W. Saybolt & Co., S.A.
Redwood Petroleum and Petrochemical Division
Analistas e Inspectores Venezolanos de Petroleo C.A.
Inspecciones, S.A.
Caleb Brett Venezuela, C.A.

Line Displacement: When a vessel is loading crude and products, it is usually necessary to displace lines once or twice during loading. Masters will be advised of necessary line displacements before loading starts and are required to take note because NOTICE HAS TO BE GIVEN BY VESSEL when pumping should be stopped and tanks changed. Once shore tanks have been changed, it will not be possible to change the quantity of the product already in the ship, as shore lines will then contain a product different from the one already loaded. *Ship's gauges and draft should be carefully checked when calculating required quantities.*

Spillage: In case spillage occurs, the Terminal Port Supervisor must be advised immediately, as any spillage must be reported to the Authorities without delay.

There has been considerable discussion in Venezuela concerning oil spillages resulting in contamination of Lake Maracaibo. Considerable pressure is being exerted by Government agencies to eliminate all spillage, and the Terminal is making every effort to avoid contamination of Lake Maracaibo.

While vessel is at Bajo Grande take special precautions to avoid dirty ballast, bilge water or any other contaminant entering the Lake.

If a spill should occur and Terminal representative, the Government's representative of the National Guard observes that the waters of the Lake are being contaminated by any substance from the vessel the Terminal will request that vessel suspends deballasting, loading or discharging operations immediately and all consequences that might arise from this operation such as short loading, the unmooring of your vessel, fines, damages to fishermen, clean up costs, etc., *will be strictly, for vessel's account.*

We strongly recommend to Masters to emphasise to the officers on deck to endeavour to avoid spillages and to make certain that the scupper plugs are installed prior to commencement of loading operations in order to withhold on deck any spillage that might occur.

After Loading: All Butterworth plates, tanks tops and ullage plugs should be inspected to ensure against entry of water. Inspection of ullage plugs should follow on completion of temperature readings because of the necessity of taking temperatures en route. Sea suction valves should be secured by positive means until all cargo has been discharged. This may be accomplished by numbered seals, chains and padlocks. The method of securing should be noted on the inspection documents. Regardless of which method is used, appropriate log entries should be made indicating the date, time and method used and under whose supervision, both vessel officer and/or Cargo Inspector, such method was applied.

About 2 hours is required for the preparation of the cargo documents which are normally delivered on board before sailing.

Temperature of Boscan Crude and Boscan Products at Sea: On short voyages, as for instance to the U.S.A., it has proved most practical to maintain the loading temperature. On longer voyages, as for instance to Europe, the temperature may be dropped to 130°F., which does no harm as long as sufficient time is given to bring the temperature up again to that required for discharging. Masters should, however, not expect a temperature rise of more than 5°F. per day, especially if the sea temperature is low. The heat transfer properties of Boscan Crude are very poor as are those of the heavy products made from this crude. Many ships have been delayed in the discharge port due to too low cargo temperature. A temperature of 160°F. is suggested for discharging Boscan Crude, Topped Boscan and Cutback Asphalts.

Discharge Cargo: Boscan Crude has a flash point of 110°F. – 160°F. and a maximum viscosity of 1400 SSF at 140°F. The viscosity at other temperatures follows the pattern of other petroleum products. Boscan Crude has been successfully handled in ships fitted with both reciprocating and centrifugal type pumps with forward and after pumprooms respectively. It is generally found that this crude can best be handled at a temperature which brings its viscosity to about 600 SSF – 160°F. Vessels with forward pumproom should control stern trim so that it does not exceed about 4 ft. while stripping the after tanks. Also a 5° list is very helpful when stripping. Once the cargo gets below heating coils, tanks must be pumped empty as fast as possible. At times it has been found helpful to gather tanks strippings into a single tank for discharge ashore, as it is very difficult to strip against heavy back pressures. Watch reciprocating pumps for vapour lock. Because of high viscosity, proper care should be taken that no oil is left in vessel discharge lines at low temperature.

Tank Cleaning After Discharge Cargo: Many Masters have expressed concern over tank cleaning after discharge. Assuming that the ship proceeds to sea for this operation and has sufficient time for proper execution, vessel may be cleaned quite thoroughly using the Butterworth system. However, it is of vital importance that the system be used at maximum pressure and temperature (not below 160 p.s.i. and 170°F respectively). At these conditions and with 2 machines, it has been found that about 4 hours are required for each tank. It is of importance to keep the tanks well stripped during the Butterworthing. Some prefer to steam out the tanks before Butterworthing. If this course is adopted care should be taken that the steaming does not last more that 1 hour as the heat will drive off the light ends of the oil and leave a rubbery residue that is very difficult to remove.

It has been found helpful to keep the machines in LOW position for about 1 hour and the HIGH – MIDDLE and LOW in order, in the usual manner.

Boscan *Crude and Products/Light Products:*

Loading Product	*API Gravity*	*Temperature °F*	*Loading Lines used*	*Unloading Rate (bbl./hr.)*
Boscan Crude	10.0 – 11.0	165	2×18 in.	15,000*
Cutback Asphalt	11.0 – 15.0	170	2×18 in.	15,000
Asphalt Cement (Pas)	5.0 – 6.0	300	1×14 in.	5,000
High and Low Visc. Residue	10.0 – 19.0	160	2×18 in.	16,000
Bunker "C"	10.0 – 16.0	160	2×18 in.	16,000
Gasoline	61.0 – 67.0	85	2×12 in.	6,200
Ind. Gas Oil	29.0 – 31.0	95	1×12 in.	6,200**
Light Gas Oil	32.0 – 38.0	95	1×12 in.	6,200
Light Naphtha (LSR)	70.0 – 73.0	85	1×12 in.	6,200
Heavy Naphtha (HSR)	52.0 – 55.0	85	1×12 in.	6,200
Jet A-1	45.0 – 51.9	85	1×12 in.	6,200

* Loading Rate.

** Loading and unloading rate.

DENSITY: 0.977 – 1003.

FRESH WATER: Delivery of boiler and potable water is made by barge, *minimum quantity 100 tons.* The barge holds about 160 tons and the pumping rate is about 25 t.p.h. Requirements should be cabled in advance to the Agent of the vessel in Maracaibo.

FUEL:

Advance Notice of Requirement: Should a vessel arriving at Bajo Grande require any bunkers, Owner or Operator must place their nomination with Maraven, S.A. via Telex No. 23535 Mara Vc as much in advance of the delivery date as possible. Telex should indicate name of vessel, ETA at Bajo Grande and quantity and quality of Marine Fuels required. A cash deposit in U.S. Dollars covering the nomination must be made prior to the delivery date into the following account:

Chase Manhattan Bank,
Chase Manhattan Plaza,
34th Floor,
New York, N.Y.
Current Account No. 001-1-992773.

Owner or Operator must also request Chase Manhattan Bank to confirm via Telex to Maraven, S.A. that such deposit has been made in order to cover the cost of bunkers to be delivered to vessel arriving at Bajo Grande at the current ETA. Only after this Telex has been received will delivery actually proceed.

Bunker Facilities: Bunkers are available from pipe-line at Bajo Grande Terminal for vessels loading and unloading cargo at Berths No. 1, 2 and 3. Bunkering rate is about 2,500 bbls.p.h. for Bunker "C", intermediate bunker fuels and marine gas oil.

Marine Fuels and Lubricants Available: Bunker fuel (sometimes called Bunker "C"), intermediate bunker fuels and marine gas oil.

Lubricants are generally available in the Maracaibo area. Should you require any, we recommend that vessel's local Agent be contacted.

Lighterage: Bunker fuel, intermediate bunker fuels, marine diesel and gas oil are also available for ships in the Maracaibo area. 72 hours' advance notice is required for barge deliveries of all products.

CONSULS:

Following countries have consular representation in Maracaibo:

Argentina
Austria
Belgium
Bolivia
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Puerto Rico
Spain
Sweden
U.S.A

REPAIRS: No major repair facilities are available in Maracaibo but small repairs can be undertaken by local machine and electric shops. Shore labour can be furnished if required. Technicians are available for minor radio repairs. Nearest dry docks are at Curacao for vessels up to 30,000 d.w.t. and at Puerto Cabello, Venezuela for vessels up to 18,000 d.w.t.

CUSTOMS: *Contraband:* Strict compliance with the Customs Law of the Country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but a greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to the very strict enforcement of the Customs Regulations, it is recommended that no goods be carried which are not shown on the Stores List. Any new articles (clothes, shoes, etc.) should be included in the store list and marked as personal belongings. If during a checkup by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo. Their services may be procured by cabling requests to the local Agent at Maracaibo.

HOLIDAYS: The Terminal office will be closed on the following days. New Year's Day (January 1st); Easter Thursday/Friday (March/April); Declaration of Independence (April 19th); Labour Day (May 1st); Battle of Carabobo (June 24th); Independence Day (July 5th); Birthdate of Simon Bolivar (July 24th); Columbus Day (October 12th); Chiquinquira's Day (November 18th); Christmas Day (December 25th); All Saturdays; All Sundays.

SHORE LEAVE: Shore Leave is permitted at the discretion of the Port Authorities; required number of shore passes will be brought on board on arrival in Maracaibo and have to be returned to the Customs Guard again before the vessel leaves Bajo Grande.

GENERAL:

Tonnage Applicable on Fees: On ships registered in countries which have a reciprocal tonnage agreement with Venezuela, the gross tonnage registered in such countries will be applied for calculating pilotage fees. Such countries are:

Denmark
France
Germany
Ireland
Netherlands
Norway
Portugal
Sweden
United Kingdom
U.S.A.

On ships registered in countries not listed above, such ships calling at Venezuelan ports for the first time must be measured for Venezuelan tonnage by the Port Captain. It is usual practice to take ashore the ship's Panama Canal or Suez Canal International Gross Registered Tonnage Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Firearms and Ammunition: Firearms must not exceed 1 per Officer nor may the ammunition exceed 18 cartridges per Officer. All firearms and ammunition must be carefully declared on the Store List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

Guards: Customs Guards are stationed on the platform at Bajo Grande. They must be provided with sleeping quarters on the ship and seated in the Officers' mess for their meals. Non-compliance may cause cargo stoppage and fines. Masters are reminded that these guards are representatives of the Venezuelan Government and any uncourteous action on the part of the crew or passenger will be regarded as a slight against the Country itself.

Gangways: The ship is to supply a safe gangway, which allows easy access to the vessel. The Terminal has a gangway which may be used on request with the understanding that any damage to the gangway or ship or shore personnel through its use may be held against the ship.

Safety: Vessel must be in readiness to move at all times. The attention of Masters of turbine steamers are called to this regulation.

Ship's fire fighting equipment must be ready for instant use while vessel is alongside. Shore personnel will render assistance in an emergency but, since no fireboats are stationed in the immediate area, vessels should be prepared to combat fire without outside assistance. It is necessary to obtain Terminal's approval for repairs of propelling machinery.

Normal safety precautions apply. Smoking is not allowed on the pier. No hotwork is permitted on vessels alongside without *written* permission from the Port Supervisor. *Swimming alongside pier is dangerous and absolutely prohibited.*

Launch Service: The launch is primarily for the use of the port staff.

Taxi: Taxi service will be generally available upon request to vessel's Agent.

Visitors: According to Port Regulations concerning access to ships and loading terminals and in the interest of industrial safety, only persons directly concerned with loading operations will be permitted to board vessel or visit the loading platform at Bajo Grande.

Plimsoll Marks: The Port Captaincy requires that Plimsoll Marks be readily visible. If they are not clearly legible, permission to sail may be withheld and a fine imposed. This is applicable to inbound and outbound vessels.

We therefore, request your full compliance with this Regulation from the Maracaibo Port Captaincy.

Marine Stores/Charts: Marine stores are available in limited supply. Marine charts are not available.

Compass Adjusters: There are no compass adjusters in Maracaibo.

Seamen Left Behind: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

Crew in Transit: In case a crew member is left ashore for a justified cause, such as hospitalisation, repatriation, etc., his documents and personal effects are to be delivered to the vessel's Agent before sailing. A letter is required from the Master with detailed instructions as to maximum cash advance, etc. All expenses incurred by such members are for vessel's account.

Port Supervisor: Masters or their representatives are invited to call at the Port Supervisor's Office on shore in Bajo Grande or over the telephone on the pier, for any further help, information or complaints.

Terminal: Cable Address: Maraven, S.A., Maracaibo.

NOTICE: Issued by Maraven, S.A., Bajo Grande Refinery, Maracaibo.

PROCEDURE FOR BERTHING AND UNBERTHING MANOEUVRES

To the Masters of all the tanker ships arriving at Maraven's Refinery, Bajo Grande Marine Oil Loading Terminal, Lake Maracaibo, Venezuela.

Instructions concerning approaching and manoeuvres for berthing/unberthing at this Terminal.

With a view to prevent any possibility that your ship may cause damage to our installations, we shall highly appreciate it if Masters pay attention and respect to the following procedures:

1. Entrance Bajo Grande Refinery Terminal (Lat. 10° 30′ 50″ N., Long. 07° 36′ 08″ W.) is between the Main Navigation Channel Marker Buoys B86 – B88 and leaving between the Buoys BG2, BG1 and B86.

2. On ship's arrival at the Terminal Entrance Buoys, the Official Pilot, a Marine Officer, acting as a Liaison Officer of Maraven, will board the ship in order to assist her Master and the Official Pilot in all matters concerning inter-communications and co-ordination with the Terminal and on basis of his technical and local knowledge and experience give advice relative with the vessel's safe berthing/unberthing and safe mooring/unmooring to/from the pier.

3. For best manoeuvrability, ships arriving on ballast or partially laden, must arrive with a draft forward which should not be less than given in the following table and a trim by the stern of about 0.75% of ship's length on ships of 400 ft. length or more.

Length	*Draft Forward*	*Trim by Stern*
400 ft.	10 ft.	3 ft. 00 in.
500 ft.	12 ft.	3 ft. 09 in.
600 ft.	14 ft.	4 ft. 06 in.
700 ft. ideal	16 ft. (nor less than 14 ft.)	5 ft. 03 in.
750 ft. ideal	17 ft. (nor less than 14 ft.)	5 ft. 08 in.

The ship's total displacement in any case should not exceed 42,000 tons for ships mooring at Berth No. 1 and 20,000 tons for ships berthing at Berth No. 2.

4. For more information please consult the instructions and information for the port which will be issued to you opportunely on your arrival for first time to this Terminal, please comply with them, and see that they are complied with.

5. *Mooring Lines:* Prior to arrival at the Terminal, the vessel shall have all the necessary mooring lines ready for use together with a sufficient number of heaving lines and the equipment and the personnel required for mooring. All the lines used for securing the ship to the berth should be of the same material, construction and of approved characteristics.

5A. *Recommended Mooring Lines:*

Forward	Aft
3 head lines	3 stern lines
2 breast lines	2 breast lines
2 springs	2 springs

5B. *Winches:* The use of tension winches is not allowed.

6. *Tugboats:* Minimum 2 twin-screw tugboats of adequ horsepower for the size of ships ordinarily berthing at this Terminal assist the vessel in the berthing/unberthing manoeuvres. If the Mas so request or in the case of the size of vessel and wind and/or curre conditions so require, the Terminal may order the use of 3 tugboats the manoeuvres. The tugboats, on arrival, will come alongside the sh before entering in the Terminal.

The first communication with the tugs is via VHF Channel 16 as fi contact and then changed as per instructions.

7. *Berthing:* At Bajo Grande ships berth bow to North.

On approaching the berth, approaching bow to or at any angle w the berth is to be avoided.

No. 1 Berth (Outer Berth): The ship will be put in a position paral and abeam to the berth at a minimum distance of about 50 m. or mor depending upon the prevailing conditions of wind and current.

Once in this position and with the ship motionless or almo motionless, the Liaison Officer will assist you and the Official Pilot in th manoeuvres to nurse the ship alongside sideways with the tugs whic generally, will be alongside the ship's side opposite to the side the sh will berth, already made fast and ready to push.

When the manoeuvre is carried out for berthing to No. 1 or Out Berth, the starboard anchor will be in cockabill position ready for use case needs arise and in such case the aft tugs or both immediate ordered to pull on reverse.

It will be avoided to haul the mooring ropes secured to the Nor platform bollards in order to pull the vessel forward. If need arises th ship's engines may be used to move the ship.

8. *Unberthing:* The use of spring lines must be avoided in order t veer the ship on the mooring platform for clearing the vessel's bow stern while unberthing. These spring lines will be only used in case extreme emergency.

After all the mooring lines have been cast off, the ship will be towe sideways away from the berth to a distance where she can safe proceed under own power.

The Official Pilot for manoeuvres and Liaison Officer will disemba when the ship is safely free away and offering no risk to the dock.

Maraven will not permit berthing or unberthing without a Marave Liaison Officer being onboard.

Note; According to new Port Regulations for unberthing, 2 Offic Pilots will board; for unberthing manoeuvres and to conduct the vesse to the Outer Channel, respectively. The undocking Pilot disembarks Bajo Grande.

9. *Berth No. 2* (Inner Berth): The same procedure hereinbefo described for berthing at Berth No. 1 will be followed for berthing at Bert No. 2. The ship will be put first parallel to the berth and then the vesse nursed alongside with the tugs. For unberthing, manoeuvres will be th reverse. During berthing and unberthing manoeuvres, ship's engines will be used only when it becomes necessary.

At this berth anchors must not be used because of submarine pipe lines laid there. In this berth the distance from it must not be more tha 50 m.

10. *Emergency Towing-Off Wire:* Whilst berthed alongside th platform, emergency towing-off wire-ropes should be rigged both on th offshore bow and quarter of the ship, with their loops kept near th waterline at all times where the tugs can easily and quickly pick ther up.

The wire-ropes should be in good condition and of suitable streng for the ship's size. The wires should be properly led outboard throug the nearest fairleads leaving sufficient wire-rope coiled on deck and fre to go when the tug hauls and of adequate length to tow her safely o the Terminal.

The overboard length of rope should be adjusted as the draft decrease or increase.

11. *Mooring Lines Whilst at Berth:* Mooring lines should b periodically inspected and attended to ensure that they are kept taut i order to minimise and movement of the ship along or away from th berth.

In the case of ships equipped with automatic tension winches, th brakes of the winches should be applied and the mooring lines handle on manual operation when required to take up slack or pull them taut

12. *Safety Practices:* While the ship is lying at the Terminal the Maste will ensure that all the safe practices in loading or discharging o products and related operations are complied with on his ship and als ensure the maximum co-operation between the vessel's crew and th Terminal personnel in their mutual interests of safe and efficie operations.

AUTHORITY: Maraven, S.A. – Bajo Grande Refinery, P.O.Box 9 Maracaibo, Venezuela 4033A. *Tel:* (061) 202673. *Telex:* 61254, 6116

Contact: Captain N. Arceo, Terminal Supervisor.

Head Office: Maraven S.A., Apartado 829, Codigo Postal 1010 Caracas, Venezuela. *Tel:* 908-2111. *Telex:* 23535, 23536.

(2) OPERATORS: Maraven, S.A.

LOCATION: S.W. of channel Buoys B – 87 and B – 88.

The installations for processing natural gas liquids at Bajo Gran processes liquids for Maraven, S.A., and they are known as Produ Owners. The Plant is situated in Bajo Grande, approximately 10 mi to the South of the Port of Maracaibo, on the West bank of Maraca Lake.

FLAG: The local authorities require the Venezuelan flag to be hois to the top of the vessel's mast from the time it enters the outer chan on arrival, until it leaves the outer channel on departure.

DOCUMENTS: *Customs Clearance for Programmed Vessels:*

Vessels which arrive in ballast or with cargo in transit, require the following documents (with additional file copies if these are required):

(A) Clearance from the last port
2 copies – 1 visaed Ballast Certificate
4 copies – 2 visaed Passenger List
4 copies – 2 visaed Lists of Equipment
4 copies – 2 visaed List of Passengers in Transit
4 copies – 2 visaed List of Mess Equipment and Spares
4 copies List of Personal Effects
4 copies – 2 visaed List of Stores
5 copies Crew Lists.

Vessels which arrive with cargo must have, apart from the foregoing:

(B) 4 copies – 2 visaed Venezuelan Entry Manifests
6 copies – 2 visaed Bill of Lading
2 copies visaed Entrance Manifests.

In the absence of a Venezuelan Consul at the last port, the Customs clearance documents must be signed by the Consul of a friendly nation, one of the Port Authorities, Notary Public, the Chamber of Commerce, or by two recognised signatories.

Clearance Through Customs of Diverted Vessels:

Vessels diverted on the high seas to Maracaibo to load at Bajo Grande must present all the documents indicated in (A) above, except the consular correspondence, which they will not have.

Vessels diverted on the high seas to Maracaibo (Bajo Grande) which do not have a Venezuelan Customs Clearance on board, must advise their Agents by radio prior to their arrival, the name of the vessel, the name of the Master, nationality of the vessel, net Venezuelan tonnage (if available, if not, the net registered tonnage), last port of discharge, port to which it was originally sailing and the ETA at the Pilot station at San Carlos. This information is required to obtain the Entry Permit prior to the arrival of the vessel. Three copies of the diversion telegram received by the vessel, signed by the Master, together with those documents detailed above, must be presented to the Port Authorities on arrival at Maracaibo. Non-presentation to the Port Authorities of the documents or the information mentioned will occasion a fine to the vessel.

Inspection by Customs: All vessels arriving from foreign ports destined for the dock at Bajo Grande must anchor in the Port of Maracaibo for Customs inspection by the Port Authorities before proceeding to Bajo Grande. The vessel's gangway must be in position prior to arrival at Maracaibo.

A member of the National Guard of Venezuela will come on board every vessel at Bajo Grande to observe the activities in connection with the operations of loading and unloading. This official is authorised as representative of Customs and is known as the "Vigilante de Aduana". He must be fed and lodged at the same standard as ship's officers.

Loading Documentation: The loading and Customs papers will be delivered to the Master by the Agent of the ship on his arrival at the Port of Maracaibo, on his voyage outwards.

PILOTAGE: Vessels entering currently have the option of taking on the official Pilot at:

(a) The channel in front of the pilot station at San Carlos, between the Buoys B – 24 and B – 26.

(b) In front of Amuay Bay or Punta Cardon. However, to arrange this service, Agents must be advised at least 48 hours in advance of this requirement.

The Pilot who boards the vessel in front of San Carlos will take it to Maracaibo, where he will disembark.

Due to weather conditions, the Port Captaincy of Maracaibo cannot guarantee the embarkation or disembarkation of the Pilots at the "EM" Buoy. For this reason, Masters must communicate with the pilot station of San Carlos to receive necessary instructions as to where the Pilot will be embarked, the latter usually coming on board between Buoys B – 24 and B – 26. The system of communication between the pilot station of San Carlos and the vessels will be via radio-telephone. The San Carlos frequencies are: 2182 kHz. and 156.8 MHz. (VHF Channel 16). Other frequencies are: 2122 and 2080 kHz. and 156.6 MHz.

Pilotage to navigate through the inner and outer channels is compulsory at all times. The maximum speed of navigation in the dredged channels is 10 knots.

Vessels leaving will take the Lake Pilot on board at Bajo Grande and on reaching the Port of Maracaibo the Pilot will be changed for another to take the vessel through the channel. The Channel Pilot will pilot the vessel up to the San Carlos Bank, generally between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has issued instructions to all ships' Agents so that they may inform the Master and/or Owners of the vessels that all vessels must identify themselves with the pilot station of San Carlos by radio-telephone, regardless of the time of day, when they are entering between Buoys B – 17 and B – 19 and when they are leaving between Buoys T – 42 and T – 40.

Every time a launch with an official Pilot on board leaves to attend to a vessel in sight, the costs will be charged to the company which owns the vessel or to its representative, even when service has not been given.

A government Pilot will assist each vessel from Maracaibo to Bajo Grande and on the outbound trip to Maracaibo. The government Pilot will also assist in the berthing and unberthing operations. The ship's Agent will inform the Master of each vessel, as well as the government Pilot, the schedule for berthing the vessel.

The Plant Mooring Supervisor will board each vessel prior to approaching the dock. Mooring Supervisor will assist in the mooring and unmooring operations. It should be understood that the Mooring Supervisor acts only in an advisory capacity to the Master. The vessel's Master retains full responsibility at all times. The Plant assumes no responsibility in connection with any acts or advice given by the Mooring Supervisor.

APPROACHES: The buoy which marks the entrance to the outer channel (Buoy "EM") is situated in approximately position 11° 13′ 47″ N., 71° 33′ 31″ W. The characteristics of the light of the "EM" Buoy are: white flash every ten seconds, visibility approximately 5 miles. The distance between the "EM" Buoy to the Southern extremity of the outer channel, marked by the Buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and normally has a depth of 42 ft. minimum at low tide observed at the time of neap tides with a tidal amplitude varying 2 ft. 3 in.

There is a breakwater 0.5 miles to the East of and parallel to the outer channel which extends 1.6 miles to the North from the Northern side of the Island of Zupara. The end of this breakwater is marked by a steel frame tower with a light 25 ft. above sea level. Characteristics of the light are: white flash every 8 seconds, visibility about 3 miles.

Commencement of the inner dredged channel is marked by the Buoys B – 29 and B – 30. The length of this channel, which is marked by buoys, is approximately 12 miles, and ends at Buoys T – 55 and T – 56. The channel is 800 ft. wide and the normal checked depth is 43 ft. neap tides with a tidal amplitude varying between 1.5 ft. to 2.5 ft.

The channel from the Buoys T – 56 as far as the Port of Maracaibo is a dredged channel, whose end is marked by Buoys B – 73 and B – 74. It is some 800 ft. wide and has a depth of at least 43 ft. The distance is about 11 miles and the tidal amplitude range is insignificant.

RESTRICTIONS: Bridge clearance at MHHW 146 ft.

MAX. SIZE: The maximum permissible fresh water draft at the dock is 36 ft. and the maximum overall length vessel the dock will accept is 700 ft. Vessels with a berthing displacement up to 20,000 long tons will be accepted, providing the approach velocity can be controlled to 0.3 ft. per second or less.

Vessels with an overall length greater than 700 ft. or with a fresh water draft of more than 26 ft. or a displacement greater than 20,000 long tons will not be accepted for loading at Bajo Grande, unless they have obtained the prior authorisation of Maraven, S.A. If the vessel is not equipped to moor, load and unmoor in a safe manner, the vessel will not be loaded. In such cases, there will be no responsibility on the part of Maraven, S.A.

RADIO: Maraven, S.A. Export Department also has radio-telephones with the following frequencies: 2080, 2120, 2182 (stand-by), 2638 and 2738 kHz and 156.8 (stand-by) and 156.6 MHz. operated in accordance with the following schedule:

Monday – Friday:	From 0730 until 1130
	From 1300 until 1700
Saturday, Sunday and Holidays:	From 0730 until 1030 approx.

Any tanker or vessel bound for Bajo Grande shall cable Maraven, at least 5 days in advance of its scheduled arrival time in Maracaibo, giving notice of its estimated time of arrival, loading capacity, amount and type of product to be lifted and condition of ship's tanks.

At least 48 hours in advance of arrival at the San Carlos Pilot Station, the vessel's estimated time of arrival, nationality, Venezuelan net tonnage (if available, otherwise its registered tonnage), quantity and type of cargo required, condition of ship's tanks, name of Agent, last port, Master's name and all requirements of the vessel while in port should be cabled to "Maraven, Maracaibo" and to the ship's Agent. As the cable office in Maracaibo is not able to communicate directly with vessels at sea, messages to "Maraven, Maracaibo" and to Agent should be routed via PJC Curacao, and should be prefixed "Via AAC" (All America Cables and Radio Inc.). Failure to give such proper notices shall absolve the Plant from any claim for delays or demurrage.

TUGS: 2 × 1,600 h.p. tugs used for mooring and unmooring operations.

BERTHING: The dock proper may be identified by the overwater pipeline trestle that connects the dock with shore.

The dock is located approximately Lat. 10° 30′ N., Long. 71° 36′ W., which is 2 miles off shore from the Bajo Grande Natural Gas Liquids Processing Plant and S.W. of channel Buoys B – 87 and B – 88 on the Maracaibo channel. The dock is single sided and consists of 4 breasting pilings, 4 mooring dolphins and a loading platform.

The dock is equipped with a compressor and auxiliary equipment to assist the ship in compressing and re-condensing the ship's vapours. No liability will be assumed by the Plant Operator for unavailability of the Dock's vapour compressor. The dock is also equipped with a vent system to dispose of contaminated vapours.

A tie-up crew will handle all mooring lines before and after loading.

The Plant tie-up crew will assist the ship's crew in positioning and connecting the cargo loading arms and in removing same on completion of loading. The dock loading arms are equipped with 10 in. ASA 300 lb. RF flanges. It shall be the responsibility of the ship to furnish its own fittings to mate with the dock's 10 in. ASA 300 lb. FR flanges.

Mooring Procedure: Any vessels calling at Bajo Grande must be equipped with mooring hawsers of sufficient length and strength to run a line to each of the 2 bow and 2 stern mooring dolphins and shall use such equipment while at the dock. Vessels equipped with tension winches and cables shall utilise these in addition to the mooring hawsers or alone if the vessel has sufficient cables to meet the minimum requirements of running a cable to each of the bow and each of the stern mooring dolphins. For added security of those vessels not equipped with tension and/or cables, 1 steel cable will be furnished for a bow and another for a stern mooring dolphin by the Plant. It should be recognised by all parties that while the use of these cables is strongly recommended, the Plant accepts no responsibilities for loss or damage to any vessel or to any facility or to any person that may result from the failure of this equipment.

For the convenience and safety of all personnel boarding or disembarking while at Bajo Grande it is recommended that the vessel's accommodation ladder be rigged on the port side, this being the side normally laying against the dock. The ladder should be suspended after the Mooring Master boards and during docking operations to avoid being fouled.

BALLAST: There are installations for unloading dirty ballast. Vessels which arrive at Bajo Grande with dirty ballast must advise 48 hours in advance with regard to any emulsifiers, detergents or chemicals which may be present in the ballast and which are going to be unloaded. If these emulsifiers, detergents and chemicals are not acceptable, Maraven will advise the ship and the latter must arrive at Bajo Grande with clean ballast.

The ballast will be unloaded at a rate of approximately 5,000 bbls.p.h., nevertheless in the case of unexpected damage or malfunction of the system at Bajo Grande, Maraven will give instructions to the Master of the vessel so that he may arrive with clean ballast and Maraven will not be responsible for the delays which may be suffered by vessels in cleaning their tanks prior to arrival.

It is strictly prohibited to discharge into the lake any liquid or solid waste resulting from tank cleaning. Therefore it is recommended that the Master gives instructions to all personnel so that they avoid any possible leak or contamination in the lake.

In the event that the representative of the Plant or the National Guard observe that dirty ballast is being discharged into the lake, or even residues or other contaminatory organisms whilst clean ballast is being unloaded, such operations will immediately be suspended and the consequences will be strictly for the account of the ship.

LOADING: *Notice of Readiness:* On arrival at Bajo Grande and after inspection by the Customs Authorities, and having obtained any other official approval required before loading, the Master of the vessel will notify Maraven in writing that the vessel is ready to load. This notification must include a report of the conditions of the tanks of the vessel, specifying in detail the temperature, pressure, last loading, list of vessel and trim, possibility of contaminatory organisms and any other conditions which may affect the loading.

The Master of the vessel may request any equipment and/or service which he considers necessary for the safe and efficient loading of his vessel and Maraven will make every effort to fulfil this request.

It will be the responsibility of the vessel to provide its own connections to join up with the RF 10 in. 300 ASA flanges of the dock.

It will be the responsibility of the ship's Master to ensure that prior to commencement of loading, the atmosphere inside the tanks, which are to receive products are within the safety limits stipulated. Nevertheless, Maraven reserves the right to inspect at any time, to verify the fulfilment of these safety precautions and to refuse to load any vessel which in the opinion of Maraven does not fulfil the safety requirements stipulated.

LPG refrigerated vessels will not be considered ready to load at Bajo Grande unless all the LPG tanks contain LPG vapours and are sufficiently cooled to permit shipment of the nominated products.

Vessels which receive completely refrigerated products must be capable of receiving at their boiling point from 0.5 to 2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all the vapours resulting from the shipment at the rate specified and including those vapours which form as a result of the heat gained by the vessels' tanks.

Loading Procedure: The positioning and connection of the loading arm must be effected to the satisfaction of the personnel in charge of the vessel. After approval of the personnel in charge of the vessel, the loading valves may be opened to check that the connections do not have leaks and loading may commence.

The maximum loading rate is 8,000 bbls.p.h. (750 – 775 tonnes p.h for completely refrigerated products and petrol) and a minimum loading rate of 250 bbls.p.h. (23 tonnes p.h.).

The pumps are designed to supply a minimum flow of 250 bbls.p.h. at a pressure of 225 p.s.i.g. and, since the installations at the Bajo Grande Dock do not have facilities for controlling the pressure of LPG which is being loaded, they are not responsible for any damage or delay which may occur due to the request for reduction in flow and pressure of LPG in order to cool or purge the vessel's tanks.

There are no installations for generation of inert gases. LPG vessels which require cooling, purging or any other assistance in Bajo Grande can be accepted after prior request in writing from the Master of the vessel; however, these services will be charged to the vessel. The responsibility for helping to effect purging and/or cooling is charged at 733 Bolivares per hour, during the time that such operation of purging or cooling causes the vessel to exceed the permitted period of stay.

The quantity of products used in such purging or cooling will be for the account of the vessel.

In the event that the dock vapour compressor is operated at the request of the vessel's Master for a purpose other than for purging or cooling, this will be charged at the rate of 500 Bolivares per hour to the ship.

All loading and unloading operations must be suspended whilst there is bad weather and the tank covers of the vessel must be closed and secured. During periods of calm, petrol or other products with a low flash point can be loaded at reduced rates or the loading operation can be interrupted if the heavy vapours are not being dispersed with sufficient speed to avoid dangers of gas accumulation. Officers on the vessel must be alerted so that they may be on watch whilst such conditions apply.

Under normal operational conditions it may be necessary to displace the loading line. This will require the person in charge of the vessel advising the representative of the Plant when the loading is nearing completion in order to complete an equal quantity to the capacity of the loading line.

Permitted Period of Stay: (a) The permitted period of stay, as is defined hereunder, shall commence to be counted from 6 hours after arrival of the vessel at Bajo Grande. The permitted period of stay will be terminated when the final mooring cable has been withdrawn from the quay.

For the purpose of these instructions, the Notice of Readiness, may be delivered after the vessel has tied up at the dock; nevertheless, the arrival at Bajo Grande shall be defined as the time when the vessel passes between Buoys B – 87 and B – 88, which mark the Maracaibo navigational channel and are situated approximately 1,000 m. in front of the Bajo Grande Dock.

(b) In the event that a vessel arrives at a different time to that confin in the shipping programme, and unless Maraven has approve different arrival time, vessel must await mooring of other programm vessels before arriving and which vessels may have arrived at that ti and the permitted period of stay will commence when the load operation commences, or 6 hours after receiving Notice of Readine whichever is the later. It is agreed that a vessel shall be included in t loading programme if it arrives at Bajo Grande between the hours 12.01 hrs. on the accepted date and 0600 hrs. of the following day.

(c) Except for the provisions in (b) above, all vessels arriving Bajo Grande will have the right to moor in the order in which they appe in the shipping programme. Maraven at their discretion may change t order of shipment when it may be necessary for reasons of safety for the purpose of obviating a closure of the Plant or reduction production.

(d) The waiting time permitted shall be 24 hours, plus one (1) ho for each 6,000 bbls. of product loaded in excess of 114,000 bbls. Th waiting time shall be that permitted to load the complete cargo or pa of the cargo of the vessel, it being understood that any time spent deballasting operations will not be taken as waiting time. If the loadi operations are delayed or interrupted by *force majeure*, which sh include the closure of the shipping terminal due to bad weather, the tim thus lost will not be counted as permitted waiting time.

(e) The loading operations shall be considered as terminated whe the loading hoses are disconnected. Every vessel will leave the qua as quickly as may be practically possible after having comple shipment of the cargo and the personnel of the vessel and those land have arrived at an agreement as to the quantity of products shippe

(f) In the event that a vessel is moored at the quay for 6 consecu hours after Maraven has notified the Master of the ship that t installations are ready to deliver the product, if the vessel on complet of this time is not in a position to receive products, then at the discretio of Maraven the vessel may be withdrawn from the quay, to prevent th products burning or a reduction in production.

A vessel may be withdrawn from the quay at any time for reasons safety.

Verification and Measurement: Determining factors to arrive at th official figures of a shipment:

(A) Petrol and Butane:

(1) Correction factors of the individual meters less than 1%. In th event the terminal shall always use the figures of the meters as offic (and not take into account the absolute difference in barrels) taki always the precaution of carrying out a comparison between the figur of the ship and those of the land.

(2) Factor of correction in any of the meters greater than 1%. In th event the vessel's figures will be used, comparing them in all aspec with the figure of the meters without applying the correction factor a with the land tanks.

In those cases in which the vessel's figures are used, it is appropria to suggest that they check their figures.

(3) In the event of the measuring system not operating, and the vess cannot give its own figures, as a last recourse the figures of the sho tanks will be used.

(B) Propane:

(1) The vessel's figures will be taken proceeding in exactly the sa way as in point (2) of sub-section (a) above.

(2) In the event that the vessel cannot supply figures, the figures the shore tanks will be used.

All volumes will be adjusted to the volume equivalent to 60°F accordance with the applicable sections of Standard API 2534 and th corresponding tables of the Measurement Tables of Oil ASTM (late edition) or other methods or standards selected by Maraven.

If the product delivered is LPG, the content of the ship's tanks w include the quantity of the product in the form of vapour.

All volumes will be calculated in U.S. liquid barrels at 60°F and th adjustments at this temperature will be made in accordance with the Measurement Tables ASTM – 1P, American Edition 1952 (or the rul tables which may replace these).

In the event of the products being loaded in a vessel whose tan pipes and equipment are empty when loading commences, the gros volume of products which may remain in the pipes and equipment completion of shipment and at the time of final measurement, shall calculated on the basis of the volumetric capacity of those pipes a equipment, adding the calculated volume loaded in the vessel's tan and including in the total volume delivered to and received by the vess at that time. In the event that the procedure described is used determine the volume of products delivered and if during the time of th delivery vapours from the vessel's tanks be vented then the quantity vapours vented shall be determined as shall also be the liquid volum equivalent to these vapours in normal conditions and this will be add to the quantity determined in (a) and (b) above.

Permissible Composition of the Atmosphere of the Tank for Purgi Maximum percentage per volume of air or oxygen permissible for th safe shipment of the product when the vessel's tanks are purged w CO_2 or N_2:

Product	*%Air* (CO_2)	*%Air* (N_2)	*%Oxygen* (CO_2)	*%Oxygen* $(N_2)^*$
LPG	50	40	8	7
Petrol	50	40	8	7

*The percentages of nitrogen do not include the nitrogen of the ai the mixtures.

Example: If a vessel is going to load LPG and it is going to be pu with N_2, it must add sufficient N_2 to ensure that the mixture does contain more than 40% by volume of air. The other 60% will be N

Ref. Principles & Practices of Purging, 1954. American Gas Ass Chapter 2, page 28.

FRESH WATER: Available at Maracaibo Harbour.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker 'C' fuel oil are available in the area. Lubricating oils in limited quantities are also available from local contractors. All bunker, lubricating oils, water and other requirements should be cabled to the ship's Agent. For reasons of safety, no bunkers may be taken on the vessel while berthed at Bajo Grande.

MEDICAL: Complete medical services are available in Maracaibo.

CONSULS: The following nations have Consular representation in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Netherlands
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Maracaibo: No major repair facilities are available, minor repair jobs can be taken care of through local machine and electrical shops. Shore labour can be furnished if required. Radio, radar and gyro compass technicians are available upon request.

Bajo Grande: No repair facilities are available, but when required, personnel from shops in Maracaibo will travel to Bajo Grande to effect repairs.

SHORE LEAVE: Launch service for official business purposes and emergencies is readily available in Maracaibo. Launch service for shore leave can be arranged through contact marine service and will be the responsibility of ship's personnel. Arrangements for shore leave transportation can be made through the ship's Agent. No shore leave facilities are available at Bajo Grande.

CLASSIFICATION SOCIETIES: American Bureau of Shipping and Lloyd's Register of Shipping, U.S. Salvage Association, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale, and Germanischer Lloyd have Agents in Maracaibo. Surveyors are available by appointment from any of these Agents.

CURRENCY: The Venezuelan unit of currency is the Bolivar (Bs) and is the only currency recognised as legal tender within the country. Masters desiring a cash advance should make the request to their Agent when advising ETA.

MAIL: Outgoing mail for ship's account may be given to the Agent's representative who boards the vessel on arrival at Maracaibo inbound. Personal mail will be accepted only if carrying the correct amount of Venezuelan postage, or if postage is authorised by the Master for the vessel's account.

GENERAL: *Maracaibo Port Captaincy:* Directive which must be observed by vessels entering and leaving Maracaibo Lake:

OBJECTIVES:

To increase the safety of Human Life at Sea, to take all necessary measures to avoid marine accidents in general and to ensure that vessels are navigated with safety in the navigable channels and waters of Maracaibo Lake.

1. All radio-telephone communications between the Control Offices of Maritime Transit under the control of the Port Captaincy of Maracaibo and vessels, shall be made, for the first contact, via Channel 16 (156.8 MHz) and immediately it shall be agreed that for the transmission of required information they will change to Channels 12 or 14. Also this procedure will be adopted in communication from ship to ship.

2. Any vessel which navigates in the vicinity of the Buoy "EM" of the outer channel being 10 miles from the latter shall call the pilot station at San Carlos, requesting permission to enter the zone and will supply the following information:
(a) Name and type of the vessel.
(b) Nationality.
(c) Draft.
(d) Last port of call
(e) ETA at the "EM" and "B – 26" Buoys.

3. The Port Captaincy will authorise by radio, via the pilot station of San Carlos, to Masters of vessels who have reported to that station request to cross the outer channel, or part of it, with the assistance of the Official Pilot, in accordance with the sequence of arrival.

4. Every 5 miles, the Master of the vessel will call up San Carlos, indicating any information which he may have and giving his position within the channel, by reference to the buoys which are on his starboard side.

5. When communication in item 1 has occurred, San Carlos will inform the vessel as follows:
(a) The location of any dredger (mobile or stationary) which is operating in the outer channel, buoys whose lights are out, changes in buoys' positions or where buoys have disappeared, vessels which have sunk, etc.
(b) If there are vessels leaving the port, to give the position of these by reference to the odd numbered buoys.

6. Vessels shall establish radio-telephone communications with the dredger when they are 5 miles from it. In this communication, they will indicate the place they estimate that the vessel will meet the dredger and any other information which they consider necessary for the safety of navigation of both.

7. San Carlos will keep vessels informed of all the circumstances mentioned above, especially the time and place that each of them estimate to pass close to any dredger which is operating in the outer channel, and in order that they do not meet the dredger simultaneously.

8. Masters of vessels will inform the pilot station at San Carlos of any other information which the latter may request.

9. Masters of vessels will keep a watch on Channel 16, on the order of the Official Pilot, until their arrival at port of destination in Maracaibo Lake and on leaving until the Pilot has left the vessel.

10. Pilots, when they are bringing a vessel into the port, at the level of the parallel of Palmas del Norte Point (Buoys T – 55 and T – 56), will call up the Port Captaincy and transmit the following information:
(a) Name of vessel
(b) Time
(c) Port where operations will be effected
(d) Name of Pilot calling.

11. When the vessel continues to navigate to the South of General Rafael Urdaneta Bridge, the Pilot will inform the Control Office of Maritime Transit in Maracaibo, the time at which the vessel will pass Buoy "B – 79".

12. The average speed of vessel in the navigable channels will be ten (10) knots, Masters being authorised as are also Official Pilots, to alter this, when the safety of navigation may require it.

13. San Carlos will check by radio-telephone the transit of vessels from the Entrance Buoy "EM" to the level of the parallel which passes in front of Palmas del Norte Point (Buoys T – 55 and T – 56 and vice versa).

14. Loaded vessels navigating outwards, and being in the outer channel, will have priority over vessels coming in to the same channel, provided that these do not meet with those coming out in the critical zone, included between Buoys B – 21 and B – 22 and E – 33 and E – 34. For this purpose, the San Carlos Pilot Station will inform entering vessels the situation of leaving vessels so that they may take necessary measures to avoid meeting those vessels coming out in the referred zone.

15. The Port Captaincy will check via the office of Control of Maritime Transit, the Navigation of vessels, from the parallel passing Palmas del Norte Point (Buoys T – 55 and T – 56), as far as the terminals and ports to the South of General Rafael Urdaneta Bridge and vice versa.

16. Every Official Pilot navigating outwards when passing the Buoy B – 72, will call up San Carlos by radio-telephone and will supply the following information:
(a) The time that he is passing Buoy B – 72.
(b) The time that he is arriving at San Carlos.

17. When the dredger receives any call from a vessel it will give information as follows:
(a) Location where it is at that time.
(b) Direction of dredging (South North or North South).
(c) The side on which the vessel must pass.
(d) Time necessary to make the manoeuvre indicating on which side of the channel dredging will continue after the manoeuvre.

18. The pilot station at San Carlos will be attentive to all communications made and will take note of them, in the event that their intervention may be required by dredgers or by vessels.

19. Any vessel sailing from any port in the No. 2 Pilotage Area of Maracaibo, will inform the Port Captain as follows:
(a) Type and name of vessel.
(b) Where from and time of leaving the port.
(c) Speed and port of destination.
(d) Estimated time of passing Buoy B – 72.

Signed – Port Captain.

Section B

LA ESTACADA: 10.42 N. 71.32 W.

TERMINAL NOT IN USE. BUOYS HAVE BEEN REMOVED.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATOR: Maraven, S.A.

LOCATION: Loading Terminal in the Lake of Maracaibo at La Estacada, located at Lat. 10° 42' 30" N., Long. 71° 31' 40" W. Entrance to and leaving this terminal is made between Buoys B-65 and B-66.

DOCUMENTS: As soon as vessel is safely moored Agents' representative will board the ship together with Port Authorities. The following documents are needed on arrival:

1. Clearance from Last Port with the following attached:
   Stores List
   Crew List
   Slop Chest Inventory
   Ballast Certificate
2. Crew List (6 copies).
3. Stores List (6 copies).
4. Slop Chest Inventory (Deck, engines and cabin store listed separately) (6 copies).
5. List of Personal Effects (6 copies).
6. Derat Exemption Certificate (original).
7. Venezuelan Net Tonnage Certificate (original).

See "Tonnage Applicable".

The Health Officer sometimes requests to see the Vaccination Certificates of crew members.

PILOTAGE: (See "Maracaibo Lake"). Pilotage Compulsory.

1. All vessels must call Maraven, S.A. and Agent on VHF Channel 16, when passing the E.M. Buoy and when embarking the Pilot at San Carlos.

2. Reduce speed approaching Inner Channel Buoy B-63; rig accommodation ladder starboard side properly illuminated. Company Cargo Co-ordinator will board between B-63 and B-65.

3. Listen during transit on 2182 kHz and VHF Channel 16.

4. In event of unforeseen circumstances requiring vessels to anchor, area West of Estacada Northern Buoy mooring outside of channel limits will be used.

Vessels proceeding to La Estacada Terminal must enter the Outer Channel and embark the Government Pilot between Buoys B-25 and B-27. After vessel arrives in the vicinity of the E.M. Buoy, Master must contact San Carlos Pilot Station by radio-telephone on frequency 2182 kHz or VHF Channel 16 requesting Pilot between Buoys B-25 and B-27.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge. Once the Pilot is on board the vessel will proceed to La Estacada, reducing speed in the vicinity of Inner Channel Buoys B-63 and B-65 where Maraven Cargo Co-ordinator will board. Accommodation ladder must be rigged up on starboard side.

MAX. SIZE: Water depth in both buoy moorings is 40 ft. mean monthly observed lowest water (MMOLW). Because of the depth of the surrounding approaches, 39 ft. (MMOLW), admissible mid-ships maximum draft in No. 1 is 35 ft. 06 in. fresh water. Under certain tidal conditions, however, with vessels over 60,000 d.w.t., it may be necessary to restrict loading to draft. Masters are requested to be guided by the Cargo Co-ordinator in appropriate draft be loaded.

Berth No. 1: Length up to 720 ft. Beam unlimited.

RADIO: *Information to be cabled to Agent, Maracaibo.*

Upon vessel's departure from the last port bound for La Estacada cable 72, 48 and 24 hours ETA at San Carlos Pilot Station, including in this message last port, Master's name, if A.C. current on board and any requirements. If diverted, cable original destination, also have 5 copies of diversion cable ready on arrival. If the vessel is nominated to load a part cargo only at La Estacada, indicate at which port cargo will be completed. All cables should be sent via PJC (Curacao Radio) and via ITT All American Cables.

A separate cable should be sent to Maraven, S.A. Maracaibo indicating ETA at San Carlos only.

TUGS: Use of 2 tugs of at least 1,600 h.p. is compulsory for mooring and unmooring at La Estacada (Government Decree). Use of 2 mooring launches with crew including a diver, who inspects the submarine loading hoses, is compulsory at La Estacada. These mooring launches remain alongside ship during stay in berth order act in any emergency.

BERTHING: *(a) Description:* Marine Oil Loading Terminal, is an off-shore installation and consists of two permanent buoy moorings, No. 1 to the South, and No. 2 to the North (out of service).

Berth No. 1 consists of 4×14 ft. cylindrical steel buoys, each fitted with a pelican hook to which ship's mooring lines are attached by contractor's mooring launches. On each buoy there are 2×1.625 in. improved plow steel wirelines to supplement mooring lines in order to provide additional security during strong winds. In Berth No. 1 the plow steel wires are 520 ft. long.

Ships moored heading North or South according to prevailing current.

(b) Deballasting: There are no facilities at La Estacada to receive and treat dirty ballast therefore *same must be clean.* All ballast is discharged ashore through a 16 in. line.

(c) Mooring: All ships should have an adequate supply of stoppers or other special equipment necessary to handle wires attached on mooring buoys. Vessels mooring in berths must be equipped with 4 ropes forward and 4 ropes aft. Vessels are cautioned that good quality ropes are essential and that they will be held liable for any damage occurring through improper or poor mooring ropes or inability to properly handle same.

Vessels in buoy moorings must have deck winches in readiness for use at all times. Method of berthing will be at discretion of the Government Pilot, as weather and other conditions permit.

During berthing and unberthing, ship's engines, tackle and all other gear must be in operative condition and in a state of readiness for use on immediate notice.

Weather permitting, and berths being available, vessels may be berthed at any hour of the day or night. Mooring buoys are properly lighted.

Government Pilots will assist in mooring the vessel in Berth. Loading hoses can be connected both port and starboard side, according to ship's position. The Company Cargo Co-ordinator will remain on board ship to advise on connecting and disconnecting loading hoses, and loading of cargo.

The Government Pilot will later unmoor the vessel and take her out to the channel for departure.

When ship is in position and mooring wires taut, mooring winches such as tension winches must have their manual brakes put on securely, and should not rely on automatic rendering devices.

During time vessel is at the berth, frequent and regular inspection of mooring essential to ensure that mooring lines are kept taut and that movement of ship is kept to a minimum. When tugs are alongside or assisting a tanker, all cargo openings, permanent ballast tanks, lids and pump-room doors must be closed no matter what grade oil is being or has been carried, unless these spaces are gas-free.

The mooring operations are carried out by 2 mooring launches and 2 tugs.

TANK INSPECTION: As soon as all ballast is discharged and hoses connected, production supervisor or cargo co-ordinator will inspect ship's tanks. If same are dry and clean he will sign corresponding certificate.

LOADING: Berth No. 1 has 1×24 in. loading line with the corresponding manifold. 12 in. – 150 lb. marine loading hoses are used. The berth is capable of a max. loading rate of 22,500 bbls.p.h., with an appropriate reduction for topping-off.

However, maximum loading rate entirely at Company's option and will vary according to circumstances and type of tanker concerned. When completing loading, stoppage of cargo will be determined on board, and Masters are requested to inform Cargo Co-ordinator at least 30 minutes in advance in order reduce pumping rate for topping-off. Cargo Co-ordinator will be in continuous contact with pumping station by means of portable radio. Should this means of communication fail, the following signals on ship's whistle will apply:

One long blast = Stand-by
Two long blasts = Commence pumping
Three long blasts = Stop pumping

Upon completion of loading, Cargo Co-ordinator, together with ship's officer, will gauge ship's tanks and later prepare cargo documentation.

DENSITY: 997 – 1003.

FRESH WATER: Must be ordered with first ETA cable to Agents so arrangement can be made with supplier. A water barge and a tug m be hired.

FUEL: Bunkers and marine fuels supplied by barge before or a loading operation at anchorage. Agent should be given prior notice

CONSULS:

The following have consular representatives in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Only smaller repairs can be effected locally; howeve technicians available for radio and radar repairs. Contact Agent.

SURVEYORS: American Bureau of Shipping and Lloyd's Register ha Agents in Maracaibo.

SHORE LEAVE: Launch is primarily for use of authorities and compa staff, but will effect trips for crew if required by Master. Contact Age who will make necessary arrangements.

GUARDS: One National Guard stationed on board. He must be provid with sleeping quarters and seated in officers' mess for meals.

He is the representative of the Venezuelan Government and therefo any courtesy extended to him will be appreciated.

CLEARANCE: Immediately after termination of loading operation hoses are disconnected and Government Pilot will proceed to unmo vessel. In the meantime, cargo documents are prepared by Termi personnel, and as soon as vessel is cleared, she will proceed to h destination.

CURRENT/TIDE: Current velocity max. 4 knots. Nature of bottom, mu The tidal range in feet for the Estacada Terminal is Springs 1 Neaps 0.5.

GENERAL: *(a) Cash Advance:* Cash advance will be in local curren (Bolivares). Cable in advance any such requirements to Agents.

(b) Mail: Outgoing correspondence may be given to the man dispatcher. For personal mail (crew) a list should be made, indicati name of crew member, quantity of letters and destinations, and hand to Agents.

(c) Ship Chandlers: 2 ship chandlers in Maracaibo who can supp vessels with fresh meat, fish, vegetables, fruits, etc. Requiremen should be transmitted in first ETA cable to Agents.

TONNAGE APPLICABLE:

The Venezuelan Port Authorities base part of their pilotage charge on the size of the vessel, i.e. on registered net tonnage or on Venezuela net tonnage.

On Registered Net Tonnage:

Venezuela will accept the tonnage of ships registered in countries wi which they have a reciprocal tonnage agreement.

As of this date, such countries are:

Denmark
France
Germany

On Venezuelan Net Tonnage:

Ships not registered in countries listed above, when calling i Venezuelan ports for the first time, must be measured for Venezuela tonnage by the Captain of the Port. It is the usual practice to take ashor the ship's Panama Canal or Suez Canal Certificate, which is used as basis for recalculating tonnage under the Venezuelan regulations, an return it before sailing. The Venezuelan Admeasurement Certifica when later issued, is forwarded to the owners. A fee is charged for th certificate, which is payable only on the ship's first call.

AUTHORITY: Capitania de Puerto, La Ciega – Maracaibo, Venezue
Tel: 226480, 226880. *Cables:* Caripuerto.

Section C

LA SALINA (Lacustre): 10.22 N. 71.28 W. (See Pla

(N.B. For important details of Documentation, Pilotage, etc., se "Maracaibo Lake").

OPERATORS: All terminal facilities are under the control o Lagoven, S.A.

APPROACH: Entrance and leaving this terminal is made betwe Buoys B – 97 and B – 98.

LOCATION: La Salina located on Eastern shore of Lake Maracaibo Lat. 10° 22′ 18″ N., Long. 71° 27′ 49″ W. about 60 miles from th Entrance Buoy "EM".

DOCUMENTS: These are generally placed on board prior to departu Vessels whose Master accepts the early departure procedure may s with documents in blank. Figures are then radioed for inclusion in bla documents. Outward Clearance documents are placed on board th vessel prior to departure.

PILOTAGE: In the event that no contact can be made with San Ca Pilotage Station, or if there is a language problem, contact should made with Vensport, at La Salina by voice radio on VHF Channel (156.8 MHz).

The Docking Master boards by tug or launch at the waiting anchora or in the outer part of the navigation channel leading to the termina

NCHORAGE: The waiting anchorage off La Salina is located mediately Eastward of Buoys B – 97, AS – 1 and AS – 3 (Old numbers -1, M – 1a and S – 1); it has a depth of between 40 ft. and 41 ft. d fair to poor holding ground in soft mud.

ESTRICTIONS: None. The port is open for navigation during the day nd night, allowing ships to enter and sail at any hour.

AX. SIZE: Up to 112,000 d.w.t., LOA 900 ft. and max. draft 39 ft. rackish water) at Berths No. 6N, 6S, 7N and 7S. Max. distance bow manifold 450 ft.

Pier No. 3 (West Side) LOA 690 ft., draft 26 ft. and 36,000 d.w.t.

Pier No. 3 (East side) LOA 575 ft., draft 26 ft. Max. 18,000 d.w.t.

No restrictions on vessel's beam at any of the berths.

The access channel to La Salina has a least depth of 41 ft.

pecial Note: Maximum draft for loading vessels at La Salina Lacustre erminal is actually restricted to 39 ft. Vessels loading at this maximum raft of 39 ft. must cross the outer bar channel at HW.

ADIO: The cable and telegraphic address for the Lagoven, at La Salina s "Lagoven La Salina". Radio messages to and from ships at sea are uted through the Government radio station at Maiquetia (La Guaira) all letters YVG. This station operates on a 24 hour continuous watch n 500 kHz and 2182 kHz.

Listening frequencies: long wave: 500 kHz; medium wave 2182 kHz; ort wave Channels 5 and 6.

Working frequencies: long wave 417 kHz and 464 kHz; medium wave 120 kHz; short wave 4222 kHz, 6351.5 kHz, 8461 kHz and 7141.5 kHz.

Answering frequencies: long wave 500 kHz.; medium wave 2182 kHz.

ours of watch:

4222, 6531.5 kHz	0100 – 1300 hrs. GMT
8461, 17141.5 kHz	1300 – 0100 hrs. GMT

ables for vessels may also be routed via Curacao Radio, call sign PJC.

Radio notice of arrival should be sent 72 hours prior to arrival at La Salina and corrected if weather or other conditions delay the vessel.

Vensport La Salina handle all communications between vessels and agoven Terminal control tower. VHF radio-telephone Channel 16 156.8 MHz) may be used for initial contact. Channels 6, 10, 13 and 14 re also available on a 24 hour basis.

All vessels en route to La Salina may also communicate with Lagoven muay or Caripito Marine Offices and request that messages dealing th corrected ETAs, Pilots and other business be relayed to Vensport La Salina.

HF: Transmit on VHF when passing Aruba or Amuay Bay updated TA messages to either Lago Marine or Amuay Marine for relay to La Salina. Contact Vensport La Salina on VHF when within reach ormally after passing General Urdaneta Bridge) for latest berthing structions.

UGS: Lagoven S.A. maintains one 3,000 h.p. diesel tug and one 300 h.p. diesel tug. Tug-boat assistance is considered essential and s afforded to all vessels entering, leaving or shifting in the harbour.

Additional tugs can, in an emergency, be ordered from Maracaibo. The tugs are usually employed in the alongside mode and are made ast using their own ropes (2.5 in. diameter nylon).

ERTHING: At La Salina, Lagoven maintains a deep-water terminal Lacustre) consisting of an island where are located 2 finger piers, each 100 ft. in length and 500 ft. between piers, providing 4 berths to ccommodate tankers up to 112,000 d.w.t. Berths are numbered 6N, S, 7N and 7S, from North to South. At these berths various products an be loaded simultaneously namely – 6N and 6S – Crude, Naphtha nd Butane; 7N and 7S – Crude; Pier No. 3 (West side), Propane and utane; Pier No. 3 (East side), same as West side but not concurrently th West side. In addition there is an offshore platform (Pier No. 3) here liquefied petroleum gases (Butane and Propane) can be loaded.

Instructions concerning berthing are given by Vensport La Salina by eans of radio-telephone.

The use of an anchor when docking is permitted at all berths. It is onsidered prudent to have the outboard anchor hove-out prior to ntering the harbour in order to facilitate speedy release if necessary hile docking. The Pilot will advise whether the ship is to be berthed ort or starboard side to the dock.

The tugs are made fast on the seaward side, one forward and one ft. Vessels berth under normal circumstances always with head in, hich is a relatively simple manoeuvre. Vessels are berthed starboard de alongside Berths 6 North and 7 North; portside alongside at erths 6 South and 7 South.

When the vessel's bow is between two and three ships' lengths from e head of the pier, the engines are stopped or reversed. The vessel en slowly enters the berth parallel to and about 40 ft. from the ontinuous fender face. When the vessel's bow is just past the berth's anifold area, the forward spring line is sent in by heaving line. The essel is then positioned by using its ropes and is pushed alongside by gs. The current sets mostly in a general Northwesterly direction with velocity between 0 and 2 knots. This should be taken into account, articularly when berthing at the South facing berths where the vessel ay be set onto the pier.

Moorings: Mooring bollards spaced with 80 ft. intervals are located n both sides of the pier, and provide the basis for a potentially excellent ooring configuration consisting of:

3 Head lines
3 Stern lines
2 Breast lines
1 Forward, Spring line and
1 Aft Spring line.

LLAST: Vessel should arrive at La Salina with sufficient ballast to ermit safe handling. Government Pilot requirements in this connection der normal weather conditions are interpreted as drawing proximately 8 ft. forward, 18 ft. aft, on a T – 2 or similar type tanker, d 11 ft. forward, 20 ft. aft on a 26,000 d.w.t., on larger type vessels e minimum draft required is 14 ft. forward and 22 ft. aft.

Ballast should be carried in a minimum number of tanks, and all other ks stripped, so as to minimise deballasting time.

It has been established that one of the major causes of contamination of crude oil is the relatively small amount of salt water remaining in the ship's tanks, pumps, and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and downtime to refining equipment, besides presenting many other processing problems.

It is therefore requested that the full co-operation of the Master and Officers of ships loading for Aruba, be given to ensure that all ballast tanks and lines are flushed with lake water and stripped as dry as possible.

Vessels equipped with a separate and completely segregated system of ballast tanks, lines and pumps, will be permitted to discharge ballast and load cargo simultaneously, providing approval of both the pier foreman and Petroleum Inspector is secured.

A Pier Supervisor who is in direct communication with the loading pumphouse is stationed at each pier during the entire time the vessel is discharging ballast or cargo or receiving cargo.

All dirty ballast must be discharged ashore. The terminal has a 100,000 bbl. reservoir connected to two high capacity separator units. Max. ballast discharge is 40,000 bbls./hr. with max. 130 p.s.i. at rail. One or two hard arms (12 in.) are usually connected for ballast discharge.

If it is desired to follow the "load-on-top" procedure it is requested that the marine representative be informed on arrival.

POLLUTION: There are no shore facilities to recover an oil spill. The Venezuelan authorities take a very serious view of oil pollution and heavy fines are imposed for violations of the strict pollution rules. A government representative is stationed at the terminal. It is therefore important that all precautionary measures be taken and spills avoided. In case of a spill, the port services section should be informed immediately by VHF or telephone, which is located on the pier. The use of dispersants or detergents on the water is not permitted.

LOADING: Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on arrival. Supplementary information including number and size of lines and Chicksan arms will be furnished to the Chief Officer before loading commences. Loading rates will be reduced as required when topping off.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Shut-down controls for all crude oil pumps are available at each loading berth at ship's rail of loading vessels for use in case of emergency only.

LOADING RATES: Loading operations at La Salina Terminal are normally carried out at relatively high pumping rates; up to an average of 40,000 bbls.p.h. Ship's officer will be advised by the pier supervisor at what rate the cargo will be loaded. LPG is loaded up to an average max. rate of 7,500 bbls.p.h. at Platform No. 3.

During periods of calm, loading of gasoline or other similar low flash products may be at lower rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ships' officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Cargo Handling: The terminal is mainly a crude exporting facility, but also LPG, bunkers, condensate and gasoline are handled.

The cargo transfer facilities are:

Berth 6 North and South:
3 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arm for bunkers (located aft of manifold).

Berth 7 North:
4 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arms for bunkers (located aft of manifold).

Berth 7 South:
4 × 12 in. Chicksan arms for crude loading.
3 × 12 in. Chicksan arms for pressurised gas loading (located forward of crude loading manifold)
1 × 8 in. Chicksan arm for bunker (located aft of manifold).

Gasoline, condensate and pressurised butane are handled at Berth 6 at both sides of the manifold.

All connections are standard 150 ASA bolt hole flanges.

The emergency cargo stop button is located in the operators' shelter on both piers.

Crude loading rates up to 50,000 bbls./hr. can be provided.

The loading and discharging of all crude petroleum and its products will be stopped during the passage of an electric storm and ullage covers must be closed and dogged down.

Cautionary Advice: Whenever non-matching flange sizes necessitate the use of reducers (spool pieces), Masters should insist that the reducer or hard arm be adequately supported by a proper jack, and should refuse to let cargo transfer operations commence before a satisfactory vessel manifold and hard arm connection has been provided.

MEDICAL: Complete medical, dental and hospitalisation facilities are available at La Salina. Medical treatment is provided at a private clinic.

Authorisation forms for medical treatment are provided which require the Master's signature. Transportation will be supplied by Vensport La Salina.

If the patient does not speak Spanish or English, an interpreter should accompany him.

DENSITY: Average density at the berth is 1002 but varies dependent upon amount of rainfall. The temperature ranges from 82°F. to 86°F.

FRESH WATER: A limited supply of fresh and boiler water is available at La Salina Lacustre Terminal. Delivery is made through 2.5 in. National Standard Fire Hose Thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker C fuel oil, marine diesel and intermediate fuels are available at La Salina Terminal Lacustre. Delivery is made alongside Piers 6 or 7 by 8 in. diameter Chicksan hose, located about midships. *Loading Rates:* Bunker "C" and intermediate – 3,000 bbls.p.h. Diesel – 2,000 bbls.p.h.

It is the responsibility of the ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

Supplies of lubricating oils in drums are available. Delivery will be effected while loading and requirements should be incorporated in the radio ETA.

FIRE PRECAUTIONS: The recognised fire alarm signal is 4 long blasts with ship's or tug's whistle. An 8 in. fire water main line runs alongside all 4 berths with numerous double 2.5 in. outlets for connection to ship's hoses. Four elevated water/foam monitors are located on each pier providing relatively good fire fighting protection for the main deck area.

The 2 tugs are also equipped with elevated fire water/foam monitors, though on board foam storage capacity is relatively limited.

CONSULS: The following countries have consular representatives in the area:

Belgium
Chile
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany
Great Britain
Guatemala
Italy
Netherlands
Nicaragua
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Vensport's Port Staff will assist with emergency repairs as may be required in each case depending upon availability of competent personnel and equipment. The company's shop facilities while not equipped for extensive ship repairs, may be made available to fabricate or repair items that are urgently required.

The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

Radio technicians are available for minor repairs. With sufficient advance notice a radar specialist can be arranged to board the ship at La Salina.

TIME: GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to Pilot undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking. No launch service for liberty parties is available while vessel is anchored off La Salina awaiting berth.

GENERAL: Representatives of Vensport La Salina board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ships' requirements. The office building is located at the Pier Head Trestle and personnel are available for assistance at all hours.

(a) Bonded Stores. Cigarettes or other stores in bond are not obtainable in La Salina.

(b) Cash Advances. Cash advances are made in local currency, the Venezuelan Bolivare. Cash requirements should be included in the radio ETA.

(c) Charts. On first arrival of each tanker, the Agency Dispatcher will furnish a set of local charts if required. No supplies of U.S. Hydrographic or British Admiralty charts, or sailing directions, are available.

(d) Classification Societies. American Bureau and Lloyd's Register have non-exclusive Agents in Maracaibo, and qualified Masters and Chief Engineers are available for appointment as Surveyors when required.

(e) Gangways. All vessels using the Port of La Salina must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(f) Plimsoll Marks. The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels may be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(g) Port Services. On arrival at La Salina Terminal, a company representative boards vessels, so it is particularly requested that Masters make known to him all ship's requirements. Master should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. La Salina also has radio telephone communication with North and South America and Europe. For further information contact Vensport in the terminal building, Tel. 88491 and 88492.

(h) Rat-guards. By order of the Port Authorities, vessels are required to use ratguards on all mooring lines.

(i) Personnel – Seamen left ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, documents and personal effects are to be delivered to the Vensport Office in La Salina before sailing. A letter is required from the Master advising maximum advances to be made to seamen if any, and instructions concerning repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or Owner, responsible for any seamen left behind in Venezuela.

(j) Provisions and stores. Fresh and dry provisions are supplied by various Ship Chandlers in Maracaibo and Cabimas (La Salina). Master should deliver his signed requisition to the Vensport Office representative who boards on arrival. Provisions would then be delivered to the vessel while loading. The prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc., are competitive; dry stores are considerably higher than in most ports. The Fleet Steward will as in filling requisitions. It is important that the Master sign the S Chandlers invoice as authorisation for the Marine Department to ma settlement.

(k) Mail. Any pending ship's mail will be delivered on board by t Vensport Dispatcher on arrival at La Salina. At same time he will rece ship's mail to be dispatched. The Vensport Dispatcher will acc personal mail only if it carries the proper amount of Venezuelan postag or if Master authorises the postage by signing 7 copies of the Compa Postal Transmittal form. Masters interested in knowing the individu postage amounts to be paid by each crew member, should provide list, in duplicate, of the senders, and number of letters sent by each o identified by a number written on each letter.

Copy of this list will be returned aboard the vessel when leaving th port outward bound. If not ready on time, it will be airmailed to th vessel's next port of call.

(l) Inspection of Petroleum Products and Crude Oil. Chas. Martin Company and E. W. Saybolt petroleum inspectors are available specified.

(m) Laundry. Laundry service is available between 0700 hrs. a 1700 hrs. on week-days. No guarantee can be given on time of deliver

AGENT'S NOTICE: December 1987.

TO ALL MASTERS CALLING AT LA SALINA

We would like to draw your attention to the following:

(a) Terminal of La Salina is an artificial island. For safety reaso during your vessel's call, a permanent (24 hours) taxi service ha been arranged to take you and your crew from island to main ga and vice-versa.
(b) This taxi service MUST NOT be paid for by you or your crew.
(c) No idling or walking around the island and/or terminal is allowe
(d) It is impossible to go through La Salina's main gate without th Harbour Office Shore Pass duly filled in with name, nationalit vessel's name, passport number and date.
(e) Your agent's call name at branch office of La Salina is "Agema La Salina", standing-by 24 hours on VHF Channel 16, telephon numbers 45665 and 43089, direct line of Lagoven 3235. Agency call name at main office also standing-by 24 hours on VH Channels 12, 14 and 16 is "Agemar Maracaibo".
(f) Whenever calling "Agemar La Salina" and no reply is obtaine please contact "Agemar Maracaibo" and leave your message.
(g) If an emergency arises concerning bunkers or cargo, you mu contact Lagoven's employee-in-charge of the pier at the sma house beside the vessel or call by the telephone of the pier to th Loading Master, Tel. No. 3587, 3304 or 3258.
(h) Launch operator's call name is "Servicios Portuarios" on VH Channel 16 (24 hours), Tel: 3491 and 3492. In case you need t contact Lagoven, there is always an employee on the pier with a telephone. Bunkers or water facilities are available at this pier.
(i) Water and bunkers are available at Piers No. 7 and No. 6. Wate is taken through vessel's hose while bunkers by shore's Chicksa or rubber hose.
(j) Two hours before loading operation finishes, a radio call shou be made to "Agemar La Salina", so that arrangements for pil tugboats and other sailing procedures can be made. (*)
(k) In case of oil spillage, an immediate call should be made t "Agemar La Salina" or "Agemar Maracaibo", giving the name o your P & I Club. We will contact the area representative an request their assistance.
(l) It is recommended that a crew member stands-by on VHF, on hour after vessel finishes loading.
(m) Maximum sailing draft is 39 ft. 00 in. even keel – NOT ONE INC MORE.
(n) Crew Disembarking – In order to obtain 25% discount on air ticke and to cover IATA Regulations, Master must issue a lette addressed to Agemar requesting the tickets and mentioning name destination, passport number, nationality, age. If any exces luggage (only 40 kgs. allowed per person), Master has to authoris same and inform agents. Our agent at Maiquetia Airport will tak charge of this expense on behalf of Owners. Weighing of baggag should be done onboard and letter must be done on vessel official paper, signed by Master and with the vessel's stamp on t Crew members disembarking have to keep their Shore Passe *All other shore passes must be returned to the Agent and he mu be informed whether all crew members are on board.*
(o) Medical Attendance – Call immediately "Agemar La Salina" an send the person that is sick to the hospital, by the taxi, also ca Lagoven's Control Tower. Taxi has a visible identification that sa "Linea Zulia". Taxi driver will not only take the crew member t the hospital but will also pick up Agemar's agent and service orde as well.
(p) No external painting of vessel (hull) is allowed while berthed o anchored. It is forbidden to deballast from cargo tanks (clean o dirty) into the lake. Heavy fines will be imposed on those no complying with these regulations. Smoking is not allowed on a piers.

(*) Please call by VHF Channel 16 to "Agemar La Salina", today t 1800 hours local time, informing the estimated time of completion o loading.

MARACAIBO: 10.42 N. 71.39 W.

On the N.W. shore of the Lake Maracaibo.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at one of the Terminals in the Lake of Maracaibo.

N.B. For information details of Documentation, Pilotage etc., see "Maracaibo Lake").

Also see "Shipmaster's Report" before Bajo Grande.

ANCHORAGE: The Pilot will not con the ship into the anchorage, but will indicate the proper location to anchor. Care should be taken because of small boats and ferry traffic.

ACCOMMODATION LADDER: Vessels must provide an accommodation ladder. The use of trunk ladders, pilot ladders, etc., is contrary to port regulations. Port Authorities will board only by means of an accommodation ladder. It is recommended to rig this in advance to avoid unnecessary delays.

BOARDING PARTY: The boarding party usually consists of the following persons: One Quarantine Official, Two Customs Officials, One Port Captain's Representative, Two representatives (Agent and Mooring Master).

RADIO: "Radio Marina" transmits information of interest to navigation every day from Monday to Friday from 1000 hrs. to 1015 hrs. and from 1600 hrs. to 1615 hrs. on frequency of 4,420.7 kHz in the 60 m. band, output 1 kW. All bunker, lubricating oils, water and other requirements should be included in the cable giving ETA of the vessel.

TUGS: Service not compulsory, assistance is rendered if required by the Harbour Master.

BERTHING: The manoeuvring area within Maracaibo harbour has a depth of 26 ft.

		Length	*Depth alongside*
Wharf No.	1	106 m.	15 ft.
" "	2	106 m.	15 ft.
" "	3	159 m.	15 ft.

" "	6	135 m.	26 ft.
" "	7	135 m.	26 ft.
" "	8	135 m.	26 ft.
" "	9	120 m.	25 ft.
" "	10	120 m.	22 ft.
" "	11	120 m.	22 ft.
National Brewery Wharf		125 m.	19 ft.
Regional " "		120 m.	21 ft.
New Pier (2 berths)		—	30 ft. – 33 ft.

STEVEDORES: Normal working hours 0700 – 1100; 1300 – 1700 and 1800 – 2300 hrs.

MEDICAL: Complete medical services are available.

FRESH WATER: All wharves supplied with fresh water by 2 in. hoses. Rate 15/20 t.p.h. Fresh water also available from local contractors with barges.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available at Maracaibo from local contractors with barges. Supplied only by barge at the wharves or anchorage. Lubricating oils are also available.

CONSULS:

	Telephone		Telephone
Belgium	3235	Italy	—
Colombia	72232	Mexico	6781
Costa Rica	6511	Netherlands	4621
Denmark	6531	Nicaragua	76703

Great Britain	6169	Sweden	6511
Guatemala	71193	United States	2123

REPAIRS: No major repairs facilities are available; however, repair work can be done through local machine and electrical shops, and shore labour can be furnished if required. Radio and radar technicians are also available.

AIRPORT: International Airport "Granode Oro" situated N.W. of Maracaibo City served by many national and international airlines. A second airport with cargo and passenger services is situated at Santa Barbara del Zulia, on the banks of the Escalante River.

HOLIDAYS: All Sundays; 1st January; Good Thursday and Friday; 19th April; 1st May; 24th June; 5th July; 24th July; 12th October; 24th October; 18th November; 17th December; 25th December.

POLICE/FIRE/AMBULANCE: Police tel. 3821; Fire tel. 6585; Ambulance tel. 2209.

TELEPHONES: There is no service for connecting telephones on board vessels. Public telephones are situated in the warehouses adjacent to all wharves.

PROVISIONS: Fresh and dry provisions are available through ship chandlers in Maracaibo for delivery at Maracaibo Harbour or at the terminal.

SHORE LEAVE: Launch service in the Maracaibo harbour is readily available for official ship business. For personnel shore leave, depends on launch availabilities on arrival.

SHIPMASTER'S REPORT: 1976

Communication: Considerable difficulty was experienced raising La Guaira Radio Station (YVG) for transmitting the necessary ETAs. Our messages were transmitted via Portishead (GKR). Agents, however, advised that messages are normally transmitted through Curacao (PJC).

Pilotage: Masters making their first visit to the port are to embark the Pilot at Punta Cardon (Paraguana Peninsula). Ample notice must be given to the Agents as the Pilot has to be flown there from Maracaibo. Masters making their first visit to Maracaibo must also disembark the Pilot at Punta Cardon on departure. Masters may thereafter proceed directly to San Carlos pilot station.

Communications can be made through the Harbour Master's Office Punta Cardon.

Delays experienced off Punta Cardon did not occur on this particular occasion. Pilot boards and normally rests in the pilot's cabin until 30 minutes from the "EM" Buoy.

Berthing: 2 tugs are compulsory for vessels berthing/unberthing when the vessel's length exceeds 476 ft. All other vessels 1 tug compulsory.

Stevedoring:

Normal working hours
(Monday – Friday) 0700 to 1100 hrs.
1300 to 1700 hrs.
1800 to 2300 hrs. (Overtime)
(Saturday) 0700 to 1200 hrs.
(Sundays & Public Holidays) *No work.*

Vessels must be fully rigged and hatches open and ready in all respects to load or discharge at least 15 minutes before stevedores arrive. If necessary shore labour is available to assist.

SHIPMASTER'S REPORT: 1975.

Arrival Messages: Cable Agent – Maracaibo via La Guaira Radio on departure Cristobal with ETA Punta Cardon, draft, cargo stowage, gangs required and requirements. (For subsequent calls vessel will be permitted to proceed to San Carlos pilot station to embark Pilot).

24 hours prior to arrival repeat ETA Punta Cardon, to be sent as described above.

2 hours before arrival at pilot station – Punta Cardon call on Channel 12 VHF to update time of arrival.

Pilotage: Pilot boards at Punta Cardon about 1 mile off the tanker berths from a launch with a "roof landing", therefore the pilot ladder must be about 6 ft. from the water. This Pilot travels from Maracaibo to meet the vessel at Punta Cardon and takes the vessel all the way to Maracaibo. Punta Cardon to "EM" Fairway Buoy – 78 miles. "EM" Buoy to Maracaibo – 35 miles.

Once the vessel has made a call at Maracaibo the Master is then exempt and may take his vessel direct to the "EM" Buoy and negotiate the buoyed channel for 12 miles to San Carlos Pilot Station. The channel is straight, wide and the buoys are well lit and marked. A Westerly set is said to prevail across this channel from the "EM" Buoy to San Carlos Pilot Station but it was not evident on our passage in or out. However, a strong ebb tide was noticed running out to sea off San Carlos Pilot Station. The channel from the "EM" Buoy to Maracaibo is dredged to 41 ft. but off the berths at Maracaibo the maximum draft is 26 ft. There had been a lot of unseasonal rain prior to our call and we noted that the density of the dock water was 1001.

Documents:

1 Health Declaration.
8 Stores Lists.
8 Crew Lists.
6 Passenger Lists (If no passengers these papers have to be entered as "Nil" passengers).
8 Crew Declaration Lists.
2 Venezuelan Manifests (Sent from N.Z.).
2 Sets Bills of Lading (Sent from N.Z.).
12 Sets Tally Books (Sent from N.Z.).

Stevedores: "Servicios Portuarios de Maracaibo".

They have 24 gangs in the port and mechanical equipment to support 16 gangs. Normal working hours are 0700 – 1130 and 1300 – 1630 hrs. Overtime 1800 – 2230 hrs. Saturday 0700 – 1200 hrs. No work on Sunday.

The labour works well but is not accustomed to working refrigerated ships and when the gangs work into the wings the Agent had to supply the men with warm clothing and hot coffee. Their discharge rate for cartons of frozen cream was 18 t.p.h. In hindsight I would suggest that it would be advisable to stow frozen cream for Maracaibo in a hatch square if possible to obviate the need for the labour to go into the wings as the complaint about the "cold" does not arise until this happens. They had 14 open trucks laid on to take the cartons of cream direct to the butter works and they had an unbroken flow so the "hook" was not held up on this account.

Berthing: There are berths for 6 ocean going ships and they say they can berth these ships up to 26 ft. Tugs are available and because of berthing starboard side to we used 2 tugs. The berths are concrete with rubber fenders and there is plenty of working space for the mechanical vehicles. The Pilots speak a little English but sufficient to make themselves understood and are capable. Fresh water is available alongside but I understand if bunkers are required they have to be brought by barge and there is a minimum charge of $1,000 irrespective of the amount of fuel required. They have a repair facility which is in the hands of a local engineering company. Fresh vegetables are available and can be recommended, supplied by the only providore. He maintains a listening watch on Channel 16 VHF and has a liaison with Agents for any messages sent prior to arrival at the berth. His station is called Automercado Venezia.

EL TABLAZO: 10.45 N. 71.32 W. (See Plan)

(N.B. for important details of Documentation, Pilotage, etc. see "Maracaibo Lake".)

Also see "Shipmaster's Report" before Bajo Grande.

LOCATION: S.E. part of Puerto Miranda. Entrance by Buoys 63 and 64. Distance from San Carlos Pilot Station 16.5 miles.

South Berth:	Three urea in sacks conveyors. Cargo capacity 2,400 sacks of 50 kg. each per hour.

DENSITY: 997 – 1003.

FRESH WATER: Available, 8 t.p.h., but expensive.

OPERATOR: Petroquimica de Venezuela, S.A., (Pequiven) – El Tablazo, Apartado 159, Manejo de Productos, Maracaibo, Estado Zulia, Venezuela. *Tel:* 311-388. *Telex:* 23206. *Contact:* Captain Antonio Parcero.

PUERTO MIRANDA: 10.46 N. 71.34 W. (See Pla

(N.B. For important details of documentation, Pilotage, etc., "Maracaibo Lake").

LOCATION: Situated at Eastern shore of entrance to Lake of Maracai in position Lat. 10° 46′ N., Long. 71° 34′ W.

OPERATOR: Maraven, S.A.

DOCUMENTS: On arrival the Master must present to the Port Authori the following documents:

1 copy Clearance (Note: If the vessel was diverted, Master has present a telegram in which vessel received instructions to proce to Puerto Miranda).

7 copies Crew List.

3 copies Stores List.

1 copy Vaccination List.

3 copies Personal Effects Lists.

Vessel sailing for U.S. ports requested to have American Crew Li ready on arrival so it can be forwarded to U.S. Consulate without dela

PILOTAGE: Compulsory. On arrival Puerto Miranda under Governme Channel Pilot's assistance, the vessel will be boarded by Governme Berthing Master, who will assist Master in docking and undocking.

For Channel Pilot see "Maracaibo Lake".

ANCHORAGES: North anchorage area is situated at Northern part the exit channel and is marked by the Buoys No. B57B, AP1, AP2 a AP4. Maximum depth 10.0 m.

South anchorage area is situated at Southern part of the exit chann and is marked by Buoys No. B59, AP3, AP5 and B63. Maximum dep 10.36 m.

RESTRICTIONS: There are restrictions for docking and undocking whe strong currents are running.

MAX. SIZE: Length 910 ft., breadth 147 ft., draft 39.5 ft.

HEALTH: On arrival, when Pratique is requested, all vessels should international flag signal "Q", or show a yellow light during hours darkness. Customs will grant Free Pratique only when they are on boa

RADIO: All information such as ETA, ballast, etc. may be sent throu Curacao Radio. Telex No. 1143-6472.

Puerto Miranda can be contacted by Telex No. 61115.

VHF: Channels 16 and 12. Vessels are requested to call Puerto Miran about 3 hours before arrival at the port. Calls made in Spanish languag will be answered promptly, as there is always a Spanish-speaking cle on duty. Calls in English will be answered by the Supervisor on duty except when he is occupied, in which case the call should be repeate later. As an alternative, the Master could ask Government Pilot to repo in Spanish his arrival to Puerto Miranda.

TUGS: 2 motor tugs of 4,200 h.p. assist all vessels in docking an undocking. Tugs always used as required by pilots.

BERTHING:

Jetties/Berths	*Depth M.M.O.L.W. (ft.)*	*Maximum Permissible Draft (ft.)*	*Maximum Permissible Length (ft.)*	*Maximum Permissible Displacemen (tons)*
Jetty No. 2				
1 (North Outer)	42	39.5	910	90,000
2 (South Outer)	42	39.5	910	90,000
3 (North Inner)	35	34	†575	62,000
4 (South Inner)	28	27	‡575	62,000
Jetty No. 3				
5 Inshore (North Seaward)	42	39.5	910	90,000
6 Inshore (South Seaward)	42	39.5	910	90,000

Remarks: Alongside UKC for ships up to 700 ft. LOA = 1 ft.
Alongside UKC for ships over 700 ft. LOA = 2 ft.

(†) LOA in Berth No. 3: This can be increased up to 620 ft. whenev vessel on Berth No. 1 has LOA up to 555 ft.

(‡) LOA in Berth No. 4: This can be increased up to 610 ft. Berth No. 2 or 5 are empty when vessel arrives, then Berth No. 2 ha to be temporarily restricted to vessels up to 665 ft. LOA

The alongside drafts are subject to reduction owing to depth in inne and outer channels.

Vessels drawing over 37 ft. 06 in. will proceed according to month sailing draft table issued by Maraven, S.A.

MEDICAL: Written request for medical attendance, as well as a sho pass, is always required. Master must inform by telex how many cre members will be sent to Maracaibo through the Agent. Ample hospi facilities available at Maracaibo.

TANKERS: Discharge lines 12 in.

Tank cleaning and dirty ballast facilities up to a maximum of 25% vessel's deadweight.

Discharge of waxy slops and sewage water is forbidden.

Maximum receiving rate for ballast discharge 1,000 t.p.h.

Maximum loading rate 6,000 t.p.h.

Winds are mainly from the N.E. quadrant.

Vessels of any deadweight must secure with at least:

Forward: 4 headlines; 4 breasting fibre ropes and 1 spring in Berth No. 1 and 2.

Aft: 2 stern lines; 4 breasting fibre ropes and 1 spring in Berths No. and 2.

In Berths No. 3, 4, 5 and 6. Forward: 2 head lines; 4 breasting line and 1 spring.

A suitable gangway will be provided by the shore installation. Whe it is out of order vessel's gangway has to be used.

The terminal assist in the event of any vessel spillage; but the Mast is obligated to make his own arrangements to control the spillage.

BALLAST: *Agent's Notice:* September 1987.

For your guidance please note Maraven's tariff stipulates an additio charge of U.S.$515.00 per hour for extra berth occupation covering a delays attributable to the vessel (tank cleaning, repairs, etc.).

It is important that vessel arrives with tanks in suitable conditio load as per charter party.

If tanks are not accepted by Inspector, the Terminal will charge additional berth occupancy as per above, and if vessel proceeds to anchorage for further cleaning, Terminal fee (tugs and launch for running lines) will be charged again in full for second docking.

The volume of ballast accepted without extra charge to the vessel is up to 25% of her Summer deadweight.

For vessels over 115,000 S.D.W.T., volume in excess of 28,750 tons ballast also applies.

DENSITY: Density of water at berths 997-1003.

Density of water in outer channel 1015-1025.

FRESH WATER: Available at all jetties at a loading rate of between 20 t.p.h. to 30 t.p.h., depending on number of vessels being supplied at any one time. Approximate cost is U.S.$4.0 per ton.

FUEL: Available ex-wharf: Bunker "C", thin fuels from 200 to 3,500 seconds Redwood, and marine diesel. Delivery rate 400 t.p.h. and 80 t.p.h. respectively.

Gas oil, fuel oil and thin fuels may be supplied by barge ex-Maracaibo, delivered at anchor at a maximum rate of 110 t.p.h. and 140 t.p.h.

Notice in advance is requested for delivery.

FIRE PRECAUTIONS: Any hot work is forbidden whilst alongside the Pier. Terminal approval is compulsory for any special requirements.

CONSULS: On all Italian vessels, the Consul comes on board on arrival. Other Consulates are at Maracaibo: Colombia, Netherlands, Panama, Peru, Spain, Great Britain, Guatemala, Switzerland, U.S.A., Chile and Portugal.

REPAIRS: There are small workshops in the area. Contact Agent on arrival.

SURVEYORS:

(1) Cargo Inspectors:

Saybolt. Telex 61120 Maracaibo. Tel: 76975.
Caleb Brett. Telex 23333 Caracas. Tel: (02) 325875.
Inspecciones C.A. Telex 62292 Maracaibo. Tel: 78642.
AIVEPET. Telex 21050 Caracas. Tel: (02) 9860422.
Chas. Martin. Telex 62451 Maracaibo. Tel: 78651.
S.G.S. Telex 23324 Caracas. Tel: (02) 338569.

(2) Surveyors:

Lloyd's Register, American Bureau, Bureau Veritas and Norske Veritas.

CUSTOMS ALLOWANCES: One opened packet of cigarettes allowed to be taken from vessel by each crew member when going ashore. When a crew member signs off, he must present his personal effects to the Customs.

REPATRIATION: Crew changes and repatriation possible. All the arrangements are made by the Agent.

AIRPORT: An International Airport is situated in Maracaibo City. It is served by National and International Airlines. All arrangements through the Agent.

TIME: GMT minus 4 hours.

HOLIDAYS: Do not affect port operations, port works throughout 24 hours, 7 days a week.

POLICE/AMBULANCE/FIRE: All contact must be made in Spanish language. The supervisor will assist in making contact.

Telephones: Police 169. Fire 166. National Guard 168.

EMERGENCY CO-ORDINATION CENTRE: Port Captaincy at Maracaibo, Tel: 9-0-223279 or VHF Channel 16.

TELEPHONES: Whilst alongside, a telephone is placed on board for operational purposes, emergency and internal communication with Maraven telephones. There is no charge.

SERVICES: Radar repairs, R/T repairs, gyro-compass adjusting and all types of electronic repairs.

BANKS: The nearest bank is located at Los Puertos de Altagracia or at Maracaibo City.

STORING: Vessel can be stored by barge or truck; but it is strictly prohibited by barge during loading or discharging, likewise it is prohibited for truck to proceed alongside the ship during loading or discharging.

SHIP SUPPLY SERVICES: Available in Maracaibo. Contact to be made through the Agent.

SHORE LEAVE: Not granted until shore passes are stamped and signed by Authorities. Passport and shore pass required by all crew members going ashore. Passes must be shown to guards at gangway and gates. Crew members must be properly dressed before proceeding ashore. Master must collect all passes and return them to Agent before vessel's departure.

DELAYS: Delays can be expected during deballasting if the levels in the pits are high.

GENERAL: *(a) Tides:* In view of the changing depth in the channels which allow navigation to vessels up to about 70,000 d.w.t. fully laden at high water, permanent predictions of sailing draft tables have been prepared by Maraven S.A., and they will send these on board ships of over 47,000 d.w.t.

(b) Currents: The tidal current (Lunar tide) at this port can at times be very strong and subject to changes. Usually the outgoing tide runs for 7 to 8 hours against 4 to 5 hours for incoming tide. Direction approx. at right angles to jetty.

(c) Movement of Passengers: Embarkation or disembarkation of passengers through this port is not allowed by Venezuelan Law, as this Terminal is only authorised by the Treasury Ministry (Ministerio de Hacienda) exclusively for exporting crude oil.

(d) Failure to Rejoin Vessel: If any member of crew is not aboard at sailing time, Authorities will not clear vessel although permission may be given to proceed to anchorage if the berth is required, If sailing permission is granted, Master is required to sign letter accepting all costs in connection with this matter being for Owner's account.

(e) Launch Service: Masters who have to go on business to Maracaibo can make use of public service launches. Please contact your Agent.

(f) Guards: Custom Guards (Guardia Nacional) will be posted on all vessels and Masters are reminded that these guards must be accommodated and treated in the same manner as ships' officers. Non-compliance entails not only a fine but will result in delays in clearance and cargo operations.

(g) Visitors: Only persons on business allowed on piers. Visitors, as guest of Master, allowed to board vessels provided a written and signed request presented by Master to Port Services Department. Further particulars covering procedure for obtaining permits for visitors can be obtained from Port Services Office.

(h) Charts — Nautical Publications: On arrival of each tanker the Agency Representative will furnish a set of lake charts if required. No supplies of U.S. Hydrographic or British Admiralty charts or Sailing Directions, Nautical Almanac, etc., are available at this port.

(i) Films Exchange: Films may be exchanged at Maracaibo.

(j) Fire Alarm: Each Thursday morning at 1100 hrs. there will be a test of fire alarms including sirens at the wharves.

(k) Cash Advances: Local currency is Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in vessel's radio ETA, to permit delivery on board on arrival.

REGULATIONS: Following regulations should be strictly observed by the vessel's crew whilst alongside or at anchor. Non-compliance with these instructions entails not only a fine but delays in cargo operations.

1. Use of rafts for painting the ship's sides is strictly prohibited.
2. Lifeboats should not be lowered without the special permission of the Government Port Captaincy.
3. Swimming in the harbour is strictly prohibited.
4. Waste water, sanitary or other must not be discharged on jetty.
5. It is strictly prohibited to paint ship's name or others on jetties. When this occurs the vessel will be charged for the cleaning.
6. Painting in ships alongside is strictly prohibited.
7. Before start of cargo operations it is compulsory to execute all requirements established in the Check List.
8. It is necessary to keep a close and constant watch on moorings and to adjust when necessary. When adjusting, call for assistance of tugs before slackening off any mooring lines, if the current is setting the vessel off the pier.

AUTHORITY: Maraven, S.A. Apartado 829, Codigo Postal 1010A, Caracas, Venezuela. *Tel:* 908.2111. *Telex:* 23535, 23536. *Cables:* Maraven Caracas.

Section F

PUNTA DE PALMAS: 10.24 N. 71.34 W. (See Plan)

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake".)

OPERATORS: Maraven, S.A.

FLAG: The Authorities require the Venezuelan flag to be flown from the mast head from the time the vessel enters the outer channel to come into the port until it leaves again by the same channel.

LOCATION: The terminal is located at Punta de Palmas del Sur, approximately 13 miles South of the Port of Maracaibo on the West shore of Lake Maracaibo. The terminal proper may be identified by a 300 ft. radio tower, having 2 small red lights 200 ft. from the base, and 1 large red light on top of tower. The top light flashes every 2 seconds.

PILOTAGE: Vessels which arrive have the option of taking on the Official Pilot at the following places:

(a) In the outer chanel of the Lake of Maracaibo, between Buoys B-24 and B-26.

(b) In the anchorage area, located approximately 5.5 miles to the N.E. of the Island of San Carlos and to the East of the Buoy B-17. This area is identified by a green light buoy, equipped with a radar reflector (position: Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W.).

(c) On the "EM" Buoy (i.e. Entrance to Maracaibo), there is also a radar reflector (position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W.).

The Official Pilot who comes on board at San Carlos will take the vessel to Maracaibo. At times, due to bad weather, the Maracaibo Port Captaincy cannot guarantee the embarkation or disembarkation of Pilots at the "EM" Buoy or in the anchorage at Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W. For this reason, Masters must contact the pilots station at San Carlos so that they may give him appropriate instructions as to the place of boarding or disembarkation of the Official Pilot, who, generally speaking embarks between Buoys B-24 and B-26.

The system of communications which vessels use with the pilots station of San Carlos will be the morse lamp, radio-telephone or radio. The frequencies on which San Carlos listens out are: Radio 2182 kHz. Radio-telephone 156.6 MHz. It also operates with frequencies 2080, 2120, 2638, 2738 kHz R/T and 156.8 MHz VHF.

Vessels sailing from Punta de Palmas will take on the Official Pilot at the mooring where they are located after having terminated their loading operations. This Pilot must be requested one hour and forty-five minutes before the estimated time of being ready to sail. Vessels which embark their Official Pilot at Punta de Palmas to sail to Maracaibo will change their Pilot again on arriving at that port. The Pilot who embarks will guide the vessel to the proximities of the Island of San Carlos, between the towers E-31 and E-33, where he will disembark onto a pilot launch. The Port Captaincy of Maracaibo has given instructions to shipping Agents for the purpose of informing Masters and Owners of vessels that every Master must identify himself in advance to the pilot station at San Carlos at any time of the day, when they are arriving at Buoys B-17 and B-19, and when they are sailing at T-42 and T-40. These instructions are of an obligatory nature in order to keep the Pilots' service informed at all times of any emergency that may arise. Also to avoid an Official Pilot going out unnecessarily from his base, especially during the night in the belief that the vessel which is in sight requires his services; in this case both the service of the launch and that of the Pilotage not given will be charged to the ship's Agent or Representative.

Lake Pilotage: An Official Government Pilot will assist every ship in crossing from Maracaibo to Punta de Palmas and in its exit voyage from Punta de Palmas to Maracaibo. This Pilot will also assist in the operations of mooring and unmooring. The Agent will inform the Master and the Official Pilot of the time determined for berthing the vessel when it arrives at Maracaibo. Vessels which load in Punta de Palmas must request a Pilot for their exit journey at least 1 hour 45 minutes in advance of the time at which they consider the vessel will sail.

CARGO DOCUMENTS: Vessel's clearance and cargo papers will be delivered to the Master on arrival in Maracaibo Harbour outbound. Maraven will accept no responsibility for delay in clearing a vessel due to unavailability of personnel from offices of the Port Authorities.

APPROACHES: The buoy which indicates the entrance to the outer channel ("EM" Buoy) is located in the geographical position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. The light of the "EM" Buoy has the following characteristics: white light, with 1 flash every 10 seconds, visibility approximately 5 miles. The distance between the "EM" Buoy and the inner extremity (South) of the inner channel, marked with Buoys B-27 and B-28 is approximately 15.75 miles. The outer channel has a width of 300 m. between the limit on both sides. The navigable portion for loaded vessels is 240 m. wide. The average depth which has been checked at low tide is 13.72 m. (45 ft.) and the tidal amplitude is up to a maximum of 1.49 m. (4.9 ft.). There is a breakwater located a half a mile to the East and parallel to the external channel which extends for 2,574 m. (1.6 miles) to the North from the Northern coast of the Island of Zapara. In its outer extremity there is installed the lighthouse of the steel lattice type construction, with a height of 7.62 m. (25 ft.). The characteristics of its light are: white, with 1 flash every 8 seconds, visibility approximately 5,556 m. (3 miles).

The commencement of the internal dredged channel is marked by Buoys B-29 and B-30. The extension of this channel is 19.31 km. (12 miles) approximately and ends at Towers T-55 and T-56. The channel is 244 m. (800 ft.) wide and its normal checked depth is 13.72 m. (45 ft.) at average low tide, with a tidal amplitude which varies between 0.49 m. and 0.89 m. (1.5 ft. and 3 ft.), at Tower T-66, and from 0.82 m. to 1.46 m. (4.5 ft.) at Buoy B-29.

The channel from Tower T-56 as far as the Port of Maracaibo is dredged and its termination is marked by Buoys B-73 and B-74. It is 244 m. (800 ft.) wide and has a depth of 13.72 m. (45 ft.). Its distance is 17 km. (11 miles).

The depth in all the channels may vary in accordance with the sedimentation to which they are subjected and the formation of sand banks. The Port Captaincy at Maracaibo issues Notices to Mariners keeping them informed as to changes in depths in the channels. Navigators are advised to keep themselves up-to-date with these notices of variations of depth when they calculate their exit draft of their respective vessels.

MAX. SIZE:

Berth	*Max. LOA*	*Max. Draft*	*Max. d.w.t.*
No. 1	835 ft.	38 ft.	80,000 tons
No. 2	835 ft.	37 ft. 6 in.	80,000 tons
No. 3	890 ft.	42 ft.	100,000 tons

Also see "Berthing".

RADIO: *Time of Arrival (ETA):* When a vessel leaves its previous port destined for the Terminal of Punta de Palmas, it must inform both its Agent and Maraven S.A. in Maracaibo as to its best estimate of the date and time of arrival in Maracaibo. Then at least 24 hours prior to arrival at the San Carlos pilots' station, it must send another message to confirm the time of arrival at Maracaibo. The nationality of the vessel, name, nett Venezuelan tonnage (if it does not have this, its registered tonnage), last port, name of Master, permanent ballast or cargo in tanks or both, and any other information which is pertinent must be included in this message. The cable address of Maraven S.A. is as follows: Maraven, Maracaibo, Telex 61126. By virtue of the circumstances that the Cable Office in Maracaibo is not equipped to communicate with vessels on the high seas directly, messages sent to Maraven S.A. and to the Agent of the vessel must be transmitted through "PJC" (Curacao), with the prefix "Via ACC" (All American Cables and Radio, Inc.).

We wish to emphasise that by virtue of the fact that our undertaking rents a part of its equipment which it uses for mooring vessels in accordance with the last message of arrival of the vessel, this message must be compiled with the greatest accuracy possible. Any alteration in the time and date of arrival affecting the vessel before or after the time indicated in its message, will be for the account of the vessel as will be the cost of rental of the equipment used.

Maraven S.A. is in no way obligated to carry out the mooring of any vessel, except at the estimated time of its arrival at Punta de Palmas, although exception is made where the vessel may have been delayed in Maracaibo by virtue of reasons beyond the control of the Master.

TUGS: Tug service consisting of 2 tugs of not less than 1,600 h.p. each is provided by the terminal operator for all vessels. Both tugs will assist all vessels in mooring and unmooring operations. Should it be deemed necessary by the terminal operator to require a tug in addition to the 2 terminal tugs for mooring or unmooring vessels exceeding 750 ft. in length, charges for this additional service will be for the account of vessel.

Vessels which exceed 835 ft. overall length, and destined for Berth No. 3, require the assistance of at least an additional tug. This additional tug will remain at the convenience of the Terminal for the time that the vessel remains at the berth.

In all cases where there are adverse weather conditions, without taking into account the size of the vessel, the Operator of the Terminal, at his convenience, may request the services of an additional tug to protect the installations of the Terminal and the ship, which will be for the account of the vessel.

The Terminal Department will make the necessary arrangements through the intermediary of the ship's Agent, for contracting additional tugs. These services will be charged to the ship's Agent by the tug operator who is contracted.

MOORING: *Berth No. 1:* Located approximately 8.85 km. (5.5 mi from the Terminal and 2 km. (1.25 miles) to the West of Buoys D and D-96 in the Maracaibo Channel. Distance between the bow a stern buoys is 364.90 m. (1,200 ft.).

This berth is equipped, apart from the mooring buoys, wit transversal mooring pile on its Eastern side, submerged, with chain a cable the same as those of the Buoys. This does not interfere with t operations of mooring and unmooring.

Berth No. 2: Located approximately 8.85 km. (5.5 miles) from t Terminal and 2 km. (1.25 miles) to the East of the Buoys D-95 a D-96 and to the N.E. of Berth No. 1. Distance between the bow a stern Buoys is 350.50 m. (1,150 ft.).

This berth is equipped, apart from the mooring buoys wit transversal submerged mooring pile equal to that of Berth No. 1.

Berth No. 3: Located approximately 9.65 km. (6 miles) from the Termina 1.2 km. (0.75 mile) to the West of the Buoys D-95 and D-96 a approximately 914 m. (3,000 ft.) to the East of Berth No. 2. Distanc between the bow and stern buoys is 365.76 m. (1,200 ft.).

This berth is equipped similarly to Berths No. 1 & 2 with a transvers submerged pile on the Western side of the berth.

Conditions applicable to all berths: (a) Vessels which have a total over length of 239.26 m. (785 ft.) or more must be equipped with 2 tensio capstans at the bow and on the after deck, with sufficient cable to reac the stern and bow buoys respectively.

(b) Every vessel loading at any of the berths must take in consideration that due to Government regulations, the vessel must hav a minimum clearance of 0.984 m. (3 ft.) below the keel at any poi during its transit through the Maracaibo Channel, without taking in account the limitations of the channel assigned to the 3 berths by th Terminal Operator. In view of this regulation and the constant variatio of the depths of the channel, Masters must be guided by the most rece "Depth Bulletins" which are issued by the National Channel Institu and by the tide tables when they are planning their transit time throug the channel, and the maximum draft to which they may load their vesse

Mooring procedures and rules applicable to mooring points: Eve vessel carrying out mooring operations at any of the 3 berths must arri with a minimum draft of 3.65 m. (12 ft.) forward and respect the followi procedure and rules for berthing:

(a) Anchor: Vessels approaching the berths from the East, in the mo convenient manner and safely as possible they must drop their starboa anchor in its location once the vessel has been berthed, the chain faci East, with a length of not less than 137.16 m. (450 ft.).

(b) Mooring cables: One of the following alternatives for moori cables at each side of the vessel must be fulfilled:

1. Two cables of synthetic fibre (Nylon or Polypropylene) with 9 i circumference and 1 steel cable which has a minimum diameter 1.25 in.

2. One cable of synthetic fibre (Nylon or Polypropylene) with 9 i circumference and 2 steel cables also supplied by the vessel an which have a minimum diameter of 1.25 in.

3. One cable of synthetic fibre with a 9 in. circumference and safety cable of 1.5 in. diameter which will be supplied by the Termina

(c) Countertension cables: A countertension cable will be attached t the stern or fore deck. Vessels which have a length exceeding 800 f must use countertension cables on both sides of the dec simultaneously.

(d) Transversal cable: The transversal cable which will be supplie by the Terminal will be attached to the after deck on the starboard sid Vessels mooring at Berth No. 3 must also attach an additiona transversal cable to the after deck on the port side.

(e) All cables which are attached to vessels must have 6 turns arou the bitts, and these must be secured so as to prevent them fro unwinding.

(f) The pressure capstans must be secured in the braked positio once all other cables for mooring the vessel have been secured. Thes mooring cables must be maintained tight as the vessel goes down the water whilst it is being loaded.

(g) Vessels must be supplied with sufficient cables as spares whic can be used as the Terminal may require. All cables must be maintaine in good condition and are subject to acceptance by the representati of the Terminal. Vessels must maintain sufficient personnel on dec during the whole time that the vessel is at the berth to attend to th cables for mooring purposes whenever this may be required by th Terminal.

It is understood by both parties that, when the Terminal may requ safety cables to be used, and where such are required, Maraven S. accepts no responsibility for damages or losses occasioned to an vessel, installation or person due to the use or failure of this equipme

The vessel's gangway must be in position so that the moori supervisor or other personnel from the Terminal can come on boa the vessel when it arrives at Punta de Palmas.

This gangway must be suspended whilst manoeuvres are bei carried out, this for the purpose of obviating any damage to it occasion by tugs or launches.

Berthing Supervisor: The Berthing Supervisor of Maraven S.A. will co on board every vessel prior to its entrance to the berth to establish rad contact between the vessel, the Marine equipment and the Office at th Terminal.

Mooring gangs and equipment: The mooring equipment will be hand by the launches employed in the manoeuvres. The tug service will b available 24 hours of the day through the intermediary of the Termin Port.

The mooring gangs will assist the vessel personnel in the operatio of hoisting, connecting and disconnecting the 2×12 in. diameter loadi hoses. The approximate weight of the loading hoses is 4 tons.

The launches used for the manoeuvres will place on board equipme to facilitate the work of connecting the hoses. This equipment will be the disposal of the vessel's personnel when required as are also th launches to transport personnel.

Responsibility: The Master may request any equipment or service which he may consider necessary for a safe and efficient operation of his vessel and the Terminal Operator will do everything within his power to fulfil his requirement. Therefore all owners and operators of vessels arriving at Punta de Palmas will accept the responsibility of the safety inherent in the manoeuvring of their vessels and their movements to and from the Terminal. Maraven S.A. will accept no responsibility for losses or damages occasioned to the ship, its installations and others unless such loss and damage be occasioned due to the faults in the installations belonging to the Terminal or operated by the Terminal with the exception of the security equipment.

Operational check list: At the time when the vessel is moored and the hoses are connected, prior to the commencement of the operations of loading, the representative of Maraven S.A. on board will deliver to the Master an operational Check List. The Master is required, or whomsoever he may appoint to carry out this work together with Terminal representative, to check very carefully that all the safety regulations have been fulfilled.

Berthing Supervisor: The Berthing Supervisor will have charts and plans which will be at the disposal of the Master and his advice if he should require it. The representative will also be available to inspect the vessel's tanks and to act as liaison between the Master of the vessel and the Agent or with the Terminal of Punta de Palmas, to transmit any information relative to the ship. This supervisor must receive lodging and treatment at the same level as the ship's officers.

Unmooring procedure: When the loading operations are completed, the launches will proceed to remove all mooring cables from the buoys under the supervision of the official entrusted with the vessel or the Official Pilot, assisted by the Berthing Supervisor of Maraven S.A.

Documentation: The departure and loading documents will be delivered to the Master by his Agent or his representative, when he passes through the Port of Maracaibo.

BALLAST: *Deballasting:* It is understood that it is not permitted to discharge ballast in the lake, even though this may come from tanks used solely for ballast. Ballast will be discharged with the pumps of the vessel to the deballasting system which exists at the Terminal. As soon as the loading hoses are connected, the personnel of the Terminal will align the system with its respective valves. Once these operations are completed the Berthing Supervisor on board will inform the Master that he may commence deballasting and in turn will keep him informed as to the pressures which will be used in the operation. Once the deballasting operation has been completed, the personnel of the Terminal will align the system again and its valves so that the vessel can receive cargo through the same hoses which are used for unloading ballast and simultaneously the personnel of the vessel will align their systems on board to receive cargo. The personnel of the vessel responsible for receiving the cargo will inform the Representative of Maraven S.A.(Berthing Supervisor) when the vessel is in a condition to receive and he in turn will inform the personnel of the Terminal that they may commence pumping.

LOADING: *Oil leakage:* In order to obviate contamination of Maracaibo Lake and possible legal actions, we recommend strongly that Masters of vessels emphasise to their deck officers in order to obviate leakage that they make sure that all necessary measures have been taken on board to this end prior to commencing the loading operations. The purpose of this is to maintain on deck any leak or wastage which may occur in the vessel.

Guarantee of responsibility: In the event of an oil leakage or any other contamination or any other damages to installations caused by a vessel, the operator of the Terminal, prior to the vessel sailing, will require the Agent to deposit bond in favour of Maraven S.A. to cover the fine or other charges which may be incurred in collecting, cleaning, repairing the installations of the Terminal and also to cover any claims from third parties.

Loading procedure and pumping rates: The position of the loading hoses, supports and connections must be to the satisfaction of the personnel on board. The valves of the hoses for loading purposes will be opened in order to test the connections, detect leaks and then ultimately to commence operations.

The responsibility and custody of the cargo passes to the personnel of the ship from the moment when the cargo arrives at the connection which is the property of the ship.

The minimum loading rate at Berths No. 1 and 2 is 4,000 b.p.h. The average pumping rate, under normal conditions is 13,000 b.p.h. Sudden stoppages in loading will not be permitted during loading except in cases of emergency.

Personnel on board, responsible for the loading operations, must notify the Terminal representative, not less than 30 minutes in advance of the completion of loading. This will enable the representative to instruct the operator to reduce the rate of pumping or to continue loading by gravity as he sees fit.

For reasons of security, loading may be suspended and the hoses disconnected from the vessel's manifold when weather conditions are not favourable or at any time that the Terminal considers it convenient to do so due to *force majeure* or other reasons.

Displacement of the line: Sometimes it will be necessary to displace the submarine line in combination with the loading operation. To carry out this operation it is required that the personnel responsible for receiving the cargo notify sufficiently in advance the Berthing Supervisor when the amount of cargo lacking is equal to the capacity of the line.

The capacity of the line is a fixed quantity. Therefore it must not be considered with shortcomings or excesses.

Therefore when it is necessary to effect a displacement, the loading must be calculated carefully by the vessel personnel responsible for this operation.

It is understood that any error or negligence on the part of the vessel personnel in calculating the initiation point of the displacement of the line, will require a land pump to correct the displacement. Due to the submerged manifold it will be necessary to employ a diver to operate the valves and this operation may result in a fairly costly procedure and involve a lot of time. All costs involved in fulfilling this operation, together with the time lost will be for the account of the vessel.

Increase in pumping rates: At the request of the Master and subject to the approval of Maraven S.A., it is possible to suppy a pumping rate of 17,000 b.p.h. up to a maximum of 30,000 b.p.h., provided the operations of the Terminal permit this to be done.

MEDICAL: *Maracaibo:* Complete services are available.

Punta de Palmas: Emergency cases only will be transferred to Maracaibo for treatment, at the request of the official in charge of the vessel.

FRESH WATER: Available from local contractors with barges. Pumping will be affected during daylight hours and with prior permission of the Terminal.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil available. Lubricating oils also available. Pumping will be affected during daylight hours and with prior permission of the Terminal.

STORES: Fresh and dry provisions procurable through ship chandlers in Maracaibo for delivery at the Terminal.

CONSULS: See "Maracaibo".

REPAIRS: *Maracaibo:* There are no facilities available for carrying out major repairs. Nevertheless, repair work may be carried out through local workshops and labour can be supplied if this is required. Technicians in radio, radar, gyro compass repairs are also available.

Punta de Palmas: No type of repair will be effected here, which may prevent the unmooring of the vessel without the authority of the Marine Supervisor. Neither may boiler tubes be "blown" whilst the vessel is moored.

SHORE LEAVE: Launch service for business purposes and emergencies is readily available. Launch service for shore leave can be arranged through contract marine service and will be responsibility of ship's personnel. Arrangements for shore leave transportation can be made through Loading Master on board.

CUSTOMS: All vessels entering from foreign ports and bound for Punta de Palmas Terminal are required to anchor in Maracaibo Harbour for formal customs clearance and visit of government port authorities prior to proceeding to destination.

The vessel's accommodation ladder should be rigged prior to the vessel's arrival at Maracaibo. A member of the National Guard will board each vessel at Punta de Palmas to observe all activities connected with loading or unloading operations. This official is authorised as the customs representative, and is referred to as Customs Watch. Food and accommodation similar to officers should be made available to him by vessel.

GENERAL:

Transportation: Transportation will be supplied by launch between vessel and Punta de Palmas to the following persons, without exception:

1. Master of the vessel or the Chief Engineer, to attend to matters relating to the ship.
2. Sick personnel who require emergency medical attention.
3. Official Pilot.
4. Members of the National Guard and other Government Officials whose services relate to the tanker.
5. Doctors, when these may be required by Master, in the event of emergency only.
6. Inspectors of the oil industry.

Consular representatives, ship's suppliers, engineers, naval experts, representatives of the oil companies, suppliers of fuel and water and any other person who requires to come on board tankers when they are in Punta de Palmas must make their own arrangements for transportation to and from the ship through the intermediary of the ship's Agent. Also Agents must make their own arrangements for their own transportation.

Personnel of the ship with licence to disembark: The transportation of personnel with licence, when this is required by the Master, must be arranged through the intermediary of the Agent. Also passengers must embark and disembark at the Port of Maracaibo.

Personnel with licence are not permitted to go ashore at the Terminal of Punta de Palmas.

Classification Societies: American Bureau of Shipping, Lloyd's Register of Shipping, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale and Germanischer Lloyd have Agents in Maracaibo or in Caracas. There are experts available through the intermediary of the Agents mentioned above.

Monetary System: The monetary system of Venezuela is the Bolivar (Bs.), and is the only money legally recognised in the country. A Master who requires a cash advance must request same from his Agent when he notifies his ETA. Payment of all invoices for Terminal charges must be made in Bolivares at the Office of Maraven S.A. in Maracaibo, unless other instructions are given.

Mail: Mail for the vessel can be delivered to the representative of the Agent who comes on board the vessel at the time of its arrival or sailing from Maracaibo.

AUTHORITY: Maraven S.A.

Capitania de Puerto, La Ciega – Maracaibo, Venezuela. *Tel:* 226488.

SAN LORENZO: 09.47 N. 71.05 W.

OPERATOR: Maraven, S.A.
LOCATION: S.E. side of Lake Maracaibo.
APPROACHES: Vessels have to arrive at Maracaibo Roads through a dredged channel with controlling depths of 45 ft. in outer bar, inner channel and Punta Palmas area. In vicinity of terminal the controlling depth is 36 ft.
PILOTAGE: It is compulsory from San Carlos to Maracaibo. Pilot normally boards vessel at Buoy B–26 (Position Lat. 11° 01′ N. Long. 71° 35′ W.). It is also compulsory for all vessels which have to load at any terminal located South of the bridge Rafael General Urdaneta. This bridge has a horizontal clearance of 656 ft. and a vertical one of 148 ft. at 45 ft. MMOLW level. Pilots have to embark and disembark at Maracaibo.

When Masters have no Pilot exemption Certificate for crossing outer bar, permission has to be requested by VHF or 2182 kHz prior to arrival, which is being granted on request.
ANCHORAGES: Masters may use the following:
(a) Near E.M. Buoy, (not recommended because of the distance from San Carlos. The pilot launch never reaches this point).
(b) At Maracaibo Roads.
(c) At terminal approaches, in accordance with depths available in the area, and ship's draft.
LIGHTENING POSITION: In the Southern lake Area, arrangements have to be made in advance. Also at Maracaibo.
HEALTH: Quarantine officials board vessels at Maracaibo Roads. Pratique cannot be granted by radio.
RADIO: San Carlos Pilot Station on VHF Channels 12 and 16. Emergency call 2182 kHz. Terminal has VHF Channel 12.
TUGS: Compulsory. When vessel is over 25,000 d.w.t. a second tug is required, which is available in the area, 1,200 h.p. each. There is also a launch to assist the vessel during manoeuvring.
BERTHING: Continuous wharf 2,340 ft. in length with dolphins. This terminal is only for handling crude and its products. Maximum berthing displacement: 20,000 tons.

	Berth No. 1	*Berth No. 2*	*Berth No. 4*
Max. LOA	560 ft. 00 in.	665 ft. 00 in.	
Max. Depth	24 ft. 06 in.	35 ft. 06 in.	Out of Service
Max. Draft	23 ft. 06 in.	34 ft. 06 in.	
Loading Rate	1,450 t.p.h.	2,000 t.p.h.	

These depths are referred to the minimum monthly observed lowest water level (MMOLW).
DENSITY: At berths 998 and at outer bar between 1020 and 1025.
FRESH WATER: Available ex-barge at Maracaibo Roads.
FUEL: Any grade. In case vessels require grade not available at berth it may be supplied ex-barge at Maracaibo, which has mixing equipment able to supply the grade involved. Rate 20 – 140 t.p.h.
MOORING-UNMOORING: Carried out by Official Pilots. Mooring is Head-out to facilitate departure.
DEBALLASTING: Installations have ballast pit with capacity 650 cu.m. Max. discharge rate 600 t.p.h.
TANK CLEANING FACILITIES: Carried out by outside contractor.
REPAIRS: Minor repairs only, including electronics.

LA CEIBA: 09.28 N. 71.04 W.

SHIPMASTER'S REPORT: 1979.

BERTHING: There is a cement loading installation about 2 cables South of the 160 m. long pier at La Ceiba suitable for vessels up to 120 m. in length.

The approach channel is dredged to 9 m.

END OF MARACAIBO SECTION.

MORON: 10.32 N. 68.11 W.

This Terminal finished operations in 1981. All installations are being dismantled.

Vessels loading/discharging operations are now performed at El Palito Marine Terminal operated by Corpoven, S.A.

ORINOCO RIVER

Including Section A – MATANZAS
Section B – PALUA
Section C – PUERTO ORDAZ
(CVG Ferrominera Orinoco)
Section D – PUNTA CUCHILLO
(Lagoven S.A.)
Section E – VENALUM TERMINAL

IMPORTANT: VHF compulsory. Vessels without at least a VHF ra
aboard will not be attended to by the Pilots at the Barima pilot sta
and so will not be allowed to enter the Orinoco River.

GENERAL:

1. As early as possible, advise Puerto Ordaz Radio Station, (Ra Marina) call letters YVM, giving ETA at Buoy 0.1 of South (dredge Channel.

Shipmaster's Report: October 1982 (Updated 1988).
Contact with YVM was made 48 hours before arrival Buoy 0 accordingly, 72 hours ETA sent via Curacao Radio.

2. 24 hours prior to arrival, send another ETA to YVM.
3. Upon arrival, adhere to following procedure:
   - *(a)* Request permission to enter from "Barima Pilot", via Chan 16. *Do not enter* until granted permission; while awaiting, to or anchor at least 1 mile outside of Buoy 0.1.
   - *(b)* All vessels must also communicate with the Point Barima p station, call sign "Barima Pilot" 2182 kHz HF or 43.18 V to be informed of traffic.
4. While navigating waterway, inbound or outbound, report position YVM hourly on the hour.
5. No Pilot required nor available for navigation along channel at Boca Grande of the Orinoco River.
6. The International Rules for Preventing Collisions at Sea ap outside of Buoy 27.
7. Anchoring in channel is forbidden.
8. Throughout Orinoco waterway, the down-bound loaded vesse the privileged vessel.
9. It is compulsory to fly Venezuelan ensign inside of Buoy 0.1.
10. Vessels can only carry clean ballast within Orinoco Waterway.
11. Pilotage compulsory within Pilotage Zones No. 1 and No. 2 of Orinoco. Pilots board at outer boundary of said pilotage zone upstreamward vicinities of Buoy 27 up to Mile 128.1. Zone No. 2 from Mile 128.1 up to Matanzas.
12. Regulations for the Pilotage Zone No. 1 of the Orinoco apply ins of Buoy 27.

APPROACHES: (Also see "Radio" – paragraphs *(b)* and *(c)*).
1. *The Waterway*
A Radio Direction Finder (non-operational October 1982), located at L 08° 03′ 45″ N., Long. 60° 28′ 28″ W., transmits following sig continuously: YV – AYV. The transmitter has an output of 500 watts w a range of about 200 miles and operates on a frequency of 305 kH While navigating the waterway, ships should favour the shore on th starboard side to the extent possible, giving preference of manoeuv to loaded vessels in all cases. Ships navigating upstreamward (inboun upon approaching narrow channels should await the passing and g way to downbound vessels. It follows, therefore, that downbound load vessels are the privileged vessels.
2. *The Boca Grande (Barima Bar) Channel*
There is 1 navigable channel across the Boca Grande (Barima Ba Vessels navigating the dredged channel are privileged, regardless the direction in which they travel.
The Dredged Channel
The channel is a 400 ft. wide dredged channel. Depths the accommodate the maximum draft authorised by the Port Captain. T approach from the sea is marked by a battery-operated electric flash black buoy, identified with the number 0.1. This buoy is located in 45 of water at Lat. 08° 55′ 52″ N., Long. 60° 11′ 17″ W. Its characteris are: colour of light, white; flash, 0.5 seconds; eclipse, 11.5 secon height above water, 25 ft.; visibility, 11 miles. From Seabuoy 0.1, channel develops along 4 different courses over a total distance 27.7 Miles to Buoy 27. The course reduces by about 7° True at eac 3 turning points, located at Miles 9, 15 and 21 respectively. The in course of 234° 18′ True continues to Mile 9 where it changes to 227° True. Upon reaching Mile 15, the course again changes to 219° 51′ T to Mile 21. At Mile 21, the course changes to 212° 45′ True to Buoy at Mile 27.7. The centreline of the channel on all courses is visu marked by range structures fitted with green flashing, direction beamed lights. The West (right ascending) side limit of the chan through Mile 21 is also visually marked by range structures fitted w amber flashing, directionally beamed lights; the alignment given by side ranges develops 200 ft. to the West and parallel to the centre of the channel. Battery operated electric flashing navigation aids located along both sides of the channel. All navigation aids along East (left ascending) side of the channel are located 325 ft. f centreline or 125 ft. outside of the channel lateral limit. White flas navigation aids are located at 1 mile intervals through Mile 25.1; all along this side are black buoys, except Beacons 8.1, 9.1, 14.1, 1 20.1, 21.1, 22.1, 23.1, 24.1, 25.1, 27.1 and 27.7 (Buoy 27). All naviga aids along the West (right ascending) side of the channel are loca 200 ft. from centreline or on the exact lateral limit of the channel. flashing buoys painted red are located at 1 mile intervals from Mile to Mile 11.6. From Mile 11.6 to Mile 27.7, there are only 2 a red buoys 13.6 and 26.0.

3. *The River Channel*

From Mile 27.7, the navigable channel develops upstream. The river channel is generally deep and wide, except for the following 12 reaches which require periodic dredging: Miles 27.7 to 36.5; Miles 37.3 to 38.6; Miles 53.1 to 54.2; Miles 99.0 to 106.5; Miles 109.1 to 111.0; Miles 131.7 to 131.9; Miles 136.6 to 139.0; Miles 141.2 to 145.8; Miles 146.2 to 149.4; Miles 167.6 to 170.8; Miles 178.4 to 182.4; Miles 183.5 to 184.1. Dredged channels are normally 300 ft. in width, but occasionally can be restricted to a minimum of 250 ft. The depth maintained therein can accommodate the maximum draft authorised by the Port Captain. By Notice to Mariners, the Port Captain has instructed all Masters and Pilots to reduce speed and to proceed with caution while navigating the aforesaid reaches, especially during the low water season.

4. *River Stages*

In response to the cycle of wet and dry seasons, the flow of the Orinoco River follows a relatively regular pattern of rise and fall each year. The river normally begins rising in late March or early April and continues to rise until it peaks at crest in late August. In September, the river begins a fairly steady recession until the extreme low-water stage is reached, generally in March. The amplitude of stage variation above the low water plane of reference (0.0 ft.) at Palua (Mile 181.7) averages about 35 ft. with min. variations of 31 ft. and max. variations of 39 ft. The effects of the flood rise decrease progressively below Palua and practically vanish in the upstreamward vicinities of the Boca Grande.

5. *Tides and Currents*

(a) The indicated mean tidal range is 5.4 ft. Tidal influence is not experienced above Mile 60 during high river stages. At low river stages, a tidal effect can be observed throughout the waterway, although it progressively diminishes, moving upstreamward. However, the tidal effect is still significant at Puerto Ordaz, Mile 184, where a max. semi-diurnal change of 1.7 ft. has been recorded.

(b) The strength of river currents is generally commensurate with flow, the strongest currents occurring at high river stages. The velocity of currents at any one time generally decreases moving downstreamward. However, in certain locations, this pattern is affected by particular characteristics of river width and shape as well as by bottom gradient. Max. velocities of about 6 knots have been recorded.

6. *Navigation Aids*

(a) The navigation aids installed along the waterway consist of buoys, beacon and ranges. All aids are lighted. Identification is provided by means of numbers representing the approximate mileage of each aid, to the nearest one-tenth of a mile. The last digit of numbers identifying green lighted aids is odd, while the last digit of numbers identifying red lighted aids is even. Green lighted aids mark the left ascending limit of the navigable channel, while red lighted aids mark the right ascending limit. Aids are placed as to be intervisible, to the extent that — when abreast of any one aid — the preceding and following ones can be sighted. Consecutive aids always carry different light characteristics. Buoys are normally placed on the exact lateral limit of the channel (except for black buoys along the South Channel at the Boca Grande); beacons, instead, are located at variable distances outside of the channel.

(b) During the execution of dredging along any of the reaches which require periodic maintenance, buoys are generally moved 100 ft. outside the channel lateral limits. This information is made available to ships by YVM.

(c) The Ministerio de Comunicaciones, Direccion de Transporte Aguatico, publishes semi-annually a complete list of navigation aids. Monthly lists of changes are also published so that the complete current list can be maintained up to date.

(d) Upon encountering damaged, inoperative, or misplaced navigation aids, vessels should immediately notify YVM.

(e) Vessels are forbidden to make fast to any navigation aid.

7. *Dredging Aids*

Range structures, generally located close to shore or over the bank, are normally used to mark the lateral alignments of the channel along the reaches which require periodic dredging. These ranges are generally fitted with amber flashing, directionally beamed lights. The lights are extinguished except during execution of dredging. Dredging ranges *are not* to be used for navigation.

8. *Navigation Charts*

Navigation charts of the Orinoco Waterway should be aboard vessels for use by the Master. These charts are sold by the Instituto Nacional de Canalizaciones and are also available for purchase from the CVG Ferrominero Orinoco. If requested, CVG Ferrominero Orinoco will, if possible, arrange to make the charts and latest revisions available through the Pilot who boards at Punta Barima, provided such request is received by radio (YVM) at least 48 hours in advance of the Pilot's boarding. A set of navigation charts, corrected to latest revisions, is maintained in the office of the Traffic and Ships' Agency of CVG Ferrominero Orinoco in Puerto Ordaz. Masters may use this facility to keep their charts up to date.

Report: 1986.

Deficient Navigational Aids:

The deep draft New Barima (South) dredged channel is officially a 400 ft. wide dredged channel, but in reality it is considerably less in portions. Many of the red buoys showing a flashing red light which should be placed 200 ft. from the centre of the channel or exactly on the lateral limit, are either missing, out of position or unlit. The light on the black buoy which marks the entrance of the channel is inoperative. Several of the gauge structures fitted with green, flashing, directionally beamed lights, are inoperative. This makes it hazardous for a deep draft vessel to navigate the narrow and shallow channel during the hours of darkness. During the rainy period the authorised drafts declared by the Port Captain are in excess of the depths in certain portions of the channel.

We have been informed that about 20 vessels grounded in this area during the first 6 weeks of this year (1986).

DOCUMENTS: (Clearance, documentation and other requirements).

1. *Consignment of Inbound Vessels*

The official documents of all vessels proceeding to Puerto Ordaz and Palua should show the following consignment: to: CVG Ferrominera Orinoco, Ciudad Guayama.

2. *Customs Requirements*

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require the following documentation:

The vessel must have a Clearance Certificate (Certificade de Zarpe) or sailing authorisation issued by the Customs Authorities of the port of departure, representing the government of the country the vessel is departing from. No consular certification need be placed upon this document.

Spare Parts List (Lista de Repuestos). It must contain a note of all the spare parts and objects for the service of the vessel, including fuel. To be signed by the Master and to be current as of the day of entering the Venezuelan port.

List of Effects for use of Captain and Crewmen (Lista de efectos personales de la dotacion). To be signed by the Master and to be current as of the day of entering the Venezuelan port. The Customs are very strict and will confiscate any article that appears new.

3. *Health, Immigration, and Police Requirements*

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require following documentation.

(a) Current individual International Vaccination Certificates for each member of the crew.

(b) Derat Exemption Certificate.

(c) Crew Lists (original and seven copies).

(d) Panama or Suez Canal or any comparable type measurement certificate.

Contraband: The Venezuelan law is very strict on this subject. It cannot be emphasised too strongly that all new articles, clothing, cigarettes, liquor, etc., must be declared and sealed-up upon arrival.

Meals for Pilots and Government Officials. It is requested these men be granted the privilege of eating in the officers' dining salon.

N.B. Masters of vessels calling at Trinidad for bunkers before proceeding to Venezuela must also have the documents stamped by the Venezuelan Consulate at Port of Spain.

PILOTAGE: In order to expedite the movement of shipping in the waterways, Masters are requested to establish contact with YVM station as soon as possible, giving ETA Seabuoy 0.1. At the same time a radio-telegraph message must be sent to Agents giving ETA Barima and cargo required. When vessels are 24 hours from pilot station, send another ETA via YVM.

After reporting the ETA in advance of arrival, try to contact directly, by VHF, "Barima Pilot" when the ship approaches Seabuoy 0.1 off the bar entrance (about 2 hours before arrival at the pilot station). (It is possible to contact Pilots 100 miles before arrival Seabuoy 0.1.)

After taking the Pilots aboard, report to Radio Marina (YVM) and continue giving the ship's position according to the mile, up-river, at exactly every hour on the hour, and receive from Radio Marina the pertinent information concerning the traffic in the river waterway. If no communication can be established by voice radio aboard, comply by radio-telegraph by way of the YVM station. See "Ship's Officer's Reports" in 1st Section – "General" and "Shipmaster's Report", June 1991.

Ship's Officer's Report: July, 1980.

Hourly position reports are made on W/T to YVM when the Pilot is aboard (He writes the telegrams in Spanish).

Pilots are the employees of the Venezuelan Government and act in an advisory capacity. The Master retains responsibility for the ship at all times.

(1) Pilotage is not required and Pilots are not available for navigation outside the pilotage zone. Masters will take charge of inbound and outbound navigation on the South Channel outside Buoy 27 at the Boca Grande, without Pilot's assistance.

(2) Pilotage is mandatory within the Pilotage Zones No. 1 and No. 2 of the Orinoco. Inbound vessels will embark the government River Pilot in the upstreamward vicinities of Buoy 27. It is important that vessels pass Buoy 27 and be in sight of the pilot station at Barima in order to avoid any delay, as Pilots may not proceed until vessel is sighted. The government River Pilot will pilot the vessel while navigating the waterway; a special government Docking Pilot will generally take the vessel into and out of the Puerto Ordaz harbour.

Signals

(1) All signals used outside of the Pilotage Zone No. 1 (that is to say, seaward of Buoy 27 – Mile 27.7) shall conform to the International Rules for Prevention of Collisions at Sea.

(2) Within the Pilotage Zones (that is to say, inside of Buoy 27 – Mile 27.7) the signals used shall be in accordance with the "Regulations for the Pilotage Zones No.1 and No. 2 of the Orinoco". It should be noted that these signals are peculiar to the Orinoco Waterway, and are not necessarily in conformance with the International Rules.

(3) Within the Pilotage Zone, special signals are used for passing dredgers at work along the waterway.

Speed

The Captain of the Port has the authority to impose speed restrictions. By means of "Notices to Mariners", the Port Captain has ordered that all vessels reduce speed while navigating by the following locations: San Felix Dock, Mile 179.8; El Toro, Miles 95.4 to 96.6. It is recommended that speed be also reduced while navigating by the Palua Dock (Mile 181.8), Barrancas (Mile 143.2), and Curiapo (Mile 60.4). At the inception of the low water season each year (generally in early January), the Port Captain has in the past issued a "Notice to Mariners" instructing all vessels to reduce speed and proceed with caution while navigating the following river reaches: (1) Miles 184 to 178, (2) Miles 171 to 167, (3) Miles 150 to 141, (4) Miles 140 to 137, (5) Miles 133 to 131, (6) Miles 112 to 109, (7) Miles 106 to 98, (8) Miles 55 to 53, (9) Miles 39 to 36.

ANCHORAGES:

(1) No ships are permitted to anchor in the South Channel at the Boca Grande. Vessels are to anchor at least 1 mile outside of Buoy EO or Buoy 0.1.

(2) Within the Pilotage Zones, no vessel is allowed to anchor in narrow channels, nor close to a turn.

(3) Between Buoy 27 — Mile 27.7 and Mile 137, vessels which need anchoring may do so by coming as close as possible to shore on the ship's starboard side.

(4) Between Mile 137 and Mile 184, the Pilotage Regulations provide for 3 permanent anchorages and 1 seasonal anchorage, as follows: Area No. 5 (permanent); Miles 139.3 to 140.4. Area No. 6 (permanent): Miles 150.1 to 151.7. Area No. 7 (permanent): Miles 178.0 to 179.0. Area No. 8 (seasonal): at the junction of the Caroni and the Orinoco. It should be observed that Area No. 7, as determined in the Pilotage Regulations, partially encroaches on the narrow (dredged) channel and on shore. Vessels are to anchor in the naturally deep and wide part of the area.

(5) The low-water anchorage (for 1 ship only) previously established by the Port Captain between Miles 182 and 183 is no longer in use. This area is currently used as the turning basin for vessels exiting the Palua Channel, upon sailing from the new Palua dock at Mile 181.8.

(6) If due to emergency a ship is required to anchor in places other than the designated areas, it should do so in such a way as not to obstruct the channel and by taking the necessary precautions to avoid swinging around.

(7) Upon anchoring vessels should notify YVM.

MAX. SIZE:

(1) *Max. permissible draft.* The Port Captain of Ciudad Guayama can establish the permissible draft for the Orinoco waterway to a maximum of about 44 ft.

(2) *Controlling Depths and Authorised Draft*

The draft authorised by the Port Captain for the Orinoco Waterway is made public by means of a "Daily Bulletin of Depths and Draft" (Boletin Diario de Profundidades y Calado). Each daily bulletin issued by the Port Captain carries the following information, in Spanish and English:

(a) Controlling (minimum) depth between Miles 194 and 0, and corresponding location.

(b) Authorised draft, in feet and decimals of feet.

The controlling depths given for locations comprised between Miles 184 and 42 are actual depths, and reflect depth conditions as of the date of the bulletin. The controlling depth given for locations comprised between Miles 42 and 0 is referred to MLWS and does not include the height of tide at high water.

The authorised draft may be predicted either on the controlling depth existent between Miles 184 and 42 or between Miles 42 and 0, dependent upon whichever is the least.

When the controlling depth between Miles 184 and 42 is the significant factor, the permitted draft authorised is at least 2 ft. less than the controlling depth in this sector.

When the controlling depth between Miles 42 and 0 is the significant factor, the permitted draft authorised is generally less than the mean low water springs controlling depth but occasionally can be equal to the mean low springs controlling depth.

Whenever the MLWS controlling depth existing between Miles 42 and 0 does not provide sufficient clearance under the keel of the vessel at low water, the Master is expected to navigate by the site where the controlling depth is located only at times when the height of tide will assure a safe passage.

(3) *Variations in authorised draft:*

(a) The authorised draft is generally increased or decreased by multiples of 6 inches.

(b) Throughout the year the authorised draft is susceptible to variations, according to the conditions of the depth and width existing in the channel at any one time. On the basis of average river stages it is estimated that the authorised draft should be about 33 ft. in the dry season from December to May.

During the rainy season, from June to November, the max. permissible draft may be as high as 44 ft.

HEALTH: Radio Pratique may be obtained by sending a message, after picking up Pilot, to the Port Health Officer, advising that there is no sickness on board, name of last port, ETA, number of crew and nationality of vessel and name and nationality of Master (This does not apply at Palua).

RADIO:

(a) Communications: Communications are generally handled through the radio-telegraph station at Puerto Ordaz, call letter YVM. This station is operated on a 24 hour basis. The operating frequencies are: 440 kHz; 472 kHz; 4322 kHz; 6505.5 kHz. The GMT — CQ times and frequencies are: 0900 hrs., 4322 kHz; 1200 hrs. 6505.5 kHz; 1430 hrs. 8722 kHz; 2000 hrs. 8722 kHz; 0030 hrs. 8722 kHz; 0300 hrs. 4322 kHz.

There is no charge for messages from ship to shore or from shore to ship handled directly through YVM. A VHF frequency modulated radio system provides voice communications along the Orinoco Waterway. Master sets for the system are installed in the Puerto Ordaz Radio-telegraph Station (voice call: "Master Radio"); Marine Radio handles shipping matters exclusively, The system consists of a high-band VH frequency modulated voice radio network. To ensure a more efficie and satisfactory coverage, this system operates on dual frequencie alternating according to location, so that ships can either transmit o 161.700 MHz receiving on 159.000 MHz, or transmit on 161.150 MH receiving on 159.850 MHz. For best results, ships should sele frequencies according to the following: From sea to Mile 50: transmit o 161.700 MHz, receiving on 159.000 MHz; From Mile 50 to Mile 112 transmit on 161.150 MHz, receiving on 159.850 MHz; From Mile 112 t Mile 159: transmit on 161.700 MHz, receiving on 159.000 MHz; Fro Mile 159 to Mile 184: transmit on 161.150 MHz, receiving on 159.85 MHz.

Pilot station at Barima Bar, Palua and Matanzas are equipped wi this system. For the Puerto Ordaz area, ships will transmit to Marin Radio on a frequency of 43.02 MHz and to others on a frequency o 43.18 MHz, receiving in both cases on a frequency of 43.18 MHz.

Ship's Officer's Report: July, 1980.

The VHF Channels listed are not available on standard marine sets All VHF work is done on Channel 16 (Pilot to Pilot), and reporting o W/T to Radio Marina.

(b) Control of Navigation:

(i) Navigation on the Barima Channel at Boca Grande is free. Howeve vessels are requested to notify the Port Captain, Ciudad Guayama via "Barima Pilots" on Channel 16, upon arrival at Buoy EO, givin ETA at Buoy 27, Mile 27.7.

(ii) Simultaneous navigation in opposite directions by 2 or more vessel is not permitted on the South (dredged) channel at the Boca Grande The restriction is placed on inbound traffic, to the extent that an vessel wishing to enter the South channel requires prio authorisation from the Port Captaincy of Ciudad Guayama. Th request for permission to enter the South channel is to be addresse to the Port Captain, Ciudad Guayama, via "Barima Pilots" o Channel 16. and is to be transmitted before the vessel reache Buoy 0.1. Upon receipt of the request, the Port Captain will noti the vessel via "Barima Pilots" on Channel 16, whether permissio is or is not granted, indicating, in the latter case, the approxima waiting time. Until permitted to enter, vessels are to anchor at leas 1 mile outside of Buoy 0.1. Once that authorisation has bee granted, vessels are to enter the South channel at the earlies opportunity.

(iii) While navigating the Orinoco Waterway inbound or outboun vessels are to report their position to YVM hourly on the hour. Seaward of Punta Barima, to "Barima Pilots".

(c) Accident, Stranding, etc.

(i) Should a collision, stranding or other accident occur in th waterway, or should it be found necessary to take control of th vessel away from the Pilot for any reason, the Venezuelan la requires that a written report be made to the Captain of the Port b the Master of the vessel involved within 24 hours. The report is t be addressed to the Captain of the Port and may be handed to th Pilot or the ship's Agent for delivery. The Master need not appe in person before the Captain of the Port unless specifically ordere to do so.

(ii) Slight groundings or touching of banks and bottom may simply b noted on the reverse side of the receipt for pilotage signed by th Master.

(iii) In case of collision, stranding, slight grounding, touching of bank and bottom, or other accidents, vessels should immediately noti YVM.

SHIPMASTER'S REPORT: January 1989.

Vessel proceeding to Matanzas.

Apparently the entrance to the River Orinoco at Boca Grande ha been upgraded.

All the buoys now have solar energy cells as well as photo-cells t activate them at dusk.

The North entrance no longer exists, only the South Dredged Channe is used. A Racon had been installed on Mile 0.1 (Sea Buoy). Curren entrance information is given by Puerto Ordaz Radio Station (YVM), wi which vessels should make contact as soon as possible. As usual, pilot board the vessel between Miles 27-28. It is advisable to reduce spee beforehand, to be able to embark the pilot before Mile 28, as pilot boa is not fast and there is a considerable bend at Mile 28. Also it is advisab to familiarise yourself with the buoys and ranges up to Mile 30 whi entering, as the down-bound pilot usually disembarks between Mile 3 31 and there are 3 short distance bends before Mile 28. On our passag as many as 4 buoys were out of position, one buoy was unlit at the fir range, and Sea Buoy (0.1) Racon was inoperative.

SHIPMASTER'S REPORT: June 1991.

Boca Grande Bar:

(a) Pilotage has become compulsory through Boca Grande Bar (starting from Buoy No. 0.1) for the ships having LOA more than 200 m since March 1991. Therefore, Orinoco River traffic is applicable throu the Boca Grande Bar as well.

(b) Pilots board at Fairway Buoy (Orinoco No. 0) by means of helicopter.

(c) The Bar has recently been dredged to sufficient depth. There wa 10 ft. – 15 ft. keel clearance experienced up to Buoy No. 1 (disregarding moving mud), and became shallower up to Buoy No.

Section A

MATANZAS: 08.17 N. 62.52 W. (See Plan)

N.B. See "Orinoco River" for all important entry requirements.

LOCATION: At Mile 195 from sea on Orinoco River.
ANCHORAGES: Between Miles No. 195 and 197, Orinoco River.
MAX. SIZE: Length 600 ft., breadth 74 ft., distance between rail and hatch coaming 23 ft., max. draft 41 ft. in rainy season May to November, and 28 ft. in dry season.
Note: A vessel with LOA 738 ft. has berthed at Matanzas.
RADIO: See "Orinoco River". Cables address of Matanzas terminal operators is "Sidor Matanzas – Telex 86366" and cables may be routed through Caracas, Curacao or Trinidad Radio.
TUGS: Every vessel over 2,000 registered tons is required to use a tug when berthing. Tug is 1,600 h.p.
BERTHING: Reinforced concrete structure consisting of 3 different sections running in a straight line, bearing 065°.

From West to East, 3 sections should be pointed out:

The first section, some 320 m. long, is used mainly for unloading bulk cargoes. Depth 10 m. below MSL.

The second section, 400 m. long, is for handling steel products. Depth 11 m. below MSL.

The third part, some 280 m. long, is for general cargo. Depth 11 m. below MSL.

The level of the river fluctuates from 0.6 m. over MSL at low river water in the dry season (February – March) to 14 m. over MSL at high river water in the rainy season (July – August).

The river bed drops sharply from the edge of the pier to the navigation channel where the depth reaches 30 m. below MSL.

Berth No. 1:	Runs from bollard No. 1 to No. 7, length 155.30 m.
Berth No. 2:	Runs from bollard No. 7 to No. 14, length 176.38 m.
Berth No. 3:	Runs from bollard No. 14 to No. 24, length 204.25 m.
Berth No. 4:	Runs from bollard No. 24 to No. 33, length 182.75 m.
Berth No. 5:	Runs from bollard No. 33 to No. 39, length 160.45 m.
Berth No. 6:	Runs from bollard No. 39 to No. 44, length 158.85 m.

In addition there is another berth, length 149 m., South of No. 6, with 24 ft. of water under MSL, that runs from bollard No. 38 to No. 44.

The reinforced concrete platform is 25 m. wide at the first section and 20 m. at the second and third sections. The surface of the pier is 15.5 m. over MSL.

CRANES: Berths No. 1 and No. 2 are served by 2 "Ceretti Tanfani" bulk unloaders of 22 tonnes capacity, able to handle clamshells of 4.5 cu.m., for iron ore, lime stone and other heavy bulk, 10 cu.m. clamshells for coke and other light bulk and orange peeler and magnets for unloading scrap iron.

The reach of these cranes is 10 m. from the pier edge. The working field is from bollard No. 2 to bollard No. 13.

Berths No. 3 and No. 4 are served by 6 "CMI" gantry/trolley cranes fitted with 2 hoists of 15 tonnes each, with a total capacity of 30 tonnes with the 2 hoists in tandem. The working field is from bollards No. 15 to No. 31.

Berths No. 5 and No. 6 are served by 3 "Ansaldo" gantry/trolley cranes of 16 tonnes capacity. The working area is from bollards No. 35 to No. 44.

At bollard No. 34 there is a stationary rotary derrick of 400 tonnes capacity and a reach of 18 m.

In addition, there are 3 "Grove" auxiliary moving cranes, of the telescopic type, with a rated capacity of 80 tonnes able to work at any part of the pier.

WAREHOUSES: From bollard No. 14 to bollard No. 29, running along the South edge of the pier, there are 10 adjoining warehouses, 30×100 m. each, 3 of them open at either end and the four in the middle roofed. All of them are provided with 1 gantry crane of 25 tonnes each.
STEVEDORES: Operations are round the clock, 7 days a week.
MEDICAL: Private hospital and several doctors available.
FRESH WATER: Available at rate of 12 t.p.h.
FUEL: Available ex-barge.
REPAIRS: Local workshops undertake minor repairs.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed per crew member for personal consumption.
AIRPORT: Matanzas is served by Puerto Ordaz Airport with several daily flights from Caracas.
POLICE/AMBULANCE/FIRE: The entire length of the pier is fitted with fire hydrants and at the steel mill, about 6 km. away, there is a well equipped fire brigade with firetrucks, ambulances and rescue vehicles.

A first aid centre is located close to the fire station.

TELEPHONES: No telephones or telex services are available at Matanzas for the use of vessel's personnel. Local telephones only available at the pier and dock supervisor's office. Recommend vessels use their VHF to communicate with their Agents while at anchorage and when alongside.
IDENTIFICATION CARDS: Provided by authorities, and necessary if crew going ashore.
REGULATIONS:
Pollution: Venezuelan law and Sidor's port regulations are very strict on air and river water pollution, the following restrictions being in force:

1. No smoke to be ejected from vessels' funnels while moored at Sidor's pier.
2. No waste, refuse or garbage to be dumped in the river while in the river channel, at Matanzas roads or laying alongside the pier.
3. All waste, refuse or garbage kept on deck, to be sprayed with anti-vermin and kept covered.
4. No salt water ballast, bilge water, oils, refuse water from galleys and lavatories, etc., to be pumped into the river.

In addition to whatever penalty the vessel shall incur under Venezuelan law, Sidor reserves its right to place the offending vessel "off hire" until she has complied with the regulations.

Safety: Under Sidor's security norms, every person which, for whatsoever the reason or business, has to transit or stand on the pier's platform is bound to use a hard hat. People doing any kind of work on the pier have also to use safety shoes.

GENERAL: Sidor's pier will discharge and/or load cargoes for other industries of the area provided a berth is available and no Sidor vessels are waiting. Permission for such operations must be requested prior to vessel's arrival.

Sidor require Agents to provide stowage plan and cargo documents prior to vessel's arrival otherwise Notice of Readiness will not be accepted.

SHIPMASTER'S REPORT: January 1990.
Approach: The approach is through Boca Grande South Channel from Buoy 0.1 without a pilot, to the Barima Pilot Station which is up-stream of Buoy No. 27.1.

Prior to arrival call "Amacuro Pilot" on VHF Channel 16 when within range, up to 100 nautical miles.

Vessels only enter the channel after having been granted permission by the pilot station.

The Racon on the Fairway Buoy is inoperative.

B.A. Chart No. 3322, addition 1971, last correction 1170 of 1988 is not up-to-date.

When proceeding inward the buoys on the port side are red and those on the starboard side are green. All buoys have solar panels.

The green buoys on the starboard side are numbered 0.1, 1.1, 2.1, up to 21.1 and are spaced one nautical mile apart.

The red buoys on the port side are numbered 1.0, 2.0, 3.0, etc., up to 21.0. Buoy No. 3.0 was missing.

Buoys No. 22.1 – 25.1 are the only red buoys on the port side. On the starboard side Buoy No. 26.0 is the first buoy on the starboard side and the next buoy after that is Buoy No. 27.1, which is on the port side. The buoys are opposite each other in the channel and this is the point where the pilot boards.

The numbers on the buoys indicate the distance in miles from the entrance of Matanzas (Mile 194.5).

The pilot who boards the vessel at Buoy No. 27.1, takes the vessel to Matanzas where he hands over to the harbour pilot.

Loading: Gangs are available throughout 24 hours.

The working hours are 0730 – 1100, 1200 – 1500, 1500 – 1800, 1830 – 2230 and 2300 – 0630 hrs.

We worked with 2 gangs and the rate was 300 tons – 500 tons per shift/gang. We loaded bundles of re-bars which weighed about 1.8 tons each. The tally is carried out ashore and vessel has to ask for copies of the tally sheets.

Garbage: Garbage has to be stored on board in bags and can be removed by lorry via the Shipchandler.
Stores: Stores are available but it is advisable to get quotations. There are department stores and shopping centres in the vicinity.
Transport: Taxis are available to take personnel to the town, but only licensed taxis are permitted to enter the plant.
OPERATOR: C.V.G. Siderurgica del Orinoco C.A., Codigo Postal 8016, Matanzas, Ciudad Guayana, Estado Bolivar, Venezuela. *Tel:* 991111 and 991118. *Telex:* 86366 and 86229 (Sidor). *Cables:* Sidor Matanzas.
Contact: Superintendent, Port Services.

Section B

PALUA: 08.21 N. 62.41 W.

N.B. See "Orinoco River" for all important entry requirements. Specific details, relevant to Palua only, are as follows:
SUPPLIER: The ore supplier is CVG Ferrominera Orinoco C.A., cable address "Ferrominera". Their Palua office is fitted with VHF radio-telephone on 161.150/159.850 MHz and 2182 kHz (call).
CLEARANCE: Agent will secure the Clearance dispatch.

Note: The Palua dock and facilities are the private property of CVG Ferrominera Orinoco C.A. All Company regulations must be obeyed by vessels and vessels' personnel.

The Bill of Lading will be prepared by CVG Ferrominera Orinoco C.A., also the Commercial Invoice on the Consular Invoice form 138. The Inward Foreign Manifest, U.S. Customs form 7527–B, should be prepared by Master after sailing from Palua.

MAX. SIZE: Max. d.w.t. 100,000 tons. Max. LOA 274.32 m. Max. beam 33.53 m.
HEALTH: The vessel will be boarded by the Public Health Doctor after docking at Palua; unless instructions to the contrary.

In the event that the Authorities have to board the vessel anchored out in the stream, an accommodation ladder should be rigged, preferably on the starboard side, to keep the port side clear for docking. Venezuelan authorities and workmen will not use Pilot ladders.

RADIO: Should a vessel receive radio advice at sea to proceed to Palua, and the clearance is to another port, it is requested to send following information to "Ferrominera" at earliest convenience. i.e. Master's full name and nationality, vessel's nationality, port and number of register, net and gross tonnage, type of vessel M/V or S/S, vessel's overall length and width, last port of call, original port of destination. This is necessary in order to comply with the Venezuelan Custom Law.
BALLAST: To provide the best manoeuvring trim on docking, it will be at the discretion of the Master to properly ballast the vessel. But in order to lose no time on loading operations, as well as to prevent short loading, the ballast should be pumped out as soon as possible, using utmost caution not to pump oil or sludge overboard in the port area.

APPROACH AND DOCKING IN PALUA: After passing the village of San Felix, and before reaching the turn off from the main channel, 2 tugs and a Docking Pilot will meet the vessel and will assist in the docking manoeuvre. Although the Master will always be responsible for the vessel's movements either in the case of docking or undocking, the Docking Pilot will actually pilot the vessel to, and dock the ship at Palua.

At Mile 180.5 the ship should leave the main channel, turning to the left to follow the new dredged entrance channel of approach which is marked by 2 flashing buoys: white on the port and red on the starboard side. Diamond-shape range marks of 6 ft. side, painted white with black diagonal cross, indicate the centre line of the approach channel. The front range, fastened on the ore loading pier, shows flashing green light, and the rear range, set on a tower shows flashing green light, and the rear range, set on a tower approximately 2,000 ft. away, has fixed green light.

The docking shall be port side to in all events; and please stow all hatch boards, or pontoons, or steel battens, etc., on the starboard side of the hatch as this will keep the gear cleaner and lessen the work of the ore handling gang.

Vessel's accommodation ladder is used. Nothing should overhang the port side of the vessel on docking.

If the loading berth is not available the arriving vessel would be instructed to anchor at an anchorage just below the entrance to Palua approach channel at Mile 178.

LOADING DOCK: The ore loading port is located at Mile 181.5 of the Orinoco waterway, along the left bank going up-river. The steel dock here is aligned up and down stream in the general direction of the current. It is 907 ft. long between its pointed heads, with 791 ft. of boarding side along, the deck fixed at about 6 ft. over the maximum rise of the river in the flood season. It has a strong fender system of steel structure covered with timber overhanging the side, down to near the lower river stage; and is fitted with 14 bollards plus 2 more, one on each head, for proper docking and securing the vessel.

Once the vessel is moored alongside the new ore loading dock, there shall be no further shifting necessary to load, as the loading tower moves along the dock on rails to facilitate the loading through the various hatches.

LOADING: The ore handling and loading equipment for Palua has a max. capacity to load 3,000 metric tons of ore per hour (average 2,500 metric tonnes per hour), for the time being. With this capacity, the vessel's mooring lines should be tended during the operation.

The boom of the loading tower is so designed as to allow free movement in any direction, fore and aft. The gantry and boom travel along the dock for a distance of 518 ft., and can place the ore at a distance horizontally out from the dock fenderline of 23 ft. minimum and 62 ft. maximum at the highest water stage, and from minimum 29 ft. to maximum 67 ft. horizontally out at the lowest stage (Ship's Master reports outreach is 55 ft.).

Care must be taken during the course of loading to avoid piling the ore too high in the holds, as this necessitates hand trimming before the hatch covers can be properly secured, and incurs unnecessary trouble.

UNDOCKING: The Master, assisted by a Docking Pilot, if required, will handle the vessel on leaving the dock, going upstream from the dock not less than 0.75 miles distance to the turning basin in the same heading as when the ship moored alongside. Two tugs will go alongside the ship prior to undocking and will assist the vessel until it is headed downstream in the main Orinoco Channel. The amber lights at the heads of the dock form a range to mark the shoreside boundary of the local dredged channel. A red light high up on the loading gantry will come in the same range as the 2 amber lights. In the turning basin a tug-boat will assist the vessel swinging downstream.

When the ship is in the main channel, properly headed downstream, the Docking Pilot will leave on the tug, and the River Pilots (2 of them) will assume the navigational direction. Report to Radio Marina by voice radio and give ETA at Mile 27.

Report again to Radio Marina giving position every hour, and try to contact Barima Pilot Station sometime before arrival at Mile 31, where the Pilots will disembark.

If voice radio communication is not possible, comply by radio-telegraph by way of the YVM station.

GAS-FREE CERTIFICATE: Vessels reporting to Palua to load ore should have the holds and cargo compartments swept clean and ready to receive cargo. Also, any combination ore/tanker vessel tendering to load iron ore at Palua shall present, along with the Notice of Readiness, a Gas-free Certificate if said vessel has in the past been employed in the carriage of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. But they are advised that around Palua in Venezuela there is no chemist available for granting such a Gas-Free Certificate. It may be secured before arriving at Venezuela by calling at Trinidad, reporting to cable address: Harriman, Port of Spain.

In case of necessity, or for convenience, it could be arranged for the chemist to travel to Venezuela to meet the ship in Palua, advising Harriman (Port of Spain) at least 3 days before arrival at Palua.

If the vessel is equipped with a gas-indicating meter (explosimeter), CVG Ferrominera Orinoco C.A. will accept the Master's certification in writing that the vessel is gas-free. However, they reserve the right to check the vessel with their own equipment prior to acceptance.

MEDICAL: There is a medical dispensary at Palua, and a hospital of the Company at El Pao, where seamen may be admitted when requiring hospitalisation in emergency cases.

CONSULS: See "Puerto Ordaz".

REPAIRS: Minor emergency repairs of mechanical, electrical and electronic types may be carried out in the shops by the personnel of the Iron Mines Company of Venezuela. The American Bureau of Shipping has a surveyor at Puerto Ordaz, near Palua.

FLOOD SEASON: The port experiences a yearly flood season from the middle of June to the middle of November, to a max. of about 38 ft. at the last days of August, above the lowest stage (during the first days of April) in the dry season that occurs from the middle of November to the middle of June.

TIDE: The wind in the locality blows generally upstream, and on exceptional occasions during the dry or low-river season, when the current is weak, does overcome the current and cause the anchored ships to tend with stern upstream.

FRESH WATER: Drinking water is available at the dockside in limited quantity of about 100 tons every 24 hours. Small amounts of fresh provisions may be obtained in the locality.

FUEL: All grades of bunker fuel are available at Palua, delivered by barge.

DENSITY: 995.

REGULATIONS: The Venezuelan law is very strict on the subject of contraband. It cannot be stressed strongly enough that all *new* articles, clothing, cigarettes, liquor, etc., must be declared and sealed up on arrival.

Concerning passes, the regulation states that "members of the crew who are not officers of the vessel, in order to go ashore and return aboard, have to be supplied with an identification card to be issued by the Purser of the vessel or his substitute, which card will contain the name of the vessel, the name of the crew member and the date of issue. This card will have to be signed by the person issuing same and has to be authorised by the respective officer of the Port Captain's office for the district".

Section C

PUERTO ORDAZ: 08.21 N. 62.43 W.

OPERATORS: CVG Ferrominera Orinoco.

LOCATION: The operations of the CVG Ferrominera Orinoco are centred in the State of Bolivar in Eastern Venezuela and iron ore is loaded into ocean-going vessels at Puerto Ordaz (08° 21′ N., 62° 43′ W.), at the junction of the Caroni and Orinoco Rivers, approximately 184 nautical miles from the open sea.

GAS-FREE CERTIFICATE: Any combination ore-tanker vessel tendering to load iron ore at Puerto Ordaz shall present, along with the Notice of Readiness, a Gas-Free Certificate if said vessel has in the past been employed in the transportation of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. Gas-Free Certificates can be obtained through an approved surveyor in Puerto Ordaz.

APPROACHES: See "Punta Cuchillo".

MAX. SIZE: Max. d.w.t. 115,000 tons. Max. LOA 289.56 m. Max. beam 39.01 m.

HEALTH: Vessels could be boarded by the Public Health Doctor in the stream off Puerto Ordaz. He will not come up a Pilot ladder and will insist on an accommodation ladder which should be rigged and ready when he approaches. In order not to delay docking, this accommodation ladder should be rigged on the port side during low river stage, and starboard side during high river stage. If vessel moves directly to berth, Health Doctor will board vessel at dock.

RADIO: Should a vessel receive radio advice at sea to proceed to Puerto Ordaz, and the clearance is to another port, the Master must radio station YVM Puerto Ordaz, and advise the name of the vessel, flag, port of embarkation, original port of destination, Master's name and number of members in the ship's crew. This is necessary in order to comply with article 17 of the Venezuelan Customs Law.

TUGS: All vessels touching at Puerto Ordaz will be assisted by a tug in docking and undocking manoeuvres. Line-handlers are available on the dock to secure mooring lines on vessel's arrival, and to release them on vessel's departure.

BERTHING:

1. **The Harbour:** The Puerto Ordaz Harbour extends from Mile 183.5 to Mile 184.1 of the waterway. The harbour consists of a natural basin formed by the mouth of the Caroni as it flows into the Orinoco. The width of the turning area within the basin varies from a min. of about 1,600 ft. at low water to a max. of about 2,000 ft. at high water. The lighted buoys marking the navigable limits on either side of the harbour are moved to different positions according to river stages in order to achieve full utilisation of navigable waters. The bottom of the harbour is generally rock, with scattered layers of sand overburden deposited as sediment by the river. This sand is regularly removed by dredging in order to maintain depths which will accommodate the maximum draft authorised by the Port Captain. The bottom configuration across the harbour consists of a rocky shelf extending about 900 ft. from the face of the dock. Beyond this shelf the bottom slopes steeply into a deep gorge, then rises to form a sandy beach along the opposite shore. The velocity of river currents at this site varies according to stage levels. A slower current is generally experienced over the rocky shelf adjacent to the dock, with velocities averaging about 1.5 knots at flood stages and about 0.5 knots or less at reduced river stages. The velocity of the current over and along the deep gorge averages about 3.5 knots at flood stages and 1.5 knots or less at reduced river stages. During extreme low water the basin is subject to tidal influence and the velocity of currents is minimal, although there is no reversal of flow. The direction of the current is aimed slightly toward the face of the dock at its S.E. end but deflects away from the pier about 500 ft. downstreamward. Access to the harbour is by way of a naturally deep and wide fairway which is the continuation of the gorge as it enters the Orinoco River.

2. **The Dock:** The Puerto Ordaz Dock is located along the right ascending side of the harbour and extends outward from shore on a S.E. by East alignment. The all-steel fixed-height dock is 1,885 ft. long; its elevation is 41 ft. above low water plane (0.0 ft. stage). This dock is fitted with a strong fender system and with a sufficient number of accessible bollards for proper docking and securing.

3. **Arrival:**

(a) Notice of Readiness: When completely ready to receive cargo, vessels will submit "Notice of Readiness" to CVG Ferrominera Orinoco. Vessels will normally be loaded in the order in which Notices of Readiness are accepted by CVG Ferrominera Orinoco. The Company will advise when the vessel may proceed alongside the dock.

(b) Docking: Special Docking Pilots are provided for the docking and undocking of vessels at Puerto Ordaz. These Pilots are qualified River Pilots, thoroughly familiar with local conditions. All vessels will dock starboard side to. During the low water stage, which is from the middle of November to the middle of June, no gangway should be rigged and nothing should overhang the starboard side of the vessel. When the river is sufficiently high which is from the middle of June to the middle of November vessels are requested to have starboard gangway or accommodation ladder rigged and ready to lower immediately after docking in order to expedite the commencement of loading. Venezuelan authorities and workmen will not use Pilot ladders. Vessels reporting to Puerto Ordaz to load ore should have holds and cargo compartments broom clean and ready to receive cargo. Considerable time will be gained if this requirement is met prior to reporting.

(c) Hatches: On arrival at Puerto Ordaz all hatch boards or pontoons, beams, tarpaulins, steel battens, wedges, etc., should be stowed on the port side of the hatch. This will keep the hatch gear cleaner and lessen the work of the ore handling clean-up gang.

(d) Ballast: In order to lose no time with the loading operations, as well as preventing short-lifting, all ballast should be pumped out before arrival at the dock. Use utmost caution not to pump oil or sludge overboard in the port area. CVG Ferrominera Orinoco Ships' Agency Representative will contact vessel on arrival and will assist in every way possible.

4. **Departure:** All vessels which have completed loading at Puerto Ordaz and have received the latest river information from the port offices, and are ready for their river transit in every respect, will proceed outward via the Orinoco Waterway, disembarking the Pilot at Mile 27. Once the Pilot has disembarked, vessels shall proceed over the South (dredged) Channel to Mile 0, and exit the waterway.

MEDICAL: There is a hospital at Puerto Ordaz which will admit seamen requiring hospitalisation.

TANKERS: See "Punta Cuchillo".

FRESH WATER: Drinking water is available alongside the dock.

FUEL: Bunker "C" and diesel oil is available.

CONSULS: An Italian consulate Agent at Puerto Ordaz, nearest consuls for other countries at Cuidad Bolivar or Caracas.

REPAIRS: Minor emergency repairs may be carried out in the shops of CVG Ferrominera Orinoco.

TIME: The legal time of Venezuela, which is 4 hours behind GMT, shall be used in Pilotage Zones No. 1 and No. 2 of the Orinoco River.

SHORE LEAVE: Permitted, but it is mandatory that all crew members should report back to their respective ships before sailing time.

GENERAL: 1. *Ore Loading Equipment:* The ore handling and loading equipment installed on the pier has a speed ratio of 6,000 metric tons of ore loaded per hour. Due to this great loading capacity the vessel's mooring lines must be tended at all times.

2. *Handling Facilities:* A movable 110 ton, rail mounted stiff-leg derrick is installed on the dock for the handling of general cargo.

3. *Provisions:* Small amounts of fresh provisions are available.

4. *Surveyor:* The American Bureau of Shipping has a non-exclusive surveyor in Puerto Ordaz. Lloyd's has an Agency in Ciudad Bolivar with a branch office in Puerto Ordaz, and will appoint surveyors upon request.

SHIPMASTER'S REPORT: October 1986.

Terminal: Interalumina Terminal.

Location: Lat. 08° 18.7′ N., Long. 62° 49.0′ W.

Local Time: GMT minus 4 hours.

Approaches: Vessel can anchor 3 miles North of Sea Buoy (Lat. 08° 56′ N., Long. 60° 10.4′ W.). Contact Punta Barima Pilots or Amacuro Pilots on VHF Channel 16. After obtaining permission, vessel must proceed to inbound buoyed channel without Pilot for 27 miles up to Buoy No. 27.1. Channel of sufficient depth, variable width becoming very narrow at times. One way transit only. Current sets are various.

Pilotage: River Pilot boards at Buoy No. 27.1 and continues till 2 miles before berth. There are various buoyed channels enroute with dredging in progress. Several bends in the river, requiring close watch on steering at all times. For outbound pilotage, River Pilot and Berthing Pilot board at berth with River Pilot disembarking at Buoy No. 32.1.

Berthing: Berthing Pilot boards 2 miles before berth. Length of berth over 300 m. One tug available. Multi-purpose berth for alumina loading by chute and bauxite discharge by grabs. Sufficient depth alongside.

Loading: Cargo worked throughout 24 hours. Loading by conveyor-fed telescopic chute, capacity about 1,000 t.p.h. Chute reaches all holds.

Density: About 995 alongside berth.

Fresh Water: Available at berth, good for washing water but unsuitable for drinking.

Bunkers: HFO and DO can be supplied by barge.

Provisions: Fresh provisions and bonded stores can be supplied by Puerto Ordaz Ship Chandlers.

Shore Leave: No restrictions. Shore passes required. Puerto Ordaz City is 30 minutes by car.

Radio: For messages addressed to local Agents in Puerto Ordaz, it is better using some nearby foreign coast stations. YVG (Maracaibo Radio) provides unreliable service on HF. YVM (Puerto Ordaz Radio) does not accept public correspondence and controls all inward bound and outward bound transitting traffic only. Necessary that vessel gives time of passing Entrance Buoy and ETA at Buoy No. 27.1. Vessel is also required to give hourly position at the beginning of each hour until arriving at berth or anchorage and at the same time will obtain information concerning the changes of channel buoy positions and the transitting traffic for the vessels in the channel from the station.

For outward bound vessel, vessel to keep the same watch until passing Entrance Buoy.

The following are the paired frequencies for communicating with YVM (Puerto Ordaz Traffic Control): 468/472; 4192/4322; 6320/6372; 8386/8453 kHz.

SHIPMASTER'S REPORT: September 1988.

The following information is to be read in conjunction with the 1987/88 Edition of the "Guide".

1. The information that advises Masters to pump out all ballast before berthing should be amended.

At the end of September (1988) the river level was 2 ft. less than the highest predicted range. The actual depth at Puerto Ordaz Mineral Quay was measured at 53 ft. and the permitted air draft was 46 ft.

Ship's Masters may adjust their ballast condition through computing the relationship between their draft/air draft and actual depth at the jetty, which is subject to seasonal river level.

In addition to our regular ballast we took 1,100 cu.m. of ballast in the cargo holds in order to reduce our airdraft to the requested 46 ft., whereas we could have pumped out all ballast before going alongside.

2. The officially declared depth is 44 ft. and the permissible draft at Boca Grande Bar in late September was 42 ft.

3. The depth through the Boca Grande Bar Channel and its extension up to the 40 mile Buoy may not conform to the declared depth, and despite the pilot's statement, the part of the Channel on the Bar between Buoys No. 30-20 is the shallowest part of the passage and ships speed is reduced to half speed, instead of the section between Buoys 13.1 – 15.1.

4. The actual position of the Fairway Buoy is Lat. 08° 55.55′ N., Long. 60° 11′ W. and on our visit the buoy was unlit.

5. Many of the channel marking buoys (especially the red buoys) are unlit or have very weak flashing lights.

6. The rate of the river flow averages 3 knots – 4 knots.

7. It is suggested that deep draft vessels, outward bound, adjust their ETA at Buoy No. 44 in order that the vessel may be at Buoy No. 13.6 at daylight, taking into account that the vessel's speed will be reduced to half speed whilst navigating through the Boca Grande Channel from Mile 30 to Mile 13, due to the effect of the flood tide and mud under the keel.

The following figures may be of guidance to other vessels:

Declared depth:	44 ft.
Permitted draft:	42 ft.
Vessel's draft:	39 ft.
Vessel's sea speed:	12.5 knots
Passed Buoy 44:	1400 hrs.
Dropped Pilot at Buoy 32:	1530 hrs.
Arrived Buoy 13.6:	1820 hrs.
Vessel's average speed over the Bar between Buoy 30 – Buoy 13.6:	6 knots
High water time at Buoy 13.6:	1730 hrs.
Height of water at H.W. time:	2.0 m.
Date:	27th September 1988.

8. It is suggested that whilst navigating through the Boca Grande Channel, fuel oil is used in order to reach a high speed as quick as possible.

9. Nett ore loading rate experienced was 3,500 tonnes p.h.

10. The boarding officers were very co-operative and polite and were at all times courteous to the ship's officers and the Master.

The only documents requested were 8 copies Crew List, 3 copies Crew Personal Effects List and 3 copies of the Stores List (indicating fuel, narcotics, arms and ammunition, bonded stores and usual ship's stores).

AGENCY: Mailing Address for Puerto Ordaz: CVG Ferrominera Orinoco C.A., Agencia de Barques, Puerto Ordaz. Telex: 86472 Fmopu.

CVG Ferrominera Orinoco acts as ship's Agent for all vessels consigned to load iron ore at Puerto Ordaz. This function is performed by the Superintendent, Traffic & Ship's Agency and his staff, whose offices are located adjacent to the loading dock at Puerto Ordaz.

AUTHORITY: Capitania de Puerto de Ciudad Guayama. *Tel:* (86) 229268. *Contact:* Captain Lino Garcia Ibarra, Port Captain.

Section D

PUNTA CUCHILLO, (Puerto Ordaz Terminal): 08.20 N. 62.47 W. (See Plan)

N.B. See "Orinoco River" for all important entry requirements. Specific details relevant to Punta Cuchillo only are as follows:

OPERATORS: Lagoven S.A.

LOCATION: The terminal and dock is located near Mile Post 192 on the South side of the river.

PILOTAGE: Government Pilot will pilot vessel to Puerto Ordaz. In some cases this same Pilot will act as Mooring Pilot and dock vessel at the terminal. If River Pilot does not also act as Docking Pilot, the River Pilot will disembark at Mile 178 during LW, and Mile 183, in HW, and a Docking Pilot will embark and take the vessel to mooring.

Pilots are obtained at Buoy 27 of the old channel, which is the same as Buoy 27.7 of the new channel and is located 5 miles West of the old lighthouse at Punta Barima at Lat. 08° 36′ 00″ N., Long. 60° 30′ 40″ W. It is important that vessels pass this buoy and be in sight of the Pilot Station (1 mile E.S.E. of Punta Barima Lighthouse), as Pilots will not proceed to the vessel until it has been sighted.

APPROACHES: *Shipowners Report:* 1982.
Cautionary Advice: Due to several wrecks located in the approaches 6 miles North and 13 miles N.W. of the Fairway Buoy, extreme caution is necessary when approaching.

The coastline is difficult to pick up on radar and the Fairway Buoy is detected within a distance of only 3.5 miles. Contrary to the chart, it is currently not fitted with a racon. The buoy is not 25 ft. high as described in pilot books. It is, in fact, a small black buoy with a lattice construction with the radar reflector missing. In clear weather the channel buoys can be visually sighted and detected on radar at about 5 miles.

From the Sea Buoy 0.1 to position Mile 9, a strong N.W. set is experienced and an average of 5° set to channel course can be expected. After position Mile 9 set decreases and becomes variable in direction until arriving at Pilot Station Mile 27 position.

From August until the end of the year the river current can attain a rate of 5 knots, making it necessary for an outbound vessel to reduce speed when approaching river bends in order to ensure bends can be safely negotiated. Due to the strong currents of the Orinoco River, recent experience indicates that, if a vessel goes aground, the Master when attempting to lighter the vessel should drop an anchor prior to discharging ballast.

All stretches of the river have range markers which mark the centre of the channel. While manoeuvring in the river, the vessel tends to steady up when rudder is put midship without any counter rudder. This does not affect the manoeuvrability of the vessel but Master and Pilot should be aware of this so as not to take rudder off too fast when turning.

Buoys are NOT on the edge of the channel from the Sea Buoy to Mile 27.0. White buoys are 125 ft., Red buoys are 75 ft. outside the edge of the channel. Buoys are located at the point where the channel starts to slant downward to the deeper water. The main dredged channel is 400 ft. wide. The ranges are on the centre of the channel.

Masters must refer to the sailing directions for additional information.

MAX. SIZE:

Gauge Reading	*Maximum Draft*	*Tide Required at Bar*
12 ft. – 14 ft.	33 ft.	None
14 ft. – 17 ft.	34 ft.	None
17 ft. – 20 ft.	35 ft.	None
20 ft. – 23 ft.	36 ft.	None
23 ft. – 26 ft.	37 ft.	None
26 ft. – 29 ft.	38 ft.	None
29 ft. – 32 ft.	39 ft.	None
32 ft. – 35 ft.	40 ft.	None
35 ft. – 38 ft.	41 ft.	half of high tide
38 ft. – 41 ft.	43 ft.	half of high tide

HEALTH: Vessel will be boarded by the Public Health Doctor in the stream off San Felix or Puerto Ordaz or occasionally at the Terminal. If he boards before docking, an accommodation ladder should be rigged and ready when he approaches, as he will not come up a pilot ladder.

RADIO: Vessels diverted at sea to Punta Cuchillo which do not have a Venezuelan Clearance on board, must advise Lagoven by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessel will be subject to a fine.

TUGS: The use of tugs is necessary in docking and undocking manoeuvres of boats at this Marine Terminal. Alcoa has a 2,100 h.p. tug available for this service. A tie-up launch will be provided to assist in the mooring of the vessel, and will handle all the mooring lines before and after loading.

BERTHING: The dock at the terminal consists of a docking platform, 2 breasting dolphins and 2 mooring dolphins. The docking platform is connected to shore by a 10 ft. causeway capable of carrying a light truck.

At mean low river stage, water depth at the face of breasting structures is 40 ft. The bank rises sharply from face of dolphins toward shore. The 40 ft. depth contour extends parallel to shore for a considerable distance upstream and down stream from the dock, allowing a flat approach angle.

Current is negligible during low river stage and is approximately 6 knots at midstream at high river stage. Current runs generally parallel to the face of the dock at the dock site.

Top of dock elevation is 45 ft. above low water stage. Buffering system extends from a point below low water stage to a point immediately below top of dock. Nothing should overhang the shoreward side of the vessel when docking during the lower stages of the river. The buffering system is designed to accommodate forces exerted by a vessel of 47,000 tons displacement, approaching the dock with a velocity component perpendicular to the dockface, of 0.5 ft. per second.

Bollards for vessel's lines are provided at the mooring dolphins and at the breasting structures. Mooring dolphins will safely withstand 200,000 lb. of mooring line tension.

The facilities include a 24 in. diameter submarine pipe-line which crosses the river a short distance down-stream of the dock. The crossing is marked by triangular-shaped signs on both banks of the river. Masters are cautioned against use of vessel anchors in this area.

The terminal pumps are capable of loading oil aboard ship at the rate of approximately 14,000 bbls.p.h.

INWARD CLEARANCE FOR DIVERTED VESSELS: Vessels diverted to Puerto Ordaz to load cargo should submit all documents, except consular mail, which they will not have. In lieu of this, they should submit 4 copies of the cable to divert, leaving enough space for the translation in Spanish. Vessels diverted at sea to Puerto Ordaz (Lagoven Terminal) which do not have a Venezuelan clearance on board must advise Lagoven at Puerto Ordaz, by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessel's flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessels will be subject to a fine.

MEDICAL: Medical assistance can usually be arranged, particularly in the case of an emergency.

SAFETY: The following is a condensation of the safety precautions that should be observed when the vessel is alongside the dock:

(i) All passageway doors leading to the cargo deck areas are to be kept closed during cargo-loading operations.
(ii) Ship's firefighting equipment must be kept ready at all times while berthed at Lagoven dock.
(iii) Smoking or carrying lighted or unlighted pipes, cigars or cigarettes on the weather decks of the vessel, or on the dock, is strictly prohibited under all circumstances. Masters are requested to instruct their crew not to throw lighted cigars or cigarettes over the side or out of the portholes.
(iv) An efficient watch must be maintained on deck and in the engine-room on the vessel, and a sufficient number of men must be on board at all times to move the vessel any time, in case such is required.
(v) If the galley is located near oil-handling operations of any nature, the skylight lids should be kept down and secured to prevent the galley being sprayed with oil in the event of a burst hose.
(vi) Ventilators in the vicinity should be turned away from the scene of operation.

LOADING: Monagas Crude is the only cargo available at the Puerto Ordaz Terminal. This crude has an API gravity of 11.9° to 12.5° F (6.490 – 6.517 U.S. barrels per long ton). This cargo must be heated to approximately 140° F. in order to attain normal discharge rates.

Loading is accomplished through 3×10 in. hoses provided with 10 in. 150 lb. ASA flanges. Hoisting gear is provided for handling the hoses. A dock crew will connect the cargo hoses and disconnect them on completion of loading. Some adapters and other tools are available on dock. The oil will be loaded at an elevated temperature.

Precautions, as are common for any heavy oil, should be taken to ensure that no ballast water is left in any tank to be filled with this oil. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lb. per 1,000 barrels for every 0.10% contamination by sea water.

All cargo compartments must be stripped dry. Cargo pipe-lines should be drained and/or purged of water.

There is no provision at the Puerto Ordaz Terminal for disposal of dirty ballast or tank washings. Tankers bound for Puerto Ordaz for loading must dispose of all dirty ballast and tank washings before entering the Orinoco River.

Prior to proceeding to sea, all Butterworth plates, cargo tank hatch covers and ullage plugs should be inspected to ensure against entry of salt water.

FRESH WATER: Fresh water is available ex-barge; cable advice of 24 hours is required. Dry provisions may be obtained in very limited quantities.

FUEL: Bunker fuels are available at all hours from Astilleros Orinoco C.A., who operate a floating storage and blending facility in the Orinoco River. Bunker fuels may be received at Lagoven dry dock while loading crude. Full cargoes can be made available.

REPAIRS: No major repair facilities are available. However, small repairs can be taken care of through local machine and electrical shops and shore labour can be obtained if required.

TIME: GMT minus 4 hours.

SHIPMASTER'S REPORT: June 1987.
Location: The Terminal at Punta Cuchillo (Puerto Ordaz Terminal) lies some 192 miles up the Orinoco River.
Approaches: The buoyed channel was picked up at a distance of 15 miles, and we made contact with Barima Pilot 2 hours prior to arrival. Pilot Station instructed us to anchor 1 mile East of Buoy "0.1". No vessel may enter Boca Grande Channel without permission from the Pilot or local Radio Station "YVM". We anchored for a few hours and then proceeded up the dredged channel to Buoy 27.1 to the pilot station. The Pilot boarded from a fast launch using the pilot ladder on the starboard side. We continued up the river at 90 r.p.m. making an average speed of 10 knots. The Pilot was competent, but spoke little English. The vessel finally anchored off San Felix, 179 miles up river at 2324 hrs.

BA. Chart No. 3322 is not really adequate, so we obtained the local river charts through the Agent. In the lower reaches the leading lights are poor in daylight, being hard to pick out. The Boca Grande dredged channel is said to be 400 ft. wide, with red buoys with red lights marking the starboard side of the channel inwards and black buoys with green lights marking the port side. At times of dredging, buoys are displaced some 100 ft. outwards from the channel.
Communications: Throughout the river passage, the Radio Officer is in contact with "YVM" on the hour, giving the ship's position; they in return give positions of other ship movements, and navigational information with regards to shifting of buoys and where the dredger is working.
Berthing: We remained at anchor for 10 days, after which we picked up anchor in the afternoon and sailed the last 14 miles to the berth. It is of modern construction, fendered with wooden sheaving, with dolphins for the head and stern lines, which were long leads. Two tugs were used for mooring, tug ropes, close alongside "American style". The after tug was of conventional type, whilst the forward was a powerful flat bottom pusher type boat. The tugs kept the vessel in position whilst moorings were run.

The headlines were taken first, followed by the stern lines, run by mooring boat, 3 lines at a time, springs by heaving line. Ending up with 3 lines and 2 springs each end. Ship's gangway used.
Cargo Operations: The independent surveyor spoke good English. Vessel loaded Morichal Crude (described as Asphalt) but not what we know as asphalt, being much thinner. API 12.5, loading temperature 132°F. To be kept at loading temperature. Flashpoint 192°F.

A loading rate of 2,467 t.p.h. was achieved using 2 × 10 in. hoses. Shore stop at end of loading.

On completion of cargo operations 3 hours should be allowed for paperwork. The cargo documentation is brought on board by the Agent,who signed for the Notes of Protest on behalf of the suppliers (Lagoven SA).

Officials: The vessel was boarded at San Felix anchorage by the Agent and 5 officials, and everything proceeded smoothly.

The following documents were required:

5 copies Crew List
3 copies Crew Personal Effects List
3 copies Bond List
Clearance from Last Port

The Ship's Certificates were inspected.

Departure: The Docking Pilot took the ship off the berth, using the same 2 tugs. Pilot departed once the ship was swung. We carried 3 river pilots, two were there for the journey only, although they all did a spell on the bridge. The vessel anchored at Buoy 44.3A for 5 hours, awaiting tide. The pilots left at Buoy 32.5. At 90 r.p.m. we made 8.5 knots until we were clear of the channel.

The maximum sailing draft allowed on this occasion was given as 38 ft. 6 in. (F.W.) which, to say the least, was optimistic.

AGENCY: Lagoven handles all papers and documentation connected with the ship's business. Lagoven will also help the ship's Master in providing required land transportation, limited provisions, or any other assistance that may be required for the operation of the ship's normal business. Alcoa will also assure that the ship's requirements are met in regard to Sanitary Inspection, Customs Inspection and Guardia Nacional.

Section E

VENALUM TERMINAL: 08.18 N. 62.50 W.

SHIPMASTER'S REPORT: February, 1981.

LOCATION: Mile 194 on Orinoco River. See "Matanzas – San Felix" in "Plan Section".

ENTRY: See "General, etc." under Orinoco River.

TUGS: Are summoned by Pilot when required.

BERTHING: Modern quay built on piles parallel to the bank with access by two piers, one at either end of the general cargo quay, allowing a one way system to be operated.

Length of general cargo quay – 215 m.
Length of bulk cargo quay – 85 m.
Depth alongside at lowest state of river – 12 m.

CRANES: The general cargo quay has two container cranes of 35 tonnes S.W.L. each. Aluminium ingots are the main cargo but other cargoes are handled. Container spreaders are available and also electro-magnets for use with the cranes.

BULK CARGO FACILITIES: Also see "Berthing".

The bulk cargo quay is served by an elevator with two suckers and is used exclusively for the discharge of alumina. An average rate of 200 tonnes/p.h. is claimed.

STEVEDORES: Working hours – 24 hours a day, 7 days a week.

AUTHORITY: Industrias Venezolanas de Aliminio C.A., Zona Industrial Matanzas, Puerto Ordaz – Edo Bolivar. *Tel:* 086-993605 (also Fax). *Telex:* 86463. *Contact:* Captain Pedro Cabrera.

Industrias Venezolanas de Aluminio C.A., Av. La Estancia, Edificio Torre Las Mercedes, Piso 09, Urbanizacion Chuao, Caracas 1060, Venezuela. *Telex:* 23444. *Contact:* Luis Suarez, Terminal Operator.

END OF ORINOCO RIVER SECTION

PERTIGALETE: 10.15 N. 64.34 W. (See Plan)

LOCATION: Situated in a sheltered bay about 2 miles East of the port of Guanta, or about 4 miles from the pilotage zone situated in the North.

PILOTAGE: The pilotage zone in Pozuelos Bay is the same as for Guanta, i.e. an area situated between the islands of Borracha and Chimana, in the Bay of Pozuelos (formerly called Bergantin Bay).

From the pilotage zone for the port of Guanta/Puerto La Cruz, the private pier Pertigalete is to be approached by sailing between the Isla de Plata and the island of Cachicamo. Pilotage is compulsory in and out and is performed by well-trained government Pilots. The navigation is considered very safe.

MAX. SIZE: The depth of water for ocean-going vessels alongside the Pier is 20 ft. (shore side) to 40 ft. (sea side).

TUGS: Available from Inward Clearance port at Guanta/Puerto la Cruz.

BERTHING: The private pier in Pertigalete for berthing ocean-going vessels is up to 150 m. (492 ft.) long. The apron is ample and allows easy manoeuvre of trucks with cement. On the same pier the cement factory is regularly receiving raw material and machinery, but the berthing is along the West side of the pier for coastal trade, so does not interfere with operations for ocean-going vessels. There are chutes, conveyor belts from the nearby silos. No cranes available.

STEVEDORES: Loading operations are performed exclusively by the personnel of the cement factory. All costs, including overtime, are for account of the cement factory.

Under normal conditions on Saturday afternoon there is no work, but almost without exception the cement factory works overtime on Saturdays if by doing so the vessel can be despatched that day. On holidays, if circumstances call for urgent operation, the cement factory has the option to work overtime.

TANKERS: Berth at private wharf at Pamatacualito, operated by Baroid de Venezuela SA. Length of berth 113.60 m., depth alongside 10 m.

LOADING: The cement factory is able to deliver to the pier 600 tonnes per hour (cement in bulk).

GARBAGE DISPOSAL: No collection service available.

WASTE OIL DISPOSAL: No collection service available.

SEAMAN'S CLUBS: No seaman's club at this port. Nightclubs are situated at Puerto La Cruz City.

CURRENCY: Venezuelan Bolivar. U.S.$ 1.00 = 67 Bolivars (August 1992).

OPERATOR: Private pier of C.A. Vencemos Pertigalete is under the jurisdiction of Customs and Harbour Master of Guanta/Puerto La Cruz, Eastern Venezuela. All charter business and general administration is covered by Caracas Headquarters of Venezolana de Cementos S.A.C.A.

Local address: C.A. Vencemos Pertigalete, Apartado 4141, Puerto La Cruz. *Tel:* 95421, Al 30. *FAX:* 95420. *Telex:* 81154.

AUTHORITY: Capitania de Puerto La Cruz, Paseo Colon, Sector Los Cocos, Puerto La Cruz, Venezuela. *Tel:* (5881) 677452, 677932. *Telex:* 81386. *Contact:* Captain Humberto Marcano, Harbour Master.

AGENT: Servicios Navieros Tisa (Sernatica), P.O.Box 4356, Puerto La Cruz, Venezuela. Tel: (5881) 683998, 683481, 683666, 684083. Telex: 81390. Fax: (5881) 683422.

PUERTO CABELLO (inc. Borburata): 10.29 N. 68.01 W. (See Plan)

DOCUMENTS:

Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
3 Narcotics Drugs Lists.
2 Lists of Personal Effects.
1 Vaccination List.
Derat Certificate.

PILOTAGE: Pilotage is compulsory, but vessels must first anchor in roads 1 mile North of Punta Brava to await entry formalities and berthing orders.

MAX. SIZE: Bulk Cargo Pier: Up to 32 ft. draft.
Inner Port: Up to 28 ft. draft.
Also see "Tankers".

TUGS: The use of tug-boats within the port is compulsory both for entering and leaving port, as well as for manoeuvres in the port basin, for foreign flag ships over 300 tons.

BERTHING: The port entrance is 100 m. wide in direction West to East. Berth No. 1 and half of Berth No. 2 are along the same entrance channel, where ships are berthed only as an exception or when the port is rather congested. The total length of the North (main) Pier for the berthing of ocean-going vessels is 1,025 m., room enough for 6 to 8 vessels. For administrative reasons the pier is divided into 8 berths of about 128 m. each. Between Berths No. 2 and 3, the pier turns Southwards. Along the pier there are warehouses which under normal circumstances provide sufficient indoor space.

Along the East Pier, of 350 m. length, there are no warehouses. This pier gives berthing facilities to 3 or 4 middle-sized vessels.

Along the South Pier, of 500 m. length, there are 2 warehouses. This pier is exclusively used for coastwise shipping, fishery and small craft in general.

The dredged channel along the East Pier is only 80 m. wide. This is the only channel which connects the main basin of the port with the South basin of the port, the latter served through the South Pier.

Ro-Ro facilities available.

BULK HANDLING FACILITIES: 400 m. long new pier, designed exclusively for the handling of bulk cargoes.

This bulk cargo pier has an apron of about 25 m. and allows ships with a draft of 10 m. at any time.

Ships moored along this new pier are not able to take water there, but have to be shifted to the general cargo piers in the port of Puerto Cabello.

There is no telephone installation on the new pier.

Tug-boat service and assistance of Pilots is compulsory to negotiate the distance to and from the bulk cargo pier.

General cargo is not allowed to be handled at this pier. There are no cargo handling facilities whatsoever and no kind of rolling equipment either. All the vessels, unless they have up-to-date discharging equipment of their own, have to provide derricks of minimum 5 tons capacity to support the SKT discharging equipment of receivers. The cargo is discharged in bulk cargo trucks, fully closed and with only rather narrow manholes for the SKT arm.

The new grain terminal has been opened. The wharf is 400 m. long and allows 2 vessels to berth. Max. depth 30 ft. Average discharge rate 1,500 tons per day.

TANKERS: *Borburata:* The Maraven Terminal lies about 2 miles East of the port entrance.

Berth No.	*Max. length*	*Max. beam*	*Max. draft*
1	400 ft.	—	20 ft.
2	575 ft.	72 ft.	31 ft.

No. 1 Berth is used for bunkering only.

No. 2 Berth is used for the discharge of refined products and bulk chemicals. It is fitted with 4×8 in. Chicksans and a range of hoses from 4 in. to 8 in.

A Pilot is compulsory, and boards at Puerto Cabello. If the vessel is cleared outwards at Borburata, the Pilot may return to the pilot station by road.

Berthing and unberthing in daylight only.

Also see "Shipmaster's Reports" and "Report".

Lagoven Terminal: The buoy mooring is used for the discharge of petroleum products. Max. length 198 m. Max. beam 28 m. Max. draft 34 ft., will be increased to 38 ft. Max. Tonnage 40,000 d.w.t. Vessels berth using 5 shackles on the port anchor, and 6 stern lines to 3 mooring buoys.

Terminal Marino Holanda: Consists of 3 buoys situated in a depth of 45 ft. near Guaguaza Lighthouse. Used for loading/discharge of Chemicals.

STEVEDORES: *Straight Time:* Monday to Friday: 0700 – 1100 hrs. and 1300 – 1700 hrs.

Overtime: Monday to Friday: 1800 – 2300 hrs. Normally overtime beyond 2300 hours is not permitted.

Relief Gangs: Obtainable, if there are not too many ships working in the port at a time, from 1100 – 1300 hrs. and 1700 – 1800 hrs.

Work on Sunday: Not permitted except for passenger vessels, and considered as such are those carrying more than 60 passengers, and with a medical doctor on board.

Saturday Afternoon Work: Not permitted. But if a vessel can terminate operation and sail with a maximum of 3 additional hours' work, a special permit can be obtained from Customs and Port Authorities. In such case, the additional working hours are considered straight time work.

FRESH WATER: Available by tanker trucks only.

The drinking water in Puerto Cabello is tropical treated, well-filtered and wholesome.

Every vessel of over 600 nett tons calling at Puerto Cabello, and other ports in Venezuela, should arrange to take water only at Puerto Cabello in order to avoid double water dues.

REPAIRS: The adjacent Naval Yard, the entrance to which is within the main port, opposite the North Pier, is equipped for minor repairs both on engine and hull. For emergency purposes, the dry dock could be used. Its capacity is for ships up to 30,000 to 35,000 tons. All repairs on the hull are effected by a special crew transferred from the Naval Yard.

At the dry dock there is 1 crane of 15 tons capacity. Within the Naval Yard there are 2 slipways for ships of 125 ft. length and 210 ft. length max. respectively.

Venezuelan Navy ships always have priority.

WATCHMEN: A very careful watch must be maintained in and around the accommodation as ships' safes and cabins have been broken into.

OPENING/CLOSING HATCHES: Is not performed by the National Port Services, but instead either the ship's crew or hired assistance labour must be used. Recommended that ship's crew open and close hatches.

REGULATIONS: Port regulations referring to contamination of the port waters will be strictly applied and fines for contravention will be imposed.

No maintenance to bridgehouse, hull or deck should be carried out whilst in port unless special permit issued by the Port Captain has been obtained.

SHIPMASTER'S REPORT: November 1984 (see "Plans").

Vessel: LOA 170 m., beam 26 m.

Berth: Maraven Berth at Borburata.

Pilot: Pilot boards off Puerto Cabello during daylight hours only.

Max. Draft: 32 ft.

Tugs: When berthing, 2 tugs are made fast on the Main Deck fore and aft.

When unberthing 2 tugs are used, 1 tug tows aft and the other stands by forward.

Charts: B.A. 1523 and 1966.

SHIPMASTER'S REPORT: October 1985.

Depth within the port received from Agent:

Entrance to the Harbour	31 ft. 6 in.
Pier No. 1	31 ft. 6 in.
Pier No. 2	31 ft. 6 in.
Pier No. 3	31 ft. 6 in.
Pier No. 4	27 ft. 0 in.
Pier No. 5	27 ft. 0 in.
Pier No. 6	31 ft. 6 in.
Pier No. 7	33 ft. 0 in.

SHIPMASTER'S REPORT: February 1989.

Documents:

1 copy Health Declaration.
2 copies Drugs List.
3 copies Stores List.
2 copies Crew Declaration.
5 copies Crew List.

The port officials are generally relaxed and easy going, ship's standa papers are accepted.

A Ministry of Transport and Communications Inspector will boar probably after clearance has been given, and will fill in a lon questionnaire about the vessel and equipment and also inspect all th certificates. An Inspection Certificate is issued and is required by th Port Captain before the Clearance Outward can be issued, howeve the Agent had never heard of this before.

Pilotage: The Pilot boards at the anchorage from a large launch. Pilo leave just in the entrance channel.

Approaches: Charts: B.A. Charts No. 1966 and 1523, USDA Cha No. 24450.

Buoys were found to be as charted with lights working.

In February 1989 dredging was being carried out in the entrance wi cranes on a barge moored to the North shore of the channel and blockin about half the width. Two buoys (Fl. Red) are moored approximatel mid-channel, marking the work, with vessels passing to the South. Th channel is still adequate.

Communications: Contact with pilots and Port Captain's office can b made on VHF Channel 16.

Shortly after anchoring, a launch came alongside with an Arriva Information Form to be completed.

When calling on VHF, a number of stations will answer, most of the are ship chandlers but do not identify themselves as such.

We were advised that the vessel should anchor in Anchorage 'C' an when we asked who was calling they said that it was the Pilot statio calling, it was in fact a ship chandler.

Agents can be contacted on VHF Channel 16 and usually use Channe 11 for working, during office hours only.

Tugs: The Pilot advised that tugs are compulsory, one tug used fo vessels under 125 m. in length and 2 tugs for vessels over 125 m. LOA

The tugs join the vessel just inside the harbour entrance and if makin fast use their own lines.

Berths: Berths No. 13 to 21 have not yet been completed and work doe not appear to be continuing at the present.

Berths No. 31 and 32 are served by a fixed grain elevator supplyin a grain silo on on the dockside.

Berths No. 25 to 30 are used for discharge of grain by portabl elevators and also for containers.

The area of the dock from Berths No. 25 to 32 is known as El Grane

Dockside cranes are not provided at any of the berths but a quanti of mobile cranes of various capacities are available.

There are good fenders on all the completed berths.

Cargo Working: On the bulk berths working hours are:

Weekdays: 0700 – 1200, 1230 – 1800, 1830 – 2300.
Saturdays: 0700 – 1200.
Sundays and holidays: No work.

Overtime is possible on Saturday afternoons to finish, also at othe times if all parties agree.

Grain is discharged with a two stage chain conveyor elevator, eac stage requiring a crane for support, i.e. 2 cranes at each hatch workin

Two elevators were used throughout, requiring 3 ship's cranes an one shore crane.

Shore crane hire rates are variable, depending on the shift, but wer quoted as approximately 4,000 Bolivars per 3 shift day, exchange rat is 37 Bolivars to U.S.$1.00.

Discharge rate is quoted as 1,500 tonnes per elevator but this i entirely dependent on the availability of trucks to take the cargo awa

The distance the trucks have to go is also important, as some of ou cargo was reported to have a destination 10 hours away, with a resul that each truck could only make one round trip in a day. Each truc carries approximately 40 tonnes.

It was unfortunate that the vessel arrived just before Carnival, a heavy transport is not allowed on the roads during this time and othe holidays, in an effort to reduce accidents, due to the many drivers o the roads.

Delays during discharge were due to shortage of transport with som short delays for rain and breakdowns.

Elevator hours available	161.3 hours.
Elevator hours used	74.17 hours.
Gross rate for 8,000 tonnes	49.6 t.p.h.
Net rate for 8,000 tonnes	107.9 t.p.h.

The nett rate gives 1,618.5 tonnes per day for each elevator.

Of the 74.17 elevator hours used, 2 elevators were workin simultaneously for 14.7 hours. If discharging had been carried out wi only one elevator it would have required at least another day alongsi to complete.

Priority for trucks is given to completing vessels.

First four days of discharge 11 shifts (48.45 elevator hours) were use average of 4.4 hours per shift.

Last two days of discharge 5 shifts (25.72 hours) were used, avera of 5.14 hours per shift.

Medical: The Agent must be pre-advised of any medical attent required. The office car will pick-up crew for the doctors at 0800 hr and 1330 hrs. at the gangway. A note is required from the vessel by th driver.

Fresh Water: Fresh water is delivered alongside by tank trucks, ea carrying about 20 tonnes, order well in advance as delivery is slow. Th trucks provide the necessary hoses.

Repairs: The Port Authority only allow chipping and scraping alongs on the bridge front, funnel and decks, provided that no chippings t overside.

Hull painting is forbidden.

Permits are required for Plimsoll and draft mark painting, the permits are arranged through the Agent.

Engine repairs and check-ups require permits from the Port Authority prior to work starting, permits are often refused.

All repair work requires the advance permission of the Port Captain.

Repatriation: Prepaid tickets are a condition as airline agents cannot guarantee Seamen's Rebate and will give preference to full paid tickets.

Shore Leave: Shore passes are issued and stamped by Immigration and Port Captain, the blank passes are brought on board by the Agent with the visit and have to be completed before the Officials stamp and sign them.

Oil Spillage: The spillage of oil and garbage into the dock is prohibited, and this also covers overflowing of ballast tanks, washing dust from the docks and washing down.

Ship Chandlers: About ten ship chandlers will present themselves as soon as the clearance visit is completed, with widely varying prices.

We found Perdomo Shipchandlers to be professional, with reasonable prices and also provided a good service.

Captain's Car Service: The Agent will send the office car at 0900 hrs. and 1500 hrs. for transport to the office for communications with the Owners if required, or at any time if requested by VHF.

Flags: The Venezuelan flag must be hoisted every morning at 0600 hrs. and lowered at 1800 hrs. every evening whilst alongside.

Lifeboats: Vessels are not allowed to lower liferafts or boats for painting or maintenance work without a permit, whether alongside or at anchor.

Ratguards: Ratguards must be in position on all ropes in order to avoid fines.

REPORT: A tanker terminal has been established inside the port, at Berth No. 32. The terminal belongs to the "Instituto Nacional de Puertos", and is referred to as "Terminal Santana". The terminal handles vegetable oils through 3×6 in. connections and flexible hoses. There are 4 shore tanks about 80 m. away. Ships discharge into either shore tanks or lorries. Max. draft 9.50 m.

PUERTO DE HIERRO: 10.38 N. 62.05 W.

DOCUMENTS:

Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
6 Stores Lists.
6 Narcotic Drugs Lists.
2 Health Declarations (forms provided and filled by doctor on arrival).
Derat Certificate.

PILOTAGE: Pilot boards at Sea Buoy, Lat. 10° 37′ N., Long. 62° 06′ W. If no pilot boat meets vessel on arrival, ship must anchor to wait orders. Send 7 day, 48 and 24 hour ETAs to cable address "Transterm Guiria". Vessels should anchor in the vicinity of Sea Buoy. No radio-telephone available.

ANCHORAGE: Vicinity of Sea Buoy. Good holding ground.

RESTRICTIONS: Vessels may have to wait at anchorage until slack water for docking when tide/current is strong.

MAX. SIZE: Dock, East berth: 30 ft. at LW; 33 ft. at HW; 690 ft. length, 90 ft. beam.

Dock, West berth: 19 ft. at LW; 32 ft. at HW; 600 ft. length, 60 ft. beam. Also see "Berthing".

HEALTH: Doctor boards at berth and grants Pratique. Any suspected disease or fever to be reported at that time. Vessels arriving from a Venezuelan port do not require Pratique.

RADIO: La Guaira, Venezuela.

TUGS: None available.

BERTHING: Berthing at times limited to slack water period depending on strength of tides. Pilot will advise.

Bauxite Terminal: Max. draft 37 ft. Depth alongside 40 ft. Max. 40,000 d.w.t. Loading rate 3,000 t.p.h.

STEVEDORES: Bulk cargoes: Discharging rate 700 – 800 t.p.h., loading rate 800 – 1,000 t.p.h. No facilities available for handling general cargo.

MEDICAL: No notice required. Venezuelan Navy Hospital with limited medical assistance.

TANKERS: No oil carriers.

DENSITY: LW – 1020. HW – 1023.

FRESH WATER: Available in limited quantities at berth. Rate of delivery 30 t.p.h.

FUEL: In an emergency. Diesel fuel medium, specific gravity at 60°F 0.85, API gravity at 60°F 35, viscosity SSU at 100°F 37, viscosity engler at 20°C 1.40.

REPAIRS: None. Small company workshop.

CONSULS: None.

CUSTOMS ALLOWANCES: Two cartons of 200 cigarettes each or equivalent in tobacco. Two 0.75 litre bottles.

AIRPORT: Nearest airport (1 hour voyage on launch) is Guiria with 2 weekly flights to Caracas and the same number to Port of Spain, Trinidad. Next nearest (1 hour launch plus 2 hours car) is Carupano with 4 daily flights to Caracas.

TIME: GMT minus 4 hours all year round.

HOLIDAYS: Cargo worked 24 hours a day, 365 days a year.

IDENTIFICATION CARDS: Issued locally by Navy on arrival.

DEVELOPMENTS: Possibility of increasing draft to 42 ft. at loading berth, and to 30 ft. at discharging berth.

GENERAL: The whole of Puerto de Hierro is a Venezuelan Navy Supply Base. The dock and cargo installations are operated by Puerto de Hierro, S.A., a subsidiary of Caribbean Steamship Company, S.A. Only bulk cargoes transhipped by Caribbean Steamship are handled.

AUTHORITY: Puerto de Hierro, S.A.

PUERTO LA CRUZ, (Puerto La Cruz Terminal): 10.13 N. 64.38 W. (See Plan)

FLAG: Venezuelan flag must be displayed from the foremast when entering Pozuelos Bay as well as in docking operations regardless of the hour. At all other times the Venezuelan flag must be displayed between sunrise and sunset.

LOCATION: Puerto La Cruz located on Pozuelos Bay on the N.E. coast of Venezuela. Its harbour is well protected by numerous islands against sea currents. The hurricane path is several hundred miles to the North and has never affected the flow of navigation in the Puerto La Cruz area.

The lighthouse marking the entrance to Pozuelos Bay is located: Lat. 10° 18′ 18″ N., Long. 64° 41′ 07″ W. Visibility is 20 miles.

DOCUMENTS: Arrival Clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company.

The following documents are required and should be prepared prior to arrival:

Ship's Register.
Ballast Manifest (1 copy).
Crew List (6 copies).
Passenger and Baggage List, if any (5 copies).
List of Passengers in Transit, if any (5 copies).
List of Personal Effects (4 copies).
Stores List* (5 copies).
List of Slop Chests (4 copies).
Sailing Permit issued by Marine Authority at last port of call (Original).

*Stores List should indicate separately all deck, engine and cabin stores.

PILOTAGE: The use of Government Pilots is compulsory for all vessels docking and undocking. The Company will arrange for this service at all times. If it becomes necessary for the Master of the vessel to disregard Pilot's orders in order to ensure safety of the ship a written report from the Master shall be submitted promptly to the Government Port Captain in Spanish. Meneven will assist in translation, when necessary.

The zone for Pilot to board or to anchor awaiting Pilot is delineated by the following 3 lines: South by parallel 10° 15′ N., East by meridian 64° 40′ W., and West by an imaginary line from Punta Puinare on Isla Chimana del Oeste to the North point of Morro de Barcelona.

When ready to dock, a Pilot will be despatched by launch to ship.

RESTRICTIONS: No restrictions on arrival or sailing time.

MAX. SIZE: No limitation is placed on width of tankers. Ships up to 1,000 ft. in length can be turned around in the inner harbour area. Max. safe draft alongside (Berth No. 5) is 55 ft. (Also see "Berthing".)

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

Ships cleared between the hours of 1700 – 0800. Mondays through Fridays and all day Saturday, Sundays and holidays are charged by Immigration Service for the issuance of shore leave passes. There is no charge for this service from 0800 – 1700 hrs. Mondays through Fridays. Transportation and immigration clearance fees on movement of seamen are billed at cost.

RADIO: Masters are requested to advise Corpoven Puerto La Cruz by radio 72 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship. Vessels may contact the terminal by radio-telephone on 2182 kHz and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channel 13.

Ship-to-shore radios are installed on the oil dock and on both tugs. A 350-watt AM transmitter-receiver is monitored 24 hours a day.

TUGS: The use of 2 tugs is compulsory for all vessels over 145 m. LOA. The Company has available 3 tugs (2×3,000 h.p. and 1×1,600 h.p.).

BERTHING: The loading facilities consist of 6 berths. Products available and safe draft are as follows:

	Berth 1	*2*	*3*	*4*	*5*	*6**
Crudes	×	×	×	×	×	×
Heavy fuel oil					×	
Refined products		×	×	×		×
LPG		×				
Bunker "C" fuel	×	×	×	×	×	
Diesel fuel	×	×	×	×	×	
Intermediate fuels	×	×	×	×	×	
Fresh water	×	×	×	×	×	×
Max. safe draft (ft.)	38	38	38	55	55	40
Max. d.w.t. (thous.)	45	45	45	110	110	60
Max. LOA (ft.)	750	750	750	950	950	750

*El Chaure Terminal – Now Pier No. 6. Also see "El Chaure".

Jose Terminal is Berth No. 8 – See "Jose Terminal".

Upon arrival at dock the following rules must be observed:

(a) Masters must ensure that mooring lines are properly tended during the discharge of ballast and loading of cargo, and that sufficient personnel are on board at all times to handle same. Discharging or loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore hoses by company personnel. Vessels using Berth No. 5 are also requested to have their derrick and gangway ready for use.

Note: Vessels normally dock with starboard side to dock, unless otherwise advised.

(c) While docked, discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(*d*) Rat-guards must be placed on all ropes connected with the shore.

(*e*) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(*f*) Meals must be provided in officers' mess-room for Venezuelan National Guard personnel who may be assigned to the vessel during stay in port.

LOADING: After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions as to grade or grades of cargo, loading rates, information on size of hoses and lines, and other information pertinent to the loading of the vessel.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo of crude or fuel oil, hoses are normally displaced with air at controlled rates prior to disconnecting. If the ship's officers request that the alternate procedure of draining hoses be effected, shore personnel will be happy to comply provided the following steps are observed by ship's officers:

1. Advice be received prior to termination of loading cargo.
2. Ship's receptacles be situated to receive oil drained on board. It should be noted that heavy fines are imposed for spills or overflows which contaminate the bay.

Shortly after completion of loading, company personnel together with ship's officer will take ship's ullages and, later, deliver cargo and sailing papers to an officer of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage if the berth is needed for another vessel. The Dock Supervisor on duty will advise ship's officer on this matter.

BALLAST: Although climatic conditions in Puerto La Cruz are relatively mild, vessels should arrive with sufficient ballast to permit safe handling. Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast in territorial waters. All ballast must be pumped ashore with the exception of vessels especially equipped with clean segregated systems which are reserved for ballast only. Vessels so equipped will be permitted to pump overboard after first being inspected and approved by shore personnel. Heavy fines are imposed for pollution of waters and industrial fishermen are quick to report any infringement. Max. discharge pressure to shore installations is 90 p.s.i. through the 16 in. line which dumps into ballast lakes approximately 300 m. South of dock.

No vessel will be allowed to discharge ballast if any of the following conditions exist:

(a) Last previous cargo was sour crude/product and/or could result in unpleasantness to area inhabitants.

(b) Ballast has lead gasoline, naphtha and/or other volatile residue which may cause an explosive atmosphere at the open ballast pit.

(c) Last previous cargo had to be heated and/or pour point was higher than 80°F. This will be verified by the laboratory.

MEDICAL: All requests for medical or dental treatment must be accompanied by a written request from the Master to the vessel's Agent.

FRESH WATER: Fresh chlorinated water is available at an average rate of approximately 2 t.p.h. Total volume of water that can be supplied during the normal period alongside averages about 150 tons. As water is not held in special reserve for vessels' requirements but supplied from terminal water system, availability may be limited dependent on time of year and other conditions.

FUEL: The terminal is not a general bunker station. Only ships loading petroleum or its products may take bunkers.

Bunker "C", heavy diesel fuel and complete range of intermediate fuels are available in reasonable quantities. Delivery rates to the ships are approximately as follows: Bunker "C", 200 t.p.h.; heavy diesel, 150 t.p.h.; intermediate fuels, 150 t.p.h.

Bunkers are delivered concurrent with the cargo and should be taken as soon as clearance is granted.

Meters are installed on all bunker systems and are calibrated in nett barrels; except diesel meters which indicate gross barrels.

The dock valves on the bunker lines will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Netherlands
Norway
Sweden

Vessel's Agent should be appraised of vessel's consular requirements promptly upon docking.

REPAIRS: Request for repair work by local contractors must be accompanied by a written request from the Master of the vessel.

SURVEYORS: 1. Saybolt, Inspecciones and AIVEPET cargo inspectors available at the Terminal Office.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I available locally or from Caracas via the ship's agent.

CUSTOMS: Crew members should be warned against taking knives or other lethal weapons ashore, as this is strictly prohibited. All firearms and ammunition must be noted on Stores List. They cannot exceed 1 per officer and 18 cartridges per gun. No arms may be carried while ship is in Venezuelan waters or tied up at dock. Contraband of any description will be confiscated. Each man is allowed 1 package of cigarettes on his person and this package must be opened. No liquor is to be taken ashore. It is prohibited to carry liquor from shore to ship without authorisation from Master of vessel. It is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. However, upon written request to the National Guard contingent on the oil dock, special permission may be obtained. This is subject to 2 limitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

TELEPHONES: There is a telephone booth on each dock. The supervisor on duty may be contacted by calling number 308 or 906.

REPATRIATION: Seamen discharged from hospital for transfer to another port, seamen arriving from another port or those being repatriated are handled by the vessel's Agent, who must comply with all Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation. Venezuelan regulations, at all times hold the vessel responsible for a seaman during his stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

TIME: GMT minus 4 hours all year round.

EMERGENCY CO-ORDINATION CENTRE: Seccion de Seguridad Busqueda y Salvamento Maritimo. Telex: 31154. Tel: (02) 513395, 512156.

BANKS: Banco Royal Venezolano. Tel: (081) 691921.

Cash: The local currency is the Bolivar.

Foreign currency may be exchanged at local banks. Local banks are open Monday to Friday from 0830 – 1130 hrs. and from 1400 – 1630 hrs., except holidays.

STORING: See "Prelims".

1. Vessel can be stored by truck.
2. No need for barge storing while ship is alongside.
3. Trucks can proceed to the berth gate only. Distance from gate to ships berth 200 ft.
4. Fork lift trucks cannot be permitted inside the berth while the ship is either deballasting or loading.
   No fork lift trucks whatsoever permitted alongside LPG ships.
5. No Customs regulations in force regarding storing.
6. Local riggers can be employed to assist with storing through ship's local Agent.

IDENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent. Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

GARBAGE DISPOSAL: Garbage collection service available. Contact Marine Garbage Recolector C.A., Ave. Constitucion No. 92, Puerto La Cruz. Tel: (081) 664243. Garbage collection is by request only, $ 300.00 per service (including supply of waste bags and cleaning of garbage storage area). Daytime service only.

WASTE OIL DISPOSAL: Waste oil disposal service available at Jetties No. 1, 2, 3, 4 and 5. Discharge and disposal is limited to 15,000 tonnes per vessel. Arrangement for this service is by prior agreement. Contact agent 72 hours before arrival. There is no charge for this service.

SEAMAN'S CLUB: No seaman's club available. Taxis to be ordered by Agent. No telephone service on jetty.

CURRENCY: Bolivar. U.S.$ 1.00 = 64.50 Bs. (25.2.92). No currency restrictions. Also see "Banks".

REGULATIONS:

Excessive Smoke. It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's docks. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. Vessel's discharge of ballast or loading of crude or products will be immediately shut down.
2. Vessel will be subject to fine from authorities.
3. Vessel may be removed from dock.
4. Ship's Agent will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution. Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany, Netherlands, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL:

No charts or sailing directions are available in the terminal. Same should be forwarded by airmail to the vessel's Agent for delivery to the ship.

All ship requirements such as chandlery supplies, mail, cash advances, medical, dental, consular requirements, repair work, laundry service, bonded stores, transportation etc. should be obtained through the vessel's Agent.

Local authorities strictly forbid the throwing overboard of garbage, trash or any objects while anchored or docked, and they also forbid the exchange of articles between crew members and the occupants of adjacent small craft.

Corpoven as operator of the Terminal charges a fixed fee for General Services such as supervising the docking and undocking manoeuvres, hose connections, loading and documents required by the cargo buyers or consignee. Handling of Telexes, documents and air postage will be charged at cost.

Offices of Corpoven loading and marine personnel are located on the first floor of the building between Berths No. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours of every day. On the ground floor of this same building is the Documentation Section.

DEVELOPMENTS: Tanker terminal for VLCCs to be built.

SHIPMASTER'S REPORT: February 1979.

Documents:

3 copies of List of Passengers or "nil" passengers.

3 copies of a letter by Master stating that vessel was diverted after sailing from previous port and explaining why clearance destination is wrong.

3 copies of cable ordering diversion.

Anchorages: Good holding ground in N.W. part of anchorage area, thick mud.

Restrictions: Maximum height of manifold about 18.95 m., so necessary for vessels of 140,000 d.w.t. to load some cargo before completion of ballast.

Max. Size: If draft less than 30 ft. on arrival vessel can approach berth direct from West, and use 2 tugs. If more than 30 ft. draft then vessel must use channel to the North of berth and use 3 or 4 tugs. This for vessels of 140,000 d.w.t.

VHF: Tankers call "Corpoven" on Channel 16, then change to Channel 12 or 13. Also call Agents on Channel 16.

Berthing: Back springs to bollards on jetty. Breasts and heads and stern lines to hooks on dolphins. These hooks are secured to bollards by wire of circumference 19 cm. or diameter 6 cm.

Consuls: No U.S. Consul available and Agents will give Master letter to this effect for U.S. Immigration.

General: Ballast, if clean, may be pumped overside. If dirty, advise Corpoven prior to arrival of quantities to be pumped ashore. They will also accept slops if not sour crude or smelling too badly.

Notice to Shipmasters:

We wish to advise the Masters of all vessels calling at this port that it is strictly prohibited to take photographs.

It is likewise contrary to regulations to carry ashore a camera. Same is liable to be confiscated by the Government Authorities.

Signed S. A. Corpoven.

SHIPMASTER'S REPORT: January 1989.

Berth: Berth No. 4, starboard side alongside.

Vessel: 89,000 d.w.t.

Gangways: Shore gangways at Berths No. 1 – 5.

Tugs: 2 tugs used, port bow and starboard main deck aft. Tugs lines used.

Mooring: 2 head/stern lines, 2 breast lines and 2 springs at each end. Head lines sent first, then breast lines and finally springs. From aft, springs first, then breast lines and finally stern lines.

The pilot boat takes all the forward lines. After springs sent away by heaving line if possible, otherwise all after moorings by pilot boat on completion of forward moorings.

AGENCY:

All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

AUTHORITY: Capitania de Puerto, Guanta, Puerto La Cruz. *Tel:* 081-660534, 081-660367. *Telex:* Capipuerto 81386. *Contact:* Captain A. Hernandez, Port Captain.

Operator: Corpoven S.A. *Tel:* (081) 604709, 6022211. *FAX:* (081) 603483. *Contact:* Jesus Narvaez, Terminal Supervisor.

PUERTO SUCRE (Cumana): 10.28 N. 64.12 W.

(See Plan)

SHIPMASTER'S REPORT: August 1980.

DOCUMENTS: As for Guanta. Entry formalities, normally after berthing but if at anchor will board about 0900 hrs.

APPROACHES: Approaching Puerto Sucre at night, the lights of the city are visible for many miles, but the light indicated at the end of the pier is non-existent, also the water tower marked on the chart with red lights is non-existent.

Two vessels were alongside when this vessel approached so the pier was clearly visible with the lights of the ships, otherwise there are no lights on the pier.

The pier indicated on the chart just North of the main pier is no longer there although at low water parts of the supports are still visible. Further North there are 3 piers, approximately half cable long, used by fishing boats. They start approximately 1 cable North and 1 cable between each, also there are car ferry terminals before the mouth of the river South of Pta. Carenero. This river mouth is undergoing extensive work which is apparently to be a fishing harbour.

A tall white building is situated in approximate position Lat. 10° 27.8′ N., Long. 64° 11.1′ W., it has a fixed red light and an occulting red light at night. A silo is situated in approximate position Lat. 10° 26.7′ N., Long. 64° 11.25′ W., this has 3 red lights in a horizontal line at night. There is an air light on the control tower at the airport, alternating white and green every 5 seconds, but this is only lit when an aircraft is due.

PILOTAGE: Pilotage is compulsory for berthing and unberthing. Pilot will anchor vessel if required.

ANCHORAGE: Anchorage is limited in pilotage area "A". This vessel anchored 3 cables off the shore line and 3 cables off the pier in 30 fathoms of water, vessels also anchor 2.5 to 3 miles S.W. of pier in 25 fathoms, however Pilots prefer vessels to use nearer anchorage.

VHF: Pilots occasionally on Channel 16, but very little English spoken. The ship's chandler has a VHF set and can be very helpful as he speaks very good English.

TUGS: One tug is available to assist with berthing/unberthing.

BERTHING: Vessels use both sides of the pier and Ro/Ro vessels tie up stern to the head of the pier. Soundings were taken around the pier (See "Plan").

CARGO HANDLING FACILITIES: There are numerous fork lift trucks of all sizes, 4 mobile cranes and some small towing vehicles. This vessel had a cargo of bagged fertiliser which was discharged onto lorries and there was no shortage of these, even when working 2 ships with 10 gangs no delays were caused due to lack of transport. Ship's gear is used at all times but the mobile cranes can be hired if required.

MEDICAL: Services available.

FRESH WATER: Available using ship's hoses.

FUEL: Diesel oil is available but difficult to obtain as it has to be brought from Puerto la Cruz by road tankers.

WATCHMEN: Not available, one member of National Guard on board, requires a cabin if one available. This vessel had no spare accommodation but the guard must still be fed.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned when vessel leaves.

GENERAL: *Provisions and Laundry:* Available.

Garbage Disposal: No facilities.

PUNTA CARDON: 11.38 N. 70.14 W.

PORT LIMITS: The area enclosed by the parallels of Lat. 11° 38′ 00″ N. and Lat. 11° 36′ 38″ N. and the meridian of Long. 70° 14′ 25″ W.

FLAG: It is compulsory to display the Venezuelan flag at the foremast starboard yardarm during daylight hours for ships anchored or berthed in Venezuelan waters. The ship's Services will provide a Venezuelan flag at any time for ship's account.

LOCATION: The port of Punta Cardon is located on the Gulf of Venezuela, on S.W. coast of Paraguana Peninsula, Venezuela. Punta Cardon is an open sea port with practically no swell, due to the Easterly winds prevailing almost all year from the shore side.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Punta Cardon.
2. If a ship, originally cleared for another port (including any other Venezuelan port) is diverted at sea to Punta Cardon, certain information must be radioed prior to arrival in order to avoid heavy fine(s) and/or delays.
3. No dirty ballast may be pumped overside in port in Venezuelan coastal waters. Ballast disposal facilities are available at Punta Cardon Terminal.
4. The use of Venezuelan Government Pilots is compulsory for berthing and unberthing.
5. In addition to other clearance documents, 5 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.
6. The emergency fire signal is 5 long blasts on the ship's whistle or siren. No other signal is to be given in cases of emergency.
7. Rat-guards must be placed on all mooring lines.

DOCUMENTS: Clearance (inward Pratique). Inward Clearance is effected on board by Government Port and Customs Officials and a representative of the Oil Movements Department immediately after berthing. The following documents must be ready on arrival:

(1) In ballast:

- *(a)* Clearance from Last Port (1 copy).
- *(b)* Ballast Manifest from Last Port (1 copy).
- *(c)* Crew List (7 copies).
- *(d)* Steward's Stores List (all foodstuff, liquors, tobacco, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
- *(e)* Deck and Engine Stores and Spare Parts List (paints, varnishes, chains, ropes, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
- *(f)* Medicine Chest Lists (including narcotics accurately itemised) (5 copies).
- *(g)* Slop Chest Lists (5 copies).
- *(h)* Personal Effects Lists (4 copies).
- *(i)* Sailing Permit (issued by Maritime Authority at Last Port of call) (1 copy).
- *(j)* Passenger and Baggage Lists (if any) (2 copies).
- *(k)* List of Passengers in transit (if any) (4 copies).

(2) Both the Steward's Stores List, the Deck and Engine Stores and Spare Parts List may be prepared on board prior to the vessel's arrival. The Steward's Stores List must be comprehensive and accurate, especially with regard to cigarettes and liquor. All new clothing, gifts, souvenirs, etc. are to be clearly marked. All personal effects of the crew are to be collected and placed in the Bonded Stores Locker, ready for sealing by the Customs Authorities on arrival.

Although vessels proceed directly to Punta Cardon, clearance documents should be made out showing the port as "Las Piedras, Paraguana (Punta Cardon)". Failure to comply with this requirement may result in fines up to a max. of U.S. $600.00.

(3) Clearance documents out-bound: Outward Clearance and cargo documents are delivered on board by the Ship's Services Representative.

In the event that the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents and clearance.

APPROACHES: Restricted Fishing Area. Masters when approaching coast should keep a particularly sharp lookout for fishing boats, nets and small craft.

Mechanically propelled vessels drawing more than 5 ft. are prohibited from navigating in the restricted fishing area that extends off Paraguana Peninsular from Punta Macolla, Lat. 12° 05′ 32″ N., Long. 70° 12′ 55″ W. to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the position indicated below:

(a) Lat. 11° 37′ 12″ N., Long. 70° 14′ 25″ W.
(b) Lat. 11° 37′ 30″ N., Long. 70° 19′ 23″ W.
(c) Lat. 11° 37′ 36″ N., Long. 70° 21′ 50″ W.

Leading Lines:

Jetty	*Position* *Latitude* N.	*Longitude* W.	*Colour*	*Height in Metres (LWS)*
I	11° 37′ 19.2″	70° 13′ 54.6″	Green	4.70
	11° 37′ 23.1″	70° 13′ 47.6″	Green	14.20
II	11° 37′ 32.0″	70° 14′ 02.0″	Red	4.83
	11° 37′ 35.9″	70° 13′ 55.1″	Red	14.30
III	11° 37′ 08.1″	70° 13′ 53.5″	White	3.06
	11° 37′ 09.1″	70° 13′ 50.6″	White	14.94
IV	11° 37′ 41.9″	70° 14′ 12.0″	Blue	5.10
	11° 37′ 42.4″	70° 14′ 09.4″	Blue	21.54

Navigation Aids:

A light is located on the outer radio tower.

Position: Lat. 11° 38′ 03″ N., Long. 70° 13′ 56.2″ W.

Characteristics: Fl. White and Red, ev. 10 sec. Height 205 ft. (62.5 m.) 21 miles (U).

Sectors: Red 340° – 009°, White 009° – 202°, Eclipsed 189° – 340°. (All bearings are true from seaward).

2 large chimneys are very conspicuous in the Refinery Area. The North chimney is situated Lat. 11° 37′ 54.6″ N., Long. 70° 13′ 10.8″ W. Height above MLWS 399.6 ft. (121.8 m). The South chimney is situated Lat. 11° 37′ 52.9″ N., Long. 70° 13′ 09.8″ W. Height above MLWS 396.3 ft. (120.8 m.). For daylight distinguishing marks, both are painted with broad red and white bands and at night both have a string of all round fixed red lights at the top and the same at the middle height.

PILOTAGE: Pilots are employees of Venezuelan Government and pilotage is compulsory for vessels entering or leaving harbour. The Ship's Services Office will arrange for this service at any time. If it becomes necessary for Master of the vessel to disregard Pilot's orders in order to ensure safety to the ship, the Master must promptly submit a written report to the Harbour Master on the matter, via the Ship's Services Representative, stating reason for this action.

Pilots sustaining injuries: It is compulsory to submit a full report in cases where a Pilot is injured while performing duties on board vessels.

Agent's Notice to Masters: Dated July 1986.

Subject: Pilot Service from/to Punta Cardon

Harbour Master's Office has issued new regulations. Here below are mentioned regulations:

1. Pilot service from Punta Cardon is only compulsory when Masters are crossing the channel of Lake Maracaibo for the first time. If this is not the case, the Pilot should be then embarked at San Carlos.
2. Upon your request this Pilot service can be arranged by the Agency.
3. On departure, Pilot service to Punta Cardon is not required.
4. If Official Pilot is unable to disembark at San Carlos due to difficulties on board or by *force majeure,* or if you decide to change the instructions given to the Agency with regard to Pilot disembarking San Carlos, a letter addressed to the Harbour Master stating your reasons should be handed to the Pilot before he disembarks in Cardon.

Master's Note: With regard to the above, on reflection the content of the letter from Agent may not be too clear to those not familiar with this area. At risk of stating the obvious, what this Notice is saying is that pilotage inwards from the "EM" Buoy, to the San Carlos Pilot Station is only necessary on the Master's first visit to a Lake Maracaibo Port. Thereafter he may navigate the Outer Channel without a Pilot. The Outer Channel Pilot is taken at Punta Cardon on the inward passage, and disembarked there on the outward passage, should a Pilot be so required.

Shipmaster's Report: January 1989.

Punta Cardon is no longer a pilot station. The new station is Guaranao Pilot Station. The embarkation/disembarkation zone is located between the following 4 points:

A.	Lat. 11° 40.0′ N.	Long. 70° 15.5′ W.
B.	Lat. 11° 41.5′ N.	Long. 70° 15.5′ W.
C.	Lat. 11° 41.5′ N.	Long. 70° 16.5′ W.
D.	Lat. 11° 41.0′ N.	Long. 70° 16.5′ W.

ANCHORAGE: The anchorage at Cardon roads within a radius of 2 miles from end of jetties has depths varying from 54 ft. to 100 ft. (LWS) and a bottom consisting of mud with some patches of small stones, sand and shells. There are no known obstructions from West to N.W. of the Piers and there is ample water for a clear approach when coming from West and N.W., but the anchorage is limited on the South by a sandspit projecting 1 mile S.W. off Punta Cardon Cape. A beacon is located on this Sandspit in position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W. Fl.R. ev. 1 sec. 17 ft. 5 miles (U).

MAX. SIZE:

	Jetty/Berth		*Depth LWS* (ft. in.)	*Draft* (ft. in.)	*Length* (ft.)	*Displac* (tons)
No. 1	North Outer	(3)	42 00	39 06	710	25,000
	South Outer	(4)	42 06	40 00	710	25,000
	North Inner	(1)	31 06	30 00	575	25,000
	South Inner	(2)	32 06	31 00	575	25,000
No. 2	North Outer	(3)	43 00	40 06	710	25,000
	South Outer	(4)	41 06	39 00	710	25,000
	North Inner	(1)	21 00	19 06	424	25,000
	South Inner	(2)	23 00	21 06	424	25,000
No. 3	North Outer	(3)	47 00	44 06	900	62,000
	South Outer	(4)	48 00	45 06	900	62,000
No. 4	North Outer	(3)	47 06	45 00	900	54,000
	South Outer	(4)	47 06	45 00	900	54,000

RADIO: Arrival messages (ETA). Master of vessels bound for or diverted to Cardon are requested to radio the following information to "Maraven Caracas" via La Guaira Radio, call sign YVG, 72 hours in advance of estimated arrival, or as soon as possible.

(a) Name of vessel
(b) Flag
(c) ETA
(d) Last Port.
(e) Master's name
(f) Number of crew and passengers
(g) Port for which the vessel is cleared
(h) Quantity of clean ballast on board
(i) All requirements

This information is of the utmost importance to the Harbour Authorities in facilitating the entry of vessels in general, and in case of diversion.

VHF Radio Telephony. The radio and communication centre is located in the Oil Movements Office Building situated at the foot of Pier No. 2 at a height of 50 ft. above sea level. The roof of the building is painted black and the word "Marine" painted across in large white letters.

There is an R/T set operating 24 hours a day on the following frequencies, and manned by English speaking operators:

156.6	MHz	FM	VHF (Channel 12)	Range	limit	25	miles
156.8	MHz	FM	VHF (Channel 16)	,,	,,	25	,,
2120	kHz	AM	HF	,,	,,	150	,,
2182	kHz	AM	HF (Channel 1)	,,	,,	150	,,
7620	kHz	(SSB)	HF (Channel 3)	,,	,,	300	,,

Call sign: "Marine Cardon".

Vessels not equipped with radio telephone may call the installation by signal lamp (Aldis lamp) whereupon the service launch will be sent out to vessel to pick up any message it may have.

TUGS: 2 tugs of 2,700 h.p. are available, and their assistance is compulsory for berthing. Number, disposition and manoeuvres of tugboats are directed by the Pilot. The following tug signals in practice in this port are listed below for Master's guidance:

Short blasts are used to give orders to the tug situated ahead.

Long blasts are used to give orders to the tug situated aft.

1 blast means *push* tug engine, ahead (if it is stopped); *stop* tug engine, stop (if it is moving).

2 blasts, *pull* tug engine, astern.

1 long, 1 short, 1 long and 1 short whistle, "Calling tugs".

1 long and 2 short whistles, "Tugs Dismissed".

BERTHING: Without exception ships always moor head-in on all berths. It is considered prudent to have the outboard anchor hove out prior to approaching piers to facilitate speedy release while docking if necessary. Vessels are to be moored to satisfaction of the Port Services Superintendent or his deputy; mooring lines must be tended regularly and kept hove taut to prevent surging and possible damage to ships, docks or hoses. When adjusting mooring lines, the assistance of harbour tugs should be requested before slackening off any mooring line.

BALLAST: It is suggested that vessels nominated to load at this installation arrive with the minimum of ballast on board, necessary for the safe handling of the vessel under normal conditions. In this connection experience has shown that, under normal weather conditions, vessels can be safely berthed and unberthed with a quantity of ballast of approximately 25% of their respective Summer deadweights. Clean ballast can be pumped into the sea, but Masters are reminded that pollution of the sea incurs heavy fines. Dirty ballast can be received ashore. Maximum discharge pressure to shore installation is 150 p.s.i. in the 20 in. ballast line of Jetty No. 2; Jetties No. 1 and 4 have a 24 in. ballast line, and Jetty No. 3 has a 16 in. line. Masters are requested to endeavour to arrive at this port with 20% SDW ballast.

MEDICAL: Facilities are available for medical and dental treatment, vaccination and hospitalisation in a private clinic.

Emergency cases will be attended to at all times.

Masters requiring medical or dental service or vaccination for their crew members should call Ship's Services by dialling 2105. Our representative will make the necessary arrangements with the clinic and arrange for transportation to pick up the crew members on the pier and to take them to the clinic and back. Any crew member who is sent ashore for medical or dental treatment, and who does not speak English or Spanish, must be accompanied by a crew member who speaks one of these languages.

Doctors do not attend patients on board. In serious cases where the patient is unable to walk an ambulance will be provided to take him to the hospital.

FRESH WATER: Fresh water is available at all berths. Loading rate is 30 t.p.h.

FUEL: Available if advance notice given. Funds at to be remitted to Chase Manhattan Bank, One Chase Manhattan Plaza, New York 24 hours in advance to Maraven S.A. (Account No. 001-1-992773).

REPAIRS: Shore facilities are available for emergency repairs of a minor nature. The nearest dry docks are located at Puerto Cabello and Curacao, N.A. Request for repairs should be mentioned in the ship's ETA message.

CUSTOMS: Venezuelan National Guards are stationed at the piers to ensure that vessels in port comply with regulations.

1. *Smuggling.* Strict compliance with the Customs laws of the country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle ashore cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried but a greater quantity will result in the imprisonment of the offender with possible heavy fines and delay to the vessel.

2. *Bar.* On Customs Authorities instructions vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep the bar closed during the vessel's stay in port.

3. *Firearms.* Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be declared on Stores List. Officers must not carry firearms while ship is in Venezuelan waters. Said arms should be collected together with the ammunition and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore as these will be confiscated and the bearer fined.

CERTIFICATES: All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on size and tonnage of vessel.

It is usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans, which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to ship's Owners.

Vessels registered in following countries are exempt from above regulations, due to existing reciprocal agreement with Venezuela: Denmark, France, Germany, Great Britain, Ireland, Netherlands, Norway, Portugal, Sweden, U.S.A.

The Venezuelan Tonnage Certificate is used in calculating Venezuelan Government Port charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

TIME: Local time is GMT minus 4 hours.

HOLIDAYS: By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following national holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

TELEPHONES:

Communications Office (General and Port Information, 24 hours service), 2604. Ship's Service Office (All services to ships: mail, doctor, taxi, papers, etc., 24 hours service), 2105. Agents' Office (Weekdays) (0700 to 1200 – 1300 to 1600 hrs.), 2125. Loading Supervisor (Re cargo and bunkers), day, 0700 to 1600 hrs., 2821/2133; at night, after 1600 hrs., 2133.

SHORE LEAVE: Shore leave is permitted and Harbour Master's representative who boards vessel on arrival issues the required number of shore passes. These passes must be shown when proceeding ashore to the Government and Company Guards at the gangway and refinery gates. They are to be collected by Master prior to sailing and handed to Pilot unberthing the vessel. Masters are reminded that in accordance with the instructions of local police, crew members be properly dressed before leaving the vessel, i.e. long trousers and shirts.

Masters are requested to have shore leave expire at least 2 hours before expected departure. Men then found missing should be reported to the Ship's Services Office, Tel. 2105, who will endeavour to locate them. An officer must accompany shore personnel in order to identify the missing crew member.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or previously signed off by the Master through the Ship's Services representative. If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the Ship's Service representative, as well as written instructions as to his repatriation, when found. All costs and expenses of a crew member so left behind will be for ship's account.

GENERAL:

1. *Animals:* The importation and transit of all birds belonging to the genus parrot or parakeet is prohibited. For other birds a valid health certificate is required. For so-called "small animals" e.g. dogs, cats, monkeys, rabbits, etc. a valid health certificate and a valid rabies vaccination certificate are required.

2. *Bonded Stores:* Stores in bond are not obtainable in Punta Cardon. The nearest port with bonded stores facilities is Curacao.

3. *Board of Trade Gangway:* A safe gangway must be provided by the vessel and should be rigged as soon as possible after mooring to allow the Port Authorities to board, and should not be taken in until Pilot has boarded to unmoor vessel. The use of rung ladders, pilot ladders, etc. is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

4. *Damage during Manoeuvres:* When a vessel or the pier sustains damage during manoeuvres with an official Pilot on board, it is the responsibility of the Master to submit to the Ship's Services representatives, immediately after the accident, a report in quintuplicate, for presentation to the Harbour Master. Such reports should give full details of the accident and of all engine movements as ordered by the Pilot, as well as a sketch in triplicate of the ship's manoeuvring position at the time. These will be translated by the Agents into Spanish and forwarded to the Harbour Master.

5. *Cash Advance to Masters:* Cash advances to Masters are made only in Venezuelan currency, which is the Bolivar. Cash requirements should be included in the vessel's ETA message. Foreign currencies are accepted in the United Seamen's Service Club.

6. *Rat-guards:* By order of the Port Authorities rat-guards must be fitted to all mooring lines. Non compliance entails a fine of 200 Bolivares for each unguarded line.

7. *Kerosene, Motor Gasoline, Gas-Oil, Solvents:* Supplies for ship's purposes are available in drums. The return of empty drums ashore is prohibited by Customs regulations. Therefore the cost of each drum will be billed to the vessel in the Port Disbursement Account.

8. *Lubricants, Oils and Greases:* Supplies of products are available. Vessels arriving at Punta Cardon on Saturday or Sunday or on a holiday should give ample notice of their requirements by cable in order that the necessary labour arrangements for delivery can be made. This procedure also applies to the delivery of white oils mentioned under 7 above, when required outside working days.

9. *Laundry Service:* Laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

10. *Wireless Transmitters in Port:* It is strictly prohibited to use vessel's wireless transmitters in the Port of Cardon. Non-compliance with this regulation may result in a fine being imposed on the vessel by the authorities.

11. *Mail:* On vessels' arrival, blank Mail List Forms will be handed to the Master to be completed in sextuplicate and duly signed by him, when sending ship's and crew mail ashore for posting. Ship's mail received after ship has sailed, or for vessels on which no advice has been received, will be held for 15 days and then returned by airmail to the owners or operators or senders, at ship's expense unless specific instructions have been received beforehand.

12. *Marine Surveyors:* Both the Lloyd's Agents at Maracaibo and Norske Veritas at Caracas have a representative in Punta Cardon who acts on their behalf when a surveyor is requested. However, in the case of continuous or classification surveys, advance notice of 4 days should be given in order to arrange for an appointed surveyor to come from Caracas. There is also a representative of the American Bureau of Shipping in this area (Caracas).

13. *Miramar Club:* Masters, chief engineers and their wives can visit the Miramar Club. For this purpose entrance passes should be requested from the Ship's Services Office, tel. 2105.

14. *Manaure Bathing Beach:* The above mentioned bathing beach is open to all ship's staff and crew members.

15. *Navigation Charts:* Navigation charts are not available at this port.

16. *Passengers:* Movement of passengers over Cardon Piers is subject to restriction under terms of agreement with the government. Passengers will not be permitted to disembark unless in possession of the required Venezuelan visa and travel documents. If passengers are carried, Master should so advise in his radio ETA so that arrangements can be made for Immigration Authorities to visit vessel on arrival and thus facilitate clearance.

17. *Petroleum Inspection:* Charles Martin & Co., and E. W. Saybolt, petroleum inspectors, are available in this area. Contact can be made through the Loading Supervisor (tel. 2821).

18. *Personnel – Seamen Left Ashore:* In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reasons, all documents and personal effects are to be handed to the Oil Movement Department's representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seamen, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, or Owner responsible for any seamen left behind in Venezuela.

19. *Photographing:* The taking of photographs within the boundary fence of the Cardon Refinery is prohibited. Taking cameras ashore is likewise prohibited.

20. *Provision and Stores:* Provisions and stores are available. Requisitions should be conducted through the Ship's Services Office. Telephone number 2105 or the Ship's Services representative when he calls on board with the authorities on arrival. Ships' chandlers are not permitted to visit ships, unless specifically instructed to do so by the Agents.

21. *Radar and Radio Repairs:* Repair and maintenance services for radar, radio, gyro compass, radio direction finder, echo sounder, etc. are available. The repair man should be contacted through the Ship's Services Office, telephone number 2105.

22. *Safety of Personnel:* It will be appreciated that persons intoxicated by alcoholic drinks can create risks of accidents; therefore we ask the Master's co-operation to ensure that these persons do not enter the refinery gates and/or board their vessel unless accompanied by sober members of their crew. In this connection we will advise the Master or one of his officers, so that measures can be taken to ensure the safety of the forementioned person(s) e.g. by sending one or more of the crew to the gate to accompany him (or them) to the ship.

23. *Visitors:* Visits to ships are prohibited except from those company employees, petroleum inspectors, etc., whose duties require their presence on board.

24. *Staff and Crew Changes:* No staff and/or crew should be engaged or discharged without consulting Ship's Services (telephone 2105). In case of discharge, identification documents must be handed to the Ship's Services representative or the Norwegian Consular Officer in the case of Norwegian vessels.

25. *Tank Cleaning and Mopping:* Several contractors in the area provide labour for tank cleaning and mopping. Masters in need of this service should submit their requirements to the Ship's Services Office (telephone 2105), who will contact and request a contractor to go on board to discuss details and estimate costs of work to be effected. It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore it is up to him to decide the degree of tank cleaning necessary. He may, of course, seek

advice from the installation representative in this respect, whenever there is any doubt.

26. *Turnaround:* To promote the economical operation of their vessel, Masters are requested to co-operate with installation representatives in minimising their in-port time. Any delays which are considered unnecessary or extensive should be reported to the loading Supervisor (tel. 2133) so that corrective measures can be taken.

REPORT: February 1991.

The following telex was sent to a Master by the Agent.

Quote:

Latest Instructions Received from Coast Guard and Port Captaincy with Reference to National Security Enforcement:

(AAA) Arrival and departure transit of vessel to the terminal of Punta Cardon.

(AA1) All vessels should arrive at following position:
Lat. 12° 10′ N.
Long. 70° 40′ W.

(AA2) Then, they have to proceed to the following position (course 180°):
Lat. 11° 46′ N.
Long. 70° 40′ W.

(AA3) In order to arrive at terminal of Punta Cardon it is compulsory to pass through Coast Guard control zone at the following area:
(A) 11° 40′ 15″ N. (C) 11° 37′ 00″ N.
70° 22′ 30″ W. 70° 26′ 00″ W.
(B) 11° 40′ 15″ N. (D) 11° 37′ 00″ N.
70° 26′ 00″ W. 70° 22′ 30″ W.

(AA4) After passing through Coast Guard control you may go ahead to the anchorage zone which is as follows:
Parallels 11° 40′ 00″ N. and 11° 38′ 00″ N.
Meridians 70° 17′ 00″ W. and 70° 15′ 30″ W.

(BBB) Arrival and departure information should be transmitted by radio on VHF Channel 16 to Coast Guard or Guaranao Pilot Station (Port Captaincy of Las Piedras):

(BB1) Once you arrive at the position referred to in (AA1) above you should start calling the Coast Guard (if you do not receive any answer then call Guaranao Pilot Station).

(BB2) Following information should be passed to them:
Agency name.
Vessel's name.
ETA/Port.
Last Port.
Call Sign.
Kind of vessel.

Please note that all this information should be provided by us (agent) to the port authorities 48 hours prior to the vessel's arrival. Once you arrive at Point (AA1) above same information must be reported to authorities, thence you may be authorised to transit from Point (AA3) to (AA4) above.

If there is something different in the information, your vessel may be requested to anchor in the zone mentioned in Point (AA3) above and wait until Coast Guard boards your vessel and checks all the information again.

Please note that even when all information is correct your vessel may be requested to anchor for routine check.

(BB3) Upon departure you should contact Coast Guard/Port Captaincy and inform them about your departure and transit through zone indicated in Point (AA3)/(AA2)/(AA1).

If all the above procedure is not followed by you, your vessel will be requested to anchor for about 48 hours in area referred to as Point (AA3).

We highly appreciate your co-operation in order to avoid any unnecessary delay for your vessel.

NOTES

Please also advise Shipping Guides Ltd.

Socialist Republic of Vietnam

GENERAL:

The following ports are open for international trade:
1. Campha
2. Hongay
3. Haiphong
4. Nghe Tinh
5. Danang
6. Quy Nhon
7. Nha Trang
8. Saigon
9. Vungtau
10. Can Tho

The following small ports are also open to international trade, and information on these ports will be included in a latter edition of the Guide.

Thanh Hoa Port: Pilot Station at Lat. 19° 40.6′ N., Long. 105° 57.8′ E. Contact: Vosa Haiphong.

Dong Thap, Vinh Thai and My Tho Ports, located on the rivershore at Tien Giang. Pilot Station at Lat. 09° 26′ 23″ N., Long. 106° 30′ 48″ E. Contact: Vosa Vung Tau or Vosa Saigon.

My Thoi Port, located on the rivershore at Hau Giang. Pilot Station at Lat. 10° 20′ 40″ N., Long. 107° 03′ 00″ E. Contact: Vosa Saigon or Vosa Vung Tau.

Hon Chong Port: Pilot Station at Lat. 10° 02′ 06″ N., Long. 104° 34′ 07″ E. Contact: Vosa Saigon.

Nam Can Port: Pilot Station at Lat. 08° 42′ 08″ N., Long. 105° 17′ 08″ E. Contact: Vosa Saigon.

DOCUMENTS: (All ports).

Arrival Procedure:

(a) Arrival documents to be filled in or signed:
Clearance from Last Port.
2 copies Declaration of Arrival.
8 copies Crew Lists.
8 copies Passenger Lists.
2 copies Health Declaration.
Crew Personal Effects (individual declaration).
Passengers Personal Effects (individual declaration).
5 copies Dangerous Cargo Declaration.
5 copies Cargo Manifest.
5 copies Cargo Plan.
8 copies List of Articles Forbidden to be Used in Port.
Zoological Quarantine Declaration.
Ship's Stores Manifest.
Phyto Sanitary and Fumigation Certificates.
Veterinary Certificate.
Phyto Quarantine Certificate.
Application for Crew Members and Passengers Shore Passes (to be returned before Ship's Departure).

(b) Arrival documents to be submitted to Port Authority:
Ship Safety Construction Certificate.
Ship Nationality Certificate and Navigation Certificates.
International Load Line Certificate.
International Tonnage Certificate.
Safety Radio Telephony Certificate.
Safety Equipment Certificate.
International Certificate of Vaccination for Passengers and Crew.
Ship's Derat (or Exemption) Certificate.
Seamans Passports or Seaman's Books of Crew and Passports of Passengers.
Transit Cargo Manifest.
Zoological and Botanical Transit Cargo Manifest.
Certificates of Competency of Officers and Engineers (for all Officers onboard).
Certificates of Proficiency in Manoeuvring Lifeboats.
Foreign Currency Declaration and Invoices.
International Oil Pollution Prevention Certificate.

Departure Procedure:
2 copies Declaration of Departure.
3 copies Health Declaration.
6 copies Outward Cargo Manifest.
6 copies Crew Lists and Passenger Lists (if changes).
6 copies Personal Effects Declaration.

PILOTAGE: Pilotage is compulsory for all vessels entering or leaving Vietnamese Ports, as well as when mooring, unmooring and shifting berths in harbour.

Request for Pilots at every port by international signal code for sea pilots and on VHF Channel 16.

RADIO: All communications for ship movements through radiotelephones of Harbour Offices on VHF Channel 16.

Agents, receivers, etc. can be called through Coastal Radio Stations, this includes Vosa, who are located at every port.

Notice of Arrival: ETA message to be given 48 hours prior to ship's arrival, including particulars of vessel and cargo on board. 4 hours prior to arrival send correct time of arrival.

HEALTH: Usual international health regulations are to be observed. Any vessel, which is suspect, should inform Harbour Office and Medical Office.

Medical assistance, if required, is available, including vaccinations and inoculations, as well as dispensary and hospital treatment in all ports.

International code quarantine signals to be shown on arrival at port limits. No person, except Pilot and Port Authorities, may board or leave the ship until Free Pratique is given after port health inspection.

TIME: Local time in Vietnam is GMT plus 7 hours.

HOLIDAYS: New Year's Day (last day of December, 1st and 2nd January); Day of International Worker's Solidarity (1st May); National Day (2nd and 3rd September).

AGENCY: All foreign vessels upon arrival at Vietnamese ports are attended by the Vietnam Ocean Shipping Agency (Vosa).

There are Vosa branches at every port. Cable address of any branch is "Vosa":
Vosa Hongay, Vosa Campha, Vosa Haiphong,
Vosa Ben Thuy, Vosa Danang, Vosa Quynhon,
Vosa Nhatrang, Vosa Saigon, Vosa Vungtau, Vosa Can Tho.

All branches of Vosa work round the clock, including Sundays.

GENERAL: Commercial vessels may call at all ports officially declared open, if permission from Vietnam Maritime Department obtained at least 7 days in advance of arrival. The arrival should be re-confirmed at least 24 hours before entering territorial waters.

Emergency calls are allowed, but the Maritime Administration should be notified immediately.

Vessels only allowed to leave the Pilot Station when all formalities, such as Free Pratique, Customs, Clearance, etc., have been performed.

Crew members and officers are not allowed to have contact with other than Pilot and Port Authorities during arrival and sailing formalities.

SEARCH AND RESCUE: Maritime Search and Rescue Committee of Vietnam is located at 80 Tran Hung Dao Street, Hanoi (Ministry of Communication and Transport).

There are Search and Rescue Centres at every port (Harbour Office). The Head Office of the Rescue and Salvage Company is located at Ho Chi Minh City, and there are branch offices at Danang and Haiphong Ports.

AUTHORITY: Vietnam Maritime Department (VINAMARINE), 11 Vo Thi Sau, Haiphong, Vietnam.

The Section of Registration and Maritime Safety (VINAMARINE), 11 Vo Thi Sau, Haiphong, Vietnam. *Contact:* Tran Thanh Minh, Director.

CAN THO: 10.03 N. 105.42 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage is compulsory for all vessels that enter or leave the Port of Can Tho.

Pilot boards at correct time of arrival at "Zero Buoy" in position Lat. 09° 28′ 57″ N., Long. 106° 30′ 23″ E. During bad weather, Harbour Master will advise, by VHF, the position where Pilot may board in safety.

RESTRICTIONS: Pilot boards during daytime only.

ANCHORAGE: In "Zero Buoy" area with max. depth 12.00 m.

MAX. SIZE: LOA 140 m. Draft 7.0 m.

HEALTH: See "General" before first port.

RADIO/VHF: Communications available on VHF and ICOM IC-M700 on Channel 35 (8,743.7 kHz.) with Vosa Can Tho and Harbour Office, stand-by daily, including Sundays, 0700 hrs. – 1100 hrs. and 1300 hrs. – 1700 hrs.

TUGS: 1×135 h.p. and 1×1,400 h.p.

BERTHING: Two quays with total length 140 m., depth 9.0 m.

STEVEDORES: 4 shifts: 0700 hrs. – 1100 hrs., 1300 hrs. – 1700 hrs., 1900 hrs. – 2300 hrs. and 0100 hrs. – 0600 hrs.

CRANES: 3 shore cranes of 10 tons, 15 tons and 20 tons respectively.

FRESH WATER: Available at berth.

FIRE PRECAUTIONS: Port fire service and City fire service available.

REPAIRS: Medium size repairs possible at Navy factories.

POLICE/AMBULANCE/FIRE: Via Harbour Office or Vosa Can Tho.

SERVICES: Shipchandler services available via Vosa Can Tho.

AUTHORITY: Port of Can Tho Authority, Le Hong Phong Street, Can Tho City, Can Tho Province, Vietnam. *Tel:* 20729.

DANANG: (Tourane): 16.04 N. 108.13 E. (See Plan)

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory for all vessels that enter or leave port. Pilot Station at "Zero Buoy" (Lat. 16° 10′ N., Long. 108° 11′ E.), depths at Pilot Station 14.0 m.

Pilot boards from a tug during daytime only. Ships arriving at night should anchor in a position close to the Pilot Station.

ANCHORAGE: In Danang Bay (Bay of Tourane), depths up to 14 m.

RESTRICTIONS: No restrictions in the Bay and anchorage.

MAX. SIZE: Permissible LOA 190 m. Beam 26 m. and max. draft 11 m.

HEALTH: See "General" before first port.

RADIO: Danang Radio, call sign XVT, works 24 hours everyday (except 0530 – 0700 hrs., 0900 – 1230 hrs., 1630 – 2200 hrs.). Contact by telephone or telex through Vosa Danang.

VHF: Contact Pilot, Harbour Master and Vosa Danang on VHF Channel 16. Pilot and Harbour Master listen all day, and Vosa listen daytime only.

TUGS: 3 tugs available. 1×1,140 h.p., 1×800 h.p. and 1×480 h.p.

BERTHING: There are 2 areas:

Tien Sa area: 2 quays with 4 berths (one with length 182 m.), depth 9.5 m.

Song Han area: One quay 750 m. long with depths of 3.0 m. and 7.0 m.

CRANES: There is one heavy lift floating crane of 100 tons capacity and mobile truck cranes.

STEVEDORES: Ordered by Agent, work continuous throughout 24 hours, except for meal breaks.

BRIDGES: None.

MEDICAL: 6 hours notice required for medical assistance. There is a hospital in town.

TANKERS: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kgs. Average discharging rate 200 tons per hour per line.

FRESH WATER: Available by barges, arrange with Agent.
FUEL: Fuel oil, diesel oil and lubricating oil available, arrange with Agent.
REPAIRS: Can be undertaken on request to Agent.
DRY DOCKS: Two dry docks for vessels up to 7,000 d.w.t.
SURVEYORS: Cargo Surveyors: Vina Control.

Ship Surveyors: Vires Danang, Branch No. 4, 114 Bach Dang Street, Danang City.
AIRPORT: There is an airport about 7 km. from the city with local and international flights.
TIME: GMT plus 7 hours.
HOLIDAYS: There are no special holidays.
POLICE/AMBULANCE/FIRE: Contact Harbour Office and Vosa Danang on VHF Channel 16.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Danang Port based at Harbour Office. Contact with S.A.R. Centre on VHF Channel 16.
SERVICES: Shipchandler available at all times.
SHORE LEAVE: Permitted via local Agent.
GARBAGE DISPOSAL: Service is compulsory every 5 days. Ship must provide drums or bags. Charges U.S.$ 20 per time (on berth), U.S.$ 45 per time (at buoys or anchorage). Can be arranged through agent or harbour office (VHF Channel 16). Tel: 22652.
WASTE OIL DISPOSAL: Available at all berths or in anchorage. Barge capacity 50 tons or tanker truck 6 tons. Can be arranged through agent or harbour office (VHF Channel 16). Tel: 22652. Charges U.S.$ 1.20/ton/day by barge.
SEAMAN'S CLUBS: Two Seamen's Clubs in the port. Facilities include shops, restaurants, international telephone, church services, football, dances, mini-bus collection and postage service. Arrange through ship's agent VOSA.
CURRENCY: Vietnamese Dong (d). U.S.$ 1.00 = 7,900 d (29.4.91).

SHIPMASTER'S REPORT: 1976.
Documents: On arrival usually dealt with immediately by the Immigration Service, Police Service, Customs Service, Agency and Health Service. Ship's Documents: Certificate of Registry, Radio Certificate, Load Line Certificate, Safety Equipment Certificate, Port Clearance from last port. Cargo Documents: Bill of Lading (8 copies), Cargo Manifest (8 copies), Stowage Plan (5 copies), In Transit Cargo Manifest (if any). Immigration: Crew List (7 copies), Stores List (2 copies), Crew's Effect Declaration (2 copies), Passports of the crew.
Health: Vaccination List (2 copies), Provisions List (2 copies), International Vaccination Certificates.

All documents to be ready on arrival. Cameras and binoculars to be collected and placed in a locker, to be sealed. Bonded stores not sealed.
Pilotage: Pilot station at a position Lat. 16° 10′ N., Long. 108° 11′ E. Pilot boards from a tugboat and moves the ship to a position about 1 mile West of Phare de l'observatoire. Pilot boarding during daytime only. Ships arriving at night should anchor in a position close to the pilot station. Pilot will board the ship at 0600 hrs. ETA should be given 48 hours and 24 hours prior to arrival at the pilot station.
Restrictions: There are no restrictions for entering the bay.
Health: A 24 hours cable should be sent to the Agent, stating that all crew are fit and healthy. If any sickness on board cable 48 hours in advance.
Radio:

Call sign	Frequency	Working hours GMT
XVT	500 kHz	0001 – 1200 hrs.
XVT 2	417.5 kHz	0001 – 1200 hrs.
XVT 2	8,570 kHz	0130 – 0145 hrs.
		0830 – 0845 hrs.
		1200 – 1315 hrs.

VHF: There is no VHF station.
Radar: There is no radar post.
Tugs: There are 3 tugboats available, 1×1,200 h.p., 2×800 h.p. each. Tug's lines are used if necessary.
Berthing: There is one finger pier of 250 m. and another under construction. The latter to be ready towards the end of 1976. A tanker berth is situated in position Lat. 16° 04′ N., Long. 108° 15′ E. called My Khe. Tankers proceed to this position, after clearance, with Pilot rounding by the peninsula. (See "Plan"). At the cargo pier all discharging is done by ship's gear.
Cranes: There are no cranes available. There is 1 heavy lift floating crane of 100 tons capacity.
Bulk Handling Facilities: Bulk cargoes are sometimes handled at the port (i.e. maize) but there are no special facilities.
Bridges: No bridges.
Stevedores: Ordered by the Agent. No ETA necessary. Working hours 0001 – 0400 hrs., 0800 – 2400 hrs. Approx. discharging rate general cargo 400 tons/gang.
Medical: Six hours' notice required for medical assistance. There is a hospital in town. Inoculations required for cholera and yellow fever.
Tankers: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kg. at ship's manifold. Average discharging rate 200 t.p.h. per line.
Density: Cargo pier brackish depending on the season. At the tanker berth salt.
Fresh Water: Available by barge, rate of delivery 50 t.p.h.
Repairs: Repairs taking longer than 2 hours are not permitted unless permission is granted by the Port Master. Small repair facilities can be carried out ashore. There are no drydocks at this port.
Deck Watchmen: Cargo ships alongside the pier are provided with a gangway watch. Tankers discharging at My Khe will have two security guards on board during the stay in port.
Hatches: Old type hatches opened and closed by shore labour. Special patent hatches by crew.
Customs Allowances: The bonded stores are not sealed. There are no restrictions for quantity of spirits, cigarettes, beer, etc. It is strictly prohibited to supply any bonded stores to shore personnel.
Cargo Gear: There is 1 floating heavy lift crane of 100 tons.
Repatriation: Possible, but takes some time and can be very diffic Haiphong is a better place for crew changes.
Airport: There is an airport about 7 km. from the town. Air services Ho Chi Minh City and Haiphong, local flights only, twice a week.
Time: GMT plus 7 hours (no Summertime) is kept along the whole coa
Holidays: There are no special holidays.
Police/Ambulance/Fire: Via local Agent, telephone number 21161.
Services: There are laundry facilities (2 days ashore) with a 24 hou service. Shipchandler available at all times. Good fresh vegetables an fruits, depending on the season. Also good sea food.
Shore Leave: Permitted via local Agent with 6 hours' notice. Person with invalid Passport are not allowed to go ashore.
Regulations: It is strictly prohibited to throw any garbage into the ba heavy fines. Garbage collected by barge.
Delays: Remittance has to be granted by Owners or Charterers befo sailing. Without a sufficient remittance the vessel does not receive clearance.

Alongside the pier berthing and unberthing only between sunrise an 1400 hrs. due to strong winds in the afternoon. At any other time whe strong winds are experienced berthing and unberthing not allowed. Th fore mentioned also for the tanker berth at My Khe, here berthing normally carried out during the morning hours, when there are wea winds. During a strong monsoon it is sometimes necessary to sto discharging operations and unberth the ship.
General: Ships calling for the first time at Danang port should give the ETA and call sign, nationality, all other necessary particulars so that th ship can be identified by the Navy. Ships, chartered by the Vietnames Government should state this also and whether time or voyage charte Ships carrying general cargo should also give all particulars about th stowage of the cargo, whether any deck cargo, heavy lifts etc.
Agent: Vietnam Ocean Shipping Agency, 1a Quang Trung, Danang Cable: OSA Danang, telephone 21161.

SHIPMASTERS' REPORT: September 1980.
Documents: See "General".
Pilotage: Compulsory. Pilot boards in position Lat. 16° 10′ N Long. 108° 11′ E. Notice required 24 hours. Daylight only for berthin except in cases of emergency.
Anchorage: In the Bay of Tourane; depth up to 19.0 m.
Restrictions: No restrictions in the bay and anchorage, depth of wate up to 19.0 m.
Radio: Danang Radio.
VHF: Pilot on Channel 16.
Tugs: Two tugs available; 1 of 1,200 h.p., the other being used for barg work only.
Berthing: Location Lat. 16° 07.1′ N., Long. 108° 12.6′ E. Two pie available. Distance from sea to berth 4 miles. Max. size permissible LOA 190 m., beam 26 m. and deepest draft 11 m. Least depth of wate in channel from sea to berth 13.0 m. Mean tidal range at berth 0.5 m Nature of bottom at berth – mud and sand. Average density 1016.

Cargo Handling Facilities: No bulk handling facilities or quay crane available. There is a quarter ramp for Ro/Ro vessels and a 50 ton floatin crane. Security is good as armed police are on duty throughout th vessel's stay. There is adequate storage space for break bulk an palletised cargoes. No container handling facilities. Stevedore gang are available as required and work throughout 24 hours except for mea breaks.
Barges: There are steel barges of various sizes which are towed b tugs.
Services: The following are available: Fresh water; fresh provision minor repairs facilities; airport with internal flights only; laundry service bunker fuel oil; diesel oil; lubricating oil; doctor and hospital; groceri and meats.
General:
Officials Boarding on Arrival with Pilots:
Two armed police who remain aboard during vessel's stay at ancho
Officials Boarding when Vessel Anchored:
Agent and assistant.
1 Customs Officer.
1 Immigration Officer.
1 Agriculture Inspector.
2 Quarantine Inspectors.
2 Security Officers.
Documentation:
8 Crew Lists.
2 Stores Lists – Deck, Engine and Provisions.
2 Crew Customs Declaration Lists.
2 Currency Lists for foreign money in Crew's possession.
2 Bonded Stores Lists.
1 Health Declaration.
2 Crew Vaccination Lists.
All Vaccination Certificates.
4 copies of Bills of Lading.
7 copies of Cargo Manifest.
2 copies of Cargo Manifest – Cargo in Transit.
1 Form (Supplied) for Ship's Sextants, Binoculars, Cameras, etc.
1 Form (Supplied) for Arrival Details and Times.
All Discharge Books (Passports of Officers' wives collected for sa keeping ashore).
Restrictions:
Main and Emergency Transmitters sealed.
Stornos (Walkie Talkies) sealed.
Cameras sealed.
Bond sealed.
Inspection of all cabins on arrival.
General:

Vessel on 4 hours' notice at all times for sailing or shifting be Although bond sealed release of spirits available at any time fr Customs.

Very strict on cigarettes with issue of only 200 per week per person. Shore passes issued to all personnel. Shore leave very restricted but bus service available to Seaman's Club nightly from 1800 – 2130 hrs. accompanied by a guard.

Maximum of 20 cigarettes per person for shore leave.

Seaman's Club takes Sterling (£5 notes and above only) and U.S. Dollars.

One sight seeing tour was to have been arranged this call but cancelled due to adverse weather conditions. (Limited number of cameras would have been available on this occasion).

Remittances from Owners take at least 1 month before any cash is made available.

One typoon warning received this call when vessel had to vacate berth and proceed to anchorage.

One emergency vacation of berth at 0300 hrs. this call when heavy swell built up alongside pier.

On departure full inspection of cabins and personnel, discharge books (passports of Officers' wives returned). Shore passes collected. No mail received this call due 1 month delivery time. No restriction on bond for coastal passage Danang to Haiphong.

AUTHORITY: Danang Harbour Office, 20 Bach Dang Street, Danang City. *Tel:* 22.652. *Contact:* Tien Minh Nguyen, Harbour Master.

HAIPHONG: 20.52 N. 106.41 E.

PORT LIMITS: A line drawn from A0 Point to A1, A2, A3, A4 Points. In addition, there are 4 positions in Hongay Bay, and 5 positions in Halong Bay. In Hongay Bay: HG1, HG2, HG3 and HG4. They are bound by the following co-ordinates (D area):

	Latitude N.	Longitude E.
HG1	20° 55′ 54″	107° 03′ 42″
HG2	20° 56′ 24″	107° 03′ 37″
HG3	20° 56′ 36″	107° 03′ 54″
HG4	20° 56′ 48″	107° 03′ 48″

In Halong Bay: HL3, HL4, HL5, HL9 and HL10. They are bound by the following co-ordinates (D area):

	Latitude N.	Longitude E.
HL3	20° 51′ 34″	107° 07′ 45″
HL4	20° 51′ 45″	107° 06′ 38″
HL5	20° 51′ 50″	107° 06′ 13″
HL9	20° 49′ 10″	107° 05′ 17″
HL10	20° 49′ 17″	107° 06′ 12″

Seaward boundaries of Haiphong port limits within 3 Points F0 (Zero Buoy), F1 and F2. They are bound by the following co-ordinates (A area):

	Latitude N.	Longitude E.
F0	20° 42′ 13″	106° 56′ 42″
F1	20° 40′ 00″	106° 58′ 30″
F2	20° 40′ 00″	106° 54′ 00″

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage is compulsory for all vessels that enter and leave ports. Pilot boat arrives at the areas which are bound by the Points F0, F1 and F2 (see "Port Limits") at the correct arrival time, or as instructed by the Port Authority of Haiphong. Pilot boats are painted buff with a red stripe and a yellow star. Contact pilot station on VHF Channels 9 and 16.

ANCHORAGE: To Pilot's advice and permission of Haiphong Port Authority.

There are 4 anchorage areas:

Ninhtiep Anchorage Area with max.draft 7.00 m. There are 4 positions (NT1, NT2, NT3 and NT4).

Bachdang Anchorage Area with max.draft 6.0 m. There are 9 positions (BD5, BD6, BD7, BD8, BD9, BD10, BD11, BD12 and BD13).

Halong Bay Anchorage Area with max.draft over 10.0 m. There are 5 positions (HL3, HL4, HL5, HL9 and HL10).

Hongay Bay Area with max.draft less than 9.4 m. There are 4 positions (HG1, HG2, HG3 and HG4).

RESTRICTIONS: Max. draft to enter the berths of Haiphong Port and Ninhtiep and Bachdang Anchorage areas is 25 ft. Ships with draft over 25 ft. have to operate lighterage at anchorage areas.

MAX. SIZE: At berths, LOA 200 m. Breadth 26 m. Draft 7.0 m.

Berth for Oil Tankers: LOA 70 m., breadth 10 m. and draft 5.0 m.

HEALTH: See "General" before first port.

RADIO: Haiphong Radio handles vessel traffic. Call sign XVG, frequency 500 kHz and 8364 kHz.

VHF: Port Authority on Channel 16, working Channel 10.

TUGS: Tugs available of 500 h.p., 600 h.p. and 3,200 h.p. Tugs are used for escort, rescue, salvage and towage.

BERTHING: Port central area has 12 berths available.

Berth No. 1: Containers.
Berth No. 2: Grain, ore, coal.
Berths No. 3, 4, 5, 6, 8, 9, 10: General cargo.
Berths No. 7: Containers.
Berth No. 11: General cargo and refrigerated cargo.
Berths No. 4, 5: Passenger ships.
Doanxa Area: 2 berths for Ro/Ro or container ships.
Chua Ve Area: 2 berths for general cargo ships.
Thuongly Area: 1 berth for tankers.
Cuacam Area: 3 berths for general cargo ships.
Thuysan Area: 2 berths for fishing vessels and general cargo ships.
Vatcach Area: 3 berths for general cargo ships of less than 1,200 d.w.t.

CRANES: Port Central Area, Doanxa Area and Vatcach Area have shore cranes with capacities of 5 tons, 6 tons, 7 tons, 10 tons and 25 tons.

The Port Central Area, Doanxa Area and Chuave Area have floating cranes of 60 tons up to 200 tons available.

BRIDGES: None.

STEVEDORES: Ordered by Agent (Vosa Haiphong) or other ships' Agents in Haiphong.

Stevedores work 24 hours continuously in 4 shifts.

Loading or discharging rates are those stipulated by charter party or by the agreement between cargo owners and the stevedoring companies.

Particular advice: See "General" – "Radio" – "Notice of Arrival".

MEDICAL: Doctors and hospital facilities available in Haiphong through Agents.

TANKERS: One tanker berth, max. draft 19 ft., depending on the tide. Two tanker anchorage positions in Halong Anchorage Area with max. draft over 30 ft.

DENSITY: Low tide 1000, at berths.

FRESH WATER: Available at berths and at anchorage.

FUEL: Diesel oil and fuel oil can be supplied through Vosa Haiphong.

FIRE PRECAUTIONS: Safety Regulations for tankers and other ships with dangerous cargo.

REPAIRS: Any deck and engines repairs can be performed on request.

DRY DOCKS: Pha Rung Ship Repair Yard nearby. Dry dock available for ships with max. length 150 m. and 10,000 d.w.t. There are other small shipyards in the port area.

SURVEYORS: Cargo surveyors: Vinacontrol, branch in Haiphong City. Ship surveyors: Vietnam Register of Shipping (VIRES), Branch No. 10 at Haiphong City.

GANGWAY/DECK WATCHMAN: Compulsory for the ship's security and safety.

OPENING/CLOSING HATCHES: By the ship's crew, or by stevedores if requested.

CUSTOMS ALLOWANCES: No restrictions for spirits, cigarettes and beer for crews use, but strictly prohibited for commercial purposes.

CARGO GEAR: Cargo handled by ship's cranes or by shore cranes. If shore cranes are used, there must be a request in advance.

REPATRIATION: To Agent's advice.

AIRPORT: Catbi Airport for local services only. Noi Bai International Airport situated about 130 km. from Haiphong Port.

TIME: GMT plus 7 hours.

HOLIDAYS: National Day (2nd and 3rd September); International Labour Day (1st May); New Year (1st January); Tet Holidays (last day of December and 1st and 2nd January of Lunar Calendar).

POLICE/AMBULANCE/FIRE: Contact Port Authority or Vosa on VHF Channel 16.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Haiphong based at Harbour Office, contact can be made on VHF Channel 16 or Tel: 42637, 42682.

TELEPHONES: No connections on board vessels. All operational ports are linked by telephone network.

SERVICES: Tank cleaning equipment, facilities for discharge of tank washings and all kinds of oil residues, oily rags, food wastes, garbage and hazardous substances are available at the port. Compass adjusting, radio and radar repairs, extensions of Ship's Certificates are available at port.

BANKS: State Bank of Vietnam in Haiphong Maritime Bank, 25 Dien Bien Phu Street, Haiphong.

SHORE LEAVE: Crew members are allowed ashore.

DEVELOPMENTS: *1st Phase:* Construction of graving dock (150 m.×25 m.×6.3 m.) and 200 m. length berth with depth 6.5 m.

2nd Phase: Construction of dry dock (180 m.×30 m.×7 m.) and small piers length 100 m. and 150 m.

SHIPMASTER'S REPORT: 1976.

Documents:

8 Crew Lists.
2 Ship's Stores Manifests.
2 Crew Personal Effects Declaration (especially: cameras, binoculars, and Foreign Currency).
2 Vaccination Lists: cholera. All International Vaccination Certificates. All Passports (are taken into custody by Security Officials).

Special Documents: Special forms which are handed to vessel on arrival.

Health Dept:

1 Declaration of Health on arrival.
1 List of Provision Store (incl. vegetables, fruits, fish, shellfish, meats etc. and where taken).
1 Report of water taken on board: (Drinking — or Ballast water, tons, ports where taken) — tank now being used to supply drinking water.

State Security Dept.:

4 Copies List of Articles forbidden to be used in port: ie. radio transmitter/receiver — Numbers and power; radar; VHF; radio direction finder; echo sounder; sextant, signal gun, signal rockets, flare signals, arms, ammunition, cameras, binoculars, tape recorders, band recorders.
Note: The radio transmitter, VHF, radar, binoculars, cameras are sealed.
2 Copies Declaration of Arrival.

Note: Cameras, binoculars of the crew have to be collected and placed in a locker which is sealed. Bond is *not* sealed, and consumption is free.

Pilot: Boards at "Zero Buoy".

Note: There is no VHF radio contact possible and there is no signal station available, ETA should be given as exact as possible.

Restrictions: Max. draft to enter: 25 ft. (HW).

If ship's draft is more than 25 ft. ship has to lighten into lighters. This is done in Baie d'Halong. The procedure is that after embarking the Pilot at "Zero Buoy", the ship is brought to this bay (in daylight hours only) via: Bai de Lan Ha – Entree Profonde – Rade du Crapaud – Chenal du Volta – Chenal de la Cathedrale.

In our case we anchored in Chenal de la Cathedrale; Lat. 20° 52′ N. Long. 107° 03′ 06″ E. and discharged our gas oil cargo into tanker barges varying in size from 125 – 400 long tons. Some coastal tankers (1,500 – 2,000 long tons) are also available for accepting the cargo.

When discharging into lighters ship should provide suitable hoses.

General:

1. Ship was cleared by Authorities at this anchorage. In view of the distance to Haiphong – 5 hours by motorboat – this clearance is only given in daylight hours. Often the ship's Agent stays on board during cargo operations.

2. Because the radio transmitter is sealed, no direct contact with the outside world is possible. All messages for the Agents at Haiphong should be given to the lighters going there.

3. Medical assistance: A doctor and Hospital is available in Hon Gay on the other side of the Baie d'Halong. The doctor inspects the patient on board before permission to go ashore is given.

4. Outward clearance: Same procedure as Inward Clearance. Authorities come by motorboat from Haiphong (boat leaves there at about 0600 hrs. and arrives in Halong Bay at about 1100 hrs.). Passports are handed back to crew.

5. On inward as well as on outward clearing, crew has to stay in their cabins for inspection by Customs and security officials.

SHIPMASTER'S REPORT: April 1979.

Pilotage: Boarding position: Lat. 20° 41′ N., Long. 106° 58′ E.

The pilot boat is a 25 m. long steel vessel with white hull and superstructure. A Vietnamese flag is printed on the white funnel.

The Pilot boarded without notice, also the Agent (VOSA) did not reply to any cables requesting information. Pilotage carried out during night time only in the Winter.

Two soldiers board with the Pilot and if vessel is to anchor for lightering the Pilot and soldiers remain onboard.

Buoys: The marking of the channel by buoys is good, but for day time only. At night the lights are poor and vessels have to keep a good lookout for them.

Customs: Bond is sealed when the vessel is alongside. Very strict allowance for cigarettes.

SHIPMASTER'S REPORT: October 1980.

Documents: See "Shipmaster's Report" for Danang dated September, 1980.

Pilotage: Compulsory. Pilot boards in position Lat. 20° 41′ N., Long. 106° 58′ E. 24 hours' notice required.

Anchorage: The inner anchorage is between the outer bar and the channel cut, depth at LW 8 m.

Restrictions: It is not advisable to enter or leave during hours of darkness as there are only a limited number of lights and buoys.

Max. Size: Max. LOA 200 m., beam 26 m., draft 7.5 m. Lightening facilities are available at Baie d'Halong for vessels with draft of up to 10 m.

Health: Quarantine Authority require 24 hours' notice of arrival.

Radio: Haiphong Radio handles vessel's traffic.

Tugs: Available. 1×600 h.p., 1×500 h.p.

VHF: The Agency (Vietnam Ocean Shipping Agency – VOSA) on Channels 6 and 16. They will forward messages to the Pilot.

Berthing: Berth situated in position Lat. 20° 52′ N., Long. 106° 43′ E. The berth was built in 1976 and is down river from the town berths. In all there are 12 berths available. Our berth was 18 miles from the entrance. Max. size acceptable at the berth, LOA 200 m., beam 26 m. and deepest draft 7.4 m.

Cargo Facilities: No bulk handling facilities; no cranes at this berth but some were sighted at the town berths; no Ro-Ro facilities visible. There is a floating crane with a capacity of 60 tons (approx.). Security is good as armed guards stay aboard the vessel throughout. No container facilities of any kind sighted. Labour works around the clock in 3 shifts.

Barges: Wood and steel barges available, some have engines.

Consuls: None, nearest are in Hanoi.

Services: The following are available: Fresh water; fresh provisions (depending on time of year); minor repair facilities; airport; laundry service; diesel oil; lubricating oil; doctor and hospital; small amounts of groceries and meats.

General: Any vessel intending to remain at the port for a long period of time should have onboard sufficient stores and fresh water prior to arrival, as if vessel at anchor, stores and fresh water can take up to one week to arrive.

SHIPMASTER'S REPORT: November 1981.

Pilot Station: The Pilot boards the vessel at the anchorage which is about 2 to 3 miles S.S.E. from Zero Buoy. Pilot boat is a metal boat about 20 m. length. The funnel is painted buff with a red stripe and a yellow star.

Restrictions: There are 2 mud banks up river. One after the buoyed channel and one after the ship-canal about 1.5 miles before the berths. River draft depends on the tide which varies from 6.4 m. to 7.2 m. at HW. Haiphong port draft about 6.9 m.

Pilotage: The channel from Zero Buoy to Haiphong has buoys but no lights visible and the buoys are often out of position. The channel is very narrow having only a few centimetres' bottom clearance. Pilots are good.

Anchorage: For deeper draft than 6.9 m., ships are lightened at Halong Anchorage. Pilots, Security Officers and Customs Officer board at Zero Buoy and the vessel proceeds to the anchorage via Passe Henriette. Depths are 18 m. to 21 m. and good holding ground. The place is sheltered from all winds except North.

Documents: 1 more copy of Crew List and Money Declaration necessary than stated in "Shipmaster's Report", September 1980 for Danang.

Also see "General".

Security Police: At Halong Anchorage 2 security policemen remain on board, requesting accommodation and food.

Agency: During the vessel's lightening, Agent's clerk remains continuously on board requesting accommodation and food. Any communication with the Agency at Haiphong is done by telegram. Ship's transmitter is unsealed by Security Officer, message sent, and then resealed. Whilst alongside, Agent visits every day and they are quite efficient.

Stevedores: At Halong Anchorage, a barge with quarters for t stevedores comes alongside the vessel. Chief Stevedore is alwa available speaking efficient English. Discharging performed by vesse derricks with shore grabs. Rate about 1,500 metric tons per day. A Haiphong berth discharging performed by shore cranes with a rate o about 1,800 – 2,000 metric tons per day. Haiphong Port has a ber accommodating ten large ships. There are about 25 shore cranes fro 10 to 15 tons capacity and we have seen 1 floating crane of abo 200 tons.

Ship Chandler: Fresh provisions are poor quality and only sma quantities available. Low prices. Also ship chandler takes care of sic crew members for hospital and doctors.

Shore Leave: From Halong Anchorage crew are not allowed to g ashore. At Haiphong berth shore leave allowed from 0700 – 2300 hr All foreign currency, rings, watches, must be declared at the gate.

Repatriation: Agent assures Master that repatriation is very eas however the need of formalities and permissions will take a long time

Health: Quarantine doctor will revaccinate any crew member wi expired certificate.

Communications: VOSA Agency has VHF Channel 16 and it is possib to contact them from Zero Buoy. Communication with Owners is ver slow and the cable needs 2 to 3 days to reach the destination. Cre mail requires more than 40 days to reach the vessel.

Density: Halong anchorage 1020. Haiphong port 1000.

General: A lot of people visit the vessel claiming that they are Harbo Officers, Chief Stevedores, Receivers, Surveyors, Stevedores, Custom Officers, Security Officers.

Important: Stevedore's barge which is alongside the vessel at Halon Anchorage is full of rats, which come on board via ladders and othe ropes, with result that the vessel becomes infested with rats.

Ships must have on board, from their previous port of call, sufficien quantity of rat poison to kill them after sailing from Vietnam.

AUTHORITY: Port Authority of Haiphong, No. 1 Minhkhai Stree *VHF:* Channel 16. *Tel:* 42637, 42682.

HO CHI MINH CITY (Saigon Port): 10.50 N. 106.45 E. (See Pla

LOCATION: 46 nautical miles from Vung Tau

DOCUMENTS:

There are also 11 pairs of mooring buoys along the opposite side the river which can handle deeper draft vessels by barge or ligh

Lighters/barges: 30, from 150 tons – 1,200 tons available.

Sheds/Warehouses: 34 (78,620 sq.m.).

Open Storage: 56,300 sq.m.

BULK HANDLING FACILITIES: Dry bulk (cement, fertilizer and wheat) handled by cranes, grabs, bulldozers and trimmers.

TANKERS:

Nha Be Petroleum Terminal: 3 berths with 7.0 m., 12.0 m. and 18.0 m. depth alongside respectively.

Load/discharge rate: 300 t.p.h. – 1,000 t.p.h.; Lines of 6 in., 8 in. and 10 in. diameter for handling Fuel oil, Mogas, Diesel oil, Kerosene and Lub oil.

Vegetable Oil Terminal also available.

CONTAINER HANDLING FACILITIES: Feeder vessels only handled at Berth K12.

Handling rate by: Ship's gear on to wharf: 12 TEU/hr.

Forklift trucks in container yard from 2 tons to 30 tons capacity.

Tractors and trailers available.

Container Yard: About 5 Ha. Max stacking height: 3, using forklift trucks.

CRANES: Floating: 35 tons and 100 tons. Mobile: 5-10 tons and 150-200 tons.

BRIDGES: Inland road transport to/from the port: Tan Thuan Bridge 12 tons and Khanh Hoi Bridge 25 tons nominal allowable truck load.

STEVEDORES: Provided by the port, 24 hour service (3 × 8 hour shifts). Ship's gear operators, watchmen, opening/closing hatches operators available.

MEDICAL: Hospital, dentist, doctor and chemist available.

DENSITY: 1005.

FRESH WATER: Supply from hydrants on quays or by barges.

FUEL: Diesel oil and fuel oil by barge or truck.

REPAIRS: Facilities only available for barges (slipway) and vehicles (workshops) at locations within the port area.

SURVEYORS: Cargo surveyors: Vinacontrol.

Ship's surveyors: Vires, Branch No. 6, 22 Nguyen Hue Sreet, Ho Chi Minh City.

CUSTOMS: Port of Entry: Vung Tau-Saigon; branch office situated in Saigon Port.

HOLIDAYS: New Year's Days (Lunar: 3 days, Solar: 1 day), May Day (1.5 days), National Day (2 days: September 2nd and 3rd).

POLICE/AMBULANCE/FIRE: Telephone 296157, 441249 and 14 respectively for service required from Ho Chi Minh City or call 294971, 225762 and 225526 respectively for Saigon Port service.

AIRPORT: Tan Son Nhut International Airport 10 km. from the port.

TIME: GMT plus 7 hours.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Saigon Port is based at Harbour Office. Contact with S.A.R. Centre can be made on VHF Channels 16 or 6.

GARBAGE DISPOSAL: Service available. Drums provided alongside, and collected every three days. Charges U.S.$ 20/collection at wharf, U.S.$ 40/collection at buoy. Contact Saigon Port General Service Enterprise. Tel: 721744, 224161. Telex: 812772 SGPORT VT. Fax: 84-8-224168.

WASTE OIL DISPOSAL: Service available by barge or tanker truck. Truck capacity 10 cu.m., barge capacity 100 cu.m. Charges: Trucks U.S.$ 50/truck, barges up to 50 cu.m. U.S.$ 300, over 50 cu.m. U.S.$ 6/cu.m. Contact Saigon Port General Service Enterprise. Tel: 721744, 224161. Telex: 812772 SGPORT VT. Fax: 84-8-224168.

SEAMAN'S CLUBS: Seamans Club 1 & 2, mini-shop and Duty Free Shop. 24 hour service.

CURRENCY: Vietnamese Dong (d). U.S.$ 1.00 = 11,300 d (10.4.92).

SERVICES: Telex, telephone, transport and souvenir shop.

Hotels and tourist services to International standards available within short distance of about 1 km.

CLIMATE: Dry season November to April, rainy season May to October (average rainfall: 160 mm. – highest in July: 330 mm.), temperature: 28° C, humidity: 81%, Wind: N.E. monsoon from October to April and S.W. monsoon from May to September.

STATISTICS:

	1987	1988	1989	1990	1991
Vessel Calls:	907	961	1,049	982	985
Throughput (kTons):	2,497	3,075	4,048	4,347	4,160

(Throughput of Saigon Port in 1989 amounts to about 85% of total throughput of all ports in Ho Chi Minh City area).

Average handling rates (tons/10,000 d.w.t. vessel per day).

Commodities:	
General cargo	551
Steel, machinery and equipment	951
Rice and agricultural products	1,640
Bulk cement and fertilizer	1,260
Cement and fertilizer in bags	1,475
Containers (TEU/8 hour shift)	70

DEVELOPMENTS: Channel dredging to 9.5 m. and alongside dredging (1992); New container berths and new container handling facilities (1992-1994); Navigational aids and lighting for night navigation; Rehabilitation of existing facilities (1992-1993), and other improvements.

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Approaching from South, Mui Vung Tau (ex-Cap St. Jacques) observed on radar from about 15 miles with all details.

Anchorage extends from Lat. 10° 19′ N., Northward to Buoy No. 2. If anchoring South of Lat. 10° 19′ N., vessel will be requested to come closer in order to be boarded and cleared by Authorities.

Anchorage well protected during N.E. monsoon, no swell.

Pilot boarding ground at position Lat. 10° 20.4′ N., Long. 107° 03.2′ E. However, vessels are requested to enter and anchor at Vung Tau without the pilot. Pilot Station can be contacted on VHF Channels 16 and 6.

Watch on VHF Channel 16 should be maintained from 1000 hrs. – 1200 hrs. and 1400 hrs. – 1600 hrs. (local time), usually notice is given when vessel is to leave Vung Tau for proceeding up the river.

Buoy No. 1 is in position Lat. 10° 18.7′ N., Long. 107° 03.8′ E.

Buoy No. 2 is in position Lat. 10° 22.4′ N., Long. 107° 02.7′ E.

Buoy No. 3 is in position Lat. 10° 19.5′ N., Long. 107° 04.1′ E., but is liable to drift.

Buoy No. 7 is in position Lat. 10° 20.25′ N., Long. 107° 03.8′ E.

Buoy No. 8, formerly in position Lat. 10° 21.55′ N., Long. 107° 02.05′ E., no longer exists.

No other buoys observed in this area.

All existing buoys are unlit.

Buoy No. 2 is the Northern limit of the area where pilot not required.

Lighthouses on shore reliable and working.

Distances and bearings, taken by radar, reliable.

There are numerous fishing traps, extending from, or in the vicinity of the shore, but not obstructing navigation.

Previous information concerning the maximum size and draft is still valid.

From Vung Tau Anchorage to Saigon Port, most of the river is without any marks. Inbound or outbound ships transit the river during the day time only.

Authorities from Vung Tau board the vessel on anchoring, but only North of Lat. 10° 19′ N.

There are about 5 – 6 officials, representing Immigration, Customs, Port Authorities and Port Health. In addition ship's agent and 2 port police officers board (and stay onboard for security reasons). Vessels bound for Saigon (Ho Chi Minh City), if waiting at anchorage, are also cleared by Authorities and one set of documents remains on board to be handed to Authorities in Saigon by ship's agent.

Whilst at anchor and alongside in port, crew must keep sharp lookout and keep watch duties as Port Rules require.

In addition to the numerous forms given on arrival by Authorities to be filled in, following documents are required:

Clearance from Last Port.
7 copies Crew List.
1 copy Crew Personal Effects Declaration.
1 copy Ship's Stores Declaration.
1 copy Arms and Ammunition Declaration.
1 copy Medical Narcotics Declaration.
1 copy Crew Vaccination List (if expired, crew will be revaccinated).
1 copy Foreign Currency Declaration (crew and vessel's).
6 copies Cargo Manifest.
6 copies Cargo Plan.

All ship's certificates checked by Port Authorities.

Crew Passports/Seaman's Books usually taken ashore to obtain shore passes in Saigon.

Radio room sealed, if necessary to operate, permission must be obtained from Police Officer on board.

Fresh water available by barge (250 tons) at Vung Tau on advance notice of 24 hours, and by barge (250 tons), or by pier hose connection at Saigon Port.

Fresh fruit, vegetables and any kind of food can be obtained, prices low and negotiable, medium quality.

The cargo fumigation can be performed at Saigon Port.

The ship's derating can be performed at Saigon Port.

AUTHORITY: Saigon Harbour Master, 3 Nguyen Tat Thanh Street, Ho Chi Minh City. *Tel:* 291825, 291826. *Telex:* 812772 Sgport VT. *FAX:* 84-8-224168. *Contact:* Truong Van Cac, Harbour Master.

NGHE TINH, (Ben Thuy): 18.39 N. 105.42 E.

PORT LIMITS: The seaward boundaries of Nghe Tinh Port are the Lat. 18° 50′ N. in the North, the Lat. 18° 45′ N. in the South and the Long. 105° 49′ E. in the East.

The seaward boundaries of Nghe Tinh Port (including Ben Thuy) Gua Lo, Xuan Hai areas, in the North, East and South limited by sections from the positions 18° 50′ 01″ N., 105° 42′ 09″ E.; 18° 50′ 01″ N., 105° 47′ 00″ E.; 18° 48′ 00″ N., 105° 48′ 00″ E.; 18° 45′ 04″ N., 105° 46′ 08″ E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory for entering and leaving. Pilot Station at "Zero Buoy" (Lat. 18° 48′ N., Long. 105° 48′ E.) for Nghe Tinh and Xuan Hai areas, depth 14.0 m., and for Gua Lo area (Lat. 18° 48′ 30″ N., Long. 105° 45′ 12″ E.), depth 10.0 m.

ANCHORAGE: Anchorage Area: "Zero Buoy", and discharge area at position Lat. 18° 49′ N., Long. 108° 45′ E. (N.W. of Hon Ngu Island), depth 11.0 m.

RESTRICTIONS: Maximum draft to enter 5.0 m. Vessels exceeding 5.0 m. draft discharge cargo into self-propelled barges at discharge area (See "Anchorage"). Pilot boat may only arrive at "Zero Buoy" in conditions of weather with wind not exceeding Force 5. Pilot boards during daylight only.

MAX. SIZE: At berth, LOA 100 m., max. draft 5.0 m.

HEALTH: See "General" before first port.

RADIO: There is no radio contact with Nghe Tinh Port. Notice of Arrival messages sent via Haiphong Radio XVG or Danang Radio XVT.

VHF: Nghe Tinh Harbour Master on Channel 16 from 0800 – 1400 hrs. and 1600 – 2000 hrs. local time.

TUGS: 2 tugs, 305 h.p. each available.

BERTHING: 3 small berths in Nghe Tinh area for ships with draft 4.0 m. Two berths in Gua Lo area for ships with draft 5.0 m. One berth in Xuan Hai area for ships with draft 5.0 m.

CRANES: There are 5 mobile truck cranes, capacity 3 – 6 tons each.
BRIDGES: None.
STEVEDORES: Stevedores work 2 shifts. 0800 hrs. – 1800 hrs. and 1800 hrs. – 0600 hrs. with one meal interval between 1130 hrs. – 1230 hrs.

One gang average for day (24 hours).
Grain and Bulk Cargo: 300 tons.
General Cargo: 150 – 200 tons.

DENSITY: 1,000 at low tide.
MEDICAL: Doctors and hospital facilities available through Agent – Vosa at Nghe Tinh Port.
FRESH WATER/FUEL: Fresh water and fuel oils are available at Nghe Tinh.
AIRPORT: International Airport at Noi Bai, about 340 km. from the port.
REPAIRS: Can be performed on request.
SURVEYORS: Cargo Surveyors: Vina Control have branch office in Nghe Tinh.

Ship Surveyors: Vires have branch office in Nghe Tinh.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Nghe Tinh Port based at Harbour Office, call on VHF Channel 16.

SHIPMASTER'S REPORT: July 1982.
Location: 10 miles upstream from the entrance of the Song Ca River. Vessels exceeding 4.5 m. draft discharge cargo at anchor off the entrance to the river into self-propelled barges which transport the cargo to Nghe Tinh.
Pilot/Anchorage: Vessels anchor in position: Lat. 18° 47′ N., Long. 105° 47′ E. 1.5 miles S.E. of Hon Niem Island in 14 m., soft grey mud and sand. Pilot and officials board at this position. After Clearance granted, vessel shifts to discharge anchorage in position Lat. 18° 49′ N., Long. 105° 45′ E., 1 mile N.W. of Hon Niem Island in 10 m. This anchorage was approached by rounding Hon Niem Island to the Eastward, not less than 0.5 miles off, there is a dangerous rock awash at LW in position Lat. 18° 50.7′ N., Long. 105° 46′ E. It is prudent to approach the port in daylight due to the large amount of unlit fishing craft in the vicinity.
Documents/Officials:
Officials boarding with Pilot on arrival:

3 Security Officers.
2 Customs Officers.
2 Immigration Officers.
2 Quarantine Inspectors.
1 Agricultural Inspector.
1 Agent.
1 Harbour Master.

To be accommodated and victualled during stay of vessel in port:

3 Security Officers.
2 Customs Officers.
Agent.

Agent is the only person who speaks/understands a limited amount of English.
Documents required:

6 Crew Lists.
2 Stores Lists (deck, engine and cabin).
2 Stores Lists (provisions).
1 Health Declaration.
2 Crew Customs Declaration Lists.
2 Currency Lists (foreign monies in crew's possession).
2 Bonded Stores Lists.
4 copies Cargo Manifests.
4 copies of Bills of Lading.
2 Cargo Stowage Plans.
3 Forms (supplied) for Sextants, Binoculars, Cameras, etc.
3 Forms (supplied) for Arrival details and times.
1 Form (supplied) Report concerning where water taken during the voyage, drinking and ballast in tons and tank being used at present for drinking water.

Certificates of Registry, Radio, Load Line, Safety Equipment and Derat sighted, also Clearance from last port.

All Passports/Seamen's Identity Cards collected and taken ashore, require to see each crew member and compare with Passport photo. Discharge Books were not required. All Vaccination Certificates sighted and returned. Inspection of all crew cabins and each crew member's foreign money counted at the same time.
Restrictions: Main switch for Radio Transmitter/Receiver sealed.

All Cameras sealed. Bond and beer lockers sealed. (Release of bonded stores available at any time from Customs Officers on board).
General: There is no Radio or VHF contact with Nghe Tinh. ETA/Health messages, etc, via Haiphong Radio XVG to VOSA Haiphong.

No fresh water or oil fuels are available at the anchorages off Nghe Tinh.

Limited quantities of fruit and vegetables are available when in season. There are no facilities for sending or receiving mail.

Draft survey is carried out at commencement and completion of cargo, 3 surveyors attend from Hanoi, a journey of approximately 10 hours by road.

Bulk cargoes are discharged by ship's gear using shore grabs (which are in poor condition) each grab capacity approximately 1.5 tons (bulk wheat) also burlap savealls, sewn on to cargo nets are used.

Cargo loaded into self propelled barges, each carrying 40/50 tons bulk grain, approximately 20 barges are available when none are under repair, which is quite frequent, journey to discharge wharf takes 3 hours, 6 hours to discharge and 3 hours to return to the ship.

Stevedores work two shifts 0600 – 1800 hrs. and 1800 – 0600 hrs. with one meal interval between 1130 – 1230 hrs.

1 gang's average discharge per day (24 hours) 250/350 tons.

AUTHORITY: Nghe Tinh Port Director and Harbour Master, Nghe Tinh Harbour Office.

NHA TRANG: 12.12 N. 109.13 E.

DOCUMENTS: See "General" before first port.
PILOTAGE: Compulsory for all vessels entering and leaving port.

Pilot boards at one of 2 stations.
Southern Pilot Station: Lat. 12° 10′ 10″ N., Long. 109° 15′ 30″ E.
Northern Pilot Station: Lat. 12° 14′ 50″ N., Long. 109° 14′ 50″ E.
correct arrival time.

ANCHORAGE: To Pilot's advice.

Anchorage area for ships carrying dangerous cargo in North, Wes
Hon Mot Island, max. depth 20 m. Other cargo ships anchor wit
0.5 miles of port pier, max. depth 15 m.

RESTRICTIONS: Pilots board during daylight only.

(6) HON GAY PORT

DOCUMENT: See "General" before first port.

PILOTAGE: Compulsory for all vessels.

Pilot Station: Lat. 20° 44′ 12″ N., Long. 107° 10′ 30″ E.

ANCHORAGE: In Halong Bay, depths 18 m. to 21 m. (low tide) and good holding ground. The anchorages are sheltered from all winds.

Anchor places: For LASH vessels: Lat. 20° 49′ 50″ N., Long. 107° 08′ 02″ E.

For tankers: Lat. 20° 50′ 25″ N., Long. 107° 07′ 48″ E. or Lat. 20° 50′ 50″ N., Long. 107° 07′ 35″ E.

For dangerous cargo: Lat. 20° 52′ 15″ N., Long. 107° 05′ 00″ E. or Lat. 20° 52′ 15″ N., Long. 107° 04′ 30″ E.

For discharging/loading cargo: Lat. 20° 56′ 55″ N., Long. 107° 03′ 34″ E. or as instructed by Harbour Master.

RESTRICTIONS: The main channel to reach Hongay is marked by 10 unlit buoys and dredged to 6.7 m. at low tide. Width 80 m. Distance from pilot station to inner harbour is 18 miles. Also see "Bridges".

MAX. SIZE: Coal Berth: Length 130 m., draft 8.5 m.

Tanker Berth: Length 185 m., draft 10.5 m. (located at Lat. 20° 58′ N., Long. 107° 03′ 42″ E.). Also see "Bridges".

Cailan Berth: Length 160 m., draft to Pilot's advice.

HEALTH: See "General" before first port.

RADIO: Contact Haiphong Radio.

VHF: Harbour Office (Pilot) of Hon Gay Port and Vosa Hon Gay (Agent) on Channel 16.

TUGS: 1×1,200 h.p., 1×305 h.p. and two small tugs.

BERTHING: Coal Berth: One pier of length 150 m.

Tanker Buoys: For tankers of 20,000 d.w.t., depth 15 m.

General Berth: One pier with length 166 m. and depth 9 m.

CRANES: Shore cranes available.

MEDICAL: Doctors and hospital facilities available through Vosa at Hon Gay.

FRESH WATER: Fresh water supplied from small barge through Vosa at Hon Gay.

FUEL: Diesel oil and fuel oil can be supplied by barge through Vosa at Hon Gay.

AIRPORT: International Airport Noi Bai, situated about 140 km. from the port.

REPAIRS: Can be performed on request.

DRY DOCKS: Available at Pharung Shipyard for 10,000 d.w.t., and Halong Shipyard for 5,000 d.w.t.

SURVEYORS: Cargo Surveyors: Vinacontrol branch.

Ship's Surveyors: Vires, Hon Gay branch.

BRIDGES: None, but tankers going into and out of mooring berth must contact Harbour Master, to get permission to pass under high voltage electric line at Hon Hay (Baichay). Clearance under cable with maximum high water of 5.0 m. is 32 m.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Hon Gay Port based at Harbour Office. Tel: 25394 or call on VHF Channel 16.

SHIP'S OFFICERS REPORT: July 1986.

Pilotage: Compulsory. Pilot will board at pilot station between 0600 hrs. and 1800 hrs. (daylight hours). Pilot will bring vessel to either Quarantine Anchorage or Inner Harbour, via Vung Ha Long Buoyed Channel, for Customs and Immigration clearance.

Pilot Station: Lat. 20° 44.2′ N., Long. 107° 10.5′ E.

Anchorages:

Quarantine Anchorage: Lat. 20° 52.2′ N., Long. 107° 06.2′ E.

Inner Harbour Anchorage: 0.8 miles S.S.W. off Hon Gay.

Restrictions: 1. Transit from Pilot Station to Quarantine Anchorage in daylight hours only.

2. Vung Ha Long Buoyed Channel dredged to 7.0 m. Draft restriction according to tides. Approximate max. draft 10.0 m.

3. Height restriction through Cua Lu to tanker berth 39.0 m. (air draft) at Chart Datum.

Radio/VHF: Hon Gay Pilot and Vosa Hon Gay (Agent) on VHF Channel 16.

Tankers: Tanker berth in position Lat. 20° 58.0′ N., Long. 107° 03.7′ E. Vessel tied up to buoys and discharged via flexible hose of 6 in. Vessel can expect delays. Average discharge rate 180 t.p.h.

Density: Between 1009 and 1017, according to tidal stream.

Agent: Vosa is sole government Agent. Agent acts as interpreter.

SHIPMASTER'S REPORT: September 1988.

Hon Gay: Radio contact direct through Haiphong (XVG) is possible for sending cables, but working hours are unreliable.

Not a single cable was acknowledged by Vosa Agent at Hon Gay. However queries were received from Vosa Haiphong via Haiphong Radio.

VHF contact after arrival was also difficult, due to frequent electricity shutdown in Hon Gay.

No draft restriction from Pilot Station (Lat. 20° 44.12′ N., Long. 107° 10.3′ E.) to Lightering Anchorage (Lat. 20°50.3′ N., Long. 107° 07.7′ E.).

The main channel to reach Hon Gay is marked by 10 unlit buoys and dredged up to 6.3 m. at low water. When crossing the channel with 9.0 m. draft and 3.3 m. of high tide, the echo sounder indicated a clearance of 2.0 m.

All movements in the channel during daytime.

The Sea Berth is just after passing the electricity high tension overhead cables. Air draft required to pass under the high tension cables with high tide of 3.3 m. was 33 m.

Mooring and unmooring during daylight hours and during slack water.

One tug available for mooring and unmooring.

Sea Berth consists of 5 buoys (3 forward and 2 aft). The hoses are rigged on the port side, we were given 2×6 in. hoses for discharging Gas Oil. The rate of discharging was 200 tonnes per line per hour. Shore capacity is around 15,000 tonnes.

Shore start/stop of cargo operations is by flag signals during daytime and by light signals during night time. During rain and blackout at night time, the signal arrangement is inadequate and unreliable.

During the stay at Sea Berth, lightering is allowed.

At all times, 3 policemen reside onboard. Accommodation and meals are to be supplied.

Fresh water is available.

Shipchandler service is minimal. Most essentials out of stock or out of season.

AUTHORITY: Hon Gay Harbour Office. *Tel:* 25394, 25604.

QUY NHON: 13.46 N. 109.14 E.

DOCUMENTS: See "General" before first port. Additional copies of documents may be required.

PILOTAGE: Compulsory. Pilot boards on correct arrival time at "Zero Buoy" (Lat. 13° 44′ 19″ N., Long. 109° 15′ 16″ E.). During bad weather Harbour Master will advise by VHF the anchorage position where Pilot may board in safety.

RESTRICTIONS: Pilot boards during daylight only.

ANCHORAGE: In "Zero Buoy" area with max. depth 10.00 m. If draft exceeds 9.00 m. vessels anchor in the Southern port limits.

MAX. SIZE: LOA 180 m. Draft 7.5 m.

HEALTH: See "General" before first port.

RADIO: Contact Quy Nhon Radio, call sign XVH.

VHF: Harbour Master on watch: 0630 – 1100 hrs. and 1330 – 1700 hrs. on Channel 16.

TUGS: 1×800 h.p. and 1×980 h.p.

BERTHING: Two quays with length 350 m., depth 7.5 m. (low tide) available.

CRANES: 5 shore cranes with capacities 15 tons, 12 tons, 10 tons and 2 shore cranes of 8 tons and 40 tons available.

BRIDGES: None.

STEVEDORES: Stevedores work 3 shifts: 0600 hrs. – 1400 hrs., 1400 hrs. – 2200 hrs. and 2200 hrs. – 0600 hrs.

TANKERS: One floating pier for tankers with max. draft 9.0 m. Pipes and hoses of diameter 200 mm. and 159 mm. (6 in.).

DENSITY: 1020.

FRESH WATER: Available at berth.

FUEL: Lube oil and diesel oil available. Fuel oil presently available.

FIRE PRECAUTIONS: Tanker regulations apply and fire service available on wharf.

REPAIRS: Machine shop in port. Minor repairs possible.

DRY DOCKS: 500 tons capacity for small ship construction.

SURVEYORS: Cargo surveyors: Vinacontrol, branch office at 228 Tran Hung Dao Street, Quy Nhon City.

Ship surveyors: Vires, branch at Quy Nhon Port.

AIRPORT: Pha Chat Airport 35 km. from port. Local flights only. International flights from Tan Son Nhat Airport of Ho Chi Minh City or Noi Bai Airport of Hanoi City.

POLICE/AMBULANCE/FIRE: Contact via Harbour Office or Vosa Quy Nhon on VHF Channel 16.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Quy Nhon Port based at Harbour Office. Contact S.A.R. Centre on VHF Channel 16.

AUTHORITY: Quy Nhon Harbour Office. *Tel:* 2221.

VUNG TAU: 10.21 N. 107.04 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage is compulsory for all vessels that enter or leave the Port of Vung Tau.

General Pilot Station for Saigon/Vung Tau Ports and Mekong River is at "Zero Buoy" in position Lat. 10° 20′ 40″ N., Long. 107° 03′ 00″ E.

ANCHORAGE: In Vung Tau Bay, with anchorage well protected during N.E. monsoon, no swell at waiting area.

(1) All vessels waiting to enter Saigon Port must fly signal flag No. 1 at top of foremast.

(2) All vessels waiting to transit Mekong River must fly signal flag No. 2 at top of foremast.

(3) All vessels waiting to enter Saigon Port may be inspected by Vung Tau Harbour Master (if requested by Master).

HEALTH: See "General" before first port.

RADIO: Contact Saigon Radio, call sign XUS.

VHF: Contact with Pilot Station, Harbour Master and Vosa Vung Tau on Channel 16.

TUGS: Available from 1,000 h.p. – 7,000 h.p.

BERTHING: Vung Tau Port consists of three ports:

1. No wharf. Port for export of the crude oil. Pilot Station at position Lat. 9° 11′ N., Long. 107° 35′ E., for tankers with LOA 250 m., breadth 40 m., draft 15.0 m. and 80,000 d.w.t.
2. Petroleum and gas service port in position Lat. 10° 23′ 36″ N., Long. 107° 05′ 58″ E. There are 9 quays. Quay No. 6 for ships with LOA 160 m., breadth 28 m., max. draft 9.0 m. and 12,000 d.w.t. Other berths for ships less than LOA 120 m., draft 6.0 m. and 6,000 d.w.t.
3. Cat Lo Port in position Lat. 10° 24′ 48″ N., Long. 107° 08′ 00″ E. Length of quay 250 m. For ships with LOA 135 m., breadth 20 m. and 6,000 d.w.t.

CRANES: There are 3 shore cranes of 10 tons, 3 floating cranes of 300 tons and 400 tons and mobile truck cranes.
MEDICAL: Doctors and hospital facilities available through Vosa Vung Tau or Vosa Saigon.
TANKERS: See "Berthing" and "Shipmaster's Report".
FRESH WATER: Can be supplied by pier hose connection for berthed ships (Cat Lo Port) and by barge, generally subject to advance notice of 24 hours.
FUEL: Diesel oil and fuel oil can be supplied at Vung Tau Port.
REPAIRS: Any small deck and engine repairs can be performed on request.
SURVEYORS: Cargo Surveyors: Vinacontrol, branch at Vung Tau City.
Ship's Surveyors: Vires, branch at Vung Tau Port.
AIRPORT: International service via Tan Son Nhat Airport at Ho Chi Minh City.
SERVICES: Shipchandler available at all times.
POLICE/AMBULANCE/FIRE: Contact through Harbour Office and Vosa Vung Tau on VHF Channel 16.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Vung Tau Port based at Harbour Office. Contact S.A.R. Centre on VHF Channels 16/6.

SHIPMASTER'S REPORT: June 1992.
Berth: Offshore storage tanker "Chi Linh".
Position: 09° 49.9′ N., 107° 59.9′ E.
Documents: See "General" before first port.

A boarding party of Pilot, Customs, Immigration, cargo supplier and cargo surveyor, 9 persons in total, come on board before berthing. Five of them stay onboard during the loading operation and require accommodation.

Pilotage: Pilotage is compulsory. Communications before arrival with the Pilot, who is also the Master of the "Chi Linh", is via VHF Channel 16 and working Channel 6. The Pilot boards the vessel from a supply boat/tug.

Approaches: B.A. Charts No. 3986 and 3987.

Coming from the North East on course 246°, the Iles of Catwick were passed to the South. 10 miles South of Poulo Sepata, course was altered to 270°, keeping the patch of 7 fathoms and the "Submarine Vulcanoes" area well clear.

Poulo Sepata was radar conspicuous at approximately 22 miles distance.

In a position bearing Poulo Sepata 059° and distance 20 miles, course was altered to 315°.

Petit Catwick and Grande Catwick are also both radar conspicuous.

In a position bearing Grande Catwick 082° and distance 23 miles, course was altered to 270°. Grande Catwick was still visible on the radar.

The first flares of Vung Tau Oil Field were visible at a distance of approximately 20 miles during daylight. Soon thereafter the first rigs could be seen on the radar.

At a distance of approximately 15 miles, the storage tanker "Chi Linh" could be distinguished clearly.

In position 10° 00′ N., 108° 17′ E., course was altered to 242° to an anchor position 3 miles West of the storage tanker.

Anchorage: 3 miles West of the storage tanker. There are numerous oil rigs in the vicinity and construction is still underway.

Restrictions: No night berthing. Vessels unmoor day and night, weather permitting.

Max. Size: 110,000 d.w.t.

Health: See "General" before first port.

Agency: Vosa Vung Tau. Telex: 641054 VOSAVU VT.

VHF: See "Pilotage".

Tugs: A supply boat/tug makes fast to the stern of the tanker during the approach to the berth. For this, 2 soft ropes are required, led through the same centre lead. The eyes of the ropes should be tied together with a messenger line onto which a heaving line should be fastened. The tug's towing rope is then shackled to the eyes of the ship's ropes, which are fastened on the bollards when sufficient slack (about 75 m.) has been paid out.

During the stay on the berth, the tug maintains a light pull on the vessel to keep her off the stern of the "Chi Linh".

Berth: The storage tanker "Chi Linh" is permanently moored to an SPM, by means of a special construction between ship's bow and SPM turntable.

Berthing: Berthing is done in a manner similar to mooring to an SPM. The mooring arrangement is as per OCIMF Standards.

The Pilot remains on the bridge until the tanker is at a distance of approximately 0.5 miles from the berth. During the final approach, he is on the foc'sle, directing the vessel by ship's walkie-talkie.

On the foc'sle, one messenger line has to be prepared for picking up the mooring arrangement. The rope is put on a winch drum, led through a bow stopper and a centre lead.

When the distance between the approaching vessel and the stern of the "Chi Linh" is approximately 60 m., the latter shoots a heaving line over the foc'sle of the tanker, by means of a pneumatic gun. Attached to this is a messenger line which, once on board, can then be fastened to the messenger line on the tanker.

The mooring arrangement can now be pulled in and the chafe chain secured on the bow stopper (vessels not equipped with a bow stopper can be moored by means of a wire/shackle arrangement, secured on the bitts, as per OCIMF).

Only 1 nylon grommet rope is used for this tandem berthing.

Loading: A 16 in. floating hose string, with a total length of 262 m., runs from the port side of the stern of the "Chi Linh" to the tanker's port manifold. The tanker rail hose has a 12 in. reducer fitted.

Cargo particulars (approximate):
Name: Bach Ho Crude.
API: 39.9 (density 15°C: 0.8252).
Pour point: 32°C.
Loading temperature: 39°C.
Heating requirements: Between 38°C and 43°C.
Max. loading rate: 2,600 cu.m./hr.

Due to the high pour point of the crude, the "Chi Linh" has to c out a line flush on completion of each loading. As a consequenc this, a water plug of approximately 75 cu.m. is received at the sta loading. This should preferably be loaded into one cargo tank.

At the end of loading, the line contents will be displaced by mean a water plug. Preferably the same tank as above should be used this, as well as for dropping the lines. Loading lines should be thoroug dropped/drained in view of the high pour point.

During stay in the berth, the starboard side accommodation lad should be ready.

AUTHORITY: Vung Tau Harbour Office, No.2 Quang Trung Stre Vung Tau. *Tel:* 2270 – 2272.

NOTES

Please also advise Shipping Guides Ltd.

Virgin Islands

FREDERIKSTED, St. Croix: 17.43 N. 64.53 W.

DOCUMENTS: All forms are standard U.S. Government Forms:

Passenger List (I-418) – 3 copies.
Crew List (I-418) – 3 copies.
Clearance from Last Port.
Inward Customs Manifest (1302) – 4 copies.
Ship's Stores Declaration – Customs Form 1303 – 2 copies.
Crew Effects Declaration – Customs Form 1304 – 1 copy.

(Also see separate headings – "Health" – "Customs" – "Immigration").

PILOTAGE: Services available day or night. Payment for Pilot services is mandatory whether Master uses Pilot or not. (Vessels commissioned by the U.S. or foreign government, yachts and vessels under 100 gross tons are exempt from pilotage fees, except when the services of a Pilot are requested).

ANCHORAGE: Open roadstead on the lee (West) side of St. Croix, providing a good anchorage with no significant tide.

HEALTH: See "Health Regulations" before first U.S.A. Port (Albany).

Garbage should be disposed of beyond the 3-mile limit. On passing the 3-mile limit all garbage disposal units which open to the sea should be closed. All garbage should then be placed in covered cans and retained on board until the ship is again beyond the 3-mile limit.

RADIO: (a) Vessels may communicate with Island via:

Mackay Radio, Amagansett, New York	Call Letters WSL
Chatham Radio, Massachusetts	Call Letters WCC
Lantana Radio, Florida	Call Letters WOE
Barbados Radio, Barbados	Call Letters VPO
Destrellan Radio, Guadeloupe	Call Letters FFO
Fort de France Radio, Martinique	Call Letters FFP

All stations maintaining 24-hour service. These radio stations then relay the messages by cablegram to Frederiksted via either ITT World Communications Inc., Cable and Wireless or Western Union International.

(b) Master of every vessel arriving Frederiksted is required to give at least 24 hours advance notice of arrival to Captain of the Port, U.S. Coast Guard – San Juan, Puerto Rico, by wireless on 500 kHz or by radio telephone 2182 kHz. Call Letters for U.S. Coast Guard, San Juan, Puerto Rico – NMR.

(c) Masters are requested to advise Agent their expected time of arrival as far in advance as is possible, vessels arriving from ports other than U.S. or Caribbean Islands should give at least 7 days' notice, and vessels arriving from U.S. ports should give at least 4 days' notice. In addition, a message should be sent verifying arrival at least 48 hours in advance, with delays reported as necessary. Arrival messages should include information regarding repairs, stores, number of crew and passengers on board. If cash is required, a minimum of 7 days' (prior to date of arrival) notice is mandatory.

(d) While vessels are in Frederiksted the Authorities do not permit the use of the ship's radio transmitters.

(e) Vessels equipped with VHF equipment should commence radio watch on Channel 16 when vessel is 100 miles from St. Croix. Contact with Agents and shore facilities can be made direct or via Virgin Islands Marine Operator – Station WAH – Call Letters WAH.

(f) Masters of vessels arriving at Frederiksted Pier are required to contact V.I. Port Authority through their Agent or by Fax No. (809) 778 1033, 24 hours in advance of arrival.

VHF: Port Authority on Channel 16.

TUGS: None readily available – tugs can be arranged with 48 hours advance notice.

BERTHING: A government-owned pier with a 1,400 ft. long approachway, bridging Maritime Zone to a pier-head 240 ft. long by 60 ft. wide. Vessels 600 ft. and over with a max. forward draft of 25 ft. have been accommodated.

FRESH WATER: Available at dock, arranged by Agent.

SHORE GANGWAYS: Available.

LAUNCHES/TENDERS: Not available.

CUSTOMS: Customs Officers will board at anchorage or wharf berths, and will require an accommodation ladder.

Vessels required to enter and clear through Customs House:
Vessels loading or unloading cargo;
Vessels embarking or disembarking passengers;
Vessels remaining in port over 24 hours;
Vessels requesting permission for their passengers to go ashore during the stay of the vessel in port.

Vessels in above categories must present following documents:
Clearance from Last Port;
3 copies of Crew List (Form I-418) or substantially similar form – see note*
3 copies Passenger List (Form I-418) or substantially similar form – see note*
4 copies Inward Foreign Manifest covering all cargo for discharge at St. Croix, V.I., showing weights or measurements (of basis of how cargo is freighted) on all items (Customs Form 1302).
2 copies Stores List (Engine-Deck-Commissary-Narcotics).
1 copy Crew Effects Declaration (Custom's Form 1304).

*List of passengers and crew shall be on Customs and Immigration Form I-418 or on a substantially similar form, except that where no steerage passengers are aboard upon arrival, the listing of the passengers may be in the form of a vessel "Souvenir List" or similar list, in which the names of the passengers are listed alphabetically by class.

Sealing of Stores: Upon arrival of a vessel from a foreign port, or a vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use of consumption on board while vessel is in port and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action. Customs Inspectors in charge of vessel, from time to time, may issue stores from under seal for consumption on board by passengers and crew.

Passengers disembarking must present personal baggage declaration if from foreign.

IMMIGRATION: Recommended that Masters who are unfamiliar with U.S. Immigration Procedure should seek clarification from Agents as far in advance as is possible.

If a vessel arrives direct from a United States mainland port or from Puerto Rico no Immigration inspection will be performed. If a vessel arrives direct from a foreign port the vessel shall undergo Immigration inspection.

Vessels arriving without a visaed Crew List, may be able to obtain a waiver from Officer in Charge of U.S. Immigration & Naturalisation Service, by making application on Form I-193. A fee of $10.00 is required to obtain a waiver.

In order to expedite the clearing of the vessel, it is suggested that prior to arrival all passengers subject to inspection should be assembled where the inspection is to be performed.

Stowaways must be reported in ETA Message and listed on a Passenger Manifest (Form I-418) and on Form I-94, and must be reported to the U.S. Immigration Officer as soon as he boards.

All non-resident alien crew members, whether shore leave is required or not, are required to have in their possession valid Passports, Seamen's Book or Identification Card (with photo) and Form I-95 (Crewman's Landing Permit) or Form I-184 (Alien Crewman's Permit and Identification Card) on arrival. All resident alien crew members are required to have in their possession Alien Registration Receipt Card (Form I-151) on arrival.

AIRPORT: Distant 8.5 miles.

TIME: GMT minus 4 hours. Atlantic Standard Time.

HOLIDAYS: The following are legal holidays: Sundays; January 1st (New Year's Day); The third Monday in February (President's Day); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; Last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 3rd (Emancipation Day); Last Monday in July (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans' Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President or the Government may by proclamation declare as holidays. The port remains open on holidays.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands. Local Port Regulations are similar to those applying in U.S. Mainland Ports.

AUTHORITY: Virgin Islands Port Authority, Marine Division, P.O.Box 1134, Christiansted, St. Croix, Virgin Islands, U.S.A. 00820. *Tel:* (809) 778-3131 (St. Croix). *FAX:* (809) 778-1033. *Contact:* Larry Finch, Marine Manager.

LIMETREE BAY, St. Croix: 17.41 N. 64.44 W.

(See Plan)

LOCATION: The facilities of Hess Oil Virgin Islands Corp. (HOVIC) are located in Limetree Bay on the South coast of the island of St. Croix, U.S. Virgin Islands. St. Croix is 32 miles South of St. Thomas and St. John Islands and 50 miles S.E. of the island of Puerto Rico. It is the largest of the U.S. Virgin Islands being 19 miles long and averages 3.5 miles in width.

The Limetree Bay sea buoy is located approximately 9.3 miles East of Sandy Point and Southwest Cape, St. Croix, on the South coast of the island. The harbour is located between Krause Lagoon and Canegarden Bay.

On approaching the Sea Buoy, Mariners are advised to stay to the South of the 100 fathom curve to avoid fish traps and shoal areas which have not been completely surveyed.

A vessel is considered to be "Arrived" when it is on the Pilot Station, that is South of the Sea Buoy (see "Pilotage").

Charts: Virgin Islands (including Saint Croix) – U.S.C. & G.S. Chart No. 905, U.S. Naval Oceanographic Office Chart No. 25246. St. Croix – British Admiralty Chart No. 485. Frederiksted Roads – U.S.C. & G.S. Chart No. 937 and U.S. Naval Oceanographic Chart No. 25251.

DOCUMENTS: All ships arriving from a foreign port will be boarded by Customs, Immigration and U.S. Public Health Service Officers. *Ships personnel are not allowed ashore until permission is granted from these officers.*

The following documents are required for entry and clearance and are to be presented to the respective officers on boarding:

Customs:

2 copies Crew List (Form I-418).
2 copies Passenger List (Form I-418).
1 copy Ship's Stores Declaration (Form 1303).
1 copy Crew Effects Declaration (Form 1304).
Inward Foreign Manifest (if discharging).
Original and 3 copies Form 7527-B.
Ship's Register.
Clearance from last port.
Derat Certificate.

For vessels not using the HOVIC Marine Agency, the following additional documents are required:

1 copy for entry and 1 copy for clearance Master's Oath on Entry of Vessel in Foreign Trade (Form 1300).
1 copy for entry and 2 copies for clearance General Declaration (Form 1301).

All other forms should be provided by the vessel's Agent.

Immigration:
Original Crew List (Form I-418) (Certified if available).
1 copy Passenger List (Form I-418).

Each crewman must have either valid D-1 (Form I-95) or new Form I-95 for presentation with Passport/Seaman's Book to Inspection Officer.

United States Immigration laws apply in the U.S. Virgin Islands. Passports and Visas are required for non-U.S. citizens.

Normally Customs entry must be complete before cargo operations can begin.

Customs clearance is accomplished by the vessel's Agent.

Cargo documents are placed onboard by the Refinery Terminal Department.

Note: The Customs Service of the U.S. Virgin Islands is under the jurisdiction of the United States Treasury Department. However, Virgin Islands Customs laws differ considerably from those of the Continental United States.

Limetree Bay is in the Christiansted Customs District.

APPROACHES: *Sea Buoys:* Sea Buoys No. 1 and No. 2 are located in 80 ft. of water on the Easterly and Westerly sides of the Limetree Bay channel entrance.

Sea Buoy No. 1 is positioned at:
Lat. 17° 40′ 37.4″ N., Long. 64° 44′ 18.2″ W.

Sea Buoy No. 1 is painted green and equipped with a quick flashing green light and a visibility of 5 miles.

Sea Buoy No. 2 is painted red and equipped with a quick flashing red light and a visibility of 3 miles.

All aids to navigation in the approach channel and harbour are privately maintained by HOVIC.

Channel/Berths: The channel is 500 ft. in width and 60 ft. in depth at Mean Low Water (MLW). This depth extends into the VLCC Berths No.3 and No. 4. Docks No. 5 and No. 6 have 50 ft. at their face. Docks No. 1, No. 2, No. 7, No. 8 and No. 9 have 45 ft. at the face of MLW. Dry Cargo Berth has a draft restriction of 34 ft. without fenders and 38 ft. 06 in. with fenders. The turning basin opens up Eastward from the channel line and is approximately 1,200 ft. long and 1,000 ft. wide. The West Turning Basin is 1,500 ft. × 1,200 ft. A breakwater extends out from the head of the East Basin to the coral reef which forms the Southern harbour limit.

Anchors: Vessels shall have their anchor windlasses manned and their anchors ready to let go upon entering the channel into Limetree Bay.

PILOTAGE: Service is available 24 hours a day. All vessels entering Limetree Bay must comply with the Navigation Safety Regulations per 33 CFR, Part 164 and an entry denoting this should be made in the vessel's logbook. A HOVIC Pilot is mandatory for all vessels entering, shifting, or leaving the facilities at Limetree Bay. Pilots will assist the Master in the docking and undocking of the vessel; however, the Master of each vessel retains *full* responsibility for the vessel at all times.

Vessels must remain at the Pilot Station 2.5 miles South of the Sea Buoy until boarded by a HOVIC Pilot. The Pilot will be placed aboard by a company tug.

The HOVIC marine and terminal office is equipped with a VHF radiotelephone having the following channels:

Initial Contact – Channel 16
Working – Channels 9, 10 and 11

Ships must call the HOVIC marine office on VHF at least 3 hours before arrival at the Pilot Station and advise of any change in their ETA.

Pilot Ladders: The following regulations apply to Pilot Ladders:

If these regulations are not complied with, HOVIC Pilots may refuse to embark or disembark thus delaying the vessel.

The Officer responsible for the embarkation and disembarkation of the Pilot is to be a Deck Officer.

The pilot ladder is to be properly secured and adequately lit at night.

The Pilot should be able to pass safely and conveniently from the head of the ladder onto the ship's deck. Where portable stanchions and bulwark ladders are used for this purpose, the portable stanchions must be rigidly secured to the ship's structure to prevent being unshipped and supported at not less than two points to prevent lateral movement. The bulwark ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow a firm grip.

The ladder is to be in good condition and its treads are to remain horizontal. The treads are to have a rough upper surface.

The length of the ladder should not exceed 30 ft. Whenever the distance from sea level to a point of access on the ship is more than 30 ft., access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

The ladder is to be rigged so that each step rests firmly against the ship's side. Spreaders are to be provided not more than 10 ft. apart to prevent the ladder twisting.

A manrope or a safety line is to be secured at the vessel's rail and lowered over the side adjacent to and for the full length of the pilot ladder. A lifebuoy with self-igniting light is to be readily available.

The ladder is to be rigged well clear of any overboard discharges and at a place where the best lee can be provided to the boat carrying the Pilot.

Whenever a mechanical pilot hoist is used, a standard pilot ladder shall be at hand, ready for immediate lowering in the event of a hoist malfunction.

ANCHORAGE: There is no safe anchorage off the entrance to Limetree Bay. Vessels having to wait due to berth availability or weather should proceed to sea towards the South and West of the Island and heave to 15 or 20 miles offshore, maintaining VHF contact with HOVIC Marine by guarding Channel 16 for berthing instructions.

In bad weather it is possible to proceed to Fredericksted on the W end of the island and anchor in 30 ft. to 60 ft. of water. Vessels s have their anchors ready to let go upon entering the channel i Limetree Bay.

RESTRICTIONS: Navigation is permitted 24 hours a day, except vessels over 100,000 d.w.t. Vessels over 100,000 d.w.t. are handled a daylight basis inbound only. The Port Captain will check and rep on each vessel's draft before a Pilot is dispatched.

Ballast Drafts: Ballast draft restrictions are as follows:

Vessel d.w.t.	*Forward* (ft.)	Aft (ft.)
Under 30,000	10	16
30,000 – 50,000	12	18
50,000 – 70,000	15	21
70,000 – 100,000	18	24
San Clemente Class	21	27
100,000 – 150,000	28	32
150,000 – 200,000	32	36
Over 200,000	40	40

These guidelines will be adjusted as weather and vessel handl characteristics dictate. Advice concerning any variance will be provid to the vessel by the Pilot in ample time to prevent any unnecessa delays to the vessel's ballasting.

MAX. SIZE: The docking facilities listed are subject to chang depending on weather conditions, depth of water and length of vesse at the adjoining berths. All vessels are normally turned prior to dockin

Roll-On/Roll-Off Dock – East Basin:
Length: 275 ft.
Draft: 13 ft.

Dry Cargo Dock – East Basin – Tankers:
Length: 650 ft. – Depending on size of vessel at Dock No.1 and distance from bow to centre manifold.
Draft: 38 ft. 06 in. with fenders.
34 ft. 00 in. without fenders.
D.w.t.: 45,000 tons.

Dry Cargo Dock – East Basin – Sulphur Ships:
Length: 585 ft. LOA
Beam: 65 ft. with Yokohama Fenders.
Draft: 38 ft. 06 in. with Yokohama Fenders.

Beam: 75 ft. without Yokohama Fenders.
Draft: 34 ft. 00 in. without Yokohama Fenders.
D.w.t.: 45,000 tons Max. – Must be adhered to.
Freeboard: 40 ft. Max. – Must be adhered to.

NOTE: If the restriction on the beam is not adhered to, hand trimmi will be required. This is an extra cost.

Vessels over 585 ft. LOA, up to 685 ft. LOA may use this berth. T above restriction on beam and draft to be adhered to. When this s vessel is used, Dock No.1 must be kept vacant.

It will be necessary to undock, and turn a vessel of over 585 ft. up 685 ft. at least once during the loading. This will involve extra p charges (one pilot and 2 tugs will be required).

All other restrictions pertaining to beam, draft, deadweight a freeboard must be strictly adhered to.

Dock No. 1 – East Basin:
D.w.t.: 80,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 42.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 2 – East Basin:
D.w.t.: 80,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 42.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 3 – East Basin:
D.w.t.: 300,000 tons maximum.
LOA: 1,200 ft. maximum.
Beam: 200 ft. maximum.
Draft: 55 ft. maximum.
Bow-Centre Manifold: 600 ft. maximum.

Dock No. 4 – West Basin:
D.w.t.: 300,000 tons maximum.
LOA: 1,200 ft. maximum.
Beam: Unlimited.
Draft: 55 ft. maximum.
Bow-Centre Manifold: 600 ft.

Dock No. 5 – West Basin:
D.w.t.: 100,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 47.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 6 – West Basin:
D.w.t.: 100,000 tons maximum.
LOA: 900 ft. maximum.
Beam: Unlimited.
Draft: 47.5 ft. maximum.
Bow-Centre Manifold: 450 ft.

Dock No. 7 – West Basin:

D.w.t.:	25,000 tons maximum.
LOA:	500 ft.
Beam:	Unlimited.
Draft:	35 ft. maximum.
Bow-Centre Manifold:	Length of vessels using this berth shall be guided by the length of the vessel at Berth No.6, also on the distance from bow to centre of the manifold.

Dock No. 8 – West Basin:

D.w.t.:	100,000 tons maximum.
LOA:	900 ft. maximum.
Beam:	Unlimited.
Draft:	42.6 ft. maximum.
Bow-Centre Manifold:	450 ft.

Dock No. 9 – West Basin:

D.w.t.:	100,000 tons maximum.
LOA:	900 ft. maximum.
Beam:	Unlimited.
Draft:	42.6 ft. maximum.
Bow-Centre Manifold:	450 ft.

HEALTH: United States quarantine laws are enforced by the U.S. Public Health Service.

Pratique is required only if vessel is coming from a plague infected area or if there is illness of a suspicious nature or there is a death (from any cause) onboard. The Master is obligated to report to the HOVIC marine office any of the above circumstances well in advance of the vessel's arrival at the Pilot Station in order that the Public Health Officials may be notified – failing this the vessel may be delayed.

All trash and refuse kept in drums on deck must be in closed plastic trash bags and the drums must have securely attached lids. No plastic bags laid upon the deck nor open containers on and/or below decks will be acceptable. No garbage collection or disposal service is allowed or available. No trash or refuse will be allowed to be deposited in the harbour. Failure to comply with any of the aforementioned items results in immediate and large fines.

RADIO/VHF: Masters must advise HOVMAR St. Croix and their agents by radio or telex 72 hours, 48 hours and 24 hours in advance of their ETA, giving the vessel's name, date and hour of arrival (Local time) and the name of their last port of call, otherwise delays may result in berthing the vessel. A vessel will be considered as "Arrived" when it reaches the Pilot Station 2.5 miles South of the Sea Buoy.

A vessel's "Notice of Readiness" will not be accepted until the vessel has initially reached this point and notified HOVIC by VHF.

VHF Radio Frequencies:

1. Calling only – 16
2. Harbour Operations – 9-10-11
3. Pilotage – 6
4. Agency – 10 or 11
5. Standby-call – 2182 kHz.

Harbour tugs and the HOVIC Marine Dispatchers monitor the VHF frequencies 24 hours a day.

S.S.B. Channel Frequencies:

2182.0	8281.2
2096.5	12421.0 (1800 to 0400 hrs. LMT)
4136.3 (0400 to 1200 hrs. LMT)	12428.0
4139.5	12424.5
6210.4	16565.0
6213.5	16568.5
6518.6	16572.0
8284.4 (1200 to 1800 hrs. LMT)	22094.5, 22608.5

S.S.B. frequencies are monitored Monday through Friday from 0800 hrs. – 1700 hrs.

RADAR: No Port Radar Service or Vessel Traffic Management System exists in the port.

TUGS: Tug assistance in the channel, docking and undocking is mandatory and is provided by 4×2,000 S.H.P. twin screw diesel tugs and 2×7,200 S.H.P. twin screw diesel tugs which are stationed in the port to provide this service. Additional tugs are available when required for lightering and handling VLCC's. All HOVIC tugs are equipped with firepumps, monitors and foam towers to assist in firefighting.

Line Handling: A line handling vessel and personnel are provided for mooring.

MOORING: A HOVIC Pilot will direct the mooring of the vessel to ensure that it is properly secured before cargo handling operations start. This does not relieve the Master of his responsibility to ensure that the vessel is safely moored and that the lines are kept properly tended at all times.

Ship's Moorings and Mooring Winches: Ships shall at all times remain adequately secured alongside the berth by the use of ropes or wires which are in good condition and properly sized for the service they are in.

Mooring lines of the same size and type should always be used for all leads in the same service.

The use of constant tension mooring winches in the automatic mode is not permitted. Vessels with constant tension mooring winches must have their brakes set manually.

BERTHING:

Port Alucroix: Situated to the West of the HOVIC Terminal. The port is entered via the Krause Lagoon Channel with a controlling depth of 35 ft. at Mean Low Water and a width of 300 ft. At the head of the Lagoon is the Martin Marietta Alumina Terminal which is currently idle. Pilot boards approximately 2.5 miles South of the Krause Lagoon Channel Sea Buoys.

Container Port: Situated close to the West of the HOVIC Terminal. The port is entered via the Krause Lagoon Channel (300 ft. wide and 35 ft. depth) and the Container Port Cross Channel (400 ft. wide and 35 ft. depth). Length of the pier is 1,200 ft. with 35 ft. depth. 1 × 30 ton Paceco container crane is available with a telescopic spreader to handle 20 ft., 35 ft. and 40 ft. containers.

A berth at the head of the pier can handle Ro/Ro cargoes.

TANKERS: *HOVIC Terminal (Hess):* A shore gangway is provided. For berth limitations due to size see "Maximum Size". All berths are for the handling of petroleum products with the exception of Dry Cargo Berth which has in addition the capability of loading sulphur pellets in bulk. There are no other facilities for handling any other cargoes beside petroleum at the HOVIC Terminal. No shore steam/power is available.

Lightering: *VLCC Lightering is no longer conducted off Frederiksted, St. Croix. Lightering is done at the island of St. Lucia. If arrangement is made to lighter at St. Croix, the procedures listed below are to be adhered to:*

VLCC Lightering Operations: Lightering of VLCC's with arrival drafts in excess of 55 ft. can be conducted off the West end of St. Croix, between 1.5 miles and 2.5 miles to the West of the Frederiksted Pier. No anchorage or mooring facilities are available in this area so Masters are requested to heave-to during the operation and maintain position by utilising the vessel's engines at reduced RPM.

VLCC tankers do not formally enter at Frederiksted. Customs, Immigration and port health inspections are made on docking at Limetree Bay after the lighterage. For this reason transportation of personnel, other than company representatives, is prohibited. Supplies and provisions may not be landed or placed on board the vessel at Frederiksted.

To expedite the lighterage operation and subsequent discharge at Limetree Bay, Masters are requested to adhere to the VLCC Communications instructions (see "Radio/VHF").

During lightering operations, the Master of the vessel shall at all times retain full control and responsibility for such operations and for the navigation of his vessel.

It is recommended that at all times during lightering operations, that the following precautions be observed.

(a) Competent personnel should be assigned to standby in the steering engineroom to handle a steering casualty.

(b) The bridge steering control station should be under manual control at all times.

(c) The ship's main propulsion system should be set to manoeuvering mode and the vessel's main propulsion space manned with personnel competent to manually answer manoeuvering orders if any automatic engine maneuvering system fails to perform properly.

(d) The vessel's movement should be monitored and plotted at sufficiently frequent intervals on a corrected chart for the lighterage area. The person maintaining such plot shall be required to lay out a track line to indicate the position and drift of the vessel. Such person shall be a licensed Deck Officer other than the person actually controlling the vessel movement.

(e) A bow lookout shall be maintained at all times with adequate communication to the bridge and to the HOVIC Pilot.

(f) Additional information and guidance is contained in the OCIMF/ICS "Ship to Ship Transfer Guide (Petroleum)". The Master of both the lightered and the lightering vessel should be completely familiar with the information contained in this booklet.

BALLAST: United States laws prohibit the pumping overboard of dirty ballast while a vessel is within U.S. coastal waters. All ballast must be pumped to facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump the segregated ballast overboard at the dock after the ballast tanks have been inspected and approved by a Marine Department representative.

In pumping dirty ballast ashore, the ballast is received through a 36 in. shore line at a maximum discharge pressure to the shore installation of 120 p.s.i. Ballast is pumped into a ballast facility about 1 mile North of the dock.

Due to the limited facilities and the possibility of more than one vessel deballasting at a time, it is requested that vessel arrive with a minimum amount of ballast, consistent with Pilot's ballast draft restrictions, and include the amount to be discharged on their ETA advices to their Agents.

The U.S. Oil Pollution Act of 1924 applies to the Pollution of Coastal Waters. Violators are subject to fines and possible imprisonment.

INERT GAS SYSTEM: Ships equipped with a properly working Inert Gas System are to keep all cargo tanks inerted when alongside with exception of those tanks that are gas-free.

Vessels equipped with an Inert Gas System may be required to depressurise the cargo tanks to allow for ullage measurements to be made. HOVIC Terminal and U.S. Coast Guard Rules and Regulations concerning Inert Gas Systems must be complied with at all times.

NOTICE OF READINESS: Notice of Readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge, and that all of the ship's equipment, including, but not limited to, tanks, pumps, valves and pipelines, are ready and fit to load or discharge petroleum or petrochemical products.

HOVIC reserves the right to refuse acceptance of such Notice of Readiness unless the vessel is in all respects ready to load or discharge.

A vessel will not be deemed ready to load or discharge and pumping will not commence until the Senior Deck Officer shall have executed and delivered to HOVIC a "Declaration of Inspection Prior to Bulk Cargo Transfer" as required by U.S. Coast Guard Regulations.

HOSES: *Connecting and Disconnecting Hoses:* A crew will be provided by the terminal to connect and disconnect cargo hoses, bunker hoses and Chicksan arms on the ship.

Vessels should have blank flanges removed from the cargo lines, reducers installed and drip pans or other fixed containment in place on arrival at the dock. The HOVIC Dispatcher will advise the vessel on arrival the size and number of hoses to be connected. Manifolds not in use must be blanked off.

1. Oil transfer hoses and loading arms must be long enough to allow the vessel to move to the limits of its moorings without placing a strain on the hose/loading arm or oil transfer piping system.

2. Each hose must be supported to prevent kinking or other damage to the hose and strain on its coupling.
3. The oil transfer system must be properly aligned.
4. Each part of the oil transfer system not necessary for the transfer operation must be securely blanked off.
5. The end of each hose and loading arm that is not connected for the transfer of oil must be blanked off using closure devices.

LOADING: The Petroleum docks are serviced by the following shore lines: 1×42 in. crude line, 1×36 in. crude line, 1×36 in. No. 6 oil line, 1×36 in. ballast line, 1×30 in. VGO (Catfeed) line, 1×24 in. No. 6 oil line, 1×24 in. VGO (Catfeed) line, 2×20 in. gasoline lines, 1×20 in. Jet/Kerosene line, 1×16 in. gasoline line, 1×12 in. line for each of the following: Paraxylene, Xylenes, Benzene and Toluene, 1×8 in. Caustic Soda line and bunker lines of 1×18 in., 1×12 in. and 1×8 in. All hose connections are 10 in. diameter, there are 4×16 in. loading/discharge arms at Berths No. 3 and No. 4 for crude oil, 2×16 in. arms for No. 6 oil/crude at Berth No. 6, and 2×16 in. arms for VGO (Catfeed)/Crude at Berths No. 8 and No. 9. Chemical grades are handled via 1×10 in. hose with Caustic Soda handled by 1×6 in. and balance grades via 2×10 in. hoses. Facilities are available to handle dirty slops/tank washings.

BRIDGES: There are no bridges that affect harbour movements.

MEDICAL: Emergency medical attention is available from the Public Hospital at any hour of the day or night. The ship's agency representative should be contacted by the Master with any requests for crew medical attention. For each man needing medical or dental attention, a form should be completed in duplicate and signed by the Master, or in his absence, by the Chief Officer. The form should provide the date, patient's name, rating and the name of the vessel.

For routine medical treatment, a doctor will board vessel on a daily basis. Dental treatment is available ashore on weekdays.

All crew members requiring medical attention should be available for treatment upon ship's arrival.

Inoculations and vaccinations are available.

DENSITY: 1025.

FIRE PRECAUTIONS: Standard fire precautions for tanker safety apply, including but not limited to: Smoking is prohibited on the weather decks of tank vessels, on docks, and in the general dock vicinity. All doors and portholes from the quarters facing outside must be kept closed while transferring cargo at the dock. No portable cables connected to an electrical source shall be used while transferring cargo or ballast. When illumination is needed, approved explosion-proof lights are to be used. Boiler cleaning, tank cleaning, gas freeing, welding, burning or hot work is not allowed at the dock. Tank mopping is permitted on an individual basis. Vessel's main engines should not be out of service while the vessel is in port. It is not permitted to shut down both main boilers on a steam vessel or pull the cylinder heads from the main engine of a motor vessel. In the event a stack or engine exhaust emits live sparks, the transfer of cargo must be stopped. The main radio transmitter is not to be used while transferring cargo or ballast. The transfer of cargo and ballast must be stopped during electrical storms, or when lightening appears in close vicinity. A fire towing wire should be led out forward and aft on the offshore side of the vessel and lowered to the water's edge, made fast to the deck and tended to maintain them at the water's edge. In the event of fire on the vessel, dock or waterfront area, the transfer of cargo will be suspended and the vessel made ready for immediate departure if the danger is imminent. Furthermore, should an emergency or accident occur, vessel and terminal personnel must take immediate action in order to protect life and property. Contact the HOVIC Port Captain on VHF Channel 11 and the terminal dockwatch to inform them of the nature of the emergency.

FRESH WATER: The Island of St. Croix is dependent almost entirely on rainfall for its supply of fresh water. There are wells but most of them are rather saline in nature. As a result, fresh water is scarce and expensive. In conjunction with its refinery operation, HOVIC operates desalination plants and limited quantities of fresh water are available providing at least 72 hours' notice of these requirements is given prior to the ship's arrival. All fresh water is metered aboard ship.

FUEL: Bunkers are available by prior arrangement. Advice concerning the quantities and type required should be given in the vessel's arrival message (ETA) sent in 72 hours prior to arrival.

CONSULS: Denmark and Netherlands.

REPAIRS: In general no repair work is authorised, except for emergencies while the vessel is at the dock. Nearest major repair facilities are at San Juan, Puerto Rico.

DRY DOCKS: No dry docks are available in the port.

SURVEYORS: Cargo Inspectors are available at Limetree Bay as follows: SGS Inspectorate, Chas. Martin and Caleb Brett. E. W. Saybolt is available from San Juan, Puerto Rico.

Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available from San Juan, Puerto Rico on 24 hours' notice. The ship's Agent will assist Masters in soliciting their services.

GANGWAY/DECK WATCHMEN: Vessel to provide personnel at manifold and gangway.

Gangway: Vessels must be prepared to provide their own gangways. Some of the docks have gangways that may be used at the discretion of the dock foreman. Where HOVIC provides the gangway, a safety net will be rigged. When the vessel's gangway is used, we strongly urge the use of a vessel supplied safety net under the gangway.

CUSTOMS ALLOWANCES: Crew members are permitted to hold out of bond 1,500 cigarettes and 1 litre of alcohol per crew member.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation by air.

AIRPORT: HOVIC Terminal at Limetree Bay is located 15 minutes via highway from the airport. Daily flights direct to Miami, Fla., New York, N.Y., Newark, N.J. and numerous flights to San Juan, Puerto Rico with worldwide connections are available.

TIME: The U.S. Virgin Islands use Atlantic Standard Time (A.S.T.) wh is Greenwich Mean Time minus 4 hours all year round.

HOLIDAYS: The refinery and terminal operates 24 hours per da year round.

POLICE/AMBULANCE/FIRE: The refinery and terminal have their ow ambulance and fire department. Contact the HOVIC Port Captain VHF Channel 11. Local police may be contacted via the Agent.

TELEPHONES: No arrangements are available for placing telepho aboard ship.

SERVICES: Following services are available: Radio/Radar repair, Sh Chandler, Liferaft Service/repacking, ship classification socie surveyors (from San Juan, P.R.), and charts, publications or Notice Mariners in very limited supply.

BANKS:

The Bank of Nova Scotia, Christiansted (809-773-1013).
Banco Popular, Christiansted (809-773-0077).
Chase Manhattan Bank, Christiansted (809-773-1200).
First Pennsylvania Bank NA, Christiansted (809-773-0440).

STORING: Vessels can only be stored by truck delivery to the pi Trucks may approach the vessel no closer than 150 ft., where goo are pushed/pulled alongside using vendor's wheeled carts. A sho crane is capable of lifting light weights to the vessel from the apro Forklifts are not allowed on the dock. Local riggers are available assistance provided a minimum of 24 hours' notice is given to the Age

SHORE LEAVE: Under normal circumstances, no restrictions a imposed by the Immigration authorities on shore liberty. Masters a requested to have all crew members on board at least one (1) hour pr to departure time to avoid delay "awaiting crew members".

If crew members of foreign vessels are to be given shore leave, For I-95 must be prepared for each member of the crew. These forms a available from the ship's agent.

Transportation: Crew members desiring shore leave are not permitt to walk through the refinery. Taxi cabs are available when required transportation through the refinery and to Christiansted and Frederiksta at the crew member's expense.

IDENTIFICATION CARDS: Agency representative will supply Mast with Refinery Gate Passes.

GARBAGE DISPOSAL: Service available. Contact any of the follow for details:

Dept. of Planning and Natural Resources. Tel: 772-0565.
Brown and Ferris Industries. Tel: 809-788-7171.
Safety Clean Enviro Systems. Tel: 854-1090.

Hess Oil Virgin Islands Corp. Facility: Facilities available for handl of plastics and garbage/refuse provided material is non-hazardou Medical waste and hazardous waste are not acceptable. US Regulations 33 CFR 158.115, 40 CFR 261.3 & 261 Sub-part D app All ship waste is subject to inspection and control of the U.S. Dept. Agriculture & U.S. Coast Guard. Vessels should apply for servi through their agent 36 hours prior to arrival, indicating type and amou of material for disposal ashore. Charge is U.S.$ 21.00 per 4 cu.ft. ba Special bags are supplied through the agent.

WASTE OIL DISPOSAL: Service available. Contact any of the follow for details:

Dept. of Planning and Natural Resources. Tel: 772-0565.
Brown and Ferris Industries. Tel: 809-788-7171.
Safety Clean Enviro Systems. Tel: 854-1090.

Hess Oil Virgin Islands Corp. Facility: Dirty ballast/slops are discharg to shore through a 36 in. shore line at a maximum discharge pressu to the shore installation of 120 p.s.i.

SEAMAN'S CLUBS: None. Usual local facilities.

Hess Oil Virgin Islands Corp. Facility: Hess Oil Virgin Islands Corp. je is within 10 minutes of large shopping centre which can be reached taxi or walking from the refinery main gate.

CURRENCY: U.S.Dollar.

TIDES AND CURRENTS: The tides are small and diurnal, the mea range being about 0.5 ft. and the diurnal range less than 1 ft. Normal there is a drift of 0.5 knot to 1 knot moving along the South shore of th island in a Westerly direction.

H.O. Sailing Directions and U.S. Coast Pilots No. 5 can prov additional details.

REGULATIONS: Vessel will be held responsible for the cost of labo and material required to clean up any oil spill caused by the vessel Limetree Bay. Slick booms are available to isolate spills and continge plans are in force for oil spills. The U.S. Coast Guard will be notified any oil spills, no matter how minor, also vessel's cargo trans operations will be suspended pending U.S. Coast Guard investigatio

AIR POLLUTION: Blowing or cleaning of boiler tubes while a vessel alongside the dock or within the harbour limits is strictly prohibited.

It is unlawful to permit the emission of smoke darker than No.2 on th Ringelmann scale. Violation of this law in Limetree Bay may result fines to the vessel. Terminal personnel record violations and report th same to Air Pollution Authorities. Masters are advised that continu violation can result in the vessel being placed offhire. The vessel will b sailed and not re-docked until the problem is fully resolved.

In the event a stack or engine exhaust emits live sparks, the trans of cargo must be stopped. If the condition is not corrected immediat the vessel will be removed from the harbour.

SWIMMING: Swimming in the Harbour is not permitted as sharks a barracudas frequent the area.

COMMUNICATIONS:

Communication with U.S. Navy at Fredericksted: Arriving at or depar from Limetree Bay, all vessels passing the Western end of St. Croix a to monitor VHF Channel 16 for radio traffic from the U.S. Navy Weapo Tracking Station at Fredericksted. Vessels may be requested to al course to avoid interrupting naval activities that are being conduc with aircraft, ships and submarines.

DELAYS: Due to the multiple capabilities of the harbour, infrequ delays are encountered in the transfer of petroleum or petrochem products.

GENERAL:

Photography: Cameras are not allowed within the confines of the Refinery. Picture taking is strictly prohibited.

Emergency Towing Wires: Immediately on docking, emergency towing wires of sufficient length to reach the water's edge, with 8 ft. eyes on the outboard ends, must be paid out from the offshore bow and quarter. The inboard end of the wire must be made fast to the vessel's bitts. Wire shall be in good condition, of adequate strength and adjusted as necessary throughout loading/discharge operations to keep the eyes at or above the waterline at all times.

Liquors: The transportation of alcoholic beverages inside HOVIC's property is strictly prohibited; consequently, no liquor or beer may be removed from vessels. The only exception to the foregoing is the delivery of bonded stores ordered by the Master for the vessel.

Visitors: No visitors are permitted in the dock area. Only persons on official ship's business are permitted on the piers.

Laundry: Facilities are available to handle ship's laundry.

Mail: Official and personal mail will be delivered on board by the ship's Agent upon vessel's entry.

Mail received for vessels while in port will be delivered on board prior to sailing. Outgoing mail is accepted from Master, provided it is accompanied by a mail transmittal slip to support disbursements.

Supplies and Repairs: Limited supplies of provisions and marine hardware are available on the island. There are no facilities for major repairs closer than San Juan, Puerto Rico. Machine shops in Christiansted and Fredericksted can assist in making minor repairs.

Overloading: Masters are advised that International Laws pertaining to overloading are strictly enforced and they should be guided accordingly.

Vessels shall not arrive or sail overloaded. All expenses incurred in discharging or lightering overloaded cargo will be for the vessel's account. Vessels departing to zones requiring lighter draft may sail with the draft permitted in that zone plus an allowance for fuel and water consumption to the zone limit.

Weather Conditions: The loading and discharging of all crude and petroleum products will be stopped during severe electrical storms.

Loading of gasoline or other similar low flash products will be stopped during periods of calm when the heavy vapours cannot be dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's Officers are cautioned to be on their guard during such conditions.

In the event of abnormal weather conditions in the area, such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters may be told to suspend all operations and proceed to sea until normal weather conditions again return.

Demurrage: Vessels are required to vacate the berth promptly upon completion of cargo handling operations (loading or discharging operations, as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the HOVIC Marine Manager.

If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be held responsible for penalties and demurrage as follows:

(1) To pay dock demurrage at the rate of U.S.$1,000 per hour or a pro-rata share thereof for a fraction of an hour.
(2) To hold HOVIC harmless for any demurrage and consequential damages incurred as a result of any other vessels suffering berthing delays or for any other events resulting from its failure to properly vacate the berth.

The following rules shall govern the determination of demurrage:

(1) 1 hour of free laytime will be allowed after completion of cargo loading operations. This free time will start at the time cargo hoses are disconnected from the ship's manifold on completion of loading or discharging of cargo.
    Vessels awaiting cargo papers and/or Customs Clearance must vacate the berth within 1 hour of such completion and move outside to await their papers.
(2) 4 hours free Laytime will be allowed for ballasting after discharge operations are completed.
(3) Ballasting times for VLCC's will be handled on an individual basis for each ship.
(4) Delays caused by the terminal are excepted.

DEVELOPMENTS: Currently there are no planned revisions to the harbour.

AGENCY: Vessels calling at HOVIC's terminal should address all business messages to their Agent. Ship owners and operators may wish to have their vessels representated by HOVIC Marine Agency. The Agency offers a complete and efficient service.

Arrival: The ship's agent is to be advised as to the vessels ETA 72 hours, 48 hours and 24 hours prior to the vessel's arrival. They are to keep the terminal advised at all times.

AUTHORITY: Hess Oil Virgin Islands Corporation (HOVIC), P.O.Box 127, Kingshill, St. Croix, U.S. Virgin Islands 00850. *Tel:* 809-778-4000, 778-4494. *Telex:* 3473013. *Contact:* Andrew B. Koski, Port Captain. John H. Frederick, Marine Manager.

Virgin Islands Port Authority, P.O.Box 1707, St. Thomas, Virgin Islands, U.S.A. 00801. *Tel:* (809) 774-2250 (St. Thomas), (809) 778-1180 (St. Croix).

ROAD HARBOUR & PORT PURCELL, Tortola, British Virgin Islands: 18.25 N. 64.37 W.

PORT LIMITS: All the area of water North of an imaginary line drawn from Burt Point to Hog Point (see B.A. Chart 2020).

DOCUMENTS:
Clearance from last port.
1 Declaration of Health Certificate.
4 Crew Lists.
2 Crew Store Lists.
2 Ship's Stores Lists.
2 Passenger Lists.

PILOTAGE: Only compulsory for vessels of 200 g.r.t. and over, unless a vessel is in possession of a valid Exemption Certificate issued by the Ports Manager. Pilot boards at Port limits after receiving advice from Agents preferably 12 hours prior to arrival. Link calls made through Tortola Radio, Channel 27 in daytime and Channel 16 at night.

Vessels arriving ahead of ETA sound "G" on whistle if unable to advise Agent.

No inward pilotage at night, unless emergency, night Pilotage outwards by special arrangement.

ANCHORAGES: Between Buck Island and Beef Island or immediately South of Port limits, approximately 12 fathoms.

RESTRICTIONS: Anchorage within Port limits prohibited unless authorised by Ports Manager. Max. draft alongside Port Purcell 21 ft.

HEALTH: Customs issue Pratique for vessels with clear bill of health, otherwise request doctor to board on arrival alongside or at anchor.

RADIO: Call sign "Port Purcell" – can be reached by VHF Channel 16. Cable and Wireless maintain a Public Coast Station on Tortola, call sign "Tortola Radio", with an approximate range of 50 miles and provides linked telephone calls between ships and any shore based telephone subscriber. From 0700 hrs. – 1900 hrs. watch is kept on Channel 16, at night for emergencies only.

For distances in excess of 50 miles any other convenient shore station, (eg. Barbados, St. Thomas) that will accept messages for onward cabling or telephoning to Tortola.

TUGS: None available.

BERTHING: Port Purcell quay is 800 ft. long, max. draft 21 ft. at any state of tide, salt water. Ships discharge with own gear.

CRANES: Port Purcell has 1 mobile shore crane, max. lift 8 tons. Prior advice required for use.

MEDICAL: Hospital facilities available, no routine inoculations, etc., required unless specially notified.

DENSITY: Entirely salt water within port limits.

FRESH WATER: Available in limited quantities at Port Purcell, approx. delivery 20 t.p.h. and costs U.S.$14.00 per 1,000 gallons.

FUEL: Diesel only for small vessels delivered by road tanker to Port Purcell, 2 hours' notice.

REPAIRS: Minor repairs only.

SURVEYORS: Available.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: No sealing of tobacco, wine or spirits.

AIRPORT: Beef Island, 7 miles, regular local flights to St. Thomas, Puerto Rico, Antigua which connect with several main lines to Europe and the Americas.

TIME: GMT minus 4 hours.

HOLIDAYS: Port Purcell closed Christmas Day, Good Friday and 1st Monday in August.

POLICE/AMBULANCE/FIRE: Dial 999 (emergency). Police station 43422.

TELEPHONES: Telephones available for use on board ship.

SHORE LEAVE: No restrictions for crews.

IDENTIFICATION CARDS: None required.

DELAYS: None should be expected. Cargo working is geared to ship's arrival, irrespective of time and 24 hours continuous working if required.

AUTHORITY: Ports Manager and Harbour Master, Road Town, Tortola, Virgin Islands.

ST. THOMAS: 18.20 N. 64.56 W. (See Plan)

St. Thomas is situated on South side of Island of St. Thomas. It is 1,434 miles from port of New York. Northern side of Island borders on Atlantic Ocean, and Southern side on Caribbean Sea. The Harbour is one of the best in the West Indies, being almost landlocked.

DOCUMENTS: *Quarantine, Customs and Immigration* – see "Frederiksted".

Agent:
1 copy Crew List (Form I-418).
1 copy Passenger List (Form I-418).

PILOTAGE: Compulsory and available day and night. Pilot Boat has letter "P" on deck house and flies International Code flag "P". Pilots will meet vessels 1 to 3 miles outside harbour, boarding via Jacob's ladder.

ANCHORAGE: Outer Harbour Anchorage located beginning at Scorpion Rock Lighted Buoy No. 1 (Lat. 18° 19′ 25.6″ N., Long. 64° 55′ 08″ W.) thence 180° 1,580 yards; thence 263°, 2,490 yards; thence due North 1,255 yards; thence due East to the Southerly tip of Sprat Point, Water Island; thence to Cowell Point, Hassel Island, and thence to point of beginning. This anchorage is considered good and is about 8 fathoms with sand bottom.

RADIO: (a) The St. Thomas Marine Operator will guard the following from 0600 to 2100 hrs.: Channel 26, 16 VHF, 2009 – 2506 and 2182 kHz AM, and the upper side band (2010.4 – 2507.4 kHz) of the same frequency. The Harbour Master's Office maintain a 24 hour watch on VHF Channel 16 (working on Channel 12).

(b) Master of every vessel arriving at St. Thomas is required to give at least 24 hours advance notice of arrival to Captain of the Port U.S. Coast Guard – San Juan, Puerto Rico by wireless on 500 kHz or by radio telephone 2182 kHz.

(c) Masters are requested to advise Agents their ETA, at least 36 hours in advance. Arrival messages should include cash requirements (local currency U.S. Dollar) and advice regarding repairs, stores, etc. This information is particularly necessary in the cases of vessel arriving on weekends or holidays. For cruise vessels the arrival messages should also include the number of passengers and crew on board.

(d) While vessels are in St. Thomas Harbour, the Authorities do not permit the use of the ship's radio transmitters.

(e) U.S. Coast Guards: This organisation maintains a small Marine Safety Detachment in St. Thomas to observe, service and effect repairs to navigation aids in vicinity of St. Thomas. An 82 ft. Coast Guard Patrol Boat "Point Whitehorn" (82364) is attached to the station for primary purpose of search and rescue work. Maintains watch on VHF Channel 16. Radio telephone marine information broadcasts, including Notices to Mariners, will be made on 2670 kHz, after first making a preliminary announcement on 2182 kHz. Radio telephone urgent and safety broadcasts or Marine Information will continue to be made on 2182 kHz.

TUGS: Normally not considered necessary for docking, however tugs are available for docking and undocking ships.

BERTHING: Wharf of the West Indian Company Limited, located on Eastern shore of harbour basin. Wharf is bulkhead type, 2,234 ft. long, running N.E./S.W., and is well protected to seaward. Mooring bitts are spaced at intervals of 50 ft. There is a "cut out" in the wharf 950 ft. from N.E. corner, which is 22 ft. wide and approximately 3.5 ft. above low water. This ramp is slanting from 8.3 ft. to 3.5 ft. over a distance of 20 ft. Similar type of ramp located on West Corner of wharf. Safe depth alongside from 27 ft. near N.E. end to 30 ft. on S.W. end. Bulwark is 8.3 ft. above mean tide. Average difference between high and low tide is 11 in.

Dockage dues are payable to the West Indian Company Limited, as per tariff.

In the Crown Bay area (access via East or West Gregerie Channels) the V.I. Port Authority maintains facilities which include a pier extending 800 ft. from shore with 500 ft. of berthing space on South side and 200 ft. on North side, where ships up to 25,000 g.r.t. can moor. Controlling depth presently 38 ft. This pier is used for berthing tourist and tanker vessels only. A curved bulkhead at top of Crown Bay, approximately 900 ft. long, is used for Ro/Ro, container and break bulk cargo. Controlling depth 15 ft. 24-hour arrival notice is required.

Phase II-A of the development at Crown Bay will include a 650 ft. berth for cargo vessels.

CARGO HANDLING: Containers are handled at the West Indian Company and the Crown Bay area (V.I. Port Authority), but no special gantry cranes are available. Ro/Ro cargo handled at these facilities as well. No liquid chemicals facilities exist here but there is a small privately-owned LPG plant limited to 20 ft. draft and 250 ft. length. Shell uses this facility for gasoline and light diesel. The "T"-pier in Crown Bay is used for the V.I. Water and Power Authority for movement of fuel and water, and Texaco has its own pipe-line on the same pier for their products.

STEVEDORES: Discharging and/or loading arranged by the West Indian Company Limited for account and risk of vessels.

Rates of discharging and/or loading dependent on vessel's equipment and stowage. However, following may be considered average:

General Cargo 6 weight tons per gang hour.
Bagged Goods 8/10 weight tons per gang hour.
Lumber 10/12 weight tons per gang hour.

Each stevedore gang normally consists of 12 stevedores (10 on board and 2 ashore), 2 winchmen, 1 signalman, 1 foreman.

MEDICAL: Local hospital is the Knud-Hansen Memorial Hospital, which is equipped with facilities for operations, etc.

FUEL: Bunkers are not available except for small craft.

FRESH WATER: Mostly rain water which when available is supplied by the West Indian Company Limited. This supply is limited and is on an emergency basis only. Water may also be requested from the Government of the Virgin Islands in cases of emergency only. Delivery effected by pipe alongside wharf. Water can be delivered by barge.

HEALTH, CUSTOMS, IMMIGRATION: Refer to Frederiksted.

CONSULS: Following countries have consular representatives in St. Thomas:

Belgium	France	Panama
Denmark	Haiti	Sweden
Dominican Republic	Netherlands	United Kingdom
El Salvador	Norway	

AIRPORT: Distance 2 miles. Connections with International flights from Puerto Rico and direct flights from New York, Dallas/Fort Worth and Miami.

TIME: Official St. Thomas time is Atlantic Standard Time, which is 4 hours behind GMT.

HOLIDAYS: The following are legal holidays in St. Thomas: Sundays; January 1st (New Year's Day); January 15th (Martin Luther King); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; The last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 25th (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans' Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President of the Government may by proclamation declare as holidays.

Whenever any holiday falls upon Sunday, the Monday following is a legal holiday.

POLICE/AMBULANCE/FIRE: Police 915; Ambulance 774-1212; Fire 921. Port Authority 774-2250, 774-2333.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harb Pollution Act of 1924, prohibiting discharge of refuse and oil in navig waters of the U.S. Virgin Islands.

Local Port Regulations are similar to those applying in U.S. Main Ports.

WEATHER: The weather is usually mild with little wind. Squalls w they occur, usually come from the N.E.

GENERAL: *Gangway:* One aluminium gangway available which is 3 long and 2 ft. 6 in. wide – made with skidding prevention strips only a therefore not recommended for use as a passenger gangway. There a similar gangway that is owned and used on V.I. Port Authority facili Since these are the only gangways; they are made available to vesse on first-come-first-served basis.

Stores: St. Thomas should not be depended upon for large quanti of provisions or deck and engine stores, as practically all commodi are imported making prices higher than United States mainland po and Puerto Rico. No regular Ship's Chandlers establish in St. Thomas, V.I.

Storage Facilities: The West Indian Company Limited undertak ordinary storage for a limited period of time in 8 transit warehouses, 14 ft. high with a total floor area of 80,000 sq. ft., plus an additio 9,600 sq. ft. roof covered area. There is also a large uncovered a available for outside storage. Only limited cold storage facilities a available on The West Indian Company's Dock.

Ice: Small quantities may be obtained.

Laundry: Modern laundry service is available.

AUTHORITY: Virgin Islands Port Authority, Office of the Man Manager, P.O.Box 2216, St. Thomas, Virgin Islands, U.S.A. 008 *Tel:* (809) 774-2250, 774-2333. *Contact:* Harry Magras, Man Manager.

Western Samoa

APIA: 13.50 S. 171.45 W. (See Plan)

PORT LIMITS: The Customs Act defines the port of Apia as follows: The limits of the said port of Apia shall be a circle of 2 miles radius from the Custom House now existing in Apia and the said port shall include all land, river, and sea included within that circle. The Shipping Act defines the limits of the port in similar terms using the Export Wharf as the centre of the 2 mile radius circle. Both of these features are shown on Chart 2211.

DOCUMENTS:
1 Clearance from previous port of call.
3 Crew Lists.
3 Passenger Lists.
2 Health Documents.
1 Manifest.
Bills of Lading.
Ship's Papers (stores and poisons).
List of Dangerous Goods.

PILOTAGE: 72 hours ETA is required, confirm 24 hours before arrival. Pilotage is compulsory for merchant vessels. Pilot boards 1.5 miles outside harbour on line of leading beacons. Pilot boards from harbour tug.

By night, in addition to usual navigation lights, Pilot boat carries standard identification, i.e. a red light on foremast with all-round visibility. Exemption from pilotage may be granted to Masters of vessels trading regularly to Apia, but pilotage dues are still payable.

ANCHORAGES: In 20 fathoms outside a line drawn between the 2 reefs and preferably on line of leading beacons. Bottom is coral.

RESTRICTIONS: No night-time or tide restrictions. Turning basin dredged to 36 ft. in 1972, extending to 1,200 ft. from each end of the wharf. Arrivals preferred during daylight hours.

MAX. SIZE: Shore bollards to take stern and bow lines for vessels up to 800 ft. in length. Max. draft 35 ft.

Buoy mooring for tankers up to 32,000 d.w.t. consists of 3 buoys with black and red vertical stripes, 1 ahead and 2 astern. Vessel also uses starboard anchor.

HEALTH: Doctor boards vessel on arrival alongside.

RADIO: ETAs should be sent 72 hours before arrival, and confirmed 24 hours before. Signals to incoming ships by radio or radio-telephone from Apia radio station 5WA. For radio, ships should call on 500 kHz and operate on 483 kHz. For radio-telephone, ships should call on 2182 and operate on 2162 or other available frequency as may be arranged once contact has been established. Call sign "Apia Radio" repeated.

Apia Radio maintains continuous service, and the Harbour Master can be called on Channel 16 during normal working hours. The tug and pilot launch also operate on Channel 16.

TUGS: 2 tugs available, *Pualale,* 425 b.h.p. (7 ton pull) and *Savaii,* 175 b.h.p.

BERTHING: Export Wharf – reinforced concrete wharf 604 ft. in length on the East side of inner harbour. Max. depth alongside 36 ft. All loading and discharging is carried out with ship's gear. No wharf cranes available. This wharf and all surrounding areas enclosed by fence is Customs area and all vessels trading to or from places outside Western Samoa must depart from or arrive at this wharf.

New wharf 604 ft. long, vessels up to 800 ft. may be berthed.

There is 250 ft. of berthing alongside the inner face of the Southern arm of the wharf for small ships in deep water.

There are no special Ro/Ro facilities.

Shore equipment: One 15 ton mobile crane. 2×20 ton forklifts. About 10×3 to 5 ton forklifts.

STEVEDORES: Arranged by ship's Agents.

MEDICAL: Advance notice to Agents preferable. Doctors and good general hospital where seamen may be admitted.

There is a private medical clinic and a private dental clinic. Both high standard.

TANKERS: Shell, Mobil, and B.P. operating in Samoa, and have own discharging facilities. Tanker terminal situated on West Reef. Discharge line is 6 in. diameter. Launch service may be provided between ship and shore at a small charge.

DENSITY: 1025 – but may alter considerably during rainy season.

TIDES: Mean high water intervals 6 hours 27 minutes, Spring range 3.8 ft., mean range 2.6 ft. Tidal stream normally slight, but after heavy rain outflow from rivers and streams can cause it to become quite strong.

The current across the harbour entrance about 600 m. off the reef can be variable, but is predominantly Westerly and velocities up to 4 knots have been reported but this is not normal.

FRESH WATER: Available at wharf from shore installation.

FUEL: Only light diesel fuel available.

FIRE PRECAUTIONS: Fire services available on wharf, station is 0.5 miles distant.

CONSULS: The New Zealand High Commissioner represents all British subjects; French Consul, Australian High Commissioner, Embassy of the Chinese People's Republic, South Korean Consul, German Consul, United States of America Consul.

REPAIRS: Minor repairs only.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCES: No enforcements.

AIRPORT: 25 miles from Apia on Western side of Island. Regular and frequent mail and passenger services. Direct to Auckland or U.S.A. via American Samoa.

TIME: GMT minus 11 hours. No alteration to clocks.

HOLIDAYS: No cargo on Sundays between 0300 and 2100 hrs. The recognised holidays are Christmas, New Year, Boxing Day, Good Friday, Easter Monday, Whit Monday, Anzac Day and Independence holidays from 1st June to 3rd June.

TELEPHONES: Police and public telephones near wharf and provisions are available for telephone connection to tourist vessels berthed at the wharf.

POLICE/AMBULANCE/FIRE: Hospital 21.212; Police 22.222; Fire 999 emergency or 20.404.

EMERGENCY CO-ORDINATION CENTRE: U.S Coast Guard, Pago Pago, American Samoa, 80 miles East of Western Samoa.

BANKS: Bank of Western Samoa, P.O.Box 189, Apia, Western Samoa. Tel: 22 422. Telex: 258.

Pacific Commercial Bank (Affiliate Bank of New South Wales and Hawaii), P.O.Box 192, Apia, Western Samoa. Tel: 22 781. Telex: PCB 231.

STORING: See "Prelims".
1. Truck only.
2. N/A.
3. Yes.
4. Yes.
5. No regulations.
6. Yes.

SHIP SUPPLY SERVICE: The Marine & Shipping Division of the Ministry of Transport provides tug-boat services which are available for ship-to-shore transport of personnel and/or essential ship stores, sick crew members, etc., on application to the Secretary, Ministry of Transport.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: No regular service currently available. Contact Department of Agriculture Quarantine Service (Tel: Apia 20924). Garbage disposal is only permitted from ships from Australia, Fiji and New Zealand.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Western Samoa Tala (WS$). WS$ 1.00 = U.S.$ 0.4158 (11.6.91). Local currency can not be exported.

GENERAL: *Supplies:* Provisions available. Deck and engine room supplies can be obtained in limited quantities.

Divers: No divers other than scuba divers are available, and skin divers may be recruited for up to 50 ft. diving.

Oil Pollution: The pumping of bilges, etc., within harbour limits is not permitted and *heavy penalties will be imposed for any breach.*

Garbage Disposal: The dumping of refuse of any kind within harbour limits is strictly prohibited. Properly covered receptacles will be made available and rubbish disposal vans will clear them as necessary. A small charge will be made for this service.

Charts: B.A. 1730 – Samoa or Navigation Islands.
B.A. 1339 – Plans in Samoa.
B.A. 2211 – Apia Harbour.

AUTHORITY: Government of Western Samoa, Ministry of Transport, P.O.Box 1607, Apia, Western Samoa. *Tel:* 23 700, 23 701 and 23 702. *VHF:* Channel 16. *Telex:* 221 Malo Sx. *FAX:* 21990. *Cables:* Mot Sam Govt. *Contact:* The Secretary, Ministry of Transport. N. Vaaelua, Assistant Secretary Marine and Shipping, and Acting Harbour Master.

Republic of Yemen

GENERAL:

CIRCULAR: Extract from the Circular dated 21st June, 1975 from the Hodeidah Port General Corporation.

Information and General Condition:

1. *Payment of Tolls and Dues:*

All charges imposed herein are payable in cash, in advance except in the circumstances in which the General Manager of the Hodeidah Port General Corporation exceptionally agrees otherwise.

2. *Definition to Certain Terms:*

(a) "Vessels" shall deem to refer in the Regulations to every floating craft made to sail on water by its or without its own means, whether or not fit for navigation.

(b) "Working Day": Commences at 0600 hrs. and ends at 1800 hrs. Night: Commences 1800 hrs. ends 0600 hrs. following day. Weekend: Commences Thursday 1200 hrs. and ends Saturday 0600 hrs.

3. *Public Holidays:*

The following occasions are observed as Public Holidays, which commence from 1200 hrs. on the preceding day and end at 0600 hrs. following the holiday:–

1. Weekly Holiday: Friday.
2. Al-Hijra (Moslem New Year): *1st Muharram.
3. Maulid-El-Nabi (Prophet's Birthday): *12th Rabia Awal.
4. Al-Meiraj (Prophet's Ascension Night): *27th Rajab.
5. Al-Shaabania: *15th Shaaban.
6. Idd-El-Fitr (4 days): *1st to 4th Shawal.
7. Idd-El-Adha (5 days): *9th to 13th Dulhijja.
8. Revolution Anniversary: 26th September.
9. 13th June (National Holiday).
10. Labour Day (1st May).
11. Revolution Day (14th October).

*N.B.: For Hijra Calendar dates, the corresponding Georgian Calendar dates will be those proclaimed by the Government of the Yemen.

CIRCULAR: To Owners/Masters.

We quote below text of a Circular dated 21st January, 1979, issued by the General Corporation for Ports and Marine Affairs, Hodeidah, for your information and necessary compliance:

"No vessel, having no workable derricks or winches of her own, shall be received or accepted.

Agents shall be responsible for said obligations and without any liability to the Port General Corporation, in all Yemen Ports.

Due to non-availability of discharging means of floating cranes at anchorage and non-guarantee of available shore cranes, advisable you ensure that all ships calling under your Agency should be fully equipped as required."

PILOTAGE: Pilotage is compulsory on all vessels irrespective of their size, on entry and departure.

NOTICE: The following notice was handed to a Master on arrival at Hodeidah.

Re: Formalities, Restriction, Breaches & Penalties at Yemeni Ports:

We are very pleased to welcome you and the vessel under your command at Hodeidah/Raskateeb/Saleef/Mokha, and request you to note and comply with the following formalities/restrictions to avoid payment of penalty.

1. Call Pilot only when you are fully ready in all respects. If Pilot is called to take the vessel out, and the vessel fails to depart after boarding of the Pilot, the vessel will bear all the consequential expenses of (a) Pilot waiting time, (b) Launches assistance charges, (c) unmooring charges, including any other expenses.
2. Fine of Y.Rials 500 to 2,000 is imposed, if Yemen flag is not hoisted on the highest mast.
3. Fine of Y.Rials 500 is imposed, for arrival at Port without prior notice, notifying actual time of arrival of the vessel.
4. Fine of Y.Rials 10,000 to 20,000 is imposed for attempting entry to berthing quay, without prior permission from the Management and without Pilot on board. Same penalty imposed for attempting departure without permission and Pilot, from the quays or inner basins.
5. Fine of Y.Rials 500 to 1,000 is imposed for draining water onto the quays. Vessel also to bear responsibility for losses caused therefrom.
6. Fine of Y.Rials 1,000 is imposed for throwing garbage, cargo remains, food remains, oil, etc. into inner harbour or onto quay.
7. Fine equivalent to 100% of the loss in income to the Corporation is imposed, in the event the vessel submits inaccurate statements on ships particulars and drafts.
8. Fine of Y.Rials 5,000 is imposed, if the vessel leaves anchorage after registration without clearance from the Corporation.
9. Fine of Y.Rials 500 is imposed, if Rat Guards are not provided to avoid rats escaping to the quays.
10. Fine of Y.Rials 2,000 is imposed, if vessel uses her own boats within Port limits without prior permission.
11. Fine of Y.Rials 2 is imposed per hour per metre of LOA of the vessel, for delay in completion of discharging during the duration set out by the Corporation.
12. Fine of Y.Rials 1,000 is imposed on whoever obstructs Corporation's staff/employees in carrying out their duties or insults them.
13. A shore crane will be compulsorily deployed at 100% surcharge to a vessel over 100 m. LOA.
14. Corporation reserves the right of removing any vessel from the quays for any reason in the general public interest.
15. Photography of the Port area is prohibited.

(Notes from Tariff – 1/82 published by Ports & Marine Affairs Gene Corporation).

Please note that the Port Limits (for Hodeidah) are 14° 55′ 34″ 53° 37′ E.

"Pilotage Point" for entrance and departure is Buoy No. 2.

We trust that you will find the above information very helpful to prom cordial relations with all officials and relevant authorities, and at the sa time contribute towards reducing expenses of our mutual Principals. PLEASE NOTE: All the foregoing information was in effect prior to th unification of the country and may have been superceded in rece times.

ADEN, (including Little Aden): 12.48 N. 44.54 E.

DOCUMENTS:

5 Crew Lists for Ship's Agent, Police and Immigration.
5 Passenger Lists for Ship's Agent, Police and Immigration.
2 Lists of Bonded Stores.
1 Health Form to be shown to Pilot on boarding and handed to Ship Agent.
Manifests, Bills of Lading if landing cargo only.
Ship's Register to be sighted by Pilot.
Arrival Declaration to be filled in by Ship's Agent after arrival.
Dangerous Material Declaration to be handed to Pilot on boardin

PILOTAGE: Compulsory for all vessels proceeding to and from Inne Harbour and Oil Harbour at Little Aden which exceed 200 g.r.t. To ca Pilot fly International Code Flag "G" or red/white/red lights at night. Ca "Harbour Control" on VHF Channel 16, or R/T 2182 kHz. 48 hour notice of ETA with draft to Harbour Office.

Pilot boat will meet ship at the Fairway Buoy in all weathers. Pilot boa is 50 ft. launch painted red, flying Pilot flag by day or white/red lights night. Pilot will board on lee side of ship by pilot ladder only. Vesse waiting Pilot can anchor anywhere in Outer Harbour except in Prohibited Area of 2,000 ft. around the Fairway Buoy. All Pilots a Yemenies with foreign-going Master's certificates.

ANCHORAGES: Ample anchorage area available with in Outer Harbou depths from 18 ft. to 54 ft.

(a) Anywhere North of Fairway Buoy clear of Main and Little Ade Channels and clear of Prohibited Area mentioned above.

(b) Deep water anchorage anywhere to S.W. of Fairway Buoy clea of Little Aden Channel and Prohibited Area mentioned above.

MAX. SIZE:

Aden:

(a) Max. length 900 ft., breadth no restriction, depth 38 ft. at datu for vessels taking bunkers from A.B.C. (Aden Bunkering Co.).

(b) Vessels taking bunkers from Y.K.T.C. (Yemen-Kuwait Termin Co.), max. length restricted to tankers of 750 ft., breadth n restriction, depth 39 ft. at datum.

(c) Larger vessels can be considered on application to the Po Officer. Longest vessel to enter 940 ft.

Little Aden Refinery:

Max. length 760 ft., breadth no restriction, depth 40 ft. at datum an max. deadweight 65,000 tons.

A new jetty 45 m. in length has been constructed on the North sid of the oil harbour by Agip Oil Company for use by oil rig supply tug Vessels up to 90 m. LOA and 6.1 m. draft can berth on the jetty.

Note: In both harbours vessels manoeuvring require 2 ft. water unde keel, and vessels of draft 37 ft. and above require 4 ft. water under kee

Ballast Draft for Tankers: All tankers when manoeuvring within the po shall be ballasted properly to a mean ballast draft which shall not b less than half the Summer draft and the trim by the stern not exceedi 6 ft. These figures are the minimum for normal conditions and may b increased when conditions necessitate at the discretion of the Pilot.

HEALTH: Vessels requiring Pratique fly International Code Signals 3 red lights at night. This signal to be exhibited until Pratique has bee granted by the Pilot or Port Health Officer.

Control of quarantinable and infectious diseases is direct responsibi of Port Health Officer. All passengers from infected local areas exce children under age of one year are required to have valid internatio certificate of vaccination or revaccination against yellow fever an cholera.

RADIO: All ships landing passengers are boarded by Assistant Po Health Officer unless Radio Pratique has been given. Pratique may b obtained by radio to Port Health Authorities no earlier than 12 hours an no later than 4 hours before arrival, in accordance with internatio procedure. All landing passengers medically inspected and vaccinatio certificates checked on board before Free Pratique granted. Ship having infectious diseases on board are also boarded; after examini the case and taking any necessary precautions the Assistant Port Heal Officer grants Restricted Pratique. Ships also inspected for issuing Der Exemption Certificates. Deratting carried out when necessary and der certificate issued.

Yemen Telecommunications Company: Mercury House, Ras Bora (Tel. 22223/5).

New Quay: New quay with length 750 m. and depth 11.0 m. for vessels up to 36,000 d.w.t. Two berths for container vessels and 2 berths for general cargo vessels. The quay will be equipped with 1×40 ton container crane and 6×6 ton semi-portal cranes.

Ro-Ro Terminal: Length 150 m., depth 7.6 m.

Home Trade Quay (H.T.Q.): 800 ft. long with depth of 6.7 m. Max. size of ships that can berth there are restricted to 122 m. LOA and max. draft 5.5 m.

Free zone. Initial Stage 525,420 sq. ft. open space and 162,000 sq. ft. covered space. Import and export industrial facilities. No restrictions, no taxes. Transhipment storage free for unlimited period.

STEVEDORES: ETA advice to Agent at least 48 hours before arrival.

MEDICAL: Advance notice for medical attention not normally required except for serious cases requiring doctor's attendance on board, or ambulance cases. Vaccination certificate required for landing. Hospital facilities available.

TANKERS: Tankers carrying dangerous petroleum (flash point below 73° F) and those not gas free or carrying more than 3 tons of category one cargo (explosives) cannot enter Aden Harbour during hours of darkness. They can enter Little Aden day or night. Slop (residue) discharge facilities available at Little Aden. 4 tanker berths for discharge/loading at Little Aden with max. datum depth of 40 ft.

Berthing at Oil Harbour: Functions of Oil Harbour Little Aden to receive crude oil in bulk for oil refinery and to export refined petroleum products. Vessels carrying cargo for refinery, other than oil, discharge at Inner Harbour.

Oil harbour has finger jetty and 2 T-head jetties which provide berths for 4 tankers. Tankers of up to 65,000 tons Summer deadweight with 55,000 tons of cargo can be accommodated.

Berth	*Type*	*Normal maximum length of ship* (ft.)	*Datum depth* (ft.)

Berth No. 4: Max. size 110,000 d.w.t. Max. LOA 264 m. Width of channel 220 m., depth 14.75 m. Depth alongside 15.85 m. Daylight berthing on flood tide. Daylight unberthing on suitable tides.

BALLAST: Notice: Port Authority require vessels arriving or sailing in ballast to have mean draft 50% of Summer draft and maximum trim of 6 ft. by stern. However, should the vessel have segregated ballast tanks then ballast condition must comply with regulation 13 of International Convention for Prevention of Pollution 1973, Protocol 1978. Total deballasting time allowed being 6 hours only. Vessels should have maximum possible ballast clean and capable of being pumped overboard. Dirty ballast and slops can be received ashore at maximum rate of 500 t.p.h.

Signed: Marine Superintendent.
Aden Refinery Company.

DENSITY: Salt water at all times.

FUEL:

(*a*) A.B.C. (4 berths).
Marine fuel 2500 sec., 1000 sec., 600 sec., 200 sec.
Diesel oil and gas oil.

(*b*) Yemen-Kuwait Terminal Co.
Marine fuel – all grades below 3,500 sec.
Diesel oil and gas oil.

All supplies done on a Nomination basis through the Company's Head Offices, with the vessel giving at least 48 hours' notice to Aden.

FRESH WATER: Ample available, delivered by barge in Aden at about 50 t.p.h. Ordinary water in Little Aden supplied by pipe-line at about 40 t.p.h. and condensate at about 2 t.p.h.

FIRE PRECAUTIONS: As per the Refinery regulations (International Standard). Tug wires to be rigged and check list to be furnished.

REPAIRS: Workshops are equipped to carry out: Boiler repairs; Plating and sheet metal work; Galvanising work/moulding work; Welding and blacksmith's work; Main and auxiliary machinery repairs; Carpentry and joinery work; Electrical and plumbing work; Refrigeration repairs; painting, cleaning and chipping. Repairs afloat to vessels up to 80,000 tons are undertaken; repairs to the largest vessels carried out mostly in Outer Harbour.

Radio engineering section with fully qualified personnel giving round-the-clock service of repairs and maintenance to radar and radio equipment.

During repairs, maintenance and painting – no rubbish to be thrown overboard, precautions to prevent pollution to be taken. No painting overside to be carried out without written permission from Port Authority. Chipping and/or scrapping overside strictly not permitted.

DRY DOCK: 1 sideways slipway taking 1,500 tons and floating dock lifting capacity 4,500 tons. Length 137 m., breadth 31 m. Max. draft 6.0 m.

GANGWAY/DECK WATCHMEN: It is recommended watchmen are employed; they can be supplied by Ship's Agent. Safety net to be rigged.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, derrick-topping by ship's crew. Vessels not to move in harbour with beams off.

CUSTOMS ALLOWANCES: Tobacco/Wine, Spirit allowance. No restriction at the moment. Bonded stores not allowed to be supplied more than 1 hour before ship sails.

REPATRIATION: Arranged through Ship's Agent and Immigration.

AIRPORT: About 5 miles from port. Flights to U.K. via Beirut (Middle East Airlines), Air France, Kuwait Airways, Air India, Ethiopian Airlines, Saudi Air and Alyemda also call.

TIME: GMT plus 3 hours. No alteration of clocks.

HOLIDAYS: Most holidays are religious which have movable dates. National holidays are 14th October and 30th November. Cargo work usually carried out during all holidays. Friday is a public weekend holiday.

POLICE/AMBULANCE/FIRE: Ambulance at Crater 53232; Harbour Police 22851; Port Health 22626/7; Fire 22222.

TELEPHONES: No connection to ships but link calls can be made on VHF through Yemen Communications using Channel 16 to call and working on Channel 26. Some Agents have private VHF Channels.

SHIP SUPPLY SERVICE: There are no firms specialised in this field in Yemen. However, the Yemen Ports Authority has a large fleet of tugs and launches at Aden, and will, in 1985, have 2 Voith Schneider propelled tugs, 1 fast pilot launch and 2 mooring launches at the newly constructed port of Mukalla-Khalf. These craft are available at all times for rendering assistance to sick persons on board ships in the vicinity of the ports and are also available for crew changes, mail and spare parts delivery.

As to helicopter services, the Yemen Army and Air Force make their helicopters available for rescue at sea whenever possible.

SHORE LEAVE: *Regulations:* In accordance with Art. 8 of the Immigration Rule No. 28 of the year 1969, all crew members coming ashore will be excused from obtaining visa provided they surrender their Passports to the Immigration Officer-in-Charge. These Passports will be given back to the holders before they return to their particular vessels. Any crew member unable to comply with these instructions will not be permitted to visit the town.

Ships' crew are not allowed to stay ashore after 0000 hrs.

REGULATIONS: Vessels must fly the National flag of Yemen at foremast. No movement of "dangerous petroleum" at night. Vessels must vacate oil berths on completion of bunkering. Main engines must not be immobilised in an oil berth. Sufficient crew must remain aboard vessel at all times to move her.

Ships carrying dangerous cargoes calling at Yemen Ports must inform the Port Authority concerned not less than 48 hours prior arrival. IMO Class 1 dangerous cargo to discharge at Outer Harbour Anchorage, if IMO Class 1 in transit vessel will manoeuvre during day time only.

Immobilisation of main engines should not be executed at any berth before obtaining written permission from Port Authority, through ship's Agent. Same procedure applies for overside hull painting. Application to be through ship's Agent in duplicate. Main engine immobilisation in oil berths and Home Trade Quay not allowed.

IDENTIFICATION CARDS: Shore pass to be carried at all times when ashore.

GENERAL: Outer harbour contains ample anchorage area for vessels requiring datum depths up to 54 ft. Inner harbour approached by 2.7 mile dog-leg channel, dredged to 38 ft., from Fairway Buoy in Outer Harbour where Pilots board. Inner harbour protected by breakwater at Steamer Point and by rubble mound. It provides 24 buoy or anchor-and-buoy berths, including 13 with oil bunkering facilities. Majority of these berths have a datum depth of 30 ft. or 38 ft., with max. length of ship ranging from 275 ft. to 750 ft. In addition 3 dolphin berths, with bunkering facilities, of 39 ft. datum depth and normally accommodating ships of 750 ft. – 900 ft. max. length; vessels of greater length can be accommodated with the approval of the Port Officer. Quays and wharves cater for shallower-draft vessels and lighters.

Oil harbour, serving refinery at Little Aden, reached by 38 ft. channel from Fairway Buoy, provides facilities for tankers of up to 750 ft. All berths and anchorages are under the jurisdiction of the Port Officer.

In order to facilitate berthing arrangements for ships calling at Aden, Masters are requested to furnish the Port Authority with the necessary information, such as, LOA, max. draft, g.r.t., type of ship, object of call, dangerous cargoes on board and IMO Classes, ETA and any other information Master thinks may be useful.

DEVELOPMENTS: Newly constructed alongside berths of 900 m. (excluding HTQ) are ready for berthing modern vessels:

2 Container berths (11 m. depth).
2 General cargo berths (11 m. depth).
1 Ro/Ro berth (7.6 m. depth).
1 Home trade quay (800 ft. long with 6.7 m. depth).

Procurement of new cargo – handling equipment:

1 Container gantry crane of 40 tons under spreader and 50 tons with hook.
2 Container handling forklifts of 45 tons each (operating August 1992).
4 Forklifts of 2.5 tons (diesel and electric).
6 Tractor units and 20 roll trailers and communications equipment.

Actual operations will start in August 1993.

The following will operate in the 2nd half of 1993:

3 Container forklift trucks of 35 tons under spreader.
12 Container forklift trucks of 12.5 tons.
5 Forklift trucks of 2.5 tons.
6 Terminal tractors.
12 Terminal chassis (semi-trailers).
Other terminal equipment plus workshop equipment and tools.

SHIPMASTER'S REPORT: 1976

Documents:

Pilot: Sights Ship's Register to check tonnages.
Customs: 2 Crew Lists; 1 Bond List.
Immigration: 2 Crew Lists.
Doctor: 1 Health Form; 1 Vaccination List.

Note: Crew List should have consecutive numbers as well as Agreement numbers.

Agents: 2 Crew Lists; Arrival information sheet; Statement of Owners full address also Cable address; 2 Arrival Declaration for Yemen Ports Authority; 2 Aden Port Log; 1 Charges sheet for Mail; 1 Sailing information sheet; 1 Currency refund sheet.

Agent brings these Forms on board and will assist with filling in the information.

Communications: It was found impossible to make Radio Contact with Aden prior to 5 days before arrival. Best time seems to be after Aden sends its Traffic List. VHF contact was made at 12 miles as the hills around Aden appear to blanket signals when further away. Channels 16, 13, 8 or 6.

Approach: This is straightforward. The B.A. Charts appear to be well up-to-date. The Fairway Buoy is easily seen at 8 miles. Pilot boards here. Pilot ladder required. Authorities will not allow the accommodation ladder to be used.

Mooring: There was a trainee Pilot with both inward and outward Pilot.

Ship was swung using starboard anchor and 1 tug aft. Berthed at No. 4 Berth. Forward: 3 ropes to buoy on inside plus starboard anchor 5 shackles. Aft: 1 rope from port quarter and 1 from starboard quarter taken to outside buoy, then 2 ropes, 1 from each quarter taken to inside buoy. Ship then hove to be centred between the 2 after mooring buoys. When ship in position oil pipe-line, on floats is towed alongside.

Visit: Agent boarded with Doctor. At first Doctor was insisting all had to have Cholera vaccinations but is not really necessary. Immigration and Customs boarded. All pleasant and helpful. Bond was sealed.

Port Facilities: 2 fairly powerful tugs. Numerous mooring boats, 1 floating crane seen but as to lift capacity this was not ascertained. Port is run by The Yemen Ports Corporation. Like the Agency it is State owned.

Watchmen: Agents automatically provide 2 watchmen, seem alert.

Regulations: Masters are requested to assist the Port Authority by not allowing Bumboatmen or fishermen to board without written permission. The Port Authority advises Masters to be most careful if they do issue written permission. There were no bumboats about and no one seeked permission to come aboard to do business.

One half hour prior to sailing the Pilot signal red-white-red in a vertical line or "G" to be hoisted also call Port Control on VHF 16.

Use of ship's whistles or sirens is very controlled.

Bunkering: Ship's crane used to hoist pipe-line aboard. The bunkering operation went smoothly and the Oil people seemed co-operative.

Walport Film Exchange: Agents were cabled but it is necessary for an Officer to go with the Agent to make the exchange.

Mail: Mail posted in London on 22nd March or 23rd March was stamped as having arrived Aden 28th or 29th March.

General: It would seem that the Port Authority, State, etc., are very keen to build up a thriving Port. It would also seem that they endeavour to give a good efficient service. I gather there is a special duty free shop ashore for the purchase of souvenirs, goods, etc.

SHIPMASTER'S REPORT: March 1985.

Documents: See "Fuel".

Pilotage: Harbour Control was called on VHF Channel 16 two ho before arrival and again 4 miles off the Fairway Buoy. Information gi from the Harbour Control regarding Pilot and berthing gave t impression of a well organised port. Night signal for a ship requi Pilot is following: vertical lights, red-white-red.

Radio: From one week before arrival, radio messages were sent t Aden Radio (7OA) to Aden and Ethiopia. Radio Officer told me th Aden Radio proved to be easy and efficient to work with.

Fuel: Bunkering commenced immediately on arrival even before sh cleared by the Authorities. Authorities came on board just befo departure to collect Crew Lists and Stores Lists. Crew's cabins were n searched and stores not sealed.

2 men from the Agents were on board to handle ship's matters.

Repatriation: 7 crew members were repatriated to Denmark, and 7 ne crew members joined. Tickets for those to be repatriated were broug from Denmark with the joining crew. Crew change went smoothly.

Notices: Yemen Ports Authority – Port of Aden:

Masters are requested to assist the Port Authorities in controlli bumboat traffic as follows:

Bumboatmen and fishermen selling fish *may not* board ships withou the written permission of the Master. Disregard of this rule renders th men liable to police action *after* the ship has left when evidence cann be obtained from the ship. Masters can greatly assist the Authorities they will ensure that they give written approval to bumboatmen an fishermen whom they have allowed to board the ship.

Port Officer, Aden.

To: All Masters of Vessels in Aden Port – From National Shippi Agency.

The undermentioned information is for your kind attention an guidance:

Immobilisation of Ship's Engines:

Please note that it is an offence to immobilise ship's engine WITHOUT written permission being obtained from the Yemen Por Authority. To avoid heavy penalty, Masters are advised to forward the requests to us in duplicate, as ship's Agents, and should NOT immobilis ship's engines unless they are in possession of the written permissio of the Yemen Ports Authority for the period approved.

Garbage Collections:

Appended below are extracts from Circular No. G/3/128 date 25th January, 1984, of the Port Officer and Director of Marine Affair Yemen Ports Authority, Aden:

(a) Collection and removal of garbage from vessels is entrusted t persons authorised and licensed by the Yemen Ports Authorit Aden, and who work on a rota system.
(b) It is compulsory for a vessel staying in the harbour for a perio exceeding 24 hours to avail itself of this service and fees will b collected per day **whether garbage has been collected or NOT**
(c) Similarly it is compulsory for garbage collectors to call on vesse allocated to them daily unless other arrangements have bee agreed with the Master of a ship. Any garbage collector who doe not call on vessel allocated to him daily without prior agreeme of the Master will not receive his fee that day if reported.

Note: Masters requiring special service for collection of extra garbag i.e., refuse/wastes, etc., emanating from the cargo holds/engine room etc., must put their written request in duplicate to us, as Agents, t arrange for the garbage collector to call on their vessel. The Maste should also notify us in writing the charges agreed upon for the ext garbage with the Collector. This does not apply to C.I.S. vessels wh are required to comply with the procedures below.

For Masters of C.I.S. Ships: Before applying for the collection of ext garbage, please first submit your written request in *4 copies* throug the Agent for *approval* of the Resident Representative for C.I.S. ships Please *do NOT* employ collection of the extra garbage before receivin this approval.

Scraping, Chipping and Painting in the Port:

Please note that as per instructions from Yemen Ports Authorit scraping, chipping and/or painting are *NOT ALLOWED* during vessel stay in the port, unless prior permission is obtained from the Port Office through us, as Agents. Any requests for the above must be forwarde to us in duplicate.

Shore Leave – Immigration Regulations:

All shore leave expires at 2300 hrs. and, therefore, all Masters, Ship Officers, crew and passengers should be on board by this time Overnight stay ashore is *not permitted*. Infringement of the above w be subjected to penalty and also delay to the ship.

Cash Advance to Master in Yemeni Dinars:

Cash advances required by Masters for payment to their crew in orde to enable the crew to avail themselves of purchases from *Tax Free Sho* require the following procedures to be complied with:

(a) Masters are required to render their requisitions in duplicate t the Agents during working hours together with 2 copies of Cre List.
(b) Either the Master or Chief Officer or Purser in person should hav the requisition attested, stamped and signed by the Custom Officer before handing them to National Shipping Co. (th Agents).
(c) Together with the cash to Master the Agents will issue Purchas Certificates on Tax Free Shop.
(d) After completion of the purchases and 24 hours before vessel i due to sail, the Master should obtain *Purchase Clearanc Certificate* from Tax Free Shop and hand it over to the Agent This is most essential as against these Certificates only and af reconciling with the actual cash advanced, the Agents can acce the balance cash refund from Master.

Under the Exchange Control Regulations, it is an offence *not* to retu the *UNUSED* Yemeni Dinars prior to sailing. Masters of vessels w received Cash Advance in Yemeni Dinars are advised to return A Yemeni Dinars remaining in their possession, to our representative w boards to clear the vessel, and ensure to obtain from him *on the spot* an official receipt of the National Shipping Company for the amount refunded, prior to departure of the vessel.

Victualling Allowance:

Free meals to Stevedores' Personnel/Watchmen.

Free meals are normally given by vessels by mutual arrangements between Masters and the Stevedores, to save time of the following persons who otherwise would have to go ashore for their meals:

One Tally Clerk per hatch working.
One Foreman.
One Cargo Supervisor.

It is left entirely to your discretion to supply free meals to the above mentioned personnel and the watchman or not. Kindly, therefore, note that we do *NOT* countersign or vouch expenditures.

Contacts on VHF: Masters of vessels can contact Agents on VHF (Channel 16) at any time during the *DAY* or *NIGHT* for any inquiries or services required. The Harbour Control also can be contacted on the same Channel.

Authorities: All in all the Port Organisation, Pilots, tugs and the Authorities gave us a good impression of the port.

AUTHORITY: Yemen Ports Authority, P.O. Box 1316, Tawahi, Aden, Yemen. *Tel:* 22666. *Telex:* 2278 Mawany Ad. *Cables:* Mawany. *Contact:* Mohamed Ahmed Ali, Director General.

HODEIDAH: 14.48 N. 42.55 E. (See Plan)

Also see "General" before first port.

FLAG: It is essential that from the time they enter Yemen territorial waters all vessels fly the Yemen flag and this should be flown continuously until they leave these waters on sailing. Failure to observe this courtesy may result in a heavy penalty. The design of the flag is red, white and black horizontal stripes of equal size with green star in centre of white stripe.

DOCUMENTS: On arrival 16 copies of Manifests of cargo for discharge are required and each must be endorsed with the word *Correct* by the *Customs Authorities* at the Port of Loading. It is imperative that at least 2 of the 16 copies of Manifests on board the ship should be freighted copies, otherwise 2 additional copies, showing freight details should be airmailed to Hodeidah separately to arrive in advance of the vessel. The Master should also be in possession of 1 copy of each Bill of Lading and certificate to show vessel is not blacklisted.

PILOTAGE: Pilotage is compulsory and as the entrance of the Channel giving access to the Port cannot be observed from the port area itself it is essential that accurate ETAs be given to the Agent in order to avoid delays waiting for a Pilot.

Vessels will be piloted down a dredged channel of about 8 miles in length. The channel, which is buoyed with black starboard and red port buoys, is 7.5 m. deep and 100 m. wide.

Pilot boarding position: Lat. 14° 56′ N., Long. 42° 54′ E.

ANCHORAGE: Masters are also recommended to ensure that on arrival they anchor off the entrance to the new port to await the Pilot and do not anchor off the old port opposite the town some 5 miles to the South and which is still shown as being the Port of Hodeidah on some charts. Vessels anchoring in the wrong area may suffer some delay before they can be contacted and asked to proceed to the correct area. Masters should be advised to anchor at the outer anchorage in the following position: Lat. 14° 55′ N., Long. 42° 54′ E. Also see "Shipmaster's Report - May 1982".

RESTRICTIONS: The approach channel is dredged to 9.5 m.

MAX. SIZE: Max. draft 31 ft. (September 1990). Also see "Shipmaster's Report", dated May 1982 and "Late Reports".

Shipmaster's Report: January 1985.

Entrance channel is buoyed differently to that shown on B.A. Chart (See "Plan"). Pilot suggests that max. draft at LW is approximately 8.0 m., especially if there is a swell at the entrance.

Report: We quote below text of a circular telex received from Ports and Marine Affairs Corporation, Hodeidah:

"The General Corporation of Yemen Ports hereby advise all Masters, Owners, Charterers and Agents that as of September 14th, 1990 all vessels with a draft of more than 31 ft. (9.45 m.) should not attempt to enter the dredged channel to the port of Hodeidah.

Vessels arriving during darkness should anchor to the West of the Fairway Buoy and await instructions.

Vessels arriving during daylight may have to anchor for a short period of time, but it is the intention of G.C.Y.P. to put a pilot onboard each ship at the first daylight high water and bring such vessels to the inner anchorage.

Under no circumstances should vessels attempt to enter the port without a pilot, except with the express permission of the Harbour Master".

HEALTH: All members of the crew must be vaccinated against yellow fever and cholera, otherwise permission will not be given to disembark.

RADIO: Masters should also ensure that a radio watch is kept to receive calls from the Port Authorities. The Hodeidah Radio Station is operative between 0600 and 1800 hrs. daily, the call sign is: 4WD or 4WD3 (short).

TUGS: 6 tugs, 375 h.p. – 1,800 h.p. Pilot launch 250 h.p. also available to assist.

BERTHING: The quay is 540 m. in length with 4 berths, the first 70 m. long, depth 6 m., the second, third and fourth are of 150 m. length and 8.5 m. depth. *Officially, ships berthing are restricted in length to 180 m.*

The quay is of concrete construction and is well founded, vessels being secured to bollards in the normal manner. Use of rat-guards is recommended. The quay is equipped with 7 electric cranes having a max. capacity of 5 tons and one crane having a max. capacity of 10 tons. Floating crane of 75 tons capacity available.

There is also a dolphin berth for discharging of petroleum products, which is connected by submarine pipes to storage tanks near the port area. The depth alongside is 6 m.

Also see "Report" and "Developments".

STEVEDORES: All labour is provided by Agent's representative including winchmen and tally clerks, but winchmen are provided entirely at ship's risk.

Rates of discharge vary but are quite satisfactory and with bagged cargo the average obtained is 30 tons per hatch per hour. Night work is possible.

Vessels are expected to supply food on board to cargo supervisors, foreman, and tally clerks. It may be left to Master's discretion whether this is supplied, but if not the Agency will have to supply same and the cost will be debited to the vessels.

Working Hours: Normally from 0600 hrs. to 1100 hrs. and again from 1300 hrs. to midnight. Additional work outside these hours, including after midnight can usually be arranged if necessary, although this cannot be guaranteed. Any work after midnight is overtime.

MEDICAL: Hospitals at Hodeidah and Sanaa-Taiz.

FRESH WATER: Available; pumping rate 10 t.p.h.– 15 t.p.h.

FUEL: Small quantities of diesel oil available from Yemen Petroleum.

CONSULS: (and Embassies):

Algeria
China
C.I.S.
Egypt
Germany
Ethiopia
France
Italy
Iraq
Korea
Kuwait
Lebanon
Libya
Saudi Arabia
Syria
United Kingdom
U.S.A.
Yugoslavia

REPAIRS: Light repairs can be carried out.

SURVEYORS: Lloyd's Agency available.

AIRPORT: Flights to Sanaa. Also flights from the new Hodeidah International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: Friday is the weekly day of rest, Sunday being a normal working day. There are also a number of Moslem holidays. Work is usually possible on such days but cannot be guaranteed. Holidays for special occasions are also liable to be declared at short notice. Friday if worked 50% and public holidays 100% surcharge. During the Moslem fast period of Ramadhan lasting about twenty nine days, which again varies from year to year, work is slower.

Also see "General" before first port.

SHORE LEAVE: Allowed. The Master should prepare a list of persons wishing to go ashore as Agent has to issue I.D. cards.

REGULATIONS: It is strictly forbidden for crew and passengers on board to take photographs while a vessel is in the harbour approaches or secured to the jetty in harbour.

Any vessel which permits oil and/or water to be discharged into the harbour will be liable to a minimum penalty of U.S. $500.

DEVELOPMENTS: A second container berth with length 300 m. and depth 11.0 m. and 1×40 ton container gantry crane has been completed.

Vacuators to be installed for grain handling, giving average daily discharge rate of 5,000 tonnes – 6,000 tonnes.

Also see "Report" below.

REPORT: August 1979 (Updated 1986).

Hodeidah Port is situated 5 km. away from the old town, built in 1961, the population of which is about 200,000. It was built on the Red Sea Coast, S.E. of Khour Ras Alkatheeb, 4 km. away from the town of Hodeidah.

Hodeidah port is built at a location safe from storms and strong winds. The port is under the administration of the Ministry of Public Works, managed by the Hodeidah Port General Corporation. It has a direct connection with the capital city of Yemen, Sana'a, by a modern highway and another connecting Taiz.

The official characteristics of the port are given as an external pool, 10 m. in depth, where ships can anchor. A channel, minimum 45 m. wide, about one km. long and 7.9 m. to 8.3 m. deep, enters into the inner pool. Maximum draft allowed is 25 ft. at HW. Buoy markings and signals for safe entry and departure are available The dimension of the inner pool is irregular, about 500 m.×400 m. Overall depth is 7.6 m. at LLW, except for 100 m. wide strip along the 300 m. berth where the depth is 8.5 m.

The port consists of a quay for loading and discharging and one special jetty for tankers. The total length of the quay is 570 m. forming 4 berths of 120 m., 150 m., 150 m. and 150 m. respectively. The quay can receive vessels up to 180 m. in length with a draft of 25 ft. at HW. The quay is equipped with 4 electric shore cranes of 5 tons maximum lifting capacity each and two mobile cranes each of 30 tons capacity.

Discharging speed for bagged cargo is between 250 tons and 300 tons per hatch per day. For general cargo the discharging speed is about 150 tons per hatch per day.

At present, there are 21,660 sq.m. of cargo storage floor space:

Shed No.	1	45 m.×60 m.	2,700 sq.m.
	2	96 m.×60 m.	5,760 sq.m.
	3	50 m.×60 m.	3,000 sq.m.
	4	50 m.×60 m.	3,000 sq.m.
	5	25 m.×60 m.	1,500 sq.m.
	6	45 m.×60 m.	2,700 sq.m.
	7	50 m.×60 m.	3,000 sq.m.

and several open storage yards for heavy machinery and equipment. There are fuel tanks with a storage capacity of 16,000 cu.m. connected to the oil jetty by means of a pipe-line system. A wireless station for communications, from ship to shore and vice versa, is also available.

Future Development: The development of Hodeidah Port includes:

1. Dredging:
   a. Deepening of the approach channel to 9.0 m. below MLW (Mean Low Water) with the provisions of a passing bay and deepening of the port basin to 9.0 m. below MLW. (Completed 1980).
   b. Deepening to a depth of 9.5 m. MLW alongside Berth No. 2 and No. 6 (completed).
   c. An area to the West of Berth No. 1 to a depth of 4.0 m. MLW.

Hodeidah Port has the following:

Berth No. 1, length 110 m., dredged to 8.0 m.
Berth No. 2, length 150 m., dredged to 9.5 m.
Berth No. 3, length 150 m., dredged to 9.5 m.
Berth No. 4, length 166 m., dredged to 10.0 m.
Berth No. 5, length 195 m., dredged to 10.0 m.
Berth No. 6, length 195 m., dredged to 10.0 m.
Oil berth for 15,000 d.w.t tankers dredged to 10 m.

2. Berth No. 6: 195 m. long berth with a 40 m. wide apron. (Completed 1982). Berth No. 6 is designed for container ships of: 22,500 d.w.t., length 204.0 m., breadth 31.0 m., draft 9.2 m., container capacity 1,522 units.

One container crane of 30.5 tons capacity is installed on Berth No. 6 and is able to load and unload between 30/40 containers per hour.

3. Slipway (completed 1981): 500 ton slipway next to the mechanical workshop. Slipway able to handle vessels 32 m. in length, 10 m. wide and 3.2 m. draft.

4. Paved Storage Areas (completed/available 1981): The concrete paving of open storage areas behind the 40 m. wide apron has approximately 80,000 sq. m.

5. Buildings and other services (completed/available 1981): Construction of service buildings include offices of the Port Corporation, Customs, Labour, First-aid with canteens, wash places and toilets.

6. Oil Terminal (completed/available 1981): 2 new breasting dolphins and 2 mooring buoys for handling tankers up to 15,000 d.w.t.

7. Floating Craft (completed/available 1981): A new 75 ton self-propelled floating crane has been provided.

8. Cargo Handling Equipment (completed/available 1981): 4 high level boom cranes, 1 port type mobile crane, 10 forklifts, 10 tonne trailers with tractors, 3 Ro/Ro tractors with goosenecks and Ro/Ro trailers.

9. Grain Silo Complex: The project under construction in Hodeidah port consists of a 20,000 ton Silo and a 14 stall bagging plant which has a bagging capacity of 200 per hour. The whole installation has a through put of 160,000 tons per year.

10. Water Mains (completed 1982): Extended to Berth No. 6 and fire mains will be from sea water and maintained with a 70 m. head by hydraulic accumulator.

Special Uses:

Berth No. 4 – grain unloading (40% berth occupancy).
Berth No. 6 – containers (with 30.5 ton container crane).

Container capacity will exceed 300,000 tons per year but will depend on the capability to empty containers and create an equivalent to that of the shipping.

Cargo must be carried by ships with a draft less than 9.2 m.

Arrival at Hodeidah/Ras Alkatheeb Ports:

Vessels arriving at Hodeidah Roads should anchor in the following positions inside Buoy No. 2.

Lat. 14° 55′ 58″ N., Long. 42° 53′ 53″ E.

Masters should radio or cable Agent the following information at least 24 hours in advance:

(i) Exact ETA.
(ii) Draft – fore and aft.
(iii) Quantity of cargo on board and distribution.
(iv) GRT, NRT and LOA (When vessel is calling for the first time).

Through Hodeidah Radio Station, Calling Sign: 4WD 500 kHz. (Frequency from 0500 hrs. up to 1700 hrs. GMT). 72 and 48 hours prior notice of arrival can also be given through Aden Radio.

Pilotage on entry and departure is compulsory. Normally, no pilotage is allowed after 1630 hrs., or before 0600 hrs. Hence vessels arriving in Hodeidah Roads after 1630 hrs. may not be piloted in until 0700 hrs. the following morning. Likewise, vessels which do not sail before 1630 hrs. may not be piloted out until 0600 hrs. the following day.

Supply of fresh water and shipchandlering is available.

Documents:

4 copies of Cargo Manifest.
2 copies of Freight Manifest.
1 copy of Bill of Lading.
(These should be airmailed to Agent after departure of vessel from port of loading.)
11 copies of Cargo Manifest.
1 copy of Freight Manifest.
(To be handed over to Agent by Master on arrival of vessel.)

Port Formalities:

1. Doctor.
2. Immigration.
3. Customs.

FOLLOWING TO BE STRONGLY OBSERVED BY ALL MASTER/CREWS OF VESSELS CALLING AT HODEIDAH:

1. Sale of wines and spirits prohibited.

2. Discharging water onto quay and dismantling ships' engines at berth not allowed.

In addition to above, Masters/Crews should be advised to take serious note of all prohibitions stipulated in the Port Tariff, see "General" before first port – "Fines".

SHIPMASTER'S REPORT: May 1982.

I came in and berthed at No. 6 Berth at 8.5 m. draft and discharged via vacuvators direct into lorries and managing a rate of 3,000 t.p.d. Pilot reckoned 29 ft. maximum can be taken in.

Other points in "Guide" seem accurate, but with the Chart B.A. 3050 being too small I cannot see many Masters bringing a large ship into the recommended anchorage position. I anchored 3 cables N.N.E. of the No. 2 Buoy in better water.

PURSER'S REPORT: August 1982.

Requirements:

1 Maritime Declaration of Health. (Any country's (preferably Arab accepted suitably amended).
1 Vaccination List (ship's form).
10 Crew Lists (ship's form).
2 Bonded Stores Lists (ship's form).
1 Crew Effects List (ship's form).

Sundry Customs and Agent's forms were brought aboard on arriv These required the usual information regarding draft, fuel, water, a tonnages, etc.

Customs and Port Authorities were very particular that cargo tonnage were accurate as per Manifest when completing forms.

Customs sealed both bond and beer rooms, but placed no restrictio on quantities in bars and cabins with the proviso that alcohol was n sold or given to locals. An additional quantity of bonded items wa allowed to be removed before sailing.

Courtesy Ensign: Supplied in the U.S.A. and not marked to show whi was top. It should be flown with the red stripe uppermost.

Mail: The Agent advised that mail both in and out of the country wa slow and unreliable.

Laundry and Chandlery: Both services available but not used.

Navigation: The Master advises that navigational marks could we change due to berth extensions and port improvements. A contai crane is at present under construction.

SHIPMASTER'S REPORT: April 1984.

Pilotage: Ships can enter or sail out of harbour at anytime, if Age makes strong request. All the buoys in the channel as well as th approaches including the Sea Buoy are lit.

Berthing: Observed a ship entering with 30 ft. draft and Pilot confirme that vessels can enter up to 30 ft. draft.

Stevedores: Bagged cargo discharging rate increased to up to 30 t.p provided that receivers are able to supply sufficient trucks in time.

The stevedores no longer request drinking water from the ship, a they drink bottled water supplied from shore.

SHIPMASTER'S REPORT: April 1990.

1. There is no Fairway Buoy (Fairway Buoy is indicated on B.A. Cha No. 1990).
2. There is no Buoy No. 2 (Port Authorities instructed vessel to ancho inside Buoy No. 2 in Lat. 14° 55′ 44″ N., Long. 42° 53′ 42″ E. f registration).
3. Authorities/Agent instructed vessel to anchor by Buoy No. 2, b this was unsafe as the depth is 7.7 m.
4. Due to shallow water in anchorage position (inside Buoy No. 2 2 vessels collided when one of them was trying to anchor.
5. A vessel anchored in the position indicated and ran aground.
6. Our vessel, which berthed port side to at Berth No. 4, grounde forward with a draft of 32 ft. 5 in.
7. The maximum depth in the anchorage position, which was checked was 9.8 m., 3 hours after high water.
8. No ship's certificates were requested by the Port Authorities or th Agent on arrival.
9. No written permission given by Port Authorities for painting ship load line or for boat drill.
10. Two crew members required cholera vaccinations, but these we not done.
11. A vessel was given verbal permission to paint ship's marks, a after painting was fined U.S.$ 3,000.00.
12. The Master of a vessel was jailed for refusing to instruct his crew to discharge bulk cement from the hold, which were the remains bags torn by the stevedores.
13. The cook on a vessel was shot by the gangway watchman, f refusing to prepare him food at 2300 hrs.
14. The Port Authority/Agent debited the vessel for one or two shor cranes daily, even though the shore cranes were not working.
15. The evacuator for discharging bulk wheat was damaged by th stevedores, due to bad handling, and the vessel was delaye 32 hours, until a bank guarantee of U.S.$ 200,000.00 was give (actual cost of damage was about U.S.$ 5,000.00).
16. Attention of all Masters and Owners is drawn to the permissab arrival draft which is 32 ft. (salt water). For every inch over 32 the vessel is fined U.S.$ 3,000.00.
17. This vessel was penalised for 5 inches, and had to pay a fine U.S.$ 18,000.00 without official receipt from the Port Authorities.
18. For further fines and restrictions, please see "General" before fi port – "Notice".

AUTHORITY: Ports and Marine Affairs Corporation, P.O.Box 318 Hodeidah, Yemen. *Telex:* 5565 Mawani Ye. *Contact:* Captain Ali H Elhabory, Chairman, Captain Ali H. Sharaf, Director-General, Capta Abdullah A. Rajab, Harbour Master.

AGENT: The Hodeidah Shipping & Transport Co. Ltd., P.O.Box 333 Hodeidah, Yemen. Tel: 2403/4/5. Cables: "Hodship". Telex: 55 (Hodeidah) and 2218 (Sana'a). Answerback: "Hodship". Branches Mocha, Saleef, Taiz and Sana'a.

MOCKA: 13.17 N. 43.10 E.

Also see "General" before first port.

Mocka New Port opened in June 1979, with equipment for loading and unloading.

TUGS: 2 available.
BERTHING: 350 m. of quay for vessels of up to 26 ft. draft (Depth 27 ft). Vessels may berth simultaneously. Cargo is discharged direct onto trucks or onto open area. New sheds are under construction.
CRANES: 1×18 ton mobile crane.
FUEL: Not available.
TIME: GMT plus 3 hrs.
REPORT: August 1979 (Updated 1986).

The project of constructing Mocka Port has been in execution since April 1978. The construction was completed during April 1979 and the port was officially opened to International traffic in June 1979.
Location: Mocka is connected to Hodeidah by a road of 240 km. out of which 45 km. is asphalt surfaced. Mocka is also connected to the twin capital of the Republic, Taiz, by a road of 110 km.
Jetty: The port consists of a jetty of 150 m. in length and 35 m. wide with a draft of 8.5 m. during low tide. This jetty can accommodate 2 vessels at a time, each of 150 m. length, on both sides and a Ro/Ro vessel at the head. A protecting jetty for breakwaters is also constructed for controlling the force of strong waves. It is 750 m. in length and 15 m. wide with various depths from 5 m. to 3.5 m. This jetty is constructed for the purpose of protecting the main jetty and can receive coasters and lighters of aforesaid drafts.
Anchorage: The dimension of the manoeuvring area, for vessels securing at berth and departing from the main jetty, is 420 m. The length of the channel leading to the manoeuvring area is 2,000 m. with a draft of 28 ft. 5 in. during low tide, whereas the draft during high tide is about 30 ft. Vessels calling at Mocka should anchor at the following position: Lat. 13° 20′ 01″ N., Long. 43° 13′ 02″ E.
Storage of Cargo: The reclaimed area for storage of discharged goods consists of 300,000 sq.m. 4 storage sheds (60 m.×50 m.).
Future Developments: There are plans for building other jetties together with protecting jetties in the near future.
Bunkers: Bunkers, at present, are not available at this port. Any vessel calling at this port is required to supply fresh water for drinking purposes to all labourers during stevedoring operations.
Radio: Vessels calling at Mocka are advised to contact Agent through Hodeidah Radio Station, call sign, 4WD, 500 kHz (frequency from 0500 hrs. up to 1700 hrs. GMT), as, at present, this port is not equipped with a wireless station. It is proposed to establish one during 1979.

SHIPMASTER'S REPORT: August 1980.
Vessel: 6,000 d.w.t., 104.0 m. LOA. Discharged 2,000 tons of RBD palm oil.
Port Limits: None defined, however vessel is in port limits and 'arrived' once anchored within the anchorage marked on B.A. Chart 1955.
Documents: 1 copy Personal Effects Declaration, 1 copy Stores List, 1 copy Inoculations and Vaccinations and at least 10 copies of Cargo Manifests, 3 copies of Crew List.
Anchorages: Vessel anchored safely in a position with the North Fort Barge 103° True −1.74 miles. Vessel's max. draft was 20 ft. and there was 30 ft. of water below the keel at 1 hour before low water. It is inadvisable to proceed further South, especially at night due to the placing of unlit channel marking buoys by the port.
Pilotage: There are presently two berths, one on either side of a finger wharf. The Pilot boards at the anchorage and brings the ship alongside one of these berths. There are 3 Pilots in Hodeidah and 1 in Mocka.
Max. Size and Restrictions: Max. permissible draft is 26 ft. salt water and max. LOA permissible is 500 ft.
Radio: None. The port operates VHF on Channels 16 and 14. There are no fixed hours and the port radio is in operation only when the port wishes to communicate with the vessels.
Radar: None.
Tugs: 2 tugs assist vessels for berthing and unberthing. We were assisted by the 'Markaron' (2,000 h.p.).
Cranes: None. There are mobile cranes available with the prior arrangements of the ship's Agents. Otherwise ship's gear is mainly used.
Stevedores: None in the strictest sense. Labour is recruited by the Agents and made available on board.
Tankers: There is no facility for discharging petroleum cargo.
Density: 1025.
Fresh Water/Fuel: Not available.
Fire Precautions: None.
Consuls: None.
Repairs: Not available.
Dry Docks: None.
Surveyors: None.
Watchmen: None.
Customs Allowances: Bonded stores are not sealed. Master is verbally informed not to make any issue from the bonded stores without the Customs permission. All officers and crew who declared their quota were allowed to keep same.
Repatriation: Possible, but local Agent has no knowledge of how to effect it.
Airport: None.
Time: GMT plus 3 hours.
Shore Leave: Allowed. The town is situated about 4 km. from the jetty. There is no entertainment that seamen can find in this town and it is not advisable to be ashore after dusk.
ID Cards: None are issued but ship's personnel going ashore have to carry their Seaman's Book or Passport.
AUTHORITY: Ports and Marine Affairs Corporation, Hodeidah, Yemen.
Contact: Abdelkader Abyadh, Manager of Mocka Port.
AGENT: See "Hodeidah".

MUKALLA (Khalf): 14.31 N. 49.09 E. (See Plan)

SHIPMASTER'S REPORT: August 1984. (Updated 1989).

PORT LIMITS: See "Gulf of Aden Pilot" (No. 64).
DOCUMENTS: See "Aden".
APPROACHES: The lighthouse is visible at 18 miles.
PILOTAGE: Compulsory for all vessels proceeding to and from the Port of Khalf. Call Pilot on VHF Channel 16. Vessels to display international signals day and night.
ANCHORAGES: Pilot Book as mentioned above gives sufficient information. A good practice during July each year (when S.W. monsoon is at its strongest) is to drop a second anchor in the morning and to heave it home again at about 1900 hrs. To keep second anchor out during the whole time of port stay is inadvisable as direction of turning on wind/tide is unpredictable and thus might end up with chains fouled.
RESTRICTIONS: Entering/leaving:

Anchorage: None.

New Port: Daytime only. During S.W. monsoon only between 0600 hrs. and 1100 hrs. and max. LOA 75 m.
MAX. SIZE: Ship's normally accommodated at Khalf Port up to 145 m., drawing max. draft of 8.5 m. Larger ships could be accepted if permission granted in advance by the Port Authority.
HEALTH: As ship arrived from Aden, no formalities whatsoever.
RADIO: All communication before arrival/after departure Aden and Mukalla via Aden Radio (70A). This radio station is working satisfactorily.

Once in port (either at anchorage or alongside) it is forbidden to use ship's radio and/or telex.

Sending cables/telexes via the Agency is time-consuming.
TUGS: At least 1 tug, and probably 2 when port is open for shipping.
BERTHING: 2 alongside berths for up to 10,000 Summer d.w.t. 3 alongside berths for coasters, depth up to 5.0 m.
CRANES: 14 mobile cranes, 3 – 10 tons capacity.
STEVEDORES: Work throughout 24 hours.
MEDICAL: Local hospital available but only a few facilities.
DENSITY: 1026.
FRESH WATER: Will be available in 1989.
FUEL: Will be available in 1989.
REPAIRS: Not available.
CONSULS: None.
SURVEYORS: Available.
FRESH PROVISIONS: Not available.
GANGWAY/DECK WATCHMEN: Not required, no reports of pilferage of cargo and/or ship's stores.
HATCHES: Once open, not necessary to close again except for sailing. Climate: Warm/humid but no rainfall.
CUSTOMS ALLOWANCES: Bonded stores were sealed on arrival, no specific rules, no search parties of Customs.

On departure: No check of seals.
REPATRIATION: *Crew Change:*

Out-going: Via Mukalla Airport to Aden (6 times a week except Fridays) then either via Jeddah or Dubai/Kuwait to ultimate destination.

In-coming: Very difficult as visa required and not easy to obtain.
Note: Flights Mukalla-Aden and vice-versa may differ from printed timetables.
AIRPORT: Located at Rayan, 29 km. East of Mukalla.
BANKS: National Bank of Yemen. Local currency: Dinar.

On presentation of passport-receipt, U.S.$ (and only this currency) can be exchanged for Dinars (approximately U.S.$3 for 1 Dinar).

It is very difficult to obtain U.S. dollars in exchange for Dinars.
STORES: Not available.
SHIP SUPPLY SERVICE: See "Aden".
SHORE LEAVE: In Mukalla (as well as in Aden) when passing Customs Gate, Passport is exchanged for receipt by the Immigration Officer on duty. When returning from shore leave this receipt is again exchanged for Passport.
Note: It is difficult to make Officials understand that crew members and/or visitors from abroad are not in possession of a receipt, which makes a crew change extra time consuming (Charterer had to wait 3 hours before he was allowed to proceed to the ship).
DELAYS: At present congestion may occur during the S.W. Monsoon period.

In future congestion may occur as infrastructure of the new port leaves much to be desired (Roads to/in/from the port, direct delivery etc.).
GENERAL: *Transit Time Airmail Post:*

Mukalla-Europe: Minimum 2 weeks, maximum 3 weeks.

Europe-Mukalla: Minimum 2 weeks, maximum 3 weeks.
Agency: National Shipping Co., P.O.Box 8039, Mukalla, Yemen. Cables: "Natship Mukalla" (via Aden Radio).
Importer: National Company for Home Trade, 5th Government Branch, Mukalla.

SHIPMASTER'S REPORT: April 1985.

PORT LIMITS: The port limits extend in a 270° direction from Ras Marbat for 2.5 miles, thence 000° along Long. 49° 07′ E. to the coast.
APPROACHES: Charts B.A. 3784 and 10.

Prominent terrain affords reasonable radar positions. Careful consideration should be given to night-time arrival if without radar due to the total absence of navigational aids at both the port and adjacent coastlines. The white house at Point Ras Marbat and the 4 tower ruins above the town are charted and conspicuous from seaward.
PILOTAGE: Pilot boards from launch, off the breakwater.
ANCHORAGE: For vessels over 10,000 d.w.t. all cargo is handled at the anchorage which may be closed from May to October due to its exposure to the S.W. Monsoon. Holding ground is reported to be variable. Reasonable anchorage obtained in 27 fathoms in position Lat. 14° 30.8′ N., Long. 49° 08.3′ E. approximately 5 cables due South of rocky projection on which part of town is built. Requests will be made to anchor closer to the shore to reduce barge transit time.

RESTRICTIONS: Berthing during daylight hours only.
MAX. SIZE: Max. size 10,000 d.w.t. Max. draft 8.5 m.
VHF: Channel 16 for Port Authority, call sign "Mukalla Harbour Master".

Agent can be contacted by calling Mukalla Harbour Office on Channel 16.
TUGS: One Voith Schneider tug of 2,000 h.p. Reportedly to be replaced by 2×1,000 b.h.p. tugs shortly.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
No. 1	177.25	9.15
No. 2	184.00	9.15
Fisheries	160.00	4.50

Turning Basin: Width 250 m. Depth 10 m.
Harbour Entrance: Approx. width 200 m. Depth 11 m.
Lighters: 4×200 tonnes, 4×60 tonnes and 2×400 tonnes, all plus or minus 10% subject to swell conditions. Lighters are discharged either at Khalf Harbour or at town quay located on West side of town, rocky projection in position Lat. 14° 31.5′ N., Long. 49° 08.2′ E. Town quay is restricted in size and served by mobile cranes.
Stevedores: Labour is available 6 days a week, Saturday to Thursday inclusive.

Morning shift: 0700 – 1230 hrs. Afternoon Shift: 1300 until lighters are full.

The afternoon shift is unpredictable and subject to lighters being available.
Medical: Local hospital affords basic medical requirements.
Fresh Water: Not available.
Fuel: Not available.
Shore Leave: Restricted by curfew to between 0800 – 1200 hrs. and 1600 – 1900 hrs. All persons going ashore are required to exchange Passport for local pass at Immigration.
GENERAL:
Harbour: Khalf Harbour, recently completed and as yet uncharted (see "Plan") provides 2 commercial jetties and a fisheries jetty.
Swell: Reportedly maximum 20 cm. in S.W. Monsoon.
Provisions: None available with the exception of individual purchases of fruit or poor quality vegetables available from market stalls ashore. Fishing good from ship's rail and crayfish, etc. obtainable from local fishing boats.
Launch: By prior arrangement with Agent only. Special dispensation can be obtained from Harbour Master to utilise ship's lifeboat. Barges can be used if other arrangements do not materialise.
Communications: By cable only. Telephone system is reported to be unreliable.
Port Officials: Immigration and Customs Officials board on arrival. Passports or Seaman's Cards are sighted. Bond Locker and Beer Room sealed but sufficient released for shipboard consumption.

Usual port papers required.
Agency: The National Shipping Co., Mukalla, Yemen. Cables: "Natship, Mukalla". Telex: None, but reported to be planned.

DEVELOPMENTS: The second stage development of Khalf Harbour will include:

Ancillary buildings, administration offices, workshop, transit sheds, surfacing and drainage, water and bunkering facilities will be made available.
AUTHORITY: Yemen Ports Authority. *Contact:* Ahmed M. Basaleem, Port Manager. Captain Salem Awad Saleh, Assistant Harbour Master.

NISHTUN: 15.50 N. 52.12 E. (See Plan)

DOCUMENTS: See "Aden".
PILOTAGE: Compulsory. Manoeuvring during day time only. There is a lighthouse, range 28 miles, flashing 10 sec. in position Lat. 15° 49.0′ N., Long. 52° 12′ E. Also the breakwater tower has a flashing green light.
ANCHORAGES: Ships waiting for berthing normally anchor 4 – 5 cables S.E. of the breakwater tower and clear of the harbour entrance.
MAX. SIZE: Maximum size of ship that can be accommodated is up to 3,000 d.w.t., 90 m. LOA and 5.0 m. draft. For ships over such size special permission should be obtained from Port Officer and Director of Marine Affairs.
VHF: Vessels approaching Port of Nishtun can communicate with Port Authority by using Channel 16 for calling during official working hours 0700 – 1400 hrs. (local time).
BERTHING: Length of quay 220 m.
CRANES: 2×3 tons – 17.5 tons mobile cranes.
MEDICAL: Limited facilities available.
FRESH WATER: Available in small quantities.
FUEL: Not available.
AIRPORT: Located at Al-Gaidah, 40 km. to the East of Nishtun.
WEATHER: *Monsoon:* During S.W. Monsoon waves may break over breakwater. Swell is created in basin so extra precautions by ships' Masters regarding mooring and securing the ship against the quay are required and extra ropes or wires are necessary.
AUTHORITY: Yemen Ports Authority (See "Aden").

RAS ALKATHEEB: 14.55 N. 42.53 E.

Also see "General" before first port.

The Port of Ras Alkatheeb is situated 14 km. from the main c Hodeidah and connected by a gravel road which is in the proces being resurfaced and broadened with two traffic lanes on the sa alignment, thus providing a first class road transport link betw Hodeidah and Ras Alkatheeb. Also see "Hodeidah".
BERTHING: The port has a berth 270 m. in length and 27 m. w pontoon type, with ships berthing on either side. This port can rece vessels with a max. draft of 26 ft. at high tide. Vessels can be secu to barges and coasters with a draft of 14 ft. which can be connecte the shore, thus enabling ships to discharge directly onto waiting truc Said pontoon is mainly used for bagged cargo on direct delivery ba

Presently, this port does not have shore crane facilities and unloading is done with ship's own gear.
Storage and Delivery: Due to lack of storage facilities at this port, deliv at present, is given directly under the hook.
GENERAL: The port is not a commercial port.

SHIPMASTER'S REPORT: November 1980.
1. Port does not accept Vessel's Registration until vessel is ancho between Buoy No. 1 and No. 2. This as per the Port Radio VHF stat
2. Buoy No. 2 is placed about 6 cables N.N.W. of charted positio
3. Do not attempt entry at night since buoys are unlit and there a many uncharted stranded wrecks visible only during daytime.
4. Tugs available: 4×700 b.h.p. and 3×1,800 b.h.p. Pilotage o during daytime.
5. Vessel berthed at Ras Khatib pontoon. Max. draft 8.0 m., t effective length of pontoon 270 m.
6. Port issues a directive to Agents giving estimated time to dischar If not completed, port charges at the rate of 4 Rials/per metre/per ho of stay extended.
7. Distance from Ras Khatib berth to town 15 km. Only 10 to 15 sho leave passes given to vessel, regardless of number of crew.
8. No chipping and scraping permitted but painting is allowed.
9. Fresh water inside port is $4/– per ton, at Ras Khatib $20/– per t by barge.
10. Provisions available but expensive.
11. Repatriation possible but very difficult due to having to obta permission from Saana.
12. Cargo work is fast, 260 tonnes of cement per gang per day. Norm shift 0730 – 1200 hrs. and 1500 – 2330 hrs.
13. As per "Pilot", there will be dredging carried out soon and a lighted buoys will be placed.
14. Ras Khatib light Fl. 3 sec. of very low power.
15. Yellow fever inoculation not compulsory unless coming fro infected area.

RAS ISA MARINE TERMINAL: 15.08 N. 42.36 E. (See Pla

LOCATION: The geographical location of the Ras Isa Marine Termin "FSO Safer", is Lat. 15° 07′ N., Long. 42° 36′ E.

Ras Isa Terminal is an Offshore Loading Terminal, located in t Yemen Republic at the Southern end of the Red Sea, East of the Zub Islands, and a little North of the port of Hodeidah. The Terminal conc of the purpose-converted Floating Storage and Offloading (FSO) Vess "Safer". This vessel is 409,000 metric d.w.t., and continuously receiv crude oil production from a pipeline on the seabed via an anchor fixed-turret mooring. The sub-sea pipeline to shore runs 4.8 miles to t N.E. at Ras Isa Peninsula. The Terminal is operated by Yemen H Oil Company (YHOC).
DOCUMENTS: At present only 2 Crew Lists are required.
PILOTAGE: The pilot boarding area for the Ras Isa Marine Terminal 2 miles Southward of the storage tanker, or boarding will be anchorage as appropriate.

The Pilot will remain on board throughout the export tanker vess stay on the berth; therefore, suitable and adequate accommodation sh be provided for him on board the export vessel.
Arrival at Pilot Station/Anchorage: Means of access to the vessel by t Mooring Master shall be provided in accordance with the requiremen of SOLAS, and early advice will be given by Ras Isa Marine Termin that access should be provided. At night, the access area shall b adequately illuminated to provide for the approach and boarding of t Mooring Master, Agent, Cargo Surveyor and YHOC Representativ The condition of entry into and use of Ras Isa Marine Terminal, a agreement for the hiring of tugs will be presented to the Master of t export tanker, and shall be signed by him on behalf of himself, the vess and its Owners prior to departure from the pilot station/anchorage a commencement of berthing operations.

Usually the tugs and Berthing Master are automatically arrang through the export tanker's port Agent and YHOC, when export tank is scheduled to berth.

Notice of Readiness is only signed for receipt by YHO Representative. In no event shall a Notice of Readiness be vali binding on the Terminal, unless and until such time as the export vess her tanks and equipment are, in fact, in every respect whatsoever, the proper condition and operation to receive the cargo. Export tank provided with a suitable landing area can be boarded by helicopter.
MAX. SIZE: Maximum size of 307,000 d.w.t. tonnes is permitted at t "FSO Safer". Partially loaded tankers acceptable. Average water de is 38.0 m.

ANCHORAGES: Should it be necessary to anchor, then the vessel should proceed to the recommended tanker anchorage area defined by the following coordinates:

Lat. 15° 05′ N.,	Long. 42° 32′ E.
Lat. 15° 03′ N.,	Long. 42° 32′ E.
Lat. 15° 05′ N.,	Long. 42° 36′ E.
Lat. 15° 03′ N.,	Long. 42° 36′ E.

RESTRICTIONS: No restrictions for berthing day or night when port is open.

Strong Winds: When mean speeds exceed 30 knots on the Marine Terminal anemometer, ships will, depending on the wind direction and general weather synopsis, be alerted that cargo/deballasting operations may have to be suspended and hoses disconnected. The Terminal has the responsibility of determining when wind conditions are reaching the limit of the design criteria for continued operations.

HEALTH: At present no Declaration required.

RADIO: *Communications:* On receipt of instructions to proceed to Ras Isa Marine Terminal, then 72 hours, 48 hours and 24 hours prior, advise ETA and other details as listed in the Ras Isa Marine Terminal Regulations and in a standard telex sent by the Terminal to the vessel.

If vessel is scheduled to berth on arrival, be sure to advise the Terminal of any change in ETA to avoid excessive stand-by charges for the tugs.

Hodeidah Port Authority must be advised as mentioned above at Hodeidah Telex: 5565 Mawani, and via Hodeidah Radio (4WD) in addition to any telex contact, as they advise the Yemen Military Authorities, who maintain a radar watch on all vessels entering and leaving Yemen waters.

YHOC Marine, Hodeidah:

YHOC, Sana'a:
Telephone: 967-1-216080, Ext. 643 or 218.
Telex: 4013 YHOC YE.
Fax: 967-1-216079.
FSO Safer – Ras Isa Marine Terminal:
Telephone: 967-1-215725, Ext. 380.
Telex: Inmarsat Atlantic 1473102 SAFA X.
Fax: 967-1-215725, Ext. 564 via operator.
VHF: Terminal Channel 74.
Tugs Channel 74.

VHF: *Export Tanker/Terminal Communication:* When the export tanker is at anchorage, communications between the storage tanker and the export tanker will be established on Channel 74.

Anchorage/Mooring Master Boarding Area: When within VHF communication range, Masters of export tankers should ascertain berthing prospects from the Terminal.

TUGS: Two suitable tugs are ready for each lifting, and are for export tanker account.

BERTHING: *Alongside Mooring/Unmooring Arrangements:* Should the export tanker be moored alongside, mooring will be on the starboard side of the "FSO Safer", according to following standard mooring plan: 4 headlines, 2 forward breast lines, 2 forward springs, 2 aft springs, 2 aft breast lines, 4 sternlines. Fendering between the two vessels consists of 5 large fenders.

For mooring/unmooring operations, the service of two tugs will be necessary. Export vessels should provide either synthetic mooring lines or mooring wires with synthetic tails. Synthetic ropes should be stored on drums or wrapping drums. Masters of export tankers are to be advised that the actual requirement of the mooring system may be subject to variation from time to time, depending on the environmental condition.

Tandem Mooring/Unmooring Arrangements: "FSO Safer" is also equipped with a Tandem Mooring System, which will be used if the weather conditions do not allow an alongside mooring, particularly in Winter time. The export tanker has to be equipped with a chain stopper on the bow, and shall be in overall conformity with the OCIMF "Standards for Equipment Employed in the Mooring of Ship's at Single Point Mooring", latest edition. The Terminal mooring hawser and chain arrangement does not allow for mooring with snotters nor with Smit Bracket, only an export tanker equipped with chain stoppers (OCIMF B 3 in. U3 chafing chain). The Terminal is permanently equipped with a floating 20 in. hose with 2×16 in. tails. Before any tandem mooring attempt, there should be a meeting between export tanker and Terminal personnel to establish procedures, responsibilities and supervisory roles. Refer to Ras Isa Marine Terminal Regulations for further information.

LOADING: *Transfer Operations:* The "FSO Safer" is equipped with 4×16 in. transfer hoses with a maximum loading rate of 100,000 bbls./hr. for alongside loading, and 1×20 in. transfer hose with 2×16 in. tails for tandem loading. At all times during the transfer operation, a responsible deck officer shall be in charge of operations, either on deck or in the control room. On vessels with a central control room from which all operations are controlled, a deck watch in contact with the control room is required to continuously patrol the cargo deck, and monitor the manifold area of the export vessel. At any time during the transfer operation, the rate can be reduced as requested by the Master or responsible officer of the export tanker. Early Departure Procedures are normally practised at the "FSO Safer".

The official quantity and quality of the crude oil delivered to the export tanker shall be determined by the Terminal, and shall be final and binding on the export tanker and her Owners and Charterers.

Hose Handling: Hose connection/disconnection will be carried out by the export tanker's crew, who at all times will be under the control of responsible deck officers. The export tanker will be required to have ready a derrick with a minimum SWL of 15 tons at the port manifold area for the handling of the Terminal hoses. For further information refer to Ras Isa Terminal Regulations.

Cargo Information: Oil loaded at Ras Isa Terminal is Marib Light Crude with an average API gravity of about 43°/44°. The loading temperature will vary from 85°F in the Winter to 100°F in the Summer months.

Deballasting Operations: "FSO Safer" has no ballast reception nor slop disposal facilities, and therefore, export vessels are required to arrive with clean ballast suitable for pumping directly to the sea. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or will be required to keep that portion of their ballast unsuitable for discharge to the sea segregated on board. YHOC will not accept any claims from vessels unable to meet such requirements.

It is strictly against the law to pollute the waters of Yemen. Any Master, and his vessel's Owners, may be subject to prosecution by the Yemen Republic, if such pollution does occur.

Simultaneous Deballasting and Loading of Cargo Tanks: This practice is essential. Vessel has to be ready at all times to manoeuver, and the only alternative is to load partial cargo first. Such operation is done at the sole risk of the export vessel, its Master and Owners, and the most stringent care and attention shall be taken by the export tanker. Export tanker will hold the Terminal, its parent companies, subsidiaries and affiliates, harmless from any and all claims, demands, damages, liabilities, costs, fines, and expenses, of every kind whatsoever, arising out of, on account of, or in any way connected with the simultaneous deballasting and loading of the export tanker.

Inert Gas Systems: All export tankers loading crude oil at the Marine Terminal must have an effectively working Inert Gas System in compliance with SOLAS Convention, and the Master shall confirm before berthing that the Inert Gas System is working correctly, i.e. maintaining positive pressure on all tanks with the oxygen content of the inert gas less than 8% by volume. On arrival alongside, export tankers will be asked to depressurise tanks sufficiently to allow up to 3 ullage ports to be open at any one time for the purpose of gauging sampling, waterfinding, temperature taking, tank inspection, etc., but ullage ports must be re-secured before cargo or ballast handling is commenced. Export tankers equipped with Vapour Lock tank dipping/sounding devices are not required to depressurise the tanks when gauging, temperature taking and water finding. During deballasting, the IGS must be capable of producing sufficient inert gas at 8% or less oxygen quality to prevent air from entering the tanks. If the IGS is not operable, deballasting from cargo oil tanks will not be allowed to commence. If during deballasting, the IGS fails, the deballasting must be stopped until the plant is again operational. If this repair is likely to take more than 24 hours, the ships' Owners and/or Charterers must be contacted and a safe deballasting/loading plan should be agreed by both parties, before operations are resumed. When loading an inerted tank, the inert gas displaced must be vented through the ship's vent system and not ullage ports.

Maximum Allowable Pressure: The export tanker must never exceed the maximum allowable pressure on its cargo piping system, and make sure the loading rate is fully agreed.

MEDICAL: No doctor, dentist or clinic, however, in emergencies, Terminal will attempt to assist.

DENSITY: 1027.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: At Sana'a.

REPAIRS: No facilities available.

REPATRIATION: No facilities available.

AIRPORT: Hodeidah and Sana'a.

SHORE LEAVE: Not permitted.

GARBAGE/WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL: *Flags:* The national flag of the Yemen Republic shall be permanently displayed by vessels at the Ras Isa Marine Terminal.

Alcohol: Masters are advised that sale of alcoholic beverages to National Citizens is strictly forbidden, and are warned of the serious consequences of offering such drinks to Terminal staff who may board the vessel.

Agency: The Terminal does not perform any vessel agency functions. Vessels calling at Ras Isa Marine Terminal are required to arrange their own agency representation from an agency operating in Hodeidah.

WEATHER: The winds in the area are usually light and generally blow from Western/Northern quadrants in the Summer, while in the Winter, from October to April, the prevailing winds blow from Southerly quadrants, building up strong swells, which force the Terminal to use the Tandem Mooring System. The existing currents are very weak.

SAFETY: The Ras Isa Marine Terminal Safety Check List is based on the recommendations of the "International Safety Guide for Oil Tankers and Terminal" (ISGOTT).

HELICOPTER: *Helicopter Operations/Precautions:* Helicopter service for embarking/disembarking a Pilot, or any other personnel from the export tanker and any other vessel, is available, but subject to availability of a helicopter. Transfer of personnel by helicopter from ships located within the Terminal area may be carried out only in emergency (i.e. evacuation of injured crew member), and subject to availability of a helicopter. The helicopter service will be for account of the export tanker. Voice contact with helicopter is possible, because all are provided with VHF radio equipment. Ensure the selected landing area on board the vessel is clear. Ensure all operational requirements on deck are as per guidelines issued by the International Chamber of Shipping in their "Guide to Helicopter/Ship Operations".

SECURITY: *General:* The Terminal will take prudent and reasonable security measures, consistent with security threats and risk inherent in each particular situation.

Security Area: The security area covered is indicated by the encircled area on the chart. Throughout the vessel's stay alongside, a gangway watch shall be maintained. The gangway security watchmen should ensure (a), unauthorised persons are excluded from the vessel, (b), authorised persons are logged on and off the vessel, and (c), if necessary, conduct checks of baggage and packages being brought on to or taken off the vessel.

It is important that the Terminal advise the Master as soon as possible of any special circumstances which might necessitate special security precautions. Conversely, the Master of the vessel should also inform the Terminal of the security status procedures on board in accordance with the Vessel Security Guidelines. Export tankers, requiring urgent services (Owners' items), should establish contact with local port Agents, at the port of Hodeidah, for delivery offshore or at the Holding Anchorage, which, if the latter is utilised, should be reported to "Ras Isa Terminal – Safer", via telex or fax for clearance to use this anchorage. Any authorised representative of the Terminal shall have the right to board any vessel within the Terminal area at any time, for the purpose of ensuring that regulations are being observed. As a condition of entry into the Terminal area, the export tanker and any other ship, must agree to vacate the berth promptly on being requested to do so by the Terminal.

SHIPMASTER'S REPORT: May 1988.
NOTE: This report was received prior to receiving new operating procedures above.

Ras Isa Terminal is an offshore loading port located in the Yemen at the Southern end of the Red Sea, East of the Zubair Islands and a little North of Hodeidah (See B.A. Chart No. 143).

The Terminal consists of a purpose-converted Floating Storage and Offloading (FSO) vessel, FSO 'Safer'. This vessel is 400,000 tonnes d.w.t. (ex-'Esso Japan'), and permanently moored in position Lat. 15° 07′ N., Long. 42° 36′ E. The 'Safer' is under the Yemen flag, and permanently connected by pipeline to the production field via a turret-mooring (6 anchors), and submarine line to shore at Ras Isa, 4.4 miles to the N.E. Production Field is some 420 km. inland, in the Marrib area of Yemen, and production is understood to be some 150,000 barrels per day. 'Safer' takes production on a continuous basis and supplies export vessels as required.

Product is Yemen Alif Crude; typical API, 39.0 to 41.0, typical temperature at loading, 30°C to 38°C, dependent on local sea temperature. The 'Safer' is on a swivel mooring system and will normally lie head to wind, with some influence from tide. Terminal is operated by a Yemeni/American combine, the Yemen Hunt Oil Corp. (YHOC), and vessel is operated (at time of writing) with Italian officers, Yemeni crew, together with American supervisors and Yemen Government representatives. Product suppliers are Yemen Oil and Mineral Resources Corporation. (YOMINCO).

Communications/ETA: (See Appendix "A").

On receipt of instructions to proceed to Ras Isa, then 72 hours, 48 hours and 24 hours prior, advise ETA and other details as listed. Hodeidah Ports and Marine Affairs Corporation (Hodeidah Port Authority) *must* be advised via Hodeidah Radio (4WD), in addition to any telex contact, as they advise the Yemen military authorities, who maintain a radar watch on all vessels entering or leaving Yemen waters. Likewise on departure, vessel must advise Hodeidah Port Authority (per format supplied by Pilot) to be marked-up on military radar screen – otherwise vessel may be intercepted; also via 4WD on 500 kHz.

'Safer' Sat. Telex 1473120 Safa-X (IOR); after initial and 72 hour messages, only requires updated ETA. On approach use VHF Channels 16 and 74.

On receipt of ship's message, 'Safer' will respond with nomination and request ship's details (See Appendix "B").

YHOC Marine: Telex 4013 or via 4WD to YHOC Marine Sanaa.

Port Authority: Telex 5565 and via 4WD.

YHOC Marine, Port Authority and Agents require, message per Appendix "A" to be repeated in each ETA notice.

Approaches and Anchorage: See B.A. Charts No. 143, 548, 542 and Appendix "C" and "Plan".

Approach to Ras Isa Terminal is straightforward and clear of dangers. However, due to lack of soundings and age of survey, it would be prudent to approach from seawards rather than coasting.

From North: Follow usual courses down Red Sea, to position 15° 30′ N., 41° 45′ E., 4.5 miles S.W. of Jabal at Tair. Thence course 120° T., distance 52 miles gives a clear run to the Holding Anchorage, passing 7 miles N.E. of Quoin and Haycock Islands in the Zubair group. Once into soundings, least depths are 40 m. – 49 m. Clematis Shoal will lie approximately 11 miles to the North of track when some 17 miles N.W. of Terminal.

Rashshah Island, 4 miles North of Terminal, is low and sandy and has a light (3M) Fl. 10s. 8 miles; both island and light are very poor, both visually and as a radar echo and will not be sighted until within 6 miles of terminal, if at all. Terminal ('Safer'), is well lit and a good radar target, and was located at 14 miles. There is a disused SPM to the East of 'Safer', which may have a tug lying close-by, these echoes tend to confuse the actual terminal position.

From South: Leaving Abu Ail Channel, course should be made to position 14° 25′ N., 42° 30′ E. (avoiding Avocet Rock), before turning North towards Holding Anchorage. Least depths on this approach appear to be 31 m., but survey soundings are old. On approach good fixed positions are necessary, due to Penguin Shoal to West, and S.E. Patches to East, the latter being actually in vicinity of anchorage.

Holding anchorage is established approximately 3.2 miles to S.W. of 'Safer'; vessels may enter and leave from/to sea without pilot, but the total area from shore, out to anchorage is restricted, and vessel must be under pilotage within this area. Depths in anchorage average 38 m. to 44 m., mud/sand bottom, holding-ground good.

Berthing and Operations: See "Plan".

Pilots (2) are British. There are 2 Smit tugs (1×40 ton and 1×60 ton bollard-pull), and tugs lines are used. Tugs are not ideal as they are primarily salvage tugs. Berthing daylight only, unberthing any time, dependent on weather conditions; if wind speed above 20 knots terminal is usually closed for berthing. Any size of vessel up to 400,000 tonnes d.w.t. can be accommodated. Depth at terminal is 33 m.

Berthing is vessel's port side to 'Safer' starboard side. Terminal prefer all wire moorings, but accept rope headlines and sternlines. Tails must be removed from wires. Moorings are 4 headlines/wires, 2 breast wires, 2 spring wires, 4 sternlines/wires, 2 aft breast wires, 2 aft spring wires, – usual firewires required. Usually springs first, followed by brea followed by head/stern lines. 'Safer' then supplies 2 'shore' wires fo'cstle, and one 'shore' wire to poop. Messengers are required. Tu make fast in 'push-pull' position on starboard forward main deck and main deck for berthing, and on long lines starboard bow and starboa quarter on sailing. Tugs lines are very heavy.

While alongside, vessel must maintain starboard accommoda ladder in lowered position. Current international safety rules, Check Li Regulations and procedures are in use, and practised. IGS must b positive and always less than 8%. Vessel must arrive with clean balla and ballast samples are laboratory tested before deballasting allowe Portable radio is supplied by Terminal for inter-ship communications

'Safer' will normally supply 2×16 in. hoses, using combination ship's lifting gear and her own crane. Her max. rate is 70,000 barre per hour. 'Safer' provides inter-ship gangway and connects/disconne hoses.

'Safer' has cargo metering equipment, but this is still at proving stag and vessel will 'ship-stop'. She will also in future be able to accept to 50,000 cu.m. of dirty ballast, but this system is still to b commissioned.

Documentation usually takes 3 to 4 hours after completion. Pilot an any surveyors will stay aboard vessel loading. Tugs stand-by whi operations are in progress.

Ras Isa commenced operations in December 1987 and 'Safer' cam on stream in March 1988. There are currently an average of 6 expo liftings per month from the terminal. As at present time, there are n port or customs or health formalities; ship's Agent requires 2 copie Crew List, and pilot asks of state of health. It is understood that th usual formalities will be instated in the near future, in which case th usual rules for entry into Muslim Arab countries are expected to app

The Yemen flag must be flown. It consists of red-white-black horizon stripes with green central star, flown with red stripe uppermost.

There are no facilities or services available. No bunkers or water repairs. It is apparently possible in urgent cases to obtain services w ship's Agent from Hodeidah, to the holding anchorage, with termin permission. This would be very expensive as Hodeidah is some 30 k away down the coast. Transport to/from 'Safer' is by launch or helicopte Agent boards vessel on arrival. Pilot issues Port Clearance and take off any timesheets and arrival/sailing figures for Agent if requeste Terminal will do their best to assist if urgent medical attention require but in general vessel must be totally self-sufficient in this port.

'Safer' has 5 large Yokohama fenders and sundry smaller fende and protection is good. Vessel's berthing (ballasted) trim must n exceed 3.0 m., with propeller immersed.

A comprehensive port-information book is issued to each arrivi vessel. On boarding, Pilot will require Master to sign an indemni absolving Pilot/Terminal from almost everything, and also pilota timesheets, port log and tugs time of hire.

APPENDIX A: See "Note" at beginning of Shipmaster's Report.

Export tankers shall advise their ETA upon departure from its last loa or discharge or other port or if at sea as soon as orders received proceed to Ras Isa and repeat at 72, 48 and 24 hours in advance arrival via Hodeidah Radio Station to the cable address "YHOC Mari Sanaa Telex No. 4013". Vessels equipped with Inmarsat satelli communications may address their telex(s) to "YHOC Marine" Inmars Telex No. 1473120 (IOR) and shall call the terminal on VHF Chann 16 when within range (then VHF Channel 74 for working).

For your information Ports and Marine Affairs Corporation, Hodeida requires the following information from vessels stemed for Ras Is Terminal to be sent to them either by telex (5565 Mawani YE) or vi Hodeidah Radio (4WD) 72/48/24 hours prior to vessel's arrival:-

AA ETA Ras Isa Terminal.
BB Nationality of ship.
CC Summer deadweight.
DD Length overall.
EE Number of crew and state of health.
FF Cargo required.
GG Arrival draft – fore and aft.
HH Name of Agents.

Master tanker to adhere to these requirements, under copy to Age to avoid imposition of fines.

APPENDIX B: See "Note" at beginning of Shipmaster's Report.

We hold your nomination for approximate ..... bbls at 60° F. Yeme Alif Crude approximate API 40.5.

Following information needed:

AAA Cargo quantity you able to load.
BBB Last cargo carried and if crude, source of origin.
CCC Quantity and grade of any transit cargo on board.
DDD Quantity of ballast and estimated deballast time.
EEE Quantity and type of slop onboard to lot of segregate on boa
FFF Maximum acceptable loading rate.
GGG Arrival draft (trim not to exceed 10 ft. or 3 m. by stern).
HHH Deepest sailing draft.
III Advised ability to simultaneously load and deballast with dou valve segregation throughout.
JJJ Confirm latest edition of I.S.G.T.T. Safety Guide and OCI Ship-to-Ship Transfer Guide are onboard.

Repeat your ETA 72, 48 and 24 hours in advance of arrival to:

YHOC Terminal (via Inmarsat Indian Ocean Telex No. 1473 Safa X).

Port Authority (Telex 5565 Mawani YE).

When within range contact YHOC Marine on VHF Channel 16 work Channel will be 74.

On arrival have your pilot ladder ready on starboard side for Berth Master boarding and your port boom (SWL rating of minimum 10 ton rigged for 16 in. hoses handling purposes.

Confirm your inert gas system is in good working condi Maintaining oxygen content less than 8% by volume in cargo tanks

Operational/Safety Check List as per OCIMF Ship-to-Ship Transfer Guide will be followed when VHF contact will be established. Please report also full name of Master.

Signed....................... /Cargo Custody Transfer Coordinator
Ras Isa Marine Terminal

APPENDIX C: See "Note" at beginning of Shipmaster's Report.

On arrival vessel has to anchor at the holding anchorage. The area designated as the holding anchorage for vessels waiting for loading at Ras Isa Marine Terminal is located to the Southwest of the terminal in following position: (N.B. Vessels may only enter this area from sea, or sail to sea, without Pilot. Any other movement must be under pilotage.)

15° 05′ N. 42° 32′ E.	15° 03′ N. 42° 32′ E.
15° 05′ N. 42° 36′ E.	15° 03′ N. 42° 36′ E.

The permanent floating storage and offloading terminal (FSO) "Safer" 400,000 d.w.t.) is located approximately 4.8 nautical miles offshore Ras Isa in position:

Latitude 15° 07′ North Longitude 42° 36′ East

in the Red Sea territorial waters of the Yemen.

SHIPMASTER'S REPORT: June 1989.

NOTE: This report was received prior to receiving new operating procedures above.

General: Ras Isa Marine Terminal is similar to ship-to-ship oil transfer, so no documents (i.e. Stores List, Bonded Store List, etc.) were requested. However 4 copies of the Crew List are required. Repairs, fresh water, crew repatriation and shore leave are not possible.

When vessel arrives at the Pilot boarding station (Anchorage area), the Pilot, Loading Master and Agent come on board by helicopter by launch. The Pilot and Agent remain aboard until ship's departure. Two British Pilots employed and one on duty. Two tugs assisted with berthing and unberthing operations.

Information required prior to arrival: ETA upon departure from last port and repeat 72/48/24 hours in advance of arrival via Hodeidah Radio Station to the cable address "YHOC MARINE SANA TLX4013". Vessels equipped with Inmarsat communications may address their telex "YHOC MARINE Inmarsat No. 873-1104125" and shall call the terminal "SAFER" on VHF Channels 16/74.

The Agent requests the following information to pass to the terminal, this may be sent 3 days in advance.

1. Cargo quantity able to load (we loaded Marib Light crude oil, API 41.1, temperature 96°F.).
2. Origin of last cargo.
3. Quantity of dirty ballast, and deballasting time (if any need to pump to shore, estimate time via 1 × 16 in. hose, maximum 70 p.s.i. discharge pressure, shore tank capacity 50,000 tons).
4. Quality and quantity of slops.
5. Maximum acceptable loading rate (storage tanker able to transfer 20,000 tons per hour).
6. Arrival draft (trim not to exceed 10 ft. or 3 m. by stern).
7. Maximum sailing draft.
8. Advise ability to simultaneously load and deballast with double segregation throughout.
9. Confirm latest editions of ISGOTT (International Safety Guide for Oil Tankers & Terminals) and OCIMF Ship-to-Ship Transfer Guide are onboard.

and additional items as follows:

Distance bow to manifold.
Helicopter landing area (helicopter has two engines and is large, takes about 20 persons).
Rig pilot ladder on starboard and 16 in. hose pick-up derrick on port side (SWL 10 tonnes).
I.G.S. works properly and all tanks including ballast tanks oxygen less than 8 percent by volume.
Mooring wires: Take off rope tail, this is extra ordinary request due to bad weather, the terminal had experienced rope tails breaking.

The Agent is requested to pass the following to the Port Authority:

1. ETA Ras Isa.
2. Vessel nationality.
3. Summer deadweight.
4. LOA.
5. Number of crew and confirm all healthy.
6. Quantity of cargo request for loading.
7. Arrival draft.
8. Name of Agent.

AUTHORITY: Yemen Hunt Oil Company, as Operator, P.O.Box 481, Sana'a, Yemen. *Tel:* Hodeidah 216080. *Telex:* 4013 YHOC YE. FAX: 967-2-216079. *Cables:* YHOC Sana'a, Yemen.

SALEEF (Salif): 15.18 N. 42.41 E.

Also see "General" before first port.

Saleef Port is a natural port on the Red Sea, approximately 80 km. North of Hodeidah Port. Two routes, one round the North end of Kamaran Island and the other around the South end provide suitable access to the harbour.

As prevailing winds are generally Southerly or Northerly, vessels are able to approach the berth from downwind. This is important as vessels will probably have to berth without tug asistance. Initially, mooring facilities are designed for 50,000 d.w.t. vessels and consists of a wharf head 20 m. wide, 93 m. long with two dolphins. A 10 m. wide trestle connects the wharf head to the shore. Facilities are designed to absorb the berthing impact of a ship approaching with a velocity component of 15 cm. per second perpendicular to the berth face and for a 50 tons mooring line pull.

Future developments: A French consulting firm has been awarded the contract to submit a report on future developments of this port.

SHIPMASTER'S REPORT: December 1979.

Acknowledgements: Most of the information has been gleaned from local Agency representatives and Capt. A. Saeed, Harbour Master.

Reference has been made to Red Sea Pilot and various BA Charts. Local written information is unavailable for the area concerned.

General: Salif lies some 60 km. North of Hodeidah, it is a natural deepwater harbour sheltered by Kamaran Island.

Since 1976 the port has enjoyed moderate expansion and can now boast a modern jetty capable of berthing ocean going vessels; other pontoon type berths are available, these being linked to the shore by small stone jetties. At present the port can accommodate two vessels of up to 200 m. length with a draft of 12 m.

Salif is geared for the export of bulk salt and the import of grain and some general cargo. In the near future a further pontoon type berth is due to come into operation to be used solely for the import of bulk cement. A bagging plant and silo have been constructed to handle the additional cargo.

This report is mainly directed to the facilities associated with the import of grain, however where possible relevant information has been included which could prove useful to other vessels trading in the area.

Documents:

6 Crew Lists with Passport numbers.
2 Bonded Stores Lists.
2 Personal Manifests.
2 Vaccination Lists.
3 copies Cargo Manifest.
Local inward forms made out on arrival.

Approaches: (BA Charts: 543 and 548). Recommend approaching around the North end of Kamaran Island, as mentioned in Red Sea and Gulf of Aden Pilot, page 390.

The lighthouses stand out well, but at night they are not lit (December 1979). The only difficulty in making Salif, in daylight, is passing to the South of N.W. shoal light, the channel at this point being about one mile wide. At night the lighthouses prove quite good radar targets, and the various islands etc. show up quite well. Once around the top of Kamaran Island course can be set down Kamaran Passage to the anchorage area off Ras el Salif. Charterers frequently advise that passage is possible South of Kamaran Island, however this is not advisable; the leads mentioned on the chart are very difficult to see and there is no room for error.

Anchorage: No specific area designated but anywhere in the vicinity of Salif Jetty. For vessels waiting for the wheat berth it is best to anchor about 0.75 miles West of Ras el Salif. Good holding ground in about 14 fathoms of water. For vessels with poor radar it would be best to anchor outside Kamaran Island until daylight, when passage can be made in safety.

Weather: See "Red Sea Pilot" for information. At Salif the wind usually picks up during the day and this can delay berthing if the strength is above Force 4.

Pilotage: Pilot boards in anchorage area from medium sized launch. Yemenese Pilot with limited English.

Daylight pilotage only.

Berthing: Vessels berth, at the bagging plant pontoon, head to wind. The pontoon consists of a flat topped barge made fast to a small stone jetty; it is well fendered with car tyres. The offshore anchor is used whilst coming alongside and a launch runs various ropes ashore to posts set on the land. Five ropes are required either end and it is necessary to join the first few together as considerable lengths are initially run. The bagging pontoon can only accommodate one vessel at a time. See "Shipmaster's Report – May 1982".

The general cargo and salt exporting jetty lies some distance to the South of the bagging plant. This pier can take one vessel of up to 200 m. in length. Facilities at this berth are an improvement over the pontoon, however for the import of grain type cargoes, it is not so efficient, it being necessary to bag the cargo by hand. Both berths can take vessels with up to 39 ft. draft.

Buoys are at present being laid to the North of the bagging pontoon and these could prove an obstacle for vessels berthing. The moorings are being laid to assist vessels making fast to the new cement pontoon (see "Projects").

Quarantine/Health Regulations: Doctor boards on arrival, either at anchorage or alongside. No health forms as such. Certificates not required unless vessel from infected area when Yellow Fever and Cholera certificates are needed. No derat facilities.

Customs: Usual Islamic laws in force. Bond not sealed and apparently no objection for crew to consume spirits/beer on board. On no account must alcohol be given/sold to local Yemenese.

Immigration: Passports are inspected on arrival. (Harbour Master acts as translator for Immigration Authorities.) Shore leave granted with passes for Salif area only. Special permission has to be given to proceed outside local area, i.e. Hodeidah.

For crew repatriation, passports are taken to Sanaa by Agent for necessary visas to be arranged.

Medical Facilities: One doctor resides in Salif, Yemenese and speaks English. He will attend the ship rather than the patient visiting him. The nearest hospital is in Hodeidah.

Port Operations (Bagging Plant): Foremen and workers are hard working. The foremen reside in caravans close to the bagging plant whilst most of the stevedores come from Salif.

The method of discharge is to load a number of diesel driven evacuators on deck and by various pipelines, these are connected to a storage hopper situated on the pontoon/barge. The hopper is connected to a small bagging plant and by means of conveyors the sacks are loaded onto road transport.

Discharge rates per 24 hours worked between 1,600 tonnes and 1,850 tonnes. Charter Party rate indicated about 750 tonnes per day. The takeaway rate from the hopper appears to be adequate with plenty of road trucks available. The grain is shipped immediately to different parts of the Yemen.

It is usual to carry sufficient bags to enable the complete discharge of the grain to go unhindered. The bags are baled and discharged onto the pontoon at regular intervals.

Ship's gear is required at each hold to sling the pipes that lead from the evacuators into the hatch. It is also required for discharging the gunnies and for loading the evacuators (1.5 tonnes). The evacuators appear reliable but spillage of diesel results during re-filling etc.

Fresh Water: Available but expensive. Supplied by road tanker at 15 tonnes a time, it is necessary to use ship's pump for pumping the water aboard. Agents require ample notice prior to supplying water.

Fuel: Heavy oil and diesel oil not available unless barged from Hodeidah.

Stores: Not readily available; fresh stores difficult to obtain.

Agency: The main Agency lies some 60 km. away by track, and the ship is attended by a runner who commutes between Hodeidah and Salif. Considerable delays result before ship's business can be completed and it is necessary for everything to be in writing; repatriation, in particular, is difficult for the organiser as well as the traveller.

Communications between Salif and Hodeidah are non-existent, a telephone line exists, but this is out of order. It is however possible to communicate directly through Portishead Radio and sometimes the only way to get messages out.

Local currency and American Dollars are obtainable from the Agents. It is difficult to obtain the money from the Agents and generally it is best to arrive with sufficient cash on board to cover any expenditure.

To arrange repatriation it is necessary to allow at least 6 days. Visas have to be obtained from Sanaa and tickets arranged. If pre-paid tickets have been sent from U.K., then they must arrive in ample time. The airport at Hodeidah has regular connections with Sanaa which in turn is linked into most air routes via Paris. Transportation from the ship to Hodeidah is by Land Rover or similar four wheel drive vehicle.

Port Regulations: Nothing in writing. The Harbour Master is the person to approach if anything required. Apparently Salif is designated a military zone and this is the reason no written information is available.

Gangway: The vessel only lies alongside for a distance of about 80 ft. amidships and consequently a pilot ladder is used instead of a gangway or brow. If this causes any difficulty, ship's lifeboat can be used as a ferry between gangway and shore.

Watchmen: Supplied by local Police/Army. They remain aboard during vessel's stay and keep pilferage to a minimum. They also keep close watch on any alcohol that may be obtained by local Yemenese.

Shore Leave: See "Immigration".

Garbage: No facilities for taking garbage away from the ship; best to dump waste food etc., whilst retaining cardboard boxes, and plastic containers.

Repairs: Possible to immobilise main engines, as once on the berth it is unlikely to shift. No repair facilities ashore.

Time: GMT plus 3 hours (no change).

Flag: Yemen Flag must be flown at all times. Red, white, black horizontal stripes with a black star in the white section.

Consuls: Situated in Hodeidah or Sanaa. Harbour Master available for Noting Protest, etc.

Tugs: None available for berthing though frequently tugs operate in the area towing barges, pontoons, etc.

VHF: Situated in port office but hours of working very flexible. The Harbour Master normally calls any vessel up shortly after anchoring.

Fire/Ambulance: None available.

Projects: A new pontoon berth, similar to the grain berth, is being constructed about 0.25 miles to the North. Silos have been erected close to the shore and are capable of storing 9,000 tonnes of finished cement. A bagging plant has also been constructed next to the silos. It is intended that cement be shipped, in bulk, and with evacuators discharged into the silos.

SHIPMASTER'S REPORT: May 1982.

I was in Saleef recently with 39,127 tonnes wheat – ship 182.08 m. long. The following are changes to information in the Guide.

The barge – pontoon berth with bagging plant no longer exists and apart from cement boats all ships now berth at jetty by Salt terminal.

Minimum water I found there in 18 days' stay was 18.5 m.

Ship's gear must be used and grain is dumped on wharf and bagged in situ, being taken away by lorries. Rate erratic, between 900 t.p.d. and 2,000 t.p.d.

Vessel has to vacate berth for car carriers and salt loaders.

No shore leave permitted.

Bond is now sealed. No restrictions on what is kept out.

NOTES

Please also advise Shipping Guides Ltd.

Yugoslavia

BAR: 42.05 N. 19.03 E. (See Plan)

PORT LIMITS: Seaward limits of the port defines a line drawn between "Voluica" Light and Ratac Point.
DOCUMENTS:
On Arrival:
2 copies Health Declaration.
1 copy General Declaration.
5 copies Crew List.
5 copies Passenger List.
5 copies Crew Personal Effects.
3 copies Stores Lists.
1 copy Animal Pets Aboard.
1 copy Certificate of Financial Insurance on Civil Liability for Oil Pollution – only foreign ships carrying more than 2,000 tons of oil.
3 copies List of Hazardous Cargoes loaded on board and Cargo Plan for Hazardous Cargo (1 copy).
On departure:
5 copies Crew List, if any change.
List of Hazardous Cargoes, if loaded and Certificate of Stowage.
PILOTAGE: Advance notice 24 hours through ship's Agent. Pilot boat blue hull, white deck house, with letter "P" on each side. Pilot boards off West Breakwater. Use international signals to call Pilot. Pilot may be contacted on VHF Channel 16, working on Channel 6.
ANCHORAGE: Safe anchorage West and N.W. off West Breakwater. Anchoring not allowed nearer then 0.5 mile off Breakwater.
RESTRICTIONS: Vessels enter/leave port by day and night. Tankers allowed only during daylight. Depth entrance 14 m.

No restriction on LOA and beam. Foreign nuclear ships enter only with special permission. Leaving or entering port for foreign tankers not allowed if not having said Certificate.
MAX. SIZE: Fully loaded vessels up to 12.5 m. draft.
RADIO/VHF: Bar Radio, call sign YUW, 500 kHz and 516 kHz. Radio telephony on 2182 kHz on 2 metre band and on Channel 16.

Agents can be contacted through Bar-Radio on VHF.

Port Authority on VHF Channels 16 and 14.

Tugs on VHF Channel 6.
TUGS: 2 tugs with twin 594 kW engine.
BERTHING: Berth assigned at Agent's request or Receiver's/Shipper's, both for liners or tramps, at the daily meeting of the Harbour Board.

3,500 m. of berthing space and able to accommodate up to 20 ocean-going vessels.
CARGO HANDLING FACILITIES: Available for all kinds of general cargo, containers, pallets, Ro/Ro, bulk, fuel oil and chemical cargoes. Regular passenger service to Italy and from May – October to Greece.

Grain silos with 30,000 tons capacity with covered Vacuvator.
STEVEDORES: The Port Enterprise "Luka Bar" is the sole stevedoring company. Work is done Monday to Friday in 2 shifts: First shift 0600 hrs. -1400 hrs. Second shift 1400 hrs. – 2200 hrs. Third shift can be ordered at daily meeting, paid as overtime. Saturdays, Sundays and holidays may be worked on overtime.
MEDICAL: Medical care available at Medical Centre at Bar.
TANKERS: New oil berth can accommodate tankers up to 80,000 d.w.t., draft limit 12.5 m. Bunkers from local bunker station. Tank cleaning, pumping of slops and gas freeing not permitted in port.

Tankers must be ready to leave port at 30 minutes' notice, at any time and at request of Port Authorities.
DENSITY: Sea water.
FRESH WATER: Available from hydrants on quay. It is also possible to supply fresh water in the roads.
FUEL: Can be obtained from local bunker station or by fuel barge. All grades available.
CONSULS: None. Most countries maintain Embassies or Consular Representatives in Belgrade.
REPAIRS/DRY DOCKS: Dry Docks at Shipyard "Veljko Vlahovic", Bijela, 36 miles from Port of Bar, capacity of about 130,000 d.w.t. and 35,000 d.w.t., available for all types of deck and engine repairs. Minor damage can be repaired while loading/discharging.
SURVEYORS: Representative of Yugoslav Register of Shipping at Tivat (80 km.).
GANGWAY/DECK WATCHMEN: Available at Master's request.
OPENING/CLOSING HATCHES: Normally performed by crew, or as per Charter Party.
CARGO GEAR: Mobile Shore Cranes: 6×5 – 6 tons, 3×3 tons, 3×8 tons, 2×20 – 30 tons, 1×40 tons. Fork-lifts capable of handling containers, Vacuvators, 3 cranes for bulk cargoes. 1×40 ton container crane. If not agreed in C/P, loading and discharging is by shore cranes.
CUSTOMS ALLOWANCES: Yugoslav Customs Regulations apply.
REPATRIATION: From Bar by bus, train (International Lines), and ship.
TIME: Central European Time, GMT plus 1 hour. Summer time kept from March to October (date fixed annually).
SERVICES: Compass adjuster at Bijela (100 km.), RDF representative at Bar. Other electronics repairs via Agent.
HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 13th, November 29th and 30th. Work can be arranged on Sundays and 2nd day of two-day holiday.
POLICE/AMBULANCE/FIRE: Police Tel. 92; Ambulance Tel. 94; Fire Tel. 93.
SHORE LEAVE: Allowed.
STORING: See "Prelims".
1. By truck.
2. Yugoslav Federal Regulations apply.
3. Yes.
4. Yes.
5. Yugoslav Customs Regulations apply.
6. Yes.

IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Collection service is performed daily whilst alongside, by special trucks. Charges are from U.S.$ 17.70 to U.S.$ 64.95 per day, depending on tonnage of vessel. Should collection only be required every second day then charges increase by 50%. Contact Tel: 085-12-332 or 085-12-022, Extn. 609.
WASTE OIL DISPOSAL: Anti-pollution service exists, using floating boom, skimmer and other equipment. Collection service is carried out using drums and tanker trucks. In the near future a barge and oily water separator will be in use. This service is carried out by PIOB. Tel: 085-12-332 and 085-12-022, Extn. 609. Telex: 63139.
SEAMAN'S CLUBS: None.
CURRENCY: Yugoslav Dinar (YUD).
AUTHORITY: Lucka Kapetanija Bar, Obala 13, Jula 8, 85000 Bar, Yugoslavia. *Tel:* (085) 11-382. *Telex:* 63188 Luckap. *FAX:* (085) 11384. *Cables:* Lucka Kapetanija Bar.

AGENT: Jadroagent – Bar. Obala 13, Jula 6, P.O.Box 10, 85000 Bar. Cables: Jadroagent Bar. Tel: (085) 11-195, 11-194, 11-193. Telex: 63141 Yu Jadrag. Fax: (085) 12751.

ZELENIKA: 42.27 N. 18.35 E.

DOCUMENTS: See "Bar".
PILOTAGE: Pilot boards at entrance of the Bay of Kotor, near point Punta Ostro. In bad weather Pilot boards at anchorage.
ANCHORAGE: Good ground for anchorage S.W. of Zelenika, about 0.25 miles off port light in about 27 fathoms.
MAX. SIZE: Port of Zelenika damaged by earthquake and temporarily closed, vessels berth at the passenger quay at Herceg-Novi.
HEALTH: Radio Agent requesting Free Pratique, 24 hours before arrival. For vessels over 500 g.r.t. Pratique is given at the anchorage. For small ships and yachts, Pratique is given at Herceg-Novi.
TUGS: None. In cases of necessity can be ordered from shipyard at Bijela.
BERTHING: The berth is assigned through the Agents giving notice 24 or 48 hours in advance. At present there is berthing for small ships only at the passenger port at Herceg-Novi.
STEVEDORES: State stevedoring company.
MEDICAL: Nearest hospital at nearby town of Herceg-Novi.
FRESH WATER: Available from hydrant on the passenger quay at Herceg-Novi.
FUEL: Nearest bunker station is at Bar.
CONSULS: None.
REPAIRS: Any kind of repairs including dry docking at nearby shipyard at Bijela.
DRY DOCKS: Floating dock lifting capacity 10,000 tons, LOA 184 m., length over keel blocks 165.6 m., inside free breadth 25.5 m.

Floating dock lifting capacity 33,000 tons. LOA 252 m., length over keel blocks 235 m., inside free breadth 44 m.

The yard is about 4 miles East of Zelenika. The yard has 1,300 m. of fitting pier.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores.
CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litres wine/spirits per man per day.
CARGO GEAR: Loading, unloading performed with ship's gear.
TIME: Central European Time. GMT plus 1 hour. Summertime kept.
HOLIDAYS: January 1st and 2nd; May 1st and 2nd; July 4th and 13th; November 29th and 30th. Work can be arranged on Sundays and on 2nd day of two-day holidays.
POLICE/AMBULANCE/FIRE: No direct connection, in case of necessity call Agency, Tel. (082) 81-456 Jadroagent or (082) 81-261 Jugoagent.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes issued by local police.
AUTHORITY: Lucka Ispostava Zelenika.

AGENT: Jadroagent, Medunarodna pomorska i saobracajna agencija, Poslovna jedinica, Bijela. Tel: (082) 81-456. Telegraphic address: Jadroagent Bijela.

Zaire Republic

GENERAL:

ETA: It is essential that any change of vessel's ETA should be transmitted sufficiently in advance in order to avoid short shipments of cargo.

Matadi is only a transit port where cargo is not stored in order to avoid congestion.

Imported cargo is immediately re-forwarded to the interior while export cargo is only brought to Matadi a few days before the ETA of the vessel for which it has been booked.

Therefore, in order to make the cargo available at Matadi, shippers need a notice varying according to the cargo concerned, but which cannot be less than 2 weeks as is the case for coffee.

Agents at Matadi and Boma have been instructed to inform Port Authorities latest 4 days before berthing of inward cargo tonnages.

Non compliance with this provision may result in berthing delay.

PILOTAGE: Vessel should cable ETA 24 hours before arrival to the Harbour Master. Cable address: "Maritime Banana" via Banana Radio.

Pilotage compulsory for all vessels over 500 g.r.t. bound for Boma and Matadi.

Ships bound for Matadi and/or Boma must take a Pilot at the pilot station at Banana (at the mouth of the Zaire River). Pilot station at Banana can be contacted directly by radio (VHF).

In order to increase the safety and to facilitate the navigation on the river the Regie des Voies Maritimes have decided that in case a vessel is not equipped with a VHF installation the Pilot will bring one on board, for which a charge is made.

The following rules must be observed at the request of the Regie des Voies Maritimes for embarking and dis-embarking of Pilots.

If gangway is rigged astern on the port side it is compulsory to use the pilot ladder.

If gangway rigged amidships on port side it is recommended that the pilot ladder is used in combination with the gangway.

Pilots requesting only the gangway do so at their own risk.

Theoretically sailing from Matadi/Boma is only authorised if vessel can reach Banana by 1800 hrs. at latest since navigation on the Zaire river is normally limited to daylight hours.

With regard to the trim the pilotage services ask Masters to comply with following rules:

Maximum draft 12 ft. aft; 2 ft. forward.

DOCUMENTS: *Ship's Documents required on arrival:*

Clearance from last port.
7 Crew Lists.
3 Lists of Arms and Ammunition.
3 Passenger Lists.
1 List of stowaways.
2 Crew Declarations.
3 Lists of Ports of Call.
2 Stores Lists.
1 International Tonnage Certificate.
1 International Load Line Certificate.
1 Derat Exemption Certificate.
1 Cargo Ship Safety Equipment Certificate.
1 Certificate of Registry.
1 Radiotelegraphy Certificate.
1 Construction Certificate.
1 Certificate Form on Board.
Free Pratique.

Documents required for disembarking passengers and discharging cargo:

A. To be received by mail at least 8 days before ship's arrival:
(1) Cargo:
  3 Freight Manifests
  8 Cargo Manifests
  5 copies of Bills of Lading
  6 copies of Stowage Plans.
(2) Passengers:
  1 Accountancy
  3 Passenger Lists, for passengers for the port/or in transit.
B. To be received by ship's bag at ship's arrival at quay:
(1) Cargo:
  1 Freight Manifest
  4 Cargo Manifests
  3 copies of Bills of Lading.
(2) Passengers:
  1 Freight Manifest
  4 Passenger Lists for passengers for the port and/or in transit.

It is most important that stowage plans be available before vessel's arrival. Vessel's operations are indeed delayed to the next shift if same are only remitted upon arrival.

DRAFTS AND CURRENTS: Drafts on River Zaire are presently as follows (September 1989):

Inwards: High Water: 25 ft. 00 in.
Outwards: High Water: 26 ft. 00 in.

The authorised drafts are notified regularly by the Port Authorities.

The currents of the river and from berth to berth as well as in Matadi and Boma vary and depend upon the high and low levels of the water sometimes with adverse currents and still waters.

For proceeding to Matadi and according to the season vessels must have a speed of at least 10.5 to 11 knots, especially to pass the "Devil's Cauldron" about 3 miles before Matadi. 12-13 knots or greater sometimes requested for a 10-15 minute period.

HEALTH: Ship's crew must have an International Certificate of Vaccination against yellow fever and cholera.

RADIO: Banana Radio, 9PA.

Telegraphy – medium wave: 0430 – 2030 UTC.
500 kHz.
Working frequency: 489 kHz.
Listening frequency: 480 kHz.

512 kHz.
Traffic list each hour + 00 of each hour during service hours.

Telegraphy short waves: 0500 – 2000 UTC.

Traffic list at:

0500/0700/0900/1100/1600/1900:	8445.0 kHz
0600/0800/1200/1400/1700	: 12660.0 kHz
1000/1300/1800	: 22431.0 kHz
1500	: 17184.8 kHz

Reserve frequency for medium wave: 6491.5 kHz

Remarks: This frequency is used for traffic when QRN appears 489 kHz.

Reserve frequency: 8546 kHz.

Listening on 8, 12 and 16 MHz, Channels 5, 6 and 15. On 22 MHz Channels 3, 4 and 9.

Each Channel is monitored during 1 minute in a scanning system this, during 15 minutes following traffic list (same frequency band traffic list) after 15 minutes, the receiver is blocked on Channel 6 (4 22 MHz) until next traffic list.

Telex on Request

Paired frequencies:

Code 34646 (This is not definite since it must be allocated by UIT,

9PA:	8714 kHz	Ship:	8353 kHz
	13078.5 kHz		12498.5 kHz

Telephony: 0430 – 2030 UTC

Listening:	2182 kHz	2182 kHz

1330/1830	on 22658 kHz	– listening 22062 kHz

Telephony VHF: 0430 – 2030 UTC.

Channel 16. Simplex Channels. Duplex Channels.

Remarks:

1. Telephone connections are possible and Agent accepts telegram in telephony.
2. Other available frequencies for telephony:

Banana Radio/9PA	*Ship*
4357.4 kHz	4063.0 kHz
4382.2 kHz	4087.8 kHz
8777.8 kHz	
8762.3 kHz	8238.4 kHz
13181.4 kHz	12410.6 kHz
17350.7 kHz	16577.8 kHz

3. Radio beacon continuous.

Frequency: 315 kHz.
Call Sign: BAN.
Position: Lat. 05° 53′ 24″ S., Long. 12° 17′ 48″ E.
Power: 1kW.
Antenna: Omni-directional.
Range: 350 miles (daylight).

BRIDGES: *Bridge on River Zaire:* It is advisable to sound whistle approaching bridge, to warn small canoes in the fairway.

FUEL: Must be ordered from Petrozaire at least 48 hours befor required. Normally supply of gasoil, light and heavy fuel is effected Banana between Buoys 12 and 14 ex-barges with: minimum quantity 250 tons; maximum quantity – 800 tons (total barge quantity).

Smaller quantities can also be supplied in Matadi or Ango Ango.

STEVEDORES: The ONATRA (Office National des Transports) – publ institution, has the monopoly of the handling, stevedoring and trans operations at the ports of Matadi and Boma.

At each berth the responsible "Pier Master" remains in consta contact with the Chief Officer during the whole operation.

Working shifts are as follows: 1st. shift: 0630 – 1430 hrs.; 2nd shi 1430 – 2230 hrs. overtime; 3rd shift: 2230 – 0630 hrs. overtime.

Work must be ordered the day before vessel's arrival. However gangs are available, work can still be ordered the day of vessel's arri but latest at 0930 hrs. during week days.

In principle no work is done on Sundays, holidays and during night. If required same has to be ordered by writing 1 working day advance before 1000 hrs. Port Authorities will then decide according the situation at that time.

According to the situation of the Port, the Authorities can also ord labour 24 hours per day Sundays and holidays included.

At Boma there is no third shift – however on special request, wo can eventually be granted until 2400 hrs.

At Matadi work during third shift will only be ordered upon speci request from vessel.

For all stevedoring operations the use of shore cranes/dock labour is compulsory. It is only in particular cases such as handling containers/"heavy lifts" or prolonged (electrical) breakdowns that P Operators can authorise use of vessel's equipment.

GENERAL: *Quay Practices:*

The Zaire courtesy flag must be hoisted by foreign ships du daytime.

In view of the proximity of the town, the use of whistles, sirens similar signals is forbidden, except on special occasions.

Safety nets must be put between ship and quay at each of the working hatches and beneath the gangway.

No rubbish whatsoever may be thrown overboard.

Official Language:

The official language used by the Port Authorities and Administration is French.

Cargo plans:

According to ONATRA's instructions, stowage plans of ships calling at Matadi/Boma must be issued in such a way that they show clearly where all goods loaded for Matadi/Boma in several ports are located. This enables ONATRA to have, at once, a clear view of each vessel and to study, before ship's arrival, the discharging/loading possibilities.

Those stowage plans must reach Agent before ship's arrival.

Vessel's loading/discharging operations will only start during the next shift if stowage plans are remitted upon vessel's arrival. A request can be made to shift the vessel to a more convenient berth depending upon the cargo concerned.

With regard to cargo loaded, ONATRA does not issue stowage plans and Masters should consequently be instructed to draw up stowage plans themselves for transmission to corresponding discharging ports.

It is customary not to moor ships at Matadi/Boma between 2200 hrs. and 0600 hrs. They remain at anchor.

Important Notices:

In connection with manifests for Matadi/Boma cargo:

1. Liner Terms Cargo:

According to the General Rules and Tariffs stowing, unstowing, loading, discharging rates are applied on weight/measurement, whichever is the highest irrespective of the freight unit.

The Port Authority ONATRA instructs therefore that:

(a) The Freighted Manifest remitted to them must show three columns detailing respectively weight and volume and freight unit (freight tons) of each cargo/bill of lading.

(b) At the bottom of each page a summing up of tonnage/weight, tonnage/volume and freight units (freight tons) should be mentioned.

(c) The last page of the manifest shall contain a separate recapitulation of weight tons, volumes and freight units (freight tons) showing thus the respective totals of each item.

Corrections or additionals added by the Agent at Matadi/Boma by hand or with typewriter are not accepted by ONATRA.

ONATRA is fully implementing the regulations and, for vessels whose manifests are incomplete or incorrect, a penalty, which may reach 1,000% of the stevedoring costs (or 10 times) is charged.

2. F.I.O. Cargo:

The same information is to be supplied as for Liner Cargo but, in addition, the manifest and B/L must clearly mention that cargo is carried on free out terms.

BANANA: 06.01 S. 12.25 E.

DOCUMENTS: See "General" before first port.

APPROACHES: In view of the strong current, and in view of the fact that the lights of the navigation buoys on the river do not always work properly, night navigation is practically impossible. Tankers, therefore, arriving at night, or in times of congestion, are recommended to anchor approx. 5 miles West of Moita Seca Light in approx. 10 fathoms, about 12 miles from Stella Buoy.

PILOTAGE: River can be entered direct from sea in deep water. Pilot (not compulsory) will board vessel from 0600 hrs. with Authorities at Pilot Station located one mile South of Banana Point.

The position of the flare of the SOCIR Refinery at Moanda is:

Lat. 5° 57′ 51″ S.
Long. 12° 25′ 07″ E.

The flare is visible during day and night and may be a good bearing for vessels approaching river.

Sailing from "Stella Buoy" at 0600 hrs. vessels with a speed of up to 14 knots must pass Bulabemba before 1400 hrs. and vessels with speed in excess of 14 knots by 1500 hrs.

MAX. SIZE: Tankers up to 35 ft. draft may discharge at buoy moorings. Also see "Berthing – Commercial Port".

HEALTH: Quarantine Officer boards at sea buoy. Free Pratique usually granted as soon as Maritime Health Declaration completed. Valid cholera and yellow fever inoculations required for all crew members.

RADIO: *Tankers:* At least 3 days' notice required to Agent (ETA and draft only) and to Harbour Master, "Maritime Banana" (ETA only). It is necessary to transmit these notices via another shore station (e.g. Cape Town Radio, Libreville Radio, etc.), as the Banana Radio Station can only be reached 2 days prior arrival. Close advice on changes in ETA necessary to prevent delays in waiting for Pilot and lighters.

Radio Banana (9PA) – see "General" before first port for details.

BERTHING:

Commercial Port:

The commercial port consists of a landing space of approximately 2,000 sq.m. in front of a warehouse with approximately 2,500 sq.m. storing room.

ONATRA, the Port Authority, has no cranes and the port equipment is extremely limited. Any discharging and/or loading must therefore be done by ships' gear.

With a draft of more than 17 ft. (indicative) cargo operations to be performed at anchor between Buoys No. 12 and No. 14. Barges and gangs are then supplied on request.

With a draft of less than 17 ft. (indicative) vessel can berth at ONATRA wharf inside Banana Bay.

Length of the wharf: 75 m.

DENSITY: Brackish to salt.

FRESH WATER: Not available.

FUEL: Must be ordered 48 hours in advance from Petro-Zaire. Bunkering takes place between Buoys No. 12 and 14. Gasoil, light and heavy fuel oil available. Barge capacity 800 tons, minimum order 250 tons.

MEDICAL: Doctor available for emergency only. No dental or hospital facilities.

TANKERS: Tankers remain at anchor between Buoys No. 12 and 16 on the river, anchorage being agreed upon by the Master and the local suppliers' representative who will have received the advice of the Pilot. Since there is no mooring buoy and in view of the strong currents it is recommended to use both anchors while main engine to remain on standby.

Cargo Operations: Tankers discharge into/load from cargo barges moored alongside either side. These barges (three in total) have a capacity of 1,650 long tons or 2,050 cu.m. and can receive the cargo at a rate up to 400 t.p.h. Under normal conditions the refinery will handle these barges per shift of 12 hours. Cargo operations are effected continuously day and night during Sunday and holidays, in shifts from 0600 – 1800 hrs. and from 1800 – 0600 hrs.

Sailing: Tankers sail without Pilot and may leave any time.

Moanda Terminal: To notify his arrival, Master to call M.V. "Afran Zenith" by radio. Vessel will then proceed to single buoy mooring berth with following particulars:

Depth: 57 ft.
Position: Lat. 5° 57′ 50″ S.
Long. 12° 08′ 19″ E.

where loading will take place.

The storage tanker is moored in position:

Lat: 05° 57′ 30″ S.
Long: 12° 06′ 00″ E.

No tank-cleaning facilities. Barge available for dirty ballast reception limited to 2,000 cu.m. per trip which occasionally and on special request can be put at disposal by the refinery.

Also see "Shipmaster's Report".

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

SHORE LEAVE: Shore leave is presently not allowed due to lack of communications; only in urgent cases may a crew member join one of the refinery tugs. There is no entertainment whatsoever ashore.

GENERAL: During stay of tankers at anchorage the discharge and/or loading operations are constantly supervised by representatives of the refinery, who are to be accommodated on board and to be provided with meals.

SHIPMASTER'S REPORT: September 1985.

Location: Moanda Oil Terminal is operated by the Zaire Gulf Oil Company. It is located about 10 miles offshore from Zaire. It consists of a SPM in position Lat. 5° 57′ 50″ S., Long. 12° 08′ 19″ E. in about 75 ft. of water. Crude oil is transferred to the export tanker at the SPM from the storage tanker "Afran Zenith" of 95,185 d.w.t.

Wind and Swell: Wind and swell are mostly from a Southwesterly direction with a heavy swell from March to September. The tidal range in the vicinity of the berth is 6.9 ft. The current in the area is a composite of the effect of the general Northwesterly drift and the outflow of the Zaire River. This results in a current of 3 – 4 knots or more in a Northerly at Westerly direction. In view of the foregoing, Masters of vessels calling at the terminal are advised that under no circumstances are engine repairs permitted within terminal limits.

Communications: Vessels bound for Zaire are required to advise their ETA:

(a) Via COMSAT to Master m.v. "Afran Zenith" GZOL 1242403; or
(b) Via telex or radiogram to the main office of the vessel's Agent in Kinshasa who will pass over the information to Zaire Gulf Oil Company (ZAGOC) and to their local office at Moanda.

ETA messages to be sent 72, 48 and 24 hours before arrival at the terminal and should contain the following information:

(a) Name of vessel.
(b) ETA in GMT (Zaire time is GMT plus 1 hour).
(c) Name of Master.
(d) Estimated arrival draft, fore and aft and displacement.
(e) Time for discharging clean ballast, if any.
(f) If vessel proceeding to any port(s) prior to Moanda and if so delays anticipated.

A 24 hour watch is maintained on VHF Channel 16 on "Afran Zenith" and contact is usually possible at a distance of 20 – 30 miles.

Dirty Ballast: No facilities exist for receiving dirty ballast and all tankers must arrive with clean ballast.

Cargo Information: Oil loaded at the Moanda Terminal is Zaire composite crude with an average API of 31.5. The loading temperature will vary from 80°F – 85°F and is fairly steady throughout the year. The loading rate is about 30,000 bbls.p.h.

Approach to Anchorage/Mooring Master Boarding Area: If vessel is required to anchor, the recommended tanker anchorage is within a circle 0.5 miles in diameter and its centre is located in a position 5 miles due West of the SPM. Owing to the presence of oil wells and submarine pipe-lines vessels should not enter into the area bounded by lines joining the following positions:

(a) Lat. 05° 46.5′ S., Long. 12° 12.5 E.
(b) Lat. 05° 49.5′ S., Long. 12° 09.0 E.
(c) Lat. 06° 00.0′ S., Long. 12° 09.0 E.
(d) Lat. 06° 00.0′ S., Long. 12° 18.0 E.
(e) Lat. 05° 53.5′ S., Long. 12° 18.0 E.

The ZAGOC Mooring Master Boarding Area is 3 miles due West (Lat. 05° 57.30′ S., Long. 12° 06′ E.) of the storage tanker "Afran Zenith" or boarding will be at the anchorage as appropriate.

Accommodation: During vessel's stay at the terminal the Mooring Master, Loading Master, Agent, Surveyor and 4 men for the hose gang will stay on board.
Mooring Arrangements: Mooring operations are only undertaken by day under normal weather conditions. Unmooring operations can be undertaken at any time. The following preparations are required on the export tanker:

(a) 4 mooring ropes, minimum length 220 m. and size 9 in., buoyant lines if possible e.g. polypropylene, in good condition.
(b) 2 suitable heaving lines of appropriate length.
(c) 2 mooring lines aft for securing a tug to realign the vessel to the buoy if necessary.

Hose Connections: 1×16 in. hose is connected to the ship's manifold.
Bunkers: Not available.
Fresh Water: Not available.

SHIPMASTER'S REPORT: April 1987.
Vessel discharged at Banana and Ango-Ango.
Approaches: Wide open with very deep water approach. Vessels can anchor at either side of the river mouth in 20 fathoms. Pirates do not appear to be a problem. The very small amount of traffic using the Congo indicates that there will be no problems with regard to crowded anchorage.
Pilotage: River passage is during daylight hours only. The Pilot boards off the Banana Creek Channel, and the lightening anchorage is between Buoys No. 12 and 14, however No. 12 Buoy is missing. A secondary anchorage is between Buoys No. 16 and 18, abeam of Crique Ariel Beacon. Both anchors with about 7 or 8 shackles will be used in either anchorage. The current is always out-flowing, so there is no fear of a fouled hawse on this visit. This vessel tried to anchor in the first anchorage, (vessels normally try the first anchorage, so as to be that much nearer to Banana for the lighters). Vessel started dragging anchors, so we hove up and moved into the second anchorage.
Officials: 14 officials boarded the vessel.
Documents:

8 copies Crew List.
6 copies Passenger and Mail List.
6 copies Stowaway List.
4 copies Cargo Manifest.
4 copies Ullage Report from Last Port.
6 copies Kroo Boy List.
6 copies Arms and Ammunition List.
6 copies Narcotics List.
6 copies List of Ports Visited.

Discharge: Lightering only at Banana.

The amount of lightering depends on the water available in the dredged sections further upstream, (all the cargo lightened has eventually to be taken up to Ango-Ango by the lighters).

On this occasion, we had to off-load into 5 lighters, to come up to 23 ft. draft (max. permissible draft up-river at this time). Only 1 tug was available so this meant 3 trips. No unloading took place between midnight and 0800 hrs. the next morning.

One pump was used, discharging to 1 barge each side simultaneously. The tug takes 2 barges at a time back to banana.
Passage to Banana and Ango-Ango: The passage to Banana takes 6 to 7 hours, and if vessel cannot arrive at Ango-Ango before 1700 hrs., then vessel will anchor at Boma. All passages take place during daylight hours.

The continuous outgoing river current can vary from 3 knots up to 6 – 7 knots, depending on rainy or dry season.

From Banana to Buoy No. 24, there is plenty of water and room to manoeuvre, etc. although it should be emphasised that here are very few aids to navigation which can be relied upon. The buoys throughout the river passage are very doubtful as to their position (they may have been moved as the channel moves, but no Notice to Mariners issued). The strength of the river current must make the mooring of these buoys very difficult, also many of them consist of oil drums fastened together.

There is a narrow channel section (dredged in parts) from Buoy position No. 46 to Buoy No. 78. Part of the new channel veers away from the dotted line on the chart, and goes off to the West of "Archipel des Tortues", up what appears on the chart to be a narrow creek. From here on there is no visual chart indication of where you are going. In the narrow parts there may be 2 buoys (oil drums) to go between, but even so there are quite a few severe turns, so there are quite a few severe turns.

From Buoy No. 86, you are back in soundings and there is plenty of water up to Boma. The Pilot changes at Boma.

We anchored overnight at Boma. The anchorage is opposite Boma town and is in a quiet stretch of water out of the current. Only one anchor is used (4 shackles), and as the current flow is always in the same direction, there is no reverse of heading, so although you are close to the South side of the river, the only problem will be if there is a sudden change of wind during one of the passing tropical downpours.

The passage from Boma to Ango-Ango is all in deep water, and is comparatively wide, although there is the occasional whirlpool, and navigation aids are sparse with a rocky shoreline.
Ango-Ango Berth Approaches: The approach is straightforward, although there are no mooring launches or tugs. The berth itself is in slack water. Normally, the vessel is put slightly ahead and off the berth, and the port anchor is dropped, with 3 shackles. The bow is then manoeuvred into the berth using engines and anchor, then head lines are sent ashore via shore messengers (the headlines may look like breast lines, and the breast lines like half springs), but be sure to get the correct lines as per plan (see "Plan"), they appear to have set messengers for each shore bollard, no springs are allowed on to the pontoon. The after lines are also sent via messengers, so be sure to organise with the Pilot as to which sequence is required, especially the springs being sent from aft, and the breast lines from the main deck.
Documents at Ango-Ango: The same number of documents as requ at Banana are again required in Ango-Ango.
Discharge: The discharge is made via 2 sets of 2 × 6 in. lines connec via shore supplied "Y" pieces connected to ship's 8 in. manifolds. Bo jet fuel and MOGAS were discharged simultaneously.

The departure is fairly straightforward, heaving off on the anchor, a there is plenty of room to swing vessel round in, especially with the bo being out in the current, and the stern in comparatively slack water.

The passage down river is, of course, much quicker with all the curre with you.

AUTHORITY: Office National des Transports, ONATRA.

AGENT: See "Matadi".

BOMA: 05.51 S. 13.03 E.

DOCUMENTS: See "General" before first port.
PILOTAGE: Port is situated on the right bank of river, about 44 mile above pilot station at Banana.

Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banan and requesting Pilot. Sailing for Banana from 0600 hrs. till 1600 hr Sailing for Matadi from 0500 hrs. till 1600 hrs.
RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating rive varies between 20 ft. to 27 ft. according to local conditions and shou be checked with Port Authority in advance.
HEALTH: Quarantine Officer boards on arrival. All crew membe require valid cholera vaccinations and yellow fever inoculatio certificates.
TUGS: 2 tugs of 200 and 300 h.p. available to assist berthing.
BERTHING: Total quay length 450 m. with 3 berths alongsid Depth of water at the quay, 8 m. at low water. Maximum current at th berths is 3 knots.
STEVEDORES: See "General" before first port.
Port Equipment:

6 electric cranes on rails, capacity 3 – 6 tons.
2 steam cranes on rails, capacity 7.5 ton at 6 m. (5.0 ton at 10 m.)
5 banana conveyors.
1 electric crane, capacity 6 tons.
8 forklifts.
5 tractors and 40 trailers and carts.
1 Palm kernel elevator.
1 Automatic grab.
2 Hyster carry cranes.
7 barges, capacity 100 tons.
1 pontoon, capacity 75 tons.

FRESH WATER: Available from quays, suitable for drinking.
FUEL: See "General" before first port.
MEDICAL: Doctors and hospital facilities available.
REPAIRS: No facilities.
HOLIDAYS: See "Matadi".
GENERAL:
Exports: Logs and timber, plywood, veneerwood, coffee, cocoa, rubbe bananas, palm kernels, oils, cakes, about 8.8% of the total exports o the Zaire.
Imports: Various. About 2.5% of the total tonnage imported into Zaire
Current at Quays: The currents of the river vary from berth to berth an depend upon the low and high level of the water with sometimes advers currents and still waters.

Maximum speed at high level: 3 knots.
Minimum depth at the lowest level: 8 m.

AUTHORITY: Office National des Transport – ONATRA.

MATADI, (including Ango-Ango): 05.49 S. 13.27 E.

(See Plan

DOCUMENTS: 7 days before arrival of vessel the following must be i the hands of the Agent:

4 Manifests (detailing explosives, general cargo, heavy lifts).
3 Stowage Plans.
6 copies of Bills of Lading.
1 Freighted Manifest.

On arrival:

Maritime Declaration.
Ship's Register.
3 Crew Personal Effects Lists.
2 Stowage Plans.
1 Freighted Manifest.
3 Lists of Ports of Call.
7 Passengers Landed.
7 Passengers in Transit.
5 Crew Lists.
5 Kroo Boys Lists.
2 Provisions Lists.
4 Individual Manifests.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Radio "Mariti Banana" 24 hours prior arrival giving ETA at Banana and requesti Pilot. Pilot boards at Banana Pilot station. Distance from Banana t Matadi about 75 miles. Sailing for Banana from 0600 hrs. – 1300 hrs 1400 hrs., depending on vessel's speed. Deadline for passing Bom 1600 hrs. Sailing for Boma from 0500 hrs. – 1600 hrs.
RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigati Zaire River varies between 20 ft. and 27 ft. according to local conditio and should be checked with the Port Authority 3 days in advanc Berthing at Ango-Ango up till 1800 hrs. only.

MAX. SIZE: Controlled by draft in river. Max. draft Berth No. 1 is 23 ft. – 24 ft.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid cholera and yellow fever inoculation certificates.

TUGS: "Viva" 1,700 h.p., "Inga" 850 h.p., "Boma" 250 h.p., "Banana" 800 h.p. and "Soyo" 220 h.p.

BERTHING: At Matadi. Total length 1,728 m.

Pier 1 – 149 m.
Pier 2 – 161 m.
Pier 3 – 155 m.
Pier 4 – 158 m.
Pier 5 – 156 m.
Pier 6 – 176 m.
Pier 7 – 188 m.
Pier 8 – 149 m.
Pier 9 – 167 m.
Pier 10 – 143 m.

Piers No. 5, 6 and 7 for full container vessels.

Minimum depth at Piers 8 and 10 is 10 m.

In addition there is a berth length 400 m. for barges.

At Ango-Ango: Length of pier 150 m. Presently used for discharging and loading flammable goods and explosives.

UNLOADING RATE: 800 tons to 1,000 tons of general cargo per day of 3 shifts.

CRANES:

44 Cranes (Electric and hydraulic) on rails	3 – 6 tons	
1 Derrick Fixed	*50 tons	(Pier 4)
1 Bridge Crane	5 tons	
6 Electric Cranes	3 – 6 tons	
2 Electric Cranes	10 tons	
3 Electric Cranes	6 tons	
1 Floating Crane	14 tons	

*Actual capacity 34 tons.

BULK HANDLING FACILITIES: Palm oil is stocked by 4 companies in Matadi, 3 of which have pipe-lines to a main quay. The palm oil installations of CCP are at Ango-Ango where ships must berth at Sep Zaire pier. Vessels handling Sep Zaire cargoes are given priority at this pier and in case of unavailability of berth, palm oil would be loaded by barge of 260 tons capacity at Matadi.

Palm kernel oil is also loaded at Berths No. 2 – 9 and Palm Oil at Berth Nos. 2 – 8 in Matadi.

P.L.Z. (Plantations Lever au Zaire) capacity	13,450 tons
AMATO-Freres	3,700 tons
MADAIL	2,340 tons
C.C.P.	3,627 tons

Cereals discharged by suction at Berth No. 9. Rate 1,000 t.p.h.

BARGES/EQUIPMENT:

Barges:

2 Pontoons N.T. 41 tons each
8 Pontoons N.T. 75 tons each
1 Lighter N.T. 91 tons
2 Lighters N.T. 99 tons each
1 Tankbarge N.T. 279 tons
19 Lighters N.T. 339 tons each
1 Lighter N.T. 438 tons
11 Lighters N.T. 487 tons each
1 Lighter N.T. 514 tons
1 Lighter N.T. 522 tons
10 Lighters N.T. 557 tons each
2 Landing craft 875 tons each

Equipment:

28 Tractors and 242 trailers and carts
71 Forklifts with a maximum capacity of 2,500 kilos
2 Roller bridges 30 tons
3 Fork conveyors
34 Platforms × 20 ft.
6 Platforms × 40 ft. (Unilock)
1 Pushwagon tractor
Grain Elevators (Midema)

DENSITY: Fresh water.

STEVEDORES: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

TANKERS: Discharge at Sep Zaire pier at Ango-Ango or Matadi. If lightening necessary before berthing, this can be effected at Ramler Buoy, 17 miles above Banana. No tank-cleaning facilities. No fresh water.

Also see "Shipmaster's Report" dated September 1990.

FRESH WATER: Delivery aboard the ship through valves and at each pier. Maximum daily capacity 200 tons. Delivery takes place according to the quantity asked for and usually during night.

Delivery cannot be done at the loading berth of Sep Zaire at Ango Ango.

Suppliers need 48 hours' notice. It is therefore highly recommended that Masters cable their needs well in advance to Agent and/or through Owners.

FUEL: See "General" before first port.

GANGWAY/DECK WATCHMEN: Recommended.

Piracy: Acts of piracy have taken place in the port.

REPAIRS: Small repairs possible at railway workshop.

HOLIDAYS: *Legal Holidays in Zaire – 1989:*

1st January	New Year's Day
4th January	Martyrs of Independence
1st May	Labour Day
20th May	Anniversary of the M.P.R.
24th June	Money Day
30th June	Independence Day
1st August	Parents' Day
14th October	Zaire Youth Day
27th October	Zaire Day
17th November	Army Day
24th November	Anniversary of the New Regime
25th December	Christmas

GENERAL: *Currents at the quays:*

The currents of the river vary from berth to berth and depend upon the high and low levels of the water with sometimes adverse currents and still waters. Difference between high and low level of the river is approximately 5.50 m.

Maximum speed at high level: 6 knots.

Minimum depth at lowest level: Minimum 8 m. at low water and minimum 10 m. at low water at the new Kala Kala quays.

Exports: Logs and timber (plywood, veneerwood), coffee, cocoa, rubber, copal, bananas, manioc, groundnuts, palm kernels, oils, cakes, fibres, cotton and copper.

Port Equipment and Accommodation: Matadi is the only Zaire port handling the despatch of export products originating from the interior and the import of products destined to Zaire (excluding Boma which is of minor importance and only serves the Mayumbe area).

About 90% of the tonnage in – and outward goes through Matadi at the head of the S.N.C.Z. railroad from Matadi to Kinshasa. The latter locality being a handling and concentration centre of the goods directed to or coming from Matadi.

SHIPMASTER'S REPORT: January 1981.

Documents and papers required on arrival Matadi:

7 Crew Lists.
2 Maritime Declarations of Health.
7 Passenger Lists (even if nil).
5 Ports of Call Lists.
4 Arms and Ammunitions Lists (even if nil).
4 Narcotic Lists.
3 Stores Lists.
2 Crew Customs Declarations.
1 Vaccination List (Cholera/Yellow Fever).
4 Animal List. (even if nil).

Following documents have to be shown to the Port Authorities:

Classification Certificate.
Ship's Register.
Derat Certificate.
Certificate of Tonnage Measurement.
Cargo Ship Safety Construction Certificate.
Cargo Ship Safety Radio-telegraphy Certificate.
Cargo Ship Safety Equipment Certificate.
International Load Line Certificate.
The official Log Book of the vessel and the Articles.

The number of crew written in the Crew Lists will be checked with the entries in the Articles.

Shore Leave: Each crew member receives a shore pass without particulars, which has to be returned before departure of the vessel. Fines will be imposed if shore leave pass is lost.

SHIPMASTER'S REPORT: August 1982.

As far as I could ascertain the only point in the Congo River where one can expect currents of 12 knots is in the "Devil's Cauldron" between Matadi and Ango-Ango. The rainy season is Jan./Feb. and the dry season June/July. The average current in the rainy season is 4 knots and in the dry 3 knots.

Tankers and other vessels who clear at Banana generally must go through the same procedure again at Ango-Ango or Matadi. A complete set of papers is expected as though it is the first entry into the country.

SHIPMASTER'S REPORT: September 1990.

Ango-Ango: Vessel discharged refined oil products.

There was no attempted theft whilst in this port. The people are as friendly as one could wish to meet, and having been ashore over the weekend, the "run ashore" could be described as excellent without any risk of violence, to any crew member. The Port Authorities and Officials, though numerous, were efficient and helpful, as were the Agent and the plant personnel. The plant itself was well run and efficient.

On arrival off Zaire, the vessel had to wait 5 days whilst cargo payment was finalised. This problem is, I believe, not uncommon.

Due to entries in the Pilot Book supplement, the vessel stayed offshore, in case of piracy. This is in fact wholly unnecessary, and on confirmation of entry we went into anchor.

I anchored about 2.5 miles West of Moita Seca. It is the end of the dry season at present. I estimated current was running at between 3 knots and 4 knots in the river, but at this anchoring position, there was little or no current. Good holding ground was found here in about 50 ft. of water.

Pilot boarded off Banana Creek at exactly 0600 hrs. There were no formalities conducted here. Vessel berthed at 1500 hrs. Our charts were corrected up-to-date, but the rapid changes of the river meant that the channel, as shown on B.A. Chart No. 634, has altered completely, and is doing so all the time. The channel was well buoyed, Pilots are Belgium trained and of good standard. Pilots change at Boma both inbound or outbound, but, I believe, will do the entire pilotage when a shortage of pilots exists.

The Ango-Ango Terminal is managed by a former Belgium ship's master, who is friendly and very helpful. Having read the entry in the "Guide", he informed me that he can supply all grades of bunkers. The pontoon system at the berth is the same, there is little strength to the current at the berth, though a counter current exists, causing sets off the berth. Berthing was much easier than I anticipated, though the ropes had to be tied together to reach the shore. The boatmen have a winch system to pull the vessel's ropes ashore, two at a time. Vessel made fast with 2 head ropes, springs, and 2 stern lines and springs. There was no problem with the vessel whilst alongside, due to the strong current in the river.

Fresh water was available by meter from the shore, but we were advised that it had to be boiled prior to drinking.

Pilotage is only by daylight. On departure, vessel must leave the berth by 1300 hrs., or wait till daylight the following day.

Fresh stores were abundant, other stores were available, including meat of a good standard. However, a lot of items are expensive. A chandler is available, but if there is time, I would suggest purchase of stores direct from Matadi market.

Discharge of oil products was about 300 tonnes per hour, but lube oil was slow with a high back pressure, and a discharge rate at times of only 80 cu.m./hr. was obtained.

Communications are poor. We had to keep owner's informed by the ship's telex. At no time were we, prior to arrival, able to communicate with Zaire by telephone or telex.

ETA, arrival details, etc. were passed by telegram to Banana Radio on 500 kHz., this station seeming only to be in range 3 days prior to arrival. However, this route seemed to be successful. I am informed that any telephone contact with Europe is impossible. Banana Radio will only pass messages.

Agent's Notice:

1. Documents required from Master on Arrival:

(A) Clearance of the last Port of Call.
(B) 7 copies Crew List.
(C) 5 copies Arms and Ammunition List.
(D) 7 copies Passengers List.
(E) 5 copies Crew Declaration (Personal Effects).
(F) 5 copies Ports of Call List.
(G) 5 copies Stores List.
(H) 4 copies Narcotics List.
(I) Ship's Certificates:
    Load Line Certificate.
    International Tonnage Certificate.
    Cargo Safety Equipment Certificate.
    Register Certificate.
    Safety Construction Certificate.
    Radio Certificate.
    Derat Exemption Certificate.
(J) Loading/Discharging Documents.

2. Documents required from Port Authorities on Arrival/Departure:

Free Pratique.
Clearance.

3. To be filled/signed by Master:

1 set of the Harbour Master's Declaration.
1 set of "Arrival Conditions".

BUCHANAN

(ORE LOADING QUAY)

1. Minimum reach of shiploader outside fendered quayside = 4.50m
2. Maximum reach of shiploader outside fendered quayside = 23.0m (incl. throw)
3. Max. possible beam of ship with 5m symmetrical spout trimming across hatch = 43m
4. Aftermost position of stern, when draft aft exceeds 9.0m
5. Foremost position of bow for acceptable mooring to anchor block
6. Any hatch located more than 245.0m from extreme stern must be loaded before draft aft exceeds 9.0m
7. Min. advisable clearance under keel: $c = \frac{3B \text{ ft.}}{125}$ (B = ship's beam in feet)
8. Max. advisable draft (cargo completed on high tide) is 41½ – 42½ ft. depending on height of tide and required clearance under keel. Ships drawing 39 feet can be handled at all times
9. Free board height under shiploader should not exceed 15m

NOTE: Information on this drawing is given as advice only and does not constitute a guarantee, that ships of indicated max. dimension can always be loaded. In addition, several other factors like trimming, ballasting and deballasting, stresses in the hull etc must be taken into account by the owner or master of the ship.

BULLEN BAY

CURACAO OIL TERMINAL

THROUGHPUT:	Transhipment	1,200,000 barrels per day
	Refinery import	250,000 barrels per day

JETTIES:
- 1 – 500,000 DWT tanker jetty
- 1 – 350,000 DWT tanker jetty
- 1 – 250,000 DWT tanker jetty
- 2 – 100,000 DWT tanker jetties
- 1 – 70,000 DWT tanker jetty
- 2 – Tugboat jetties

TOTAL TANK CAPACITY – 17,750,000 barrels

1	1,000,000 barrels capacity	–	1,000,000
16	750,000 barrels capacity	–	12,000,000
6	375,000 barrels capacity	–	2,250,000
38	Small tanks capacity	–	2,500,000

PIPELINES: Main track consists of 5 strings of 36" pipe. The jetties carry 2 strings of 36" pipe in a loop. The loading rate is up to 12,000 tons per hour. Tankers' discharge rate is up to 25,000 tons per hour.

DEBALLASTING: Capacity 4,000 tons per hour per jetty. Ballast treatment produces affluent of less than 20 parts per million (20 ppm) oil content.

TUG SERVICE: Two tugs of 4,500 h.p. with 50 tons bollard pull each. One tug of 2,500 h.p. with 35 tons bollard pull.

HELICOPTER PILOTAGE

SHIP MANOEUVRING FOR THE TRANSFER:

In deciding what heading the vessel should be on, several factors have to be taken into account. These include..

- clear areas
- ship movement
- area of vessel visible to helicopter during transfer (for the hover reference)
- relative wind

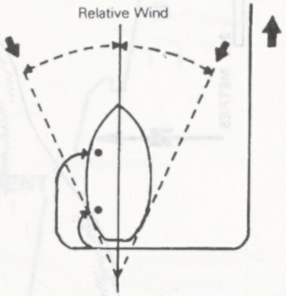
THE RELATIVE WIND IS MORE IMPORTANT THAN THE TRUE WIND DURING TRANSFER

The helicopter Pilot flies and the winching takes place from the starboard side of the helicopter. The helicopter always positions itself for the transfer so that it is hovering into the relative wind (or nearly so).

Ideally, and **in general terms,** the best direction for the relative wind is (but depending on the other factors listed above) either with the wind 0-20 degrees on the port bow or 0-20 degrees on the starboard quarter.

By way of example, two common situations are described.

A container vessel arriving - wind from northerly quarter (ignoring ship movement factors).

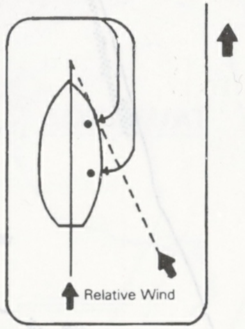


Relative Wind

1. Communications established
2. Winching zone selected
3. Heading and speed is selected so relative wind is 0 to 20 degrees on port or starboard bows
4. Helicopter will circuit vessel and come up on vessel's port side.
5. with relative wind on port side, helicopter is operating in 'clear' air and winching zone can be selected forward or aft.

NOTE: If the area selected is in the forward port part of the vessel a RELATIVE wind from ahead to 20 degrees on the starboard bow may be requested as this will allow the helicopter to hover with his tail rotor clear of the ship. If the helicopter is working on the port side aft, then the relative wind should be on the port bow.

Vessel arriving with wind in southerly quarter (ignoring ship movement factors).



Relative Wind

1. Communications established
2. Winching zone selected
3. Heading and speed selected so that relative wind is 0 to 20 degrees on starboard quarter.
4. Helicopter approaches vessel, may do a circuit and will approach from ahead.
5. With relative wind on vessel's starboard quarter, helicopter is in 'clear' air and helicopter can select areas on fo'c'sle or on vessels starboard side.

With smaller vessels a course is usually selected which has the wind and sea conditions from astern to reduce ship movement.

This also applies in strong wind conditions with larger vessels, as it also reduces the strength of the relative wind.

IN ANY CASE, THE HARBOUR AND HELICOPTER PILOT WILL CONFER WITH THE SHIP'S MASTER TO SELECT THE BEST POSSIBLE HEADING

REFINERY AREA

NOTE:

1 No anchors to be used within shaded area (Except in emergency situations)

2 Discuss method of approach with Harbour office (Channel 14)

POLLUTION : A submersible oil boom has been installed enclosing the oil pier. Normally, the boom rests on the sea-bed, but when needed it will be raised to the surface using compressed air.

The oil boom and its system of anchorage will be damaged by vessels' anchors. In order to ensure that the oil boom is operable at all times, and to avoid expensive repairs, which will be charged to the ship responsible for the damage, great care should be taken in connection with manoeuvres along the Slagen pier, which will require the use of anchors.

The drawing of the pier shows the position of the oil boom and the anchorage system. Except for emergency situations, anchors should not be used within the shaded area.

All manoeuvres to and from berths should be discussed with the Harbour office (Slagen Harbour Radio, Channel 14). The Harbour Office will give you information regarding current strength and setting.

Approach to Berth 2, and Berth 3 if Berth 2 is not occupied, is facilitated by the fendered sliding front shown on the drawing.

Before anchoring tankers should contact Fahal Control on VHF 12 for a designated anchoring position.
In all cases tankers are required to anchor at least 2 miles West of Fahal Island and at least 2 miles clear fo the Omani coastline.

Note 1. Pilot will advise boarding position on V.H.F. radio prior to arrival.
2. Vessels should not enter prohibited area unless accompanied by Pilot. If proceeding to anchorage pass northward of Fahal Island.

PUERTO ARMUELLES

STAINLESS STEEL SHACKLE FOR LINES WITH TAILS

Tails, if used, should preferably be made of nylon line (3 strand construction should not be used) about 11 m. long overall, and have a breaking strength at least 25% greater than the MBL of the wire to which they are attached. They should be replaced at least every 18 months unless experience and/or inspection indicates more or less frequent replacement is necessary.

No repairs to main engines allowed while vessels are alongside the pier.

Mooring ropes shown above are the safe minimum number for average weather conditions.

If necessary, additional mooring ropes may be required by the Pilot of ASESA Harbour Master.

Nylon ropes may be supplied by ASESA if any vessel does not have a sufficient quantity of suitable ropes for safe mooring.

Mooring ropes must be carefully tended to hold the vessel close to the dolphins at all times.

Mark to show forward limit of export tanker.

NOTES

1. Ropes number 1 & 4 forward and ropes number 1 & 2 aft are the main departure ropes. Ensure that these can be cast off last.
2. If ropes number 8 forward and number 7 aft cannot be used then rope number 4 forward and number 2 aft will have to be doubled up.
3. The mooring lay-out shown is the minimum requirement.

X

For vessels proceeding to Istanbul, or any other ports within the Sea of Marmara or Gulf of Izmit, pilotage is compulsory from the southern entrance. The same applies for vessels proceeding outwards. Pilotage is not compulsory for vessels proceeding from Gelibolu to Darica, but is compulsory within the Gulf of Izmit. For through traffic pilotage is not compulsory for the Bosphorous and Dardanelles.

All pilot stations monitor V.H.F. channel 16

Mooring Pattern

4 Head Lines
2 Breasts (Short Springs)
2 Springs fore and aft
4 Stern Lines
2 Breasts (Short Springs)
2 Springs (one spring leading aft)

1. Tension winches should be checked at each turn of tide.
2. Ropes and wires should be kept tight, particularly at L.W. slack.
3. Advice on mooring, tugs, weather conditions etc, is available from the Jetty Control Office.
4. Ore vessels must at all times have an aft leading spring which must be kept tight so as to prevent any movement along berth.
5. Tugs are at the discretion of Master and Pilot(s).

MOORING PLAN — QUEEN'S DOCK

For 12,000 tons (and upwards) deadweight tankers berthed at Jetties 2,3,4,5

These are the minimum requirements which may be varied at the discretion of the Docks Supervisor/Berthing Master to suit the size of ship and existing or impending bad weather conditions.

Rope messengers are attached to the shore wires and are passed on board from the Jetty or attendant mooring boat.

Shore stern wire must not be shipped through the centre fairlead

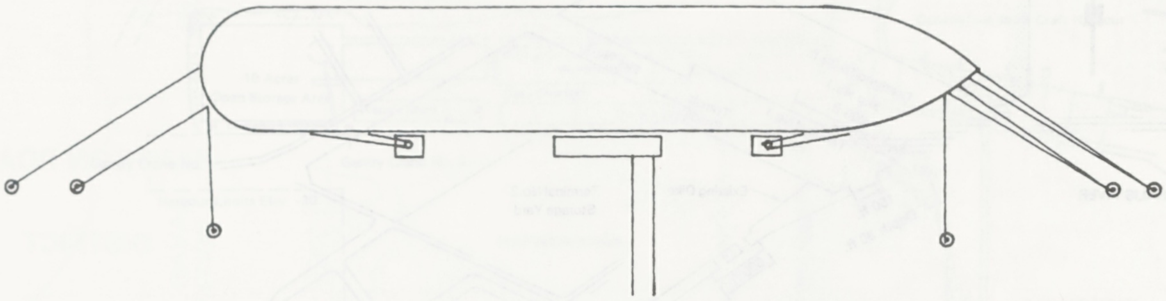
GOOD HOPE

GATX



The dock is constructed of steel piles with a concrete floor and consists of a central platform and two breasting dolphins. Both the platform and the breasting dolphins have a wood faced steel pile fender system with moulded rubber impact energy absorber installed between the outer fender and the main dock structures.

MISSISSIPPI RIVER

KEY PLAN

Mississippi River Crossing Channels

The project depth for crossing channels is 45 ft. for a width of 500 ft. to mile 150 AHP and 40 ft. above.

The controlling depths are published in Navigation Bulletins issued periodically by The New Orleans District Corps of Engineers, New Orleans, Louisiana.

Crossing channels may be marked by buoys during Low Water.

Pollution Reports

Report all spills of oil and hazardous substances to The National Response Center via 800-424-8802 (toll free), or to the nearest U.S. Coast Guard facility if telephone communication is impossible (33 cfr 153).

Warning

The Prudent Mariner will not rely solely on any single aid to navigation, particularly on floating aids. See U.S. Coast Guard Light List & U.S. Coast Pilot for details.

Caution

Mariners are warned that logs and other floating debris are constant dangers to navigations. Night travel by small craft is not recommended because of the hazard of floating obstructions.

MOORING ARRANGEMENTS FOR
50,000 DWT VESSELS & ABOVE

NOTE: Due to tidal currents, near proximity of passing vessels, and exposure of your vessel to Westerly winds, particularly in light condition, the following mooring arrangement is required.

Double spring lines to be used both forward and aft. Both forward and aft springs may lead through the same chocks at their respective locations, however, each spring line should be secured to a separate bollard on the dock. The bow breast line deadman is approximately 137 m. from the vessel. A manila or synthetic line must be used as it is impossible to pull a wire to the shoreline here. A shore messenger will be used to pull this line to the deadman.

NOTE: Lines, numbered 1,2,3 from foremost isolated mooring cell and, lines, numbered 4,5,6 from the isolated mooring cell positioned southward of the jetty, are shore based polypropylene moorings. All other lines have to be provided by the vessel.

NIKISKI

UNION CHEMICAL DOCK & MINERALS DOCK

Flood and ebb currents are usually parallel to the dock at rates of 1.5 – 6 knots.

Gangway available on the dock.

Berth requires between 14 and 24 mooring lines. Extra lines can be hired from the Pilot Station if necessary.

● Quick release hook.

PALM BEACH

Legend:
The Port of Palm Beach is located on a saltwater sound known as Lake Worth and lies 1⅓ miles from the 37-foot contour of the Atlantic Ocean, to which it is connected by an artificial cut at the North end of Lake Worth known as Lake Worth Inlet.
(1) Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning Southwesterly to the terminals, 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin. (2) 1,400 ft. by 1,310 ft., adjacent to the port terminals on the West shore. Depth of the channel and turning basin is 35 ft. (3) Slip No. 1 is 690 ft. in length with water depth of 27 ft. (4) Slip No. 2 is 650 ft. in length with water depth of 35 ft. (5) Extension of turning basin with water depth of 25 ft. (6) Three Ro/Ro ramps and the New North Wharf, which together comprise 1,054 ft. in length.

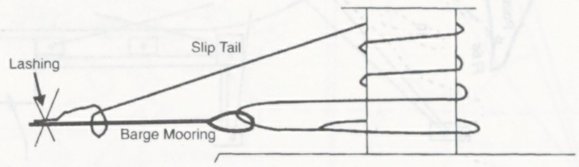
SELF UNLOADING BARGE "NOATAK"



Slip Tail
Lashing
Barge Mooring

A Nylon slip tail with one eye splice only will be passed from the barge (or tug) to the ship and made fast in the manner illustrated here.
The system is devised to minimize the rope work on the ships side and permit quick release in case of emergency.

RIVERHEAD

SUGGESTED MOORING PLAN — NORTH BERTH

The diagram above represents a suggested mooring arrangement for the North berth of the Northville Industries Corporation tanker platform at Riverhead, New York.

The ship plan represents a 30,000 to 40,000 d.w.t. handy size tanker with bridge amidship.

Mooring operations at Tosco are conducted as follows:

1. With the vessel alongside the breasting dolphins, run spring lines fore and aft to maintain desired position. Spring line leads must provide adequate scope.
2. The launch will carry a messenger from the mooring dolphins to the bow or stern to run head, stern, and breast lines. The line crew will work one end of the ship at a time, as requested by the Master.
3. Each mooring line should be secured to an individual set of bitts. Placing two lines on one set of bitts by taking round turns should be avoided.
4. All lines must be tight, and the mooring plan adequate for all anticipated weather conditions before the transfer arms will be connected.
5. The ship's gangway is not used at this terminal.

RIVERHEAD

SUGGESTED MOORING PLAN — SOUTH BERTH

The diagram below represents a suggested mooring arrangement for the South Berth of the Tosco Industries Corporation tanker platform at Riverhead, New York.
The ship plan represents a 30,000 to 40,000 DWT handy size tanker with bridge amidship.

Mooring operations at Northville are conducted as follows:

1. With the vessel alongside the breasting dolphins, run spring lines fore and aft to maintain desired position.
2. The launch will carry a messenger from the mooring dolphins to the bow or stern to run head, stern, and breast lines. The line crew will work one end of the ship at a time, as requested by the Master.
3. Each mooring line should be secured to an individual set of bitts. Placing two lines on one set of bitts by taking round turns should be avoided.
4. All lines must be tight, and the mooring plan adequate for all anticipated weather conditions before the transfer arms will be connected.
5. The ship's gangway is not used at this terminal.

This entry supersedes the entry on Page 18.

PALANCA: 06.58 S. 12.24 E. (See Plan)

LOCATION: The loading station is located 230 km. N.W. of Luanda and approximately 20 nautical miles from the nearest coast and loading terminal.

The Floating Storage and Loading Terminal "Palanca": Lat. 06° 58′ 07″ S., Long. 12° 24′ 03″ E. Water depth: 44 m.

The Auxiliary Loading Buoy (CALM): Lat. 06° 56′ 57″ S., Long. 12° 23′ 43″ E. Water depth: 42 m.

DOCUMENTS:

Documents required by Immigration on Arrival:

Immigration (DEFA) will check passports against the Crew List. Following documents are required:

5 copies Crew List.
1 copy Ports of Call List.
5 copies Passenger List.
5 copies Animal List.
5 copies Arms List.
5 copies Narcotics List.
For further information Shipping Agent should be contacted.

PILOTAGE: Pilotage is carried out by a Pilot representing Elf Exploration Angola, who will remain on board during the entire duration of the call.

The signals for contacting the Pilot are those set out in the International Code; the Pilot may be contacted by VHF Channel 16.

Pilotage is obligatory.

The Pilot shall take control of the vessel approximately 2.2 nautical miles in the 330° direction (N.N.W.) of the Loading Station at: Lat. 06° 55.3′ S., Long. 12° 22.5′ E.

It should be recalled that "piloting consists of assistance given to Masters in steering vessels upon entry into and departure from the piloting zone".

It should be stressed that the Master remains at all times entirely responsible for any damage or accidents resulting, whether at night or day, from the steering or manoeuvering of his vessel.

ANCHORAGE: Vessels coming to load at Palanca, may anchor in 45 m. of water, 2.2 nautical miles N.N.W. from the Loading Station, at Lat. 06° 55.3′ S., Long. 12° 22.5′ E.

It is prohibited to anchor in the Prohibited Area within 1.5 miles of the line of pipes connecting PAL F2 to PAL P1, and from PAL P2 to the Storage Vessel and at least 1.0 nautical miles from the Loading Station.

The sea floor is sandy and of good consistency for anchoring. Certain outcroppings of flat rocks can delay engagement of the anchor.

RESTRICTIONS: There will be no mooring after 1500 hrs. local time.

If tanker arrives after 1500 hrs. local time, Pilot will board the following day at 0700 hrs. local time.

MAX. SIZE: The maximum allowable size at the Palanca Terminal is 150,000 d.w.t. The Master of the lifting vessel must comply with international regulations concerning freeboard.

Also see "Loading".

NAVIGATION AIDS: The production facilities of Elf Exploration Angola are protected by an area of prohibited navigation which extends 0.5 miles around all fixed installations.

Access to this area is authorised only to vessels working for or authorised by Elf Exploration Angola.

This prohibited area is marked at night by white lights, emitting the letter 'U' every 15 seconds, installed on the corners of the platforms and on the front of the storage tanker "Palanca".

Average height of the lights – 19 m.
Range – 5 miles.

In the event of reduced visibility (less than 1 mile) the floating storage vessel emits audible signals in accordance with the international collision regulation for warning of approaches at sea, consisting of the letter 'U' every 30 seconds.

Platforms are located as follows (August 1992):

Production Platform Palanca (PAL P1): Lat. 06° 58′ 23″ S., Long. 12° 22′ 33″ E.
Drilling Platform (PAL F2): Lat. 06° 56′ 43″ S., Long. 12° 22′ 35″E.
Flare Platform (PAL T1): Lat. 06° 58′ 13″ S., Long. 12° 22′ 30″ E.
Flare Platform (PAL T2): Lat. 06° 58′ 24″ S., Long. 12° 22′ 38″ E.
Production Platform (PAL P2): Lat. 06° 58′ 25″ S., Long. 12° 22′ 40″ E.
Production Platform (PAC F1): Lat. 07° 05′ 59″ S., Long. 12° 20′ 19″ E.
Flare Platform (PAC T1): Lat. 07° 05′ 47″ S., Long. 12° 20′ 13″ E.
Production Platform (BUF F1): Lat. 07° 07′ 05″ S., Long. 12° 22′ 10″ E.
Production Platform (PAC F2): Lat. 07° 07′ 42″ S., Long. 12° 20′ 55″ E.
Production Platform (IPS F1): Lat. 07° 03′ 56″ S., Long. 12° 24′ 50″ E.
Production Platform (PAC F3): Lat. 07° 04′ 20″ S., Long. 12° 19′ 55″ E.
Production Platform (IMP F1): Lat. 07° 00′ 34″ S., Long. 12° 22′ 43″ E.

A sealine of 2,600 m. links the production platform (PAL P2) with the Floating Storage "Palanca".

A sealine of 3,600 m. links the Production Platform (PAL P2) with the Auxiliary Loading Buoy.

A sealine of 2,164 m. links the Floating Storage "Palanca" with the Auxiliary Loading Buoy.

Additional rigs may operate in the vicinity of these platforms at any time. Consequently vessels coming to load at Palanca must refer to radio messages received prior to arrival.

HEALTH: Health inspection is carried out by the chief doctor of the Border Health Police.

The Health Authority of the Port of Soyo may grant Free Pratique by radio.

In the event of a contagious illness on board, Health Authorities must be advised by radio before arrival.

RADIO: *Arrival Advice:* Vessels should advise their ETA by radio 72, 48 and 24 hours in advance to Elf Exploration Angola.

Thereafter, they should give notice of any significant changes in their expected hour of arrival.

Vessels shall address their ETA to:

Elf Exploration Angola
Rua Marechal Broz Tito, No. 13, CP 2610, Luanda.
Telephone: 390293, 390343, 390393
Telex: 4130-4132 ELFANG

Palanca: Floating Storage Vessel.
S.S.B. monitoring (voice) on 6,342 kHz from 0700 hrs. to 1700 hrs.
VHF monitoring on Channel 16 permanently.
Monitors satellite communications permanently:
Via Atlantic satellite (See "Notice of ETA").
Telephone No.: (871) 111.07.77.
Fax No.: (871) 111.11.76.
Telex No.: 111.07.77 FJBZ.

The following is part of a message sent to a vessel in August 1992.

Quote

Notices of ETA:

Please report to Palanca Offshore loading facilities 72 hours in advance of ETA, and again 48 hours and 24 hours before arrival.

Please send telex to Palanca Terminal/FJBX.

Elf Exploration Angola, Attn. Mrs. E.Gabriel DPRO/DEV/CB.

(A) Ship using INMARSAT:
Dial: 005811110777+ (FJBZ)
009914130+, 009914132+ or 009913513+ (A/B ELFANG AN).

(B) Ship using Radiotelex:
Dial: 05811110777
09914130, 09914132 or 09913513.
In respect of the shore station procedure.

(C) Ship using Wireless Telegraphy:
1. Address all messages to "Bureau Porthisheadradio".
2. First two words of text: "TLX 09914130 ELFLUANDA", and: TLX 0581111077 Terminal Palanca/FJBZ.
3. Messages to be treated and abstracted on board at normal radio/land line rates to U.K.

Please advise (Terminal Palanca and Elf Exploration Angola):

Name of your Shipping Agent.
Name of Master.
Vessel's Flag and Call Sign.
Voyage Number when leaving Palanca after loading.
Destination and last Port of Call.
If loading can be initiated while deballasting. If not, advise required deballasting time.
Quantity of clean ballast and permanent ballast on arrival.
Confirm that your heating coils and tanks are sound and not leaking.
Your loading rate with 1×16 in. hose.
Revert with dimensions of your forward Panama Fairlead.
Confirm that cargo tanks will be under inert gas on arrival.
If you have received Owner's instructions regarding insertions or special mentions to be added on Bill of Lading. Please revert with your standard Carrier Alpha Code.
According to your instructions, when can loading be initiated (date and time).
Quantity of slops on board, and if "Load-on-Top Procedure" will be followed this voyage.
Revert with your vessel's experience factor calculated as follows:
Total of ship's figures for the last five voyages, divided by
Total of B/L quantities for the same voyages.
If any more information needed.

Unquote.

TUGS: Mooring is carried out by a work boat using personnel designated by Elf Exploration Angola.

This vessel is at the disposition of the tanker, under the instructions of the Pilot, during the duration of the tanker's manoeuvring and its stay at the loading terminal.

MOORING: Moorings at the loading terminal are furnished by Elf Exploration Angola. Consequently, the vessel should be prepared to take on board, the hawser as close as possible to the centre line of the vessel, the mooring line being composed essentially of 45 m. of 16 in. circumference nylon and 7 m. of 3 in. chain. This chain is intended to hold fast the nip of the hawser at the fairlead; and furthermore, in order to facilitate its taking on board, the hawser is furnished with an "in haul" of 10 in. circumference polypropylene, of approximately 200 m. in length.

The "in haul" is passed to the vessel by means of a tender. The vessel must prepare the messenger line for taking on board the "in haul" by the bow.

Weather and sea permitting, mooring will be undertaken between 0600 hrs. and 1500 hrs. In exceptional conditions, mooring can take place at night.

Unmooring shall take place as soon as loading is completed, whether day or night.

The port derrick should be rigged before arrival and have a minimum lifting capacity of 10 tons.

The port side manifold should be prepared for connecting the 16 in. hose.

BALLAST: Vessels should arrive with sufficient ballast and correct trim in order to be able to manoeuvre with safety; such ballast may not be less than 30% of the deadweight of the vessel. Deballasting may be carried out only with the agreement of the Pilot.

The storage facility at Palanca is not equipped with an oil separator. The vessel should therefore present itself with clean ballast.

Any vessel presenting itself with dirty ballast may be obliged to depart the loading terminal and any resulting delay shall be entirely for its account; the acceptance of the Notice of Readiness shall be appropriately adjusted.

The Master shall be responsible for overflow or leakage from the tanks or any other situation which can bring about accidental discharge of hydrocarbons.

The scuppers shall be plugged during the duration of loading.

Elf Exploration Angola shall not be responsible for any violation of international regulations.

LOADING: The Palanca Loading Station of Elf Exploration Angola is a single point bow mooring type.

The vessel shall moor at the bow with the Storage Vessel (tandem mooring) or with the hawser of the buoy (SPM).

The Storage Vessel is connected to a Turret Buoy by semi-rigid arms. This buoy is fixed to the sea floor by chains to 6 driven stakes. These anchoring chains extend to a radius of 490 m. around the buoy.

The Loading Buoy is a CALM buoy (Catenary Anchor Leg Mooring) fixed to the sea floor by 6×4.25 in. chains.

The depth of water at the Turret Buoy is 44 m. The Storage Tanker "Palanca" has a capacity of 274,000 metric tons, is 256.5 m. long, and 60 m. beam.

The water depth at the CALM loading buoy is 42 m.

The sealine (2,500 m. × 20 in. diameter) connects the "Palanca" Floating Storage to the production platform, the buoy is connected to the sealine by 1×20 in. hose line.

For loading, there are two possibilities:

(a) A 20 in. floating line ending in 1×16 in. line connects the bow of the storage vessel to the intake manifold of the lifting vessel at a length of approximately 250 m. from the bow.

(b) Dispatching of the production from the storage barge to the second Loading Station is made through a 30 in. sealine. A floating 20 in., 300 m. long, flexible line (16 in. end reduction) connects the loading buoy to the lifting tankers manifold.

The choice of the loading point shall be made by Elf Exploration Angola. The normal conditions at the loading stations are as follows:

Tankers of 40,000 d.w.t. to 150,000 d.w.t.

Liftings of 40,000 tons to 150,000 tons.

Exceptionally, the terminal may receive:

Tankers of up to 280,000 d.w.t. unballasted or half cargo, exclusively from the SBM buoy and with 10 days notice.

Liftings of up to 200,000 tons (programmed in advance according to Block 3 Rules).

The Palanca Terminal has the right to refuse these exceptions.

Notice of Readiness: Notice of Readiness is to be addressed to Elf Exploration Angola.

Connections: The loading of vessels is carried out by means of 1×20 in. flexible floating line of 256 m. in length, terminating in 2×16 in. hoses, 27 m. long. Connection to the manifold on board is carried out by means of a 16 in. flange (150 ASA.).

The operations to connect and disconnect the hoses will be executed by the mooring crew. During the entire duration of the vessel's stay at the Loading Station, the Pilot shall assure that a safety watch is kept on board. A representative of Elf Exploration Angola shall perform the function of Chief of Loading and remain in permanent contact with the storage vessel.

The work vessel shall remain at the disposal of the Pilot, and shall hold fast at the stern of the tanker under tow. A tow should be furnished to the work vessel at the stern of the tanker, permitting a permanent traction of approximately 10 tons – 25 tons, during tandem loading operations, and also at the loading buoy.

Loading: Loading can be carried out at a maximum rate of 12,000 cu.m.p.h.

Three loading configurations are possible:

Loading in tandem, maximum rate 8,000 cu.m.p.h.

Loading on the buoy, maximum rate 6,000 cu.m.p.h.

Loading simultaneously tandem/buoy, maximum rate 12,000 cu.m.p.h. (8,000 cu.m.p.h. tandem plus 4,000 cu.m.p.h. from the buoy).

Inspection of the tanks after deballasting and measurement of ullage after loading shall be done in the presence of the Pilot, representing Elf Exploration Angola.

Elf Exploration Angola shall place on board the vessel, 2 sealed (2 litres) samples representative of the cargo.

20 minutes before the end of loading, the tanker shall make contact with the storage vessel by VHF, so as to be able to stop the pumps at the appropriate moment.

The Master shall be entirely responsible for the valve manifold operations and for on board loading safety.

Palanca Crude Characteristics: (December 1991).

API @ 60° F.	38.10
Density in Vacuum @ 15° C.	829 kg./cu.m.
Pour Point	0° C.
Reid Vapour Pressure @ 37.8° C.	52 K. Pa

MEDICAL: In Kwanda (Soyo), there is a doctor who can attend to needs of primary urgency. Urgent health evacuations to Luanda are carried out by Elf Exploration Angola at the expense of the vessel.

The Agent of the vessel shall take charge of the evacuee upon his arrival in Luanda.

FRESH WATER: Not available

FUEL: Not available.

REPAIRS: The repair shops at Luanda have limited facilities, information can be obtained from ship's Agents.

AIRPORT: The airport is located 4 km. from the city of Luanda, there is on average 1 flight per day to Europe, except weekends.

TIME: GMT plus 1 hour.

WEATHER: The rainy season predominates in February, March and April.

The dry season and cool season extends two to three months in June, July and August.

Temperature of the Air: In the rainy season, the temperature of the air varies from 23°C to 30°C with a relative humidity of approximately 91%.

In the dry season the temperature varies from 18°C to 22°C with a relative humidity of approximately 86%.

Temperature of the Sea: On the surface, the temperature of the sea varies from 30°C at the start of the year to 20°C in the month of July.

Salinity varies from 28 to 35 grams per litre.

Visibility: During the rainy season, particularly February, March, and April, the rain limits visibility to 0.5 miles.

Tides at Palanca: The tides are diurnal, maximum height at Springs is 1.9 m. The average level is 0.95 m.

Winds: The dominant winds are from the South, generally less than 15 knots on the average. Strong winds have a short duration and blow from the East or S.S.E. in association with gales (70 km./hr.).

Currents: In the Palanca region, currents can be extremely variable in force and direction but the general dominant current, flows toward the N.N.W., its speed on the surface can attain 1.8 knots.

Swell: The predominant direction of the swell is from the S.S.W., the average height varies from 1.5 m. to 2.5 m. with a period of 12 seconds, the surface waves generated by local winds rarely exceed 2 m.

The swell is strongest from May to October and at maximum 2 to 3 days before Spring tide.

Pollution: It is forbidden to discharge cinders, flammable materials, objects and waste of any kind into the sea.

Any object falling into the sea should be reported to Elf Exploration Angola.

Elf Exploration Angola may attempt, at any time that it may consider appropriate, to fish such objects out of the sea. Such fishing out shall be undertaken at the expense, risk and peril of the party responsible.

Safety: The Master is solely responsible for safety on board his vessel.

During the entire stay at the loading station, the Master must: maintain on board sufficient personnel so as to be able to manoeuvre the vessel without risk and to put into action appropriate fire fighting equipment; maintain engines so as to be ready to manoeuvre; to attend to the hawser so as to assure good mooring without abnormal wear; to keep a watch over the floating hose so as not to subject it to any wear or chafing which might cause deterioration; to keep watch so that the vessel does not collide with the storage vessel, whether as a result of a reverse in current or a severe change in wind direction or for any other reason.

Territorial Waters: The sovereignty of the Popular Republic of Angola extends to a distance of 20 nautical miles from the shore line at low tide along the coast.

The Angolan authorities exercise fiscal, customs, health, and immigration control on the high seas contiguous to the territorial waters up to a distance of 200 miles.

Currency: The legal currency is the kwanza.

Storing: It is not possible to provision at the terminal.

Transport: The means of transport of Elf Exploration Angola cannot be utilised by the crew of vessels coming to load at Palanca. There is no regular transport between Palanca and Luanda.

AUTHORITY: Elf Exploration Angola, Rua Marechal Broz Tito No. 13, C.P. 2610, Luanda, Republique Populaire D'Angola. *Tel:* 390293, 390343, 390393. *Telex:* 4130, 4132 Elfang.

Argentina

GENERAL: (Also see Page 24)

HEALTH: *Cholera Prevention:* Agent's advice to vessels calling at Argentine ports:

If your vessel has called at South American Pacific Coast ports within the last 6 months prior to arrival at Recalada Pilot Station or Brazilian ports since 15th February 1992 (or first Atlantic port if applicable), the following anti-cholera measures must be strictly abided by and for sanitary inspection on arrival at first Argentine port of call:

All ballast (and bilge water if any) must be chlorinated at the ratio of 15 grams of granulated hypochloride per ton of ballast, and all ballast and bilge discharge valves must be sealed prior to arrival at Recalada (or Atlantic port, whichever applicable).

For passing on to the sanitary authorities, please radio or telex us the following:

Confirmation that ballast tanks/bilges are empty, alternatively quantity of ballast on board per tank.

Quantity of fresh drinking water expected on board on arrival.

Short description of vessels sewage system.

Usual Free Pratique request, stating number of crew, that nobody affected by any of the six pestilential diseases, that sanitary conditions of the vessel are good, signed Master's name.

If chloride insufficient on board, will arrange delivery at Zona Comun (ex-Buenos Aires Roads) (or at first Atlantic port).

Provided ballast water has been chlorinated, we can obtain permission from the authorities to pump out ballast after inspection in port, if so required.

Liquid chlorination is also acceptable.

RIVER PARANA: The following are extracts from telexes received by a Master from the vessel's Agent (September 1992).

1. Recalada Pilots do not charge overtime costs.
2. Depth between Km. 12 and Km. 42 of the Mitre Channel is 8.06 m. Navigation width at Km. 34.8 is 60 m.
3. The Master is the responsible party with regard to the decision as to where to anchor to await daylight. He should advise Pilot on this matter when Pilot boards. Pilot will then advise best location, so as not to obstruct navigation of other vessels.
4. Pilotage service is now privatised.
5. River Parana Ports: Pilots advise that max. sailing draft is 29 ft. 06 in. for vessels of 225 m. LOA, navigating downriver through Mitre Channel.
   NOTE: Agent recommends 28 ft. max. draft as vessels have gone aground and river is not being dredged.

Chile

GENERAL: (Also see Page 357) (See Late Plans)

CHILREP: Chilean Ship Reporting System:

The Chilean Ship Reporting System (CHILREP) has been established in accordance with the International Convention on Maritime Search and Rescue, 1979 (SAR Convention), which came into effect in June 1985, and requires signatories to the Convention to provide, amongst other actions, marine search and rescue (SAR) facilities for prescribed areas, and also recommends the establishment of a Ship Reporting System. Chile ratified the Convention in October 1981, and has accepted SAR responsibility for the area shown in the attached general instructions and CHILREP procedures (See "Plan").

The CHILREP is operated by the General Directorate of the Maritime Territory and Merchant Marine (DGTM y MM) which is a Directorate of the Navy. It is a "positive" system, that is, if a Position or Final Report is missed, the Maritime Search and Rescue Coordinator Centre or Subcentre will initiate checks to establish the Safety of the vessel. These checks are aimed solely at establishing whether a vessel is safe, and include broadcasts to shipping and communications with owners, agents or charterers. If these checks are unsuccessful, then search actions will be initiated.

Should you need any further information, please do not hesitate to contact the Head of the Maritime Search and Rescue Service (Tel: 258091. Telex: 230602 DGTM CL and 330461 DGTM CK. Fax: 252539).

Chile has an extensive coast where 5 Maritime Search and Rescue Coordination Centres (MRCCS) and 11 Subcentres (MRSCs) are located, fitted with modern maritime communication systems and facilities to carry out search and rescue operations. The responsibility area also covers the Drake Passage and an area which extends to the Antarctic, where weather conditions are generally adverse. There is an Antarctic Patrol stationed at such area during Summer months, in order to assist vessels which may require assistance and to combat oil spills.

Chile also has a LUT (Local Users Terminal) of COSPAS-SARSAT System (International Satellite System for Search and Rescue), which receives alerts from radio beacons in 406 MHz and 121.5 MHz.

Participation in this system is voluntary for foreign vessels and it began in December 1991.

Notwithstanding that participation in the system is voluntary, domestic regulations provide that every foreign vessel bound to a Chilean port must report her arrival at least 24 hours in advance. When foreign vessels navigate inland waters of the Chilean Republic, they must report their position at 1200 Z and 2400 Z. In all other conditions, the system considers a daily report between 1200 Z and 1600 Z.

FUNCTIONS OF THE MARITIME SEARCH AND RESCUE SERVICE:
The International Convention for the Safety of Life at Sea requires governments to ".... ensure that any necessary arrangements are made for the rescue of persons in distress at sea, around its coasts". The Chilean Government, being part to the Convention, established the Maritime Search and Rescue Service in December 1976.

The Maritime Search and Rescue Service depends on the General Directorate of the Maritime Territory and Merchant Marine which is the National Maritime Authority.

The principal function of this Service is the coordination of marine search and rescue activity within the area of Chilean responsibility.

The facilities are available to all seafarers whether they are private boating enthusiasts, commercial fishermen or professional seamen of the merchant fleets of the world.

The Service is operated 24 hours a day by officers with considerable marine qualifications and experience and specialised knowledge of search and rescue procedures.

Communications are the very heart of all search and rescue coordination, and the Service is well equipped with a network giving worldwide coverage.

CHILEAN SHIP REPORTING SYSTEM GENERAL INSTRUCTIONS:

1. **Introduction:**
   The CHILREP is a ship reporting system established in accordance with the International Convention for the Safety of Life at Sea and the Convention on Maritime Search and Rescue. Its objectives are:
   (a) To limit the time between the loss of a vessel and the initiation of search and rescue action, in cases where no distress signal is sent out.
   (b) To limit the search area for a rescue action.
   (c) To provide up-to-date information on shipping resources available in the area, in the event of a search and rescue incident.
   The coverage of CHILREP and the Chilean maritime search and rescue area, as advised to the International Maritime Organisation (IMO), are identical.
2. **Main Features of CHILREP:**
   On departure from a Chilean port or on entering the CHILREP area, a Sailing Plan (SP) is sent to the Communications Station which relays the information to the Service where a computerised plot is maintained for the vessel position. Position Reports (PR) are sent once a day between 1200 Z and 1600 Z, so that a report is received every 24 hours. Should a vessel at any time be in a position more than 2 hours steaming from the position that would be predicted from the last SP or PR, then a Deviation Report (DR) must be sent. Failure to do so will result in the search being concentrated in the wrong area in the event of a missed report, and the possibility that survivors from a striken ship may not be found. On arrival at the ship's destination or on departure from the CHILREP area, a Final Report (FR) is to be sent. CHILREP is a positive reporting system in that, should an expected report become overdue, actions which include worldwide communication checks, the alerting of ships in the vicinity and the launching of search aircraft, will be initiated.
   Dates and times contained in CHILREP reports are to be in Universal Coordinated Time which is indicatd by the suffix "Z".

CHILREP FORMAL COMPONENTS:
The following list shows all the CHILREP format components. The full list of components do not have to be included when sending CHILREP reports. Master should include those components shown in the examples given for each report, others may be included at the Master's discretion or when relevant to the type of report being sent.

The following format complies with IMO Resolution A.648(16) of 31st October 1989.

A. Vessel's name and call sign.
B. Date/Time of Position (UTC).
C. Position (Latitude and Longitude).
D. Geographical position (optional, to be used when sailing near the coast or inland waters).
E. Course.
F. Speed (vessels's anticipated average speed until next report).
G. Name of last port of call (when entering from overseas).
H. Date/Time and point of entry into CHILREP system (point of entry is the latitude/longitude at which the vessel is entering the CHILREP area, or the Chilean port from which the vessel is departing).
I. Next overseas destination and estimated date and time of arrival.
J. Whether pilot is carried on vessel.
K. Date/Time and point of exit from CHILREP system (point of exit is the latitude/longitude at which the vessel is leaving the CHILREP area, or the Chilean port the vessel is to arrive).
L. Route (vessel's intended track-state-Rhumb Line/Coastal/Great Circle).
M. Coast radio/maritime communications stations monitored (include INMARSAT and SELCALL number, if fitted).
N. Date/Time of next report (reports between 1200 Z and 1600 Z).
O. Draft.
P. Cargo (brief indication).
Q.* Defects or other limitations.
R.* Pollution (reports of any pollution seen).
S. Weather conditions in area (optional).
T. Ship's Agents.
U. Ship type and size.
V. Medical personnel carried (Sailing Plan only).
W. Number of persons on board.
X.* Remarks.

* Harmful substances, Marine Pollution and Dangerous Goods refer Appendix A.

TYPES OF REPORTS:

1. **Sailing Plan Report (CHILREP SP):**

A Sailing Plan Report is sent to the communications stations within 24 hours prior or up to 2 hours after entry into the CHILREP area or departure from a port within the CHILREP area.

The SP contains information necessary to initiate a plot and give an outline of the intended passage.

2. **Example of SP on Entering CHILREP Area:**

Format	*Example*
CHILREP SP	CHILREP SP
A. Vessel's name and call sign.	A. MAIPO/ELDQ4
F. Speed	F. 14
G. Name of last port of call (when entering from overseas).	G. AUCKLAND
H. Date/Time and point of entry into CHILREP system.	H. 280930Z 3320S 12000W
K. Date/Time and point of exit from CHILREP system (Chilean port of arrival).	K. VALPARAISO 042000Z
L. Route	L. GC
M. Coast radio/maritime communications stations monitored (INMARSAT and SELCALL number, if fitted).	M. CBV, CBT, INMARSAT 1242731
N. Date/Time of next report.	N. 281400Z
V. Medical personnel	V. NO
X. Remarks	X. NIL

Message Transmitted: CHILREP SP A MAIPO/ELDQ4 F 14 G AUCKLAND H 280930Z 3320S 12000W K VALPARAISO 042000Z L GC M CBV CBT INMARSAT 1242731 N 281400Z V NO X NIL.

3. **Example of SP Submitted on Departure from a Port within CHILREP Area to a Port Outside CHILREP Area:** (May be submitted prior to sailing and up to 2 hours after departure).

Format	*Example*
CHILREP SP	CHILREP SP

F. Speed	F. 16
H. Date/Time and departure port for this voyage.	H. 161300Z ANTOFAGASTA
I. Next overseas destination and ETA.	I. CALLAO 181500Z
K. Date/Time and point of exit from CHILREP area.	K. 171430Z 1821S 07530W
L. Route (vessel's intended track).	L. RL
M. Coast radio/maritime communications stations monitored.	M. CBA, CBA2
N. Date/Time of next report.	N. 171500Z
V. Medical personnel	V. NO
X. Remarks	X. NIL

Message Transmitted: CHILREP SP A ACONCAGUA/CBAC F 16 H 161300Z ANTOFAGASTA I CALLAO 181500Z K 17143)Z 1821S 07530W L RL M CBA, CBA2 N 171500Z V NO X NIL.

4. **Example of SP Submitted on Departure from and to a Port both within CHILREP Area:** (May be submitted prior to sailing and up to 2 hours after departure).

Format	*Example*
CHILREP SP	CHILREP SP
A. Vessel's name and call sign.	A. ANAKENA/CBAK
F. Speed	F. 15
H. Date/Time and point of entry into CHILREP system (Chilean Port of Departure).	H. 141200Z TALCAHUANO
J. Whether Pilot is carried on vessel.	J. YES
K. Date/Time and point of exit from CHILREP System (Chilean Port of Arrival).	K. PUNTA ARENAS 171300Z
L. Route (vessel's intended track).	L. Coastal, inland waters
M. Coast radio/maritime communications stations monitored.	M. CBT, CBP, CBM
N. Date/Time of next report.	N. 151200Z
V. Medical personnel	V. YES
X. Remarks	X. NIL

Message Transmitted: CHILREP SP A ANAKENA/CBAK F 15 H 141200Z TALCAHUANO J YES K PUNTA ARENAS 171300Z L COASTAL-INTERNAL WATERS M CBT, CBP, CBM N 151200Z V YES X NIL.

5. **Example of SP Submitted when transitting CHILREP Area from and to a Port not in CHILREP Area:**

Format	*Example*
CHILREP SP	CHILREP SP
A. Vessel's name and call sign.	A. MAIPO/ELDQ4
F. Speed	F. 16
G. Name of last port of call.	G. BUENOS AIRES
H. Date/Time and point of entry into CHILREP System.	H. 150230Z 5630S 06716W
I. Next overseas destination and estimated time arrival.	I. AUCKLAND 301600Z
K. Date/Time and point of exit from CHILREP System.	K. 212300Z 5500S 12000W
L. Route	L. RL to enter CHILREP then G.
M. Coast radio/maritime stations monitored.	M. CBM, CBV, ZLB
N. Date/Time of next report.	N. 151600Z
V. Medical personnel carried.	V. NO

Message Transmitted: CHILREP SP A MAIPO/ELDQ4 F 16 G BUENOS AIRES H 150230Z 5630S 06716W I AUCKLAND 301600Z K 212300Z 5500S 12000W L RL TO ENTER CHILREP THEN GC M CBM, CBV, ZLB N 151600Z V NO.

6. **Position Report (CHILREP PR):**

Each day between 1200Z and 1600Z, a PR should be transmitted to the communications centres. The information contained in the PR will be used to update the plot. The PR must reflect the position, course and speed of the ship at the time of the report. If it is necessary to alter the nominated daily reporting time, the alterations should be shown in the PR sent before the change.

7. **Example of a PR:**

Format	*Example*
CHILREP PR	CHILREP PR
A. Vessel's name and call sign.	A. MAKEDONIA STAR/ CBMK
B. Date/Time of position (UTC).	B. 141200Z
C. Position	C. 4230S 07715W
E. Course	E. 180
F. Speed	F. 14
X. Remarks (for example, change of reporting time or revised ETA).	X. NIL

Message Transmitted: CHILREP PR A MAKEDONIA STAR/CBMK B 141200Z C 4230S 07715W E 180 F 14 X NIL.

8. **Deviation Report (CHILREP DR):**

Should a vessel, at any time be in a position more than 2 hours steaming from the position that would be predicted from the last SP or PR a Deviation Report must be sent.

9. **Example of a DR:**

Format	*Example*
CHILREP DR	CHILREP DR
A. Vessel's name and call sign.	A. MAKEDONIA STAR/ CBMK
B. Date/Time of position (UTC).	B. 071700Z
C. Position	C. 4730S 07710W
F. Speed	F. 8
I. Destination and ETA	I. TALCAHUANO 092330Z
X. Remarks (include reason for deviation, for example, reduction in speed due to weather, change of route or port of destination, etc.)	X. Reduced speed due to heavy weather.

Message Transmitted: CHILREP DR A MAKEDONIA STAR/CBMK B 071700Z C 4730S 07710W F 8 I TALCAHUANO 092330Z X REDUCED SPEED DUE TO HEAVY WEATHER.

10. **Final Report (CHILREP FR):**

The Final Report FR is the information to terminate participation in the system. Accordingly reports should be sent prior to or on arrival at port, or when a ship has departed from the service area of the system.

When a FR is intended to be sent after departing from the service area, such a report should be sent as soon as practicable.

11. **Example of a FR on Arrival at a Port in CHILREP Area:**

Format	*Example*
CHILREP FR	CHILREP FR
A. Vessel's name and call sign.	A. ACONCAGUA/CBAC
K. Date/Time and port of arrival.	K. 181315Z ARICA
X. Remarks (must include the words final report).	X. FINAL REPORT

Message Transmitted: CHILREP FR A ACONCAGUA/CBAC K 181315Z ARICA X FINAL REPORT.

12. **Example of FR, Vessel Departing CHILREP Area:**

Format	*Example*
CHILREP FR	CHILREP FR
A. Vessel's name and call sign.	A. QUEEN ELIZABETH 2/ GBTT
K. Date/Time and point of exit from CHILREP area.	K. 110430Z 1821S 08745W
X. Remarks (must include the words final report).	X. FINAL REPORT

Message Transmitted: CHILREP A QUEEN ELIZABETH 2/GBTT K 110430Z 1821S 08745W X FINAL REPORT.

13. **Method of Passing Reports:**

(a) **In a Chilean Port:**

Reports may be transmitted either to the local coast radio station or to a main coastal station by any communications systems used.

Alternatively they may be passed in a written note which is to be sent to the Local Maritime Authority through the vessel's Agent.

(b) **At Sea:**
Reports must be transmitted to any main coast stations in times and frequencies indicated in List of Coast Radio Stations (UIT LIST IV) or in other publications which contain these updated data.

OVERDUE REPORTS:

To avoid unnecessary search action, it is important that ships report at the nominated reporting time each day, and send their FINAL REPORT when leaving the CHILREP area. If a ship is unable to pass a position report due to unserviceable radio equipment or illness of the radio officer, all attempts must be made to pass a signal to this effect through another vessel, port or other shore authority, either by VHF or use of emergency transmitter.

NOTES ON PROCEDURES:

1. **Date/Time Group:**
Dates and times contained in CHILREP reports are to be in Universal Coordinated Time (UTC) which is indicated by the suffix "Z".
Example: 17 October 1990, 1200 LMT, transmitted as 171600Z (+4).
2. **Latitude and Longitude:**
Latitude is a four digit group expressed in degrees and minutes, and suffixed with "N" for North or "S" for South.
Longitude is a five digit group expressed in degrees and minutes, and suffixed with "E" for East or "W" for West.
Example: 4230S for Lat. 42° 30′ S, and 07840W for Long. 78° 40′ W.
3. **Intended Route:**
Indicate Great Circle (GC), Rhumb Line (RL) or coastal with way points being followed, expressed in latitude or longitude. Courses are not required if way points are mentioned.
4. **Speed:**
Anticipated average speed vessel will make until next report time.
5. **Course:**
True course anticipated until next reporting time using three digit group. When more than one course will be steered, enter "various", the Service will interpret this as being the normal courses a vessel will follow on that particular passage. However, if the above assumption does not apply, clarification should be made.
6. **Radio Stations Monitored:**
List stations which the vessel normally works to contact managers, owners, charterers and agents, etc., in addition to Chilean maritime communications stations monitored. If the ship is fitted with INMARSAT, or SELCALL, the number should also be included.
7. **Severe Weather:**
Vessels which anticipate passing through areas of severe weather conditions or are experiencing severe weather, are urged to report their position at more frequent intervals to the Service.
8. **Geographical Position:**
When used, give well known names of landmarks.
9. **Weather Conditions in the Area:**
This is optional but desirable, when reported, the following items are recommended:
Pressure (HP), four digits. E.g.: 1024.
Wind direction and force in knots. E.g.: 220-18.
Air and water temperature when available (°C). E.g.: 12-6.
Dew point expressed in three digits (°C). E.g.: 135 (13.5).

APPENDIX A: Detailed Reporting Requirements:

1. **Dangerous Goods Reports (CHILREP DG):**
Primary reports should contain items A, B, C, M, Q, R, S, T, U of the standard reporting format; details for R should be as follows:

R. 1. Correct technical name or names of goods.
2. UN number or numbers.
3. IMO hazard class or classes.
4. Names of manufacturers of goods when known, or consignee or consignor.
5. Types of packages including identification marks or whether in portable tank or tank vehicle or packaged in vehicle, freight container or other transport unit.
6. An estimate of the quantity and likely condition of the goods.
7. Whether lost goods floated or sank.
8. Whether loss is continuing.
9. Cause of loss.

If the condition of the ship is such that there is danger of further loss of packaged dangerous goods into the sea, items P and Q of the standard reporting format should be reported; details for P should be as follows:

P. 1. Correct technical name or names of goods.
2. UN number or numbers.
3. IMO hazard class or classes.
4. Names of manufacturers of goods when known, or consignee or consignor.
5. Types of packages including identification marks or whether in portable tank or tank vehicle or packaged in vehicle, freight container or other transport unit.
6. An estimate of the quantity and likely condition of the goods.

Particulars not immediately available should be inserted in a supplementary message or messages.

2. **Harmful Substances Reports (CHILREP HS):**
In the case of actual discharge primary harmful substances reports should contain items A, B, C, E, F, L, M, N, Q, R, S, T, U, X of the standard reporting format. In the case of probable discharge, items B should also be included. Details for P, Q, R, T and X should be as follows:

P. 1. Oil or the correct technical name of the noxious liquid substances on board.
2. UN number or numbers.
3. Pollution category (A, B, C or D), for noxious liquid substances.
4. Names of manufacturers of substances, if appropriate, where they are known, or consignee or consignor.
5. Quantity.

Q. 1. Condition of the ship as relevant.
2. Ability to transfer cargo-ballast-fuel.

R. 1. Oil or the correct technical name of the noxious liquid discharged into the sea.
2. UN number or numbers.
3. Pollution category (A, B, C or D), for noxious liquid substances.
4. Names of manufacturers of substances, if appropriate, where they are known, or consignee or consignor.
5. An estimate of the quantity of the substances.
6. Whether lost substances floated or sank.
7. Whether loss is continuing.
8. Cause of loss.
9. Estimate of movement of the discharge or lost substances, giving current conditions if known.
10. Estimate of the surface area of the spill if possible.

T. 1. Name, address, telex and telephone number of the ship's owner and representative (charterer, manager or operator of the ship or their agent).

X. 1. Actions being taken with regard to the discharge and the movement of the ship.
2. Assistance or salvage efforts which have been requested or which have been provided by others.
3. The Master of an assisting or salvaging ship should report the particulars of the action undertaken or planned.

Particulars not immediately available should be inserted in a supplementary message or messages.

The Master of any ship engaged in, or requested to engage in an operation to render assistance or undertake salvage should report, as far as practicable, items A, B, C, E, F, L, M, N, Q, R, S, T, U, X of the standard reporting format.

3. **Marine Pollutants Reports (CHILREP MP):**
In the case of actual discharges, primary marine pollutants reports should contain items A, B, C, M, Q, R, S, T, U, X of the standard reporting format. In the case of probable discharge, items P should also be included. Details of P, Q, R, T and X should be as follows:

P. 1. Correct technical name or names of goods.
2. UN number or numbers.
3. IMO hazard class or classes.
4. Names of manufacturers of goods when known, or consignee or consignor.
5. Types of packages including identification marks or whether in portable tank or tank vehicle or packaged in vehicle, freight container or other transport unit.
6. An estimate of the quantity and likely condition of the goods.

Q. 1. Condition of the ship as relevant.
2. Ability to transfer cargo-ballast-fuel.

R. 1. Correct technical name or names of goods.
2. UN number or numbers.
3. IMO hazard class or classes.
4. Names of manufacturers of goods when known, or consignee or consignor.
5. Types of packages including identification marks or whether in portable tank or tank vehicle or packaged in vehicle, freight container or other transport unit.
6. An estimate of the quantity and likely condition of the goods.
7. Whether lost goods floated or sank.
8. Whether loss is continuing.
9. Cause of loss.

T. 1. Name, address, telex and telephone number of the ship's owner and representative (charterer, manager or operator of the ship or their agent).

X. 1. Action being taken with regard to the discharge and movement of the ship.
2. Assistance or salvage efforts which have been requested or which have been provided by others.
3. The Master of an assisting or salvaging ship should report the particulars of the action undertaken or planned.

Particulars not immediately available should be inserted in a supplementary message or messages.

The Master of any ship engaged in or requested to engage in an operation to render assistance or undertake salvage should report, as far as practicable, items A, B, C, M, P, Q, R, S, T, U, X of the standard reporting format.

APPENDIX B: Coast Radio Stations Handling CHILREP Messages:

I. Long and Medium Range Coast Radio Stations:

APPENDIX C: Check List for CHILREP Reports:

CHILEAN REPORTS CHECK LIST

	SP	PR	FR	DR	
A	*	*	*	*	Name/Call Sign.
B		*		*	Date/time of position.
C		*		*	Lat./Long. of position.
E		*		+	Course
F	*	*		+	Speed
G	%%				Last port of call, only when entering from overseas.
H	*				Date/time and point of entry (Lat./Long.) into CHILREP area or Chilean port of departure.
I	%%			+	Next overseas destination and ETA.
J	%				Whether pilot is carried on vessel.
K	*		*	+	Date/time and point of exit, either the next Chilean port OR Lat./Long. when leaving the CHILREP area.
L	*			+	Route
M	*			+	Radio Stations monitored/INMARSAT and SELCALL number (if fitted).
N	*			+	Nominated daily reporting time.
V	*				Medical personnel carried.
X			*	+	Remarks

* Mandatory.
%% This information is only required when entering or departing the CHILREP area.
+ Include these only if affected by the deviation.
% Notification of pilot is required when route considers inland waters navigation.

CALETA COLOSO: (Also see Page 364)

SHIPMASTER'S REPORT: September 1992.

DOCUMENTS: *Clearance:* Inward Clearance is carried out at Antofagasta Anchorage, where the Agent will board with Customs, Immigration and Port Captain, before the Pilot boards.

The Officials are friendly, and clearance can be completed with a minimum of fuss and delay in about 30 minutes.

The pilot ladder is acceptable for boarding, and Officials appreciate being met and escorted on and off the vessel by a uniformed officer.

Outward clearance is carried out on the berth on completion of loading. Immigration formalities may be carried out before this.

Notice of Readiness: Prepared by the Agent, and is presented on arrival at Antofagasta Anchorage.

Pour Plan: Pour Plan for loading is required by the Agents and Escondida representatives on arrival at Antofagasta.

PILOTAGE: Pilots board at Antofagasta Anchorage and take the vessel alongside. It is about 40 minutes from anchor aweigh to making fast the tugs. It is also required that Pilots are on board for shifting between holds, but minor adjustments of position at a hold can be carried out under the supervision of Escondida Marine Surveyor/Consultant.

On departure, Pilots leave when vessel is clear of the berth and anchor aweigh.

RESTRICTIONS: Berthing: Possible any time night or day.

MAX. SIZE: *Size of Vessel:* The berth is designed to accommodate vessels up to 192 m. LOA with a maximum deadweight of 45,000 metric tonnes. It is reported that this vessel is the largest to use the facility to date (188.4 m. LOA and 31.0 m. beam).

Draft: The maximum draft permitted is 11.5 m., to allow for swell.

RADIO: Communications are good through coast radio station.

On approaching Antofagasta, contact can be made through the Agents on VHF, working Channel 73, who will co-ordinate Port Authorities and Pilots.

BERTH: Caleta Coloso is an ore loading berth, consisting of dolphins and mooring buoys, situated on the North side of Pta. Coloso, approximately 7 miles South of Antofagasta, and has been in use since 1990.

The port is operated by Minera Escondida Ltda. for the export of bulk copper concentrate.

The berth is exposed to the swell as there are no protecting breakwaters.

A fixed loader is situated on the centre of 3 dolphins, and it is necessary to shift the vessel for loading each hold.

Good Seibu fenders are fitted on the dolphins, and it is proposed to increase the number of fenders in the near future.

Depth alongside is reported to be maintained at 15.0 m., and this depth is available to the North and West of the berth with no obstruction reported.

BERTHING/MOORING: The berth is approached on the green leading lights on the berth (bearing 190° T), and tugs join the vessel just before the anchor is let go, when the yellow leading lights on Pta. Paso Malo are in line from the bridge.

If the Pilot requires, the tugs make fast with tugs lines abreast Hatch No. 2, and the break of the bridge on the starboard side. The starboard anchor is let go initially to 5 shackles in the water and held on to check the forward motion, then slacked away as required during the mooring operation to get the vessel in position, ending with about 8 shackles in the water.

Mooring boats are in attendance fore and aft, and take lines in the following order:

Forward:

- 2 headlines to Buoy No. 1.
- 2 breast lines to Buoy No. 5.
- 1 or 2 springs to the dolphin.

  The second spring is run to the dolphin when the vessel is in position, if only 1 spring is taken initially.

Aft:

- 2 stern lines to Buoy No. 3.
- 2 breast lines to Buoy No. 4.
- 1 or 2 springs to the dolphin.
- 2 breast lines to Buoy No. 2, and the second spring is run when the vessel is in position.

The idea is to end up holding the vessel in position, just clear of the fenders, with the mooring lines and anchor.

Head lines to Buoy No. 1 and stern lines to Buoy No. 3 should be on the windlass and mooring winch to facilitate shifting.

The mooring operation can take up to 2 hours.

The vessel is positioned with precision, with the loader at the centre of the hold to be worked by the loading overseer in VHF contact with the Pilot.

Moorings: 14 mooring lines, each of 220 m. length, in good condition, are required, 6 forward and 8 aft. Also at least 10 shackles of cable on the starboard anchor.

The Agent requires a declaration (see "Notice"), to be signed before requesting the Pilots to board. Notice of Readiness will not be accepted if the vessel does not comply with the mooring requirements.

It is reported that 4 mooring ropes are kept available at the berth for vessels which arrive with insufficient ropes. The costs of using these and whether for hire or purchase was not mentioned.

It is essential that all ropes are in good condition.

A length of 220 m. was found to be adequate, although, as a scale drawing using the 1:10,000 plan would indicate, the aft mooring winch is 280 m. from the marked position of Buoy No. 3 when working Hold No. 5, longer head lines and stern lines would be advisable.

Buoys No. 1 and 3 are reported to be 440 m. apart in their free position, but the plan shows them at 465 m. apart.

Windlass to aft mooring winch on this vessel is 171 m.

NOTICE: Issued by Agent to Master.

Quote:

I, the Master of the M/V ...., have been informed by my Owners, Operators, Charterers, Agents, that Caleta Coloso is a Loading Terminal where swell is frequent.

I have also been informed that to berth at Caleta Coloso, my ship is required to have 14 mooring ropes (combinations of rope/wire excluded) of 220 m. length, which are new or in very good conditions, without which it is impossible to berth, and therefore Notice of Readiness will not be accepted by shippers.

I hereby certify that my vessel complies with above and authorise my Agents, Messrs. ...., to call the Pilot on board for mooring purposes at Caleta Coloso.

Signature and stamp of Master.

Unquote.

LOADING: The loading arm is able to move about 7.5° either side of the central position in the fore and aft direction, giving a distance of approximately 20 m. at the end, and can move in the athwartship direction, sufficient to reach the off-shore side of the holds.

The loading arm terminates in a flexible tube, suspended below the arm, with a rotatable chute at the end, which is positioned below the hatch coaming, and cargo can be spread over the hold without requiring additional trimming.

The belt and cargo areas are covered, so loading is relatively clean.

Loading Rate: Loading rate is quoted at 850 tonnes/hr. nett and 1,200 tonnes/hr. gross.

For this operation:

Actual pouring time – 39 hours 7 minutes.
Weight meter – 40,262 tonnes.
Actual rate – 1,029.28 tonnes/hr.
Time alongside berth – 61 hours 36 minutes.
Total port time E.O.P to F.A.O.P. – 68 hours.

Loading was slowed as some cargo was off-grade, having a higher than specified arsenic quantity for Germany.

Shifting: Shifting between holds is supervised by a Pilot who has to come from Antofagasta. On occasions, when there are a number of shipping movements in that port, some delays can be experienced waiting for a Pilot.

Pilots are ordered by Loading Supervisors and Agents, and the vessel advised accordingly.

The Pilots can authorise the Escondida Marine Surveyor and Consultant on board to shift the vessel, but rarely do.

The Marine Surveyor (Captain Oscar Quevedo) was a Pilot at Antofagasta for a number of years before retiring.

During shifts, a tug and line boat are in attendance, the tug usually pushing the vessel onto the dolphins.

Engines are required to be on stand-by and would probably be needed during bad swell conditions, but on this visit, all shifting was done by heaving on the lines and after spring or the stern lines and forward spring, the other lines being slacked as required.

Any lines becoming slack due to the movement of the vessel, are heaved up on completion of the shift.

It is necessary to heave up and slack the anchor cable during the shift.

Engines are required to be on stand-by throughout the vessel's stay alongside, and one tug and line boats are ready at all times for emergency use.

Draft Survey: Carried out by independent surveyors on arrival and on completion of loading.

Bill of Lading weight is the draft survey weight.

On this loading, weightmeter weight was 39 tonnes less than the survey weight.

Hold Survey: Also carried out by an independent surveyor on arrival.

Holds are required to be swept clean with no residue of previous cargo and with bilge covers secured and covered in burlap.

Cargo Certificates are presented on arrival giving the following information:

Flow Moisture Point – 11.3%.
Transportable Moisture Limit – 10.2%.
Moisture Content – 9.8%.
Angle of Repose – 37°.
Load Factor – 0.43 cu.m./tonne
15.4 cu.ft./ton.

A further certificate is given on completion, giving starting and completing times, draft survey and weightmeter weights and actual average moisture content of representative samples during loading.

Airdraft: 15.5 m. is quoted, but it would appear to be greater than this when working, although allowance must be made for swell and clearance for the chute when moving the loading arm over the vessel.

BALLAST: Chilean regulations require that only clean ballast water may be pumped out and any ballast taken in foreign ports should be changed at sea and Log Book entries made.

It is not required to change ballast taken in Chilean ports unless it is in an infected port.

It is necessary to make a written request through the Agent to pump out ballast, stating the quantity and origin of ballast water.

A port official attends to sight the initial pumping to ensure that it is clean. This will be arranged by the Agent.

Minera Escondida are particularly concerned with the environment and will not tolerate pollution of any sort.

Declaration and request to pump out is also required by the Agent at Antofagasta.

TIME: GMT minus 4 hours. GMT minus 3 hours from Sunday following 2nd Saturday in October to the 1st Saturday in March.

IDENTIFICATION CARDS: Shore Passes are issued and have to be returned before departure.

WEATHER: Rain is unusual.

There is normally an onshore breeze from the S.W. from mid-morning until the evening, and an offshore breeze from the S.E. in the early mornings.

Cargo work is reported to be stopped when the wind is over 20 knots, and vessels are not berthed or shifted with a wind over 18 knots.

Swell is the main problem, as there is no protection at all. On this visit in September 1992, there was very little swell and no problems with moorings. However, on the vessel's previous visit, a number of mooring ropes carried away.

The most vulnerable ropes are the springs which are made fast to the dolphins, and are liable to shock tension when the vessel is surging.

GENERAL: *Charts:* B.A. Chart No. 3071 shows the position of Pta. Coloso, and B.A. Chart No. 3077 is required for Antofagasta.

The berth is not marked on the chart, and there is only a sketch plan available from the operators.

Accommodation: Accommodation on board is required for 3 persons, 2 from Minera Escondida and one from the agency, as an agency representative. Escondida Marine Surveyor/Consultant and an administrative foreman remain on board at all times. They board at the Antofagasta Anchorage with the Agent.

Meals: Meals are required for a total of 5 persons, two in addition to the 3 living on board.

Gangway: The ship's accommodation ladder is not required. There is a fitted swinging gangway on the West side of the loading dolphin with a watchman in attendance, which can be used when loading all holds, except No. 1. A good bulwark ladder is required for access to the gangway.

When loading No. 1, access to and from the shore is by launch from an offshore pilot ladder.

Stores: Stores and provisions are available, but the Agent advises that these are expensive, which is not surprising as this is a desert area, and all food stuffs have to be brought in from some distance. As in other Chilean ports, Chandlers cannot be paid in foreign currency direct, only through the Agent, due to Chilean Central Bank currency restrictions.

Agent: Ultramar Agencia Maritima Ltda., Copiapo 574, Casilla No.1210, Antofagasta, Chile. Tel: 264243, 263399, 263672. Telex: 225079 Ultra Cl. Fax: 227341. Cables: Ultramar Antofagasta. VHF: Channel 73.

HUASCO: (Also see Page 367)

The sections under the headings below should be replaced with the following:

CERTIFICATES:

Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate (1966).
Tonnage Certificate (1969).
Oil Record Book.
Responsibility for Pollution of Water Certificate.

Gas Free Certificate: Compulsory for OBO type vessels when the last cargo was fuel. The inspection must be requested from Port Captain, who sends an inspector and makes the certification.

PILOTAGE: Compulsory for every vessel mooring at Guacolda I and at Guacolda II.

Vessels wait for Pilot within area below:

(1) Lat. 28° 27′ 24″ S., Long. 71° 15′ 29″ W.
(2) Lat. 28° 27′ 24″ S., Long. 71° 15′ 05″ W.
(3) Lat. 28° 27′ 37″ S., Long. 71° 15′ 05″ W.
(4) Lat. 28° 27′ 37″ S., Long. 71° 15′ 29″ W.

RADIO:

Station Call Sign	*Category*	*Frequency*	*Type*	*Receives*	*Transmits*	*Schedule*
Huasco CBH-24	(H3E)	2 MHz	A 3	2182	2182	H 24

VHF: Vessels can communicate with the Port Captain to advise their arrival and must call the Pilot Station 4 hours before arrival through Channel 16.

TUGS: 1×4,100 h.p. available. At Huasco there are 3 motor launches for use of Pilot.

BERTHING: There are 2 cargo terminals in service, Guacolda I for general cargo and Guacolda II, the mechanised one, for loading iron ore and "pellets", both are the property of Compania Minera del Pacifico. The particulars of these installations are:

	Guacolda I	*Guacolda II*
Max. LOA	240.0 m.	315.0 m.
Max. Draft	13.5 m.	25.0 m.
Max. Air Draft	—	23.6 m.
Max. Loading Rate	—	6,000 t.p.h.
Loading Arm Reach	—	42 m.

Guacolda I Terminal: Normally used to discharge fuel, coal and general cargo for the Pellet Plant of Huasco.

The installation of the old mechanised system is being dismantled and only part of the shiploader is left standing.

Guacolda II Terminal: Used for loading iron ore in "pellets".

Warping the Vessels: Vessels docking at Guacolda I must have at least 8 lines of 220 m. forward and 7 lines of 220 m. aft. For docking at Guacolda II, vessels must have 12 lines, 8 lines of 220 m. and 4 lines of 240 m.

FUEL: Diesel oil available at Guacolda I and II.

EMERGENCY CO-ORDINATION CENTRE: Capitania de Puerto Huasco. VHF Channel 16; HF 2182 kHz. Telephone No. 531011.

AUTHORITY: Capitania de Puerto Huasco, Calle Concheria 104, Huasco, 111 Region, Chile. *Tel:* 054-531011. *Contact:* Hernan Paredes Benavides, Port Captain.

People's Republic of China

FANGCHENG: (Also see Page 394)

GARBAGE DISPOSAL: There is a company who can assist with garbage service to vessels in harbour. They have drums, skips and boats, and men to remove garbage on board every morning. Ring 822546 or 822071 (Ext. 2411, 2419) for service.

WASTE OIL DISPOSAL: Collection service, shore tanks, barges and tanker trucks available. Ring telephone numbers above for service. There are also some berths for waste oil disposal.

SEAMAN'S CLUBS: Fangcheng International Seamen's Club, Xinggan Street, Fangcheng Port, Guangxi, China. Tel: 822388. Facilities available: Guest rooms in different classes, restaurant serving both Chinese and Western food, shops, ballroom, reading room, theatres, recreation rooms and telecommunication service. Seamen's Club often organises recreational, sports and sightseeing tours for seamen from different countries.

CURRENCY: Chinese Yuan. The buying rate of U.S.$ is 532.53 Yuan per U.S.$ 100.00. The selling rate is 548.92 (March 1992).

LANSHAN: (Also see Page 400) **(See Late Plans)**

SHIPMASTER'S REPORT: August 1992.

Location: Position: 35° 05.5′ N., 119° 22′ E. The port is near Point Lanshantuo (B.A. Chart No. 1253). The port has been in operation for 2 years.

Port Limits: Approximately 6 miles radius off the end of the breakwater.

Documents: On arrival:

6 Crew Lists.
1 Customs List (Chinese Form).
1 Health Declaration (Chinese Form).
1 Vaccination List (free form).
1 List of Arms and Ammunition (free form).
2 Reports of Entry for Foreign-Going Ships (Chinese Form).
1 Animal and Plant Quarantine Declaration Form for repairing vessel (Chinese Form).
1 List of Specified Articles, foreign currency, gold, silver, belonging to ship and/or members of crew (Chinese Form mandatory).
1 List of Articles to be sealed, cigarettes and liquor belonging to ship and/or members of crew (Chinese Form mandatory).

To be shown to the Port Officials:

Ship's Register.
Tonnage Dues (Chinese Form mandatory, issued by the Port Office at the first Chinese Port of Call).
Tonnage Certificate.
Load Line Certificate.
Safety Construction, Equipment, Radiotelegraphy Certificates.
Certificate of Financial Security in respect of Civil Liability for Oil Pollution Damage.
Certificate of Insurance.
Tovalop Certificate.
Derat Certificate.
Health Books and Yellow Cards of the crew members.
Seamen's Books (Passports).

On Departure:

2 Sailing Reports (Chinese Form).
1 Customs List (Chinese Form).
Collect and return all Shore Passes issued on arrival.
Tonnage Dues (Chinese Form) must be shown to the Port Officials before sailing.

Pilotage: Compulsory. Pilotage for large vessels performed between sunrise and sunset.

The Pilot boards at anchorage from a tug. The entrance channel (315° – 135°) has a depth of 13.0 m., is about 3.5 miles in length, and about 1.2 miles in width, and is marked by two black buoys with white irregular flashes in the following positions:

(a) Lat. 35° 03.9′ N., Long. 119° 25.2′ E.
(b) Lat. 35° 03.0′ N., Long. 119° 24.0′ E.

The Pilot listens on VHF Channel 16, working on Channel 13, but there was no answer. Berthing information comes from the local Agents only.

Anchorage: The anchorage is situated about 5.5 miles S.E. of Lanshantuo Point (B.A. Chart No. 1253) and is marked by 4 black buoys, as follows:

(a) Lat. 35° 02.0′ N., Long. 119° 28.0′ E.
(b) Lat. 35° 02.2′ N., Long. 119° 23.6′ E.
(c) Lat. 35° 04.0′ N., Long. 119° 26.0′ E.
(d) Lat. 35° 00.4′ N., Long. 119° 25.8′ E.

Depths range from 10.0 m. – 15.0 m., and the nature of the bottom is sand and mud, normal holding ground. Vessel anchored with 6 shackles in the water. Tidal streams of about 2 knots were experienced.

Restrictions: Entry and departure not permitted after sunset for large vessels.

Max. Size: Vessel of 185 m. length with draft 9.2 m. can moor.

Health: Ship cleared by Health Officials on arrival. Quarantine and Veterinary Officials carried out the inspection of the crew mess, galley, dry and freezing stores. Pay strict attention to the Health Books and Yellow Cards of the crew members, especially anti-cholera injections.

Radio: Telegraphic communciations: ETA cables via Qingdao Coastal Radio Station (Call sign XST). Calling frequency 500 kHz, working 425 kHz, answering 435 kHz. Working day and night.

VHF: Pilot and local Agents keep watch on Channel 16.

Pilot works on Channel 13.

Local Agent "Penavico", working on Channel 16.

Local Agent "Sinoagent" working on Channels 74 and 73.

Radar: There is no radar station in the port.

Tugs: The port has 2 tugs: 1×2,500 h.p. and 1×800 h.p.

Berthing: Two concrete berths.

First Berth: Length 180 m., depth alongside 7.5 m.

Second Berth: Length 210 m., depth alongside 10.2 m.

Vessels can only berth starboard side alongside, port anchor used with 4 – 5 shackles in the water. Fendering is insufficient.

Cranes: 4×25 ton luffing cranes.

Bulk Cargo Facilities: The port is equipped with 4 multi-purpose portable cranes for handling bulk.

Cargoes: Coal, ores and cement.

Specialised Cargo Handling Facilities: On the first berth, another vessel loaded frozen fish, garlic in cases and peaches. She used her own equipment. She was berthed starboard side to, cargo was delivered alongside my lorries.

Tankers: On the Second Berth (210 m. length), we unloaded 3,800 tonnes of soya bean oil.

Connection: 1×6 in. hose to underground pipelines. Collector has 4×6 in. pipelines, discharging rate about 200 tons per hour.

Density: Salt water.

Fresh Water: Available.

Fuel: Available, but preliminary (7 days minimum) notice required.

Consuls: None.

Repairs: Small repairs only.

Dry Docks: No information.

Gangway/Deck Watchmen: One gangway guard for inspecting crew members passes.

Customs Allowances: Crew allowed 200 cigarettes on arrival. The bond is sealed.

Repatriation: Possible, arranged by local Agents. It takes 3 – 4 days to arrange visas.

Airport: Airport at Qingdao (180 km.).

Time: GMT plus 8 hours, no change.

Police/Ambulance/Fire: It is sufficient to ask guard to advise the desired department.

Shore Leave: Allowed. Passes issued on arrival by Immigration (must be returned before departure).

Identification Cards: Shore Passes issued on arrival by Immigration. Must be kept with Seamen's Books.

Delays: We had to wait 6 days for a berth.

Agent: China Ocean Shipping Agency, Ocean Hotel, Zhong Shan C.W.J.Road, Lanshan. Tel: 0518-312393. Fax: 311842. Telex: 36902. Cables: Penavico.

Another Agency is Sinoagent (Telex: 320034 Lsbrz-Cn. Cables: Sinoagent Lanshan).

YANTIAN: 22.35 N. 114.15 E

ANCHORAGE: Lat. 22° 34′ 02″ N., Long. 114° 15′ 21″ E.

RESTRICTIONS: Depth in channel 15.0 m.

BERTHING: July 1992.

Berth No.	*Length* (m.)	*Depth* (m.)
1	185	13.0
2	165	9.2
3	115	6.5
4	55×3	4.2

DEVELOPMENTS: Construction commenced in 1988. On completion, there will be 48 berths (total length 16,000 m.), including 6 coal berths, 9 container berths and 23 dry bulk and general cargo berths.

ZHANJIANG (Tsamkong): (Also see Page 421)

SHIPMASTER'S REPORT: July 1992.

Vessel: 96,000 tonnes d.w.t., 243 m. LOA, 38 m. beam, 57,082 g.r.t., 12.0 m. arrival draft (even keel S.W.).

Cargo: Crude oil.

Approach to the Pilot Anchorage No. 1 is easy if visibility is good and the leading lights can be seen. If draft is over 9.0 m., then Pilot boards at Pilot Anchorage No. 1 from an old tug which can keep up with the vessel at speeds of less than 5.0 knots.

Vessel was anchored at Pilot Anchorage No. 2 (0.4 nautical miles from Buoy No. 10). All leading lights and buoys were found to be in position.

If vessel arrives before high water, then it is advisable to attempt an approach to Pilot Anchorage No. 1 at high water, depending upon vessel's draft. While awaiting high water, good anchorage can be found about 8 nautical miles due East of Naozhou Dao Lighthouse, in a depth to about 21 m. We sounded a depth of 3.0 m. below keel near Buoys No. 2 and 3, when the tide height was 4.0 m.

The vessel was boarded by 8 officials and the Agent at Pilot Anchorage No. 2 for "General Examination". There is no provision for issuing Radio Free Pratique.

Despite tendering Notice of Readiness upon arrival, the N.O.R. was accepted only after the vessel was given Free Pratique at the Pilot Anchorage No. 2 by the Port Health Officials.

Vessel always berths at the oil jetty portside alongside. Berthing is assisted by 2 tugs and is carried out at high water. There are only 2 Chicksan arms of 10 in. size, and the discharge pressure requested is 5.0 kg./sq.m. at the ship's manifold, which achieves a rate of approximately 2,300 cu.m./hr.

Except for the Agent, the other officials and Terminal Operators do not speak English, and communication can pose a problem. Hence it is advisable to request the Agent to stay onboard to act as an interpreter.

At least a week's notice is required if any of the crew has to see a doctor, unless in an emergency case. The visit to the doctor is arranged by the shipchandler.

Bonded Stores, dry and fresh provision are very reasonably priced. However, there is not much choice of Bonded Stores.

Crew members are not allowed to go ashore directly along the jetty. The Agent has to be requested to arrange for a launch, which takes about 15 minutes to drop the crew ashore near the port main gate. The charge for each launch trip is U.S.$ 15.00.

A Government surveyor carries out a joint survey with the Chief Officer prior to commencing discharge. The surveyor's figures always vary from the ship's figures, as they use a different method of calculations, using density at 20°C for obtaining net volume.

Crude Oil Washing cannot be started unless written permission has been obtained from the Harbour Master. Officials from the Harbour Master's Office come onboard and witness one Crude Oil Washing sequence, check oxygen content and the Oil Record Book, before granting this permission.

Crew can go ashore using shore passes issued by the Immigration, but have to be back onboard by midnight.

The Bonded Stores are sealed upon arrival by the Custom Officials.

Notice: From Agent (Penavico) to Master:

Quote:

You are welcome to the port of Zhanjiang.

During your stay at this port, please kindly comply with the following rules and regulations of the Port Authorities concerned:

1. Please kindly apply to the Harbour Master in writing for permission for the following items. *Do not* start the below until the permission is granted from the parties concerned.
   (a) Open-fire repair/operation, e.g. welding, fire cutting.
   (b) Deballasting.
   (c) Discharge of slops/sludge or oily water to shore tank.
   (d) Overhauling of piston or main engine. Please indicate in your application form how long the immobilisation takes, and how many hours are needed for refitting the engine for emergency use.
   (e) Painting the hull and draft marks.
   (f) Put down working rafts or boats to sea as assistance to work.
   (g) Echo sounding for the depth of the port area.
2. It is banned to operate radio transmitter, single-side band radio (SSB) and radar.
3. To discharge crude oil, if C.O.W. is to be made, please inform Harbour Master directly or via the Agent by cable/telex your application for C.O.W., 7 days before arrival. Upon arrival, please apply to Harbour Master in written forms:
   (a) Application paper for C.O.W.
   (b) C.O.W. Plan.
   (c) Photocopies of C.O.W. Certificates for ship's Master or Officer.
   (d) Item List for information checking for C.O.W.
   (e) Information for facilities of the ship required for C.O.W.
   When receiving the above information, Harbour Master Officers will attend your vessel to give written permission and detailed instruction. *Do not, do not* start a C.O.W. until you receive the permission letter from Harbour Master.
4. According to the Frontier Defence Officials, crew members are allowed to stay ashore not later than midnight (2400 hrs.). Please kindly note and inform the crew members to come back to the ship before midnight.
5. To apply for Free Pratique when arriving from other countries, please hoist quarantine (yellow) flag at day time, and open three red lights at night.
6. Regarding Pilot and tug hire, please ascertain how long it takes and how many tugs are hired and write down in the Bills.
7. If any problems, plase do not hesitate to consult the Agent.

Please pay kind attention to the above and act accordingly. Thank you very much for your cooperation.

Unquote.

Colombia

GENERAL: (Also see Page 426)

CUSTOMS REGULATIONS: New Customs Regulations now in force from 1st July 1992.

The Customs Authorities now stipulate that:

(A) All cargo on board a vessel destined for Colombia must be manifested.

(B) The Manifest (cargo/freight) together with freighted copies of Bills of Lading must be given to Customs Authorities before vessel's arrival.

(C) Cargo not covered by Manifest may not be discharged. If discharged, same will be immediately confiscated by Customs.

Violations of the aforementioned regulations can result in fines of up to 100% of the cargo value as determined by Customs Authorities. Similar fines will be levied for discrepancies found in the Cargo Manifest, as well as for short-landed or overlanded cargoes, in cases where fault lies with the carrier and no reasonable explanation is provided. When the Cargo/Freight Manifest does not comply with all the requirements (as established by Customs Authorities) the carrier will be fined the equivalent of 20 minimum wages (about U.S.$ 3,000.00 as of July 1992).

Introduction of V.A.T.: The Colombian Government, under a Decree signed 30th June 1992, introduced a new tax reform which, inter alia, establishes Value Added Tax (VAT) of 12% on all port related services (i.e. wharfage, anchorage, lights/buoys, tugs, stevedoring, agency, etc.) with no exemptions.

V.A.T. at 12% came into effect as from 1st July 1992, and will be increased to 14% as from 1st January 1993.

BUENAVENTURA: (Also see Page 427)

(See Late Plans)

SHIPMASTER'S REPORT: September 1992.

Chart: B.A. Chart No. 2319 (November 1991 Edition).

Pilotage: Available at Sea Buoy No. 1 (03° 47.75′ N., 77° 19′ W.) for deep draft vessels, but normally at Pta.Bazan, South of Buoy No. 13.

Anchorage: Vessels are warned not to anchor in the vicinity of Buoy No. 1 at night, daytime no problem. Vessels normally anchor at Pta.Bazan for waiting their turn to berth, but should request *watchmen for piracy*.

Buoyed Channel: All buoys are subject to change in positions without warning, due to either tidal current or maintenance made by authorities. Please refer to local Chart No. COL 153 (see "Late Plans").

Berthing: 24 hours service. Normally 12 to 13 ocean-going vessels berthed.

Stevedores: For grain cargoes 24 hours round the clock, 7 days a week.

Watchmen: Strongly recommend 2 watchmen throughout 24 hours through Agents. Victualling by vessel. No piracy if watchmen onboard. It is also useful for preventing stowaways and drug smuggling, both a big problem for vessels calling at this port.

Fresh Water: Available at berth by hose, at about 10 tonnes/hr.

Cargo Gear: Ship's gear used with shore grabs for grain cargoes.

Shore Leave: Allowed with shore pass, ID cards not required.

Repatriation: Possible through Agents with advance notice.

Airport: Nearest airport is at Cali, about 120 km. away, which has connections to Bogota for Intercontinental flights.

Class Surveys: Available locally. Advance notice required through Agents for Classification Surveys.

Supplies: Provisions and fresh items, including seafood, are all available at very reasonable prices. Bonded items can be supplied directly from shop inside port area. Stores items difficult to supply. MDO available.

COVENAS: (Also see Page 432) **(See Late Plans)**

VHF: *Delete and substitute:*

Initial radio contact with FSU Covenas or with Covenas Control, Terminal Superintendent and Agents on Channel 16. Shift to Channel 10 for pilot boat, manoeuvring and for cargo operations. The loading vessel, either at FSU or TLU, will be attended on VHF Channel 10.

In case of 2 vessels loading simultaneously at FSU and TLU, the Cargo Loading Master will assign VHF communications channels to each one of them. One of the vessels will work on Channel 10.

Commonwealth of Independent States (C.I.S.)

BERDYANSK, Ukraine: (Also see Page 441)

(See Late Plans)

PILOTAGE: *Delete 2nd sentence and substitute:*
Berdyansk Pilot meets vessels within draft 6.0 m. and more at Reception Buoy No. 2 (Lat. 46° 36.75′ N., Long. 36° 36′ E.), and vessels with draft less than 6.0 m. at Reception Buoy No. 10 (Lat. 46° 40′ N., Long. 36° 40′ E.).

RESTRICTIONS: *Delete last sentence and substitute:*
Vessels over 160 m. LOA can only enter during daytime.

MAX. SIZE: *Add:*
The max. permitted length for entry into the port is 205 m. Sometimes with the Harbour Master's permission, vessels with max. length 225 m. may be allowed to berth at Piers No. 7 and 8.

HEALTH: *Add new paragraph:*
Vessels, which are not equipped by special collecting tank for fecal (domestic) waters with standard international connection on the upper deck, are prohibited entry into Ukrainian ports.

FRESH WATER: Price: U.S.$ 8.05 per ton.

SURVEYORS: *Delete last sentence and add:*
Independent Surveyors available for Draft Survey and checking quantity of bunkers onboard.

Contact: Azovbroker Ltd. Fax: 3-64-97. Telex: 127441 Okean CIS.

TIME: *Delete and substitute:*
GMT plus 2 hours October to April. GMT plus 3 hours April to October.

HOLIDAYS: *Delete:* Constitution Day (7th October).
Add: Christmas (7th January); Easter; Independence Day (24th August).

EMERGENCY CO-ORDINATION CENTRE: *Add:*
Tel: 62-731, 62-449, 3-63-03. VHF: Channel 16.

AUTHORITY: *Delete:* Telex: 131330. *Substitute:* Telex: 127441 Okean.
Add: FAX: 3-64-97.

ADD:

GARBAGE DISPOSAL: Special metallic containers are installed on the pier alongside the ship by port's garbage service, and exchanged when full by the same service. To reserve garbage disposal, Master should send information by radio to Agency Inflot, simultaneously with arrival information.

WASTE OIL DISPOSAL: The port is equipped by a special ship which can collect separately 340 tonnes of oily mixture waters and 86 tonnnes fecal waters. For pumping out of these waters, hoses from special boat only should be used. Strictly prohibited to mix oily waters with fecal or any sanitary waters. To reserve special ship, radio message should be sent before arriving to Agency Inflot. Before leaving port, all vessels must discharge all fecal waters into special ship, without additional payment.

Also see "Health".

SEAMAN'S CLUBS: There is a Seamen's Club at the port at Ul. Frunze 1, 332440 Berdyansk, Ukraine. Tel: 62-543. Facilities: No international telephone, church service or postage facilities are available at Seamen's Club. All other services are possible.

CURRENCY: Ukrainian Coupon and Russian Rouble (1 Coupon = 1 Rouble). U.S.$ 1.00 = 206 Roubles, but this currency rate varies from day to day.

MARIUPOL (Zhdanov), Ukraine: (Also see Page 451)

HEALTH: *Add:*

Vessels calling at any port in the Sea of Azov are to be equipped with either a sewage treatment plant or a sewage tank. Before entering Kerch Strait, all valves for discharging non-purified bilge and sewage water to be closed and sealed by the ship. Date and ship's coordinates to be entered in Log Book.

RADIO: Table: *Delete and substitute:*

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UDC	500/473	500/416	A1A	H24
"Mariupol-Radio"	2182	2182	N3E	H24
"Mariupol Radio-1"	156.8*(16)	156.8*(16)	F3E	H24
"Mariupol Radio-2" (Port Controller)	156.7*(14)	156.7*(14)		
"Mariupol Radio-5" (Harbour Master and Pilot Station)	156.45*(9)	156.45*(9)	F3E	H24
"Mariupol Inflot"	156.875(77)	156.875(77)	F3E	H24

*Frequencies are given in MHz.

FRESH WATER: *Add:*

Vessels are advised to arrive with sufficient fresh water for their stay in port.

FUEL: *Add:*

Supply of fuel to be arranged well in advance of vessel's arrival.

CERTIFICATES: *Add:*

All vessel's international certificates required.

TIME: *Delete and substitute:*

Local time GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: *Add:*

Not officially approved by Parliament.

TELEPHONES: *Delete and substitute:*

Telephones cannot be placed aboard. Long distance calls are difficult to make.

AGENT: *Add:* Fax: Via No. 873-1402223 (Azov Shipping Co.).

Denmark

KALUNDBORG: (Also see Page 549)

(B) STATOIL A/S OIL TERMINAL:

ADD:

GARBAGE DISPOSAL: Skip provided on pier, where garbage collected from last port can be placed, free of charge.

Skip can be ordered in advance through Agent. Charge: About U.S.$ 200.00.

WASTE OIL DISPOSAL: Mineral oil without chemicals is received free of charge by the Refinery. Used lub oil is received free of charge in trucks up to 10 cu.m. capacity. Agent will advise further information.

SUEZ CANAL - RULES OF NAVIGATION

JANUARY 1992

Articles 52 and 53:

Southbound/Northbound Drafts:

We quote below the text of Circular No. 435229, received from the Suez Canal Authority, Port Said:

Circular No. 435229:

Cancelling the additional due of 0.5% on Southbound vessels with drafts more than 42 ft., and the additional due of 0.6% on Northbound vessels with dimensions exceeding those in Table III, Pages 74 up to 76, Rules of Navigation 1992.

Due to the remarkable progress achieved in developing, widening and deepening the Canal, and for attracting more vessels, the following amendments will be applied:

1. All vessels are allowed to transit the Canal in both directions on condition that their dimensions do not exceed those mentioned in the attached table, and their drafts not exceeding the Tropical Load Line.
2. Tables No. II, III, pages 72 up to 76, Rules of Navigation 1992 Edition, to be cancelled.
3. Additional surcharge of 0.5%, on Southbound vessels with drafts more than 42 ft. Item (G) (3), page 95, Rules of Navigation, will be no more applicable.
4. Additional surcharge of 0.6%, on vessels with dimensions exceeding those in Table III, pages 74, 75, 76, Rules of Navigation Edition of 1992, will be no more applicable.
5. This Circular will come into force as from 1st August 1992.

Beam and Draft Table: Northbound and Southbound Convoy.

Equatorial Guinea

ISLA DE BIOKO TERMINAL: (Also see Page 626) (Punta Europa Marine Terminal): **(See Late Plans)**

NOTE: New name of Terminal is Punta Europa Marine Terminal.

The mooring now consists of a Four Point Mooring.

The following information supersedes that on Pages 626 – 629 in Volume 1:

DOCUMENTS: (As of November 1992).
- 4 copies Crew List.
- 4 copies Passenger List.
- 4 copies Arms and Ammunition List.
- 4 copies List of Narcotics.
- 4 copies List of Animals/Livestock.
- 4 copies List of Stores and Provisions.
- 4 copies List of Ports of Call.
- 4 copies Vaccination List.
- 4 copies Crew Declaration.
- 4 copies Maritime Declaration of Health.
- 4 copies Clearance for Last Port.

PILOTAGE: Walter International presently provides a European Pilot/Mooring Master to advise and assist with the berthing. He will remain on board throughout the loading to liaise between terminal and ship. He will quantify the cargo loaded and issue all the commercial documentation.

ANCHORAGE: No designated anchorage exists at present, but due to the presence of a 10 in. high pressure (3,500 p.s.i.) gas pipeline in the vicinity of the berth, Masters are recommended to anchor to the Eastward of longitude 8° 44.0′ E. The bottom consists of mud and black volcanic sand with good holding in 135 ft. of water.

NAVIGATION: The high pressure gas pipeline is marked by a red, green and red/yellow horizontal striped spar buoy to the Eastward of the line. The submarine pipeline end manifold (PLEM) is marked by a yellow spar buoy close to the Westward.

All buoys are lit with flashing lights.

A conspicuous flare is located one quarter of a mile S.W. of the Punta Europa Lighthouse.

RESTRICTIONS: Daylight berthing and unberthing only.

MAX. SIZE: Presently 60,000 tons d.w.t. (LOA 700 ft.), although larger vessels may be handled in the future. No restrictions on draft or beam.

HEALTH: *Malaria Precautions:* Bioko Island has a high incident of Chloroquine resistant malaria, and full preventative measures should be taken. Mefloquine (Larium) is the prophylaxis of choice.

TUGS: One line handling vessel with a 12 ton bollard pull is used for running lines and will assist as directed by the Mooring Master.

BERTHING: The berth consists of a Four Point Mooring located 1,500 ft. offshore in 130 ft. of water, that allows vessels to be berthed heading either N.W. (295° heading), or S.E. (115° heading), depending on the conditions prevailing at the time of berthing.

The vessel will be secured to 4 mooring buoys, each equipped with trip hooks, with one buoy located on each bow and each quarter. These buoys are designated P1, P2, S1 and S2, and the anchors for each buoy are marked with a small white marker buoy. The vessels offshore bower anchor may, or may not be used in berthing.

LOADING: As vessels may be berthed heading either N.W. or S.E., depending upon the prevailing conditions on berthing, vessels should arrive with both cargo derricks rigged and be ready to handle the hoses on either side.

The loading of the condensate is carried out by gravity from the shore storage facilities through 2×12 in. hoses at a maximum rate of about 20,000 bbls./hr. (13,000 bbls./hr. through one hose).

Each hose tail is marked by an orange pick-up buoy which in turn is attached to the submarine hose by 135 ft. of 1.25 in. diameter chain. The hoses are connected by the ship's crew under the guidance of the Mooring Master. Assorted wire strops, shackles, rope slings, turfors, etc., should be available for this operation, and should be of sufficient strength to be able to support a maximum hose weight of approximately 9,000 lbs., when the hose is suspended 20 ft. above the ship's rail.

Two Government Petroleum Ministry representatives, as well as 2 Customs Inspectors and a Cargo Surveyor, will remain on board for the loading and will require food and accommodation.

Cargo Specification: "Alba Condensate", API 60° – 52.3, density 15° – 0.7654, load temperature approximately 80°F. Ships figures, bbls., M/T, L/T, and cu.m. will be used for Bill of Lading purposed.

BALLAST: No dirty ballast facilities exist at this Terminal. Vessels nominated to load should arrive with clean ballast that can be discharged overboard.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not available.

STORES: Not available.

REPATRIATION: Possible, but not recommended.

AIRPORT: Served by an Iberia jet service once a week directly to Madrid. This flight arrives at 0800 hrs. Saturday morning, and departs 0900 hrs. Alternative travel to Europe is possible through Douala, which is served by 4 local flights a week. A departure tax of CFA Franc 5,000 (U.S.$ 20.00) is required at the Malabo Airport as well as Douala.

WEATHER: There are two distinct seasons, the Rainy Season, which extends from May through September, and the Dry Season, where it does not rain quite as much and extends from December to February. The variable season between the Wet and Dry Season occupies the rest of the year.

CURRENTS: During the Wet Season, a strong inshore current flows continually from the S.E. towards the N.W. at a rate of about 2 – 2.5 knots. This current decreases during the Dry Season, and is usually weak and variable.

OPERATOR: Walter International Equatorial Guinea, B.P. 742, Malabo, Equatorial Guinea. *Tel:* (240-9) 2736. *FAX:* (240-9) 2746.

Estonia

TALLINN: (Also see Page 631) (See Late Plans)

GENERAL:

Republic of Estonia
Ministry of Transport and Communication

NOTE: The following is a translation into English.
Appendix 1. Navigation Safety Rules in Tallinn Port and Archipelago Small Ports (Roomassaare, Virtsu, Kuivastu, Rohukula, Heltermaa, Sviby (dated 1992)).

A. *General Clauses:*

1. The Appendix 1. of the Code of Customs of the Port applies equally to all vessels, irrespective of a flag, calling at the City Port, Muuga and Kolpi Ports, Archipelago Small Ports, or to companies and private persons, performing their activities in the Port and Archipelago Small Ports territory.

2. The Tallinn Port Aquatorium includes:

The City Port water area, that is the basin area of the Old Harbour and outer routes in the Tallinn Bay, limited in the North by a geographical parallel, passing through the Northernmost point of the Old Harbour North-Western Mole head, in the East by the Tallinn Lighthouses leading line and by the coastline in the South.

The Kopli Port water is a basin area within the bounds of Sectors 1, 2, 3, 4, in the South, and Sectors 5, 6, 7, 8, 9, 10, in the North. The aquatic area bounds near Sector 4 docks and Sector 11 are equal remote of opposite coast territories.

The Muuga Port water area is a basin area from C.Tahkumagi, alongside coastline, up to the Western Basin Mole head extremity. From the sea side, the water area is limited by lines, connecting C.Tahkumagi (Lat. 59° 30′ 04″ N., Long. 25° 00′ 04″ E.) with the points (Lat. 59° 31′ 04″ N., Long. 24° 58′ 01″ E.) and with the Western Mole base (Lat. 59° 31′ 04″ N., Long. 24° 56′ 06″ E.).

B. *Vessels entering and leaving the Port:*

1.1 Vessels navigation in the approaches and within the Tallinn Port Aquatorium is controlled by the Traffic Control Service, further TCS, call sign "Tallinn Radio 5" on VHF Channel 14 ("Port Control").

In the Kopli Port water area, TCS call sign "Tallinn Radio 32" on VHF Channel 11.

In the Muuga Port and the Viimsi Reach, TCS call sign "Muuga Radio 5" on VHF Channel 67.

1.2 Information on a vessel approach should be sent to the Port Operator by the Master or his Agent 48 hours and 24 hours prior to the approach.

Information must contain following data:
Time of approach to the Pilot Station.
Draft forward and aft.
Reason for call.

1.3 The Master should contact TCS in advance on the VHF and adjust the time of approach. While entering the City Port, Kopli Port or Tallinn Bay, vessels' communication is maintained on VHF Channel 14, call sign "Traffic Control" or "Tallinn Radio 17". While entering Muuga Port, Muuga Bay on VHF Channel 67, call sign "Muuga Radio 5".

1.4 Vessel entering or leaving the Port should receive TCS permission.

1.5 Vessel's arrival and departure is registered by the Agent or vessel's administration representative at the Port Inspection.

1.6 The Master of a vessel departing should seek consent, via the Agency, from the Port Authority, during working hours.

Vessel's departure for a coastwise passage is registered in the same manner.

Vessels engaged in foreign traffic must receive a Customs' permission prior to a departure registration.

1.7 The Master of a vessel, arriving to an Archipelago Small Port, should send information about arrival to the Port Operator, who reports it to an Archipelago Small Port by special services.

1.8 When within VHF range of a small port, the Master should contact the Archipelago Small Port's administration, and receive its permission to enter.

1.9 The vessel's arrival at the Tallinn roadsteads for Customs' formalities processing, for deviation operations and other aims, and also for repair, technical works in harbours, plants and aquatic areas, not belonging to the Tallinn Port, should register an arrival at the port.

1.10 An arrival registration in the Port Inspection is performed within 8 hours from the moment of the arrival.

1.11 Auxiliary, port and technical fleet vessels register a navigation permission in the Port Inspection.

2. Pilotage.

2.1 Pilotage is compulsory in Tallinn, Muuga and Kopli Bays for all the vessels over 300 g.r.t. and for Estonian vessels over 20,000 g.r.t. Technical, port and dredging fleet vessels are free of pilotage.

2.2 Pilotage is performed 24 hours a day.

There are 3 pilot stations.

(Lat. 59° 29′ 04″ N., Long. 24° 30′ 08″ E.).
"Tallinn" in the place of Buoy N1 "Tallinn",
(Lat. 59° 37′ 05″ N., Long. 24° 38′ 00″ E.).
"Aksi" near the island Aksi,
(Lat. 59° 37′ 03″ N., Long. 24° 38′ 00″ E.).

2.3 Before the approach to the pilot station, the Master should contact radio station "Tallinn Radio 17" by radiotelephone on VHF Channel 14 ("Traffic Control") or "Muuga Radio 5" on VHF Channel 67, and confirm the final time of arrival.

2.4 While entering or leaving the Port, pilotage is not compulsory for vessels under 300 g.r.t. and port or technical fleet vessels.

2.5 Vessels shifting in the Port is arranged with a Pilot aboard.

2.6 An application for pilotage should be sent by the Master or Agent to the Harbour Master, 4 hours prior to a vessel's approach to the pilot station. The vessels in Port apply for a Pilot to the Port Inspection 2 hours in advance, and re-confirm within 30 minutes of unberthing or shifting.

2.7 Vessels' pilotage is provided in sequence of vessels' arrival and when their applications are presented, except emergency and liner vessels. The pilotage order, if necessary, is settled by the Port Operator with the Port Inspection consent.

2.8 The Port bears no responsibility for a possible delay in the following cases:
A vessel's arrival notice not sent or not in due time.
No free Pilots in the port, because all are engaged in pilotage.
Unfavourable weather preventing Pilots boarding vessels.

2.9 In absence of a Pilot or for other reasons, a vessel should anchor in places recommended for this.

2.10 The Harbour Master may permit navigation without a pilot upon certain circumstances for some Masters on the shipowner's demand.

3. Vessel Traffic Regulations.

3.1 Vessels' traffic on approach to the Port and anchoring changes is controlled by the TCS.

3.2 Vessels are not allowed to enter or leave the Harbour, to shift alongside a berth without TCS permission.

3.3 In case of need, the TCS may impose speed restrictions for vessels, or one-way traffic in the regulation zone.

4. Navigation in Ice.

4.1 The Tallinn Bay, Muuga and Kopli Bays freeze some years. The beginning of the icebreaker-assisted navigation period is announced by the Harbour Master's office.

4.2 The Harbour Master through the TCS, controls icebreaker operations for vessels from the edge of the ice to the berths and when shifting in the roadsteads and in the Port Aquatorium.

4.3 Icebreaker operations and convoy forming is performed according to icebreaker operations daily schedule.

4.4 In cases where another shipping company intends to conduct vessel in ice to the Port and outward, it should hand over an application to the Harbour Master 48 hours in advance.

4.5 An application may be amended or cancelled, but no later than 12 hours before the date declared.

4.6 A vessel's departure time from the Port or time of convoy forming alongside the edge of the ice is decided by the Harbour Master and is announced to a company or the Master. The vessels, liable to convoy forming, should sail to the roadsteads beforehand on the Harbour Master's instructions.

4.7 The Master of a vessel, calling at the port, informs the Harbour Master or an Agent about an estimated time of approach to a meridian (C.Ristna) 12 hours in advance.

4.8 The Master is informed on his request about ice situation, ice edge location, approximate ice pilotage start and icebreaker departure time.

4.9 The icebreaker's Master obeys only the Harbour Master.

C. *City Port:*

1.1 A vessel should not approach the Northern Gates of the Old Harbour, nearer than one mile, without the TCS' permission ("Tallinn Radio 5") for entering the Old Harbour.

1.2 The vessels, excluding tugs and icebreakers, may call at the Port and leave if visibility is no less than 5 cables.

The tugs and icebreakers may call at the Port and leave if visibility is no less than 2 cables.

Visibility for Passenger carriers calling and leaving is determined by the Master.

1.3 When vessels shift in the port, her main engine, steering gear, anchor and mooring devices should be in working order.

1.4 Vessels are prohibited to let go or dredge anchor in the passage from the Basin N1 to the Basin N2 (a submarine cable and a water pipe pass from the Berth N6 to the Eastern Mole extremity).

1.5 The vessel passage to the Admiral Basin is permitted when a crossing bridge is completely raised.

The bridge raising is arranged on the vessel's demand (one long blast).

1.6 A vessel's speed should not exceed 3 knots in the Port Aquatorium.

1.7 Vessels that may call at the Port:

The Port Area	*Maximum Vessels' Measurements*		
	Length (m.)	*Breadth* (m.)	*Draft* (m.)
Basin N1:			
Berth 1	100	15	4.5
2	135	20	6.6
3	135	18	6.8
4	30	8	5.0
5	135	20	6.7
6	100	15	4.5

Comment: Mooring with tugs near Berths N3 and N5 for vessels over 15 m. in breadth is impossible if another vessel is alongside indicated berths with the same breadth.

Basin N2:			
Berth 7	160	25	7.7
8	140	20	7.0
9	30	8	4.8
10	160	18	7.3
12	180	25	7.8
Basin N3:			
Berth 13	160	25	7.7
14	160	25	8.2
15	180	25	8.3
16	160	25	8.0
17	140	18	7.8

1.8 The call at the Port through the Northern Gates is possible for vessels with draft under 8.6 m. and length under 180 m. Through the Southern Gates, with draft under 7.0 m., length under 140 m.

1.9 Water level in the Port depends on the wind force and direction (wind tide phenomena). Real water level data can be received in the Port Inspection.

2. Vessels Towing.

2.1 During towing operations in the Port Aquatorium vessels' communication is maintained through radiotelephone on VHF Channels 9 and 6.

2.2 The number of tugs and type required for mooring, unmooring and swinging operations is decided by the Master with a Pilot consent.

2.3 The Master should apply for tugs required while entering the Harbour, via the Agent or the Port Operator, 45 minutes prior to arrival at the Port.

2.4 The Master's order for tugs required while shifting in the Port or for vessel's departure, should be sent to the Agent or the Port Operator by telephone 363 (428-363) 2 hours in advance.

2.5 If the wind velocity exceeds 16 m./sec., mooring operations are arranged with a Pilot and the Master's consent only.

2.6 In case of disagreement between the Master and a Pilot, the Harbour Master decides number and capacity of tugs.

2.7 Shifting of vessels in the Port Aquatorium if visibility is less than 2 cables, except passenger ship shifting.

2.8 Vouchers for towing vessels, leaving the Harbour, should be registered before departure. Vouchers for towing vessels while entering and shifting may be registered after the end of the works.

3. Vessels staying at Berths.

3.1 It is prohibited to turn a third vessel broadside on to another two vessels, turned broadside at the berth earlier.

3.2 Vessels berthed alongside must raise anchors, if used during berthing.

3.3 Vessels staying broadside at the berths is permitted by the Harbour Master.

3.4 Berth-side cranes, providing safety mooring, should be installed no later than 30 minutes prior to vessels' arrival (departure).

3.5 In Winter time, the berth, inshore part pile-moorings and approaches must be cleared of ice and snow and covered with sand.

3.6 While mooring, all the other works on a berth or any transport movement is prohibited. Non-participants in mooring operations are not allowed to stay in a mooring zone.

3.7 The most high-capacity tugs should be in readiness and on duty after storm warning or when wind increases to over 18 m./sec.

3.8 In case of extra dangerous phenomena warning, the Master and his Mate must be on duty on a vessel.

A vessel's electric power supply should be cut off from the shore mains.

3.9 A stevedore company's representative should be present on the berth while mooring. A vessel's stem position relative to a berth is determined by the above mentioned representative.

3.10 Vessels, staying at a berth, are prohibited to turn propellers, except small vessels' preparing for a departure or shifting.

3.11 A hull or a deck erection of a vessel, staying at the Berth N1, should not obscure the Southern Gates red light zone.

3.12 Diving operations should receive a permission for work from the Port Operator on duty after a report about supposed work duration.

3.13 A vessel lowering divers must have continuous radiotelephone communication with the Port Inspection.

3.14 Repairs, painting and other operations of vessels and berths must be arranged from special rafts with consent of cargo loading areas' supervisors and the Port Inspection's permission.

3.15 A vessel's hull painting operation near a berth may be permitted by the Port Inspection, only with absolute water pollution prevention.

3.16 Vessels staying at berths must have:
(a) Rat guards on mooring ends.
(b) Nets to prevent cargo dropping overboard. After loading operations are finished, they must be taken away.

4. Passenger Operations.

4.1 The Head of the Passenger Terminal should be held responsible for passengers embarkation/disembarkation.

4.2 Passengers embarkation/disembarkation on the roadsteads is performed by the Port craft or local companies' passenger carriers. The craft should have radiotelephone VHF communication with TCS. The Agent co-ordinates these operations with other services involved.

4.3 Passengers embarkation/disembarkation over a vessel, staying alongside a berth, is prohibited.

5. Radio and Telephone Aids Usage.

5.1 A vessel in the Port Aquatorium should keep a watch on VHF calling Channels 14 and 16.

5.2 VHF radio station with call sign "Tallinn Radio 1" works 24 hours a day, and provides communication between vessels and all coastal services. It is linked to the Port ATE (automatic telephone exchange) and the telephone network of Tallinn, VHF calling Channel 16, working Channels 1, 3, 26, 27.

"Tallinn Radio 17" ("Traffic Control") – Traffic Control Service regulates vessels navigation in Tallinn Bay and performs radio pilotage, Channel 14 calling, Channel 20 working.

"Tallinn Radio 5" ("Port Control") – Traffic Control Service regulates navigation in the Port Aquatorium, Channel 14 calling, Channel 9 working.

5.3 The ATE of the Port provides telephone communication between vessels at the berths and coastal services. Connection to the town network is performed by dialling 9, from town to the Port ATE dialling 428.

5.4 The Port main services telephone numbers:

Subscriber	*ATE*	*Town*
Fire Station	206	9-01
Emergency First Aid	8	9-03
Police	612	9-02
Dispensary	510	
Telephone Repair Service	211	
Port Operator on Duty	363	
Port Inspection	588	
Sanitary Quarantine Department	520	
Customs	332	
Electrician on Duty	589, 545	
TCS, SRS (Shore Radar Station)	495	

D. *Kopli Port:*

1.1 Vessels entering and leaving the Harbour use a channel connecting the roadsteads with the Port. The channel length is 800 m., width 90 m. – 150 m. Vessels' admissible draft in the channel is 8.6 m.

Extreme draft of vessels, staying at berths must not exceed:

The Southern Side	1 Sector (Berth N62)	3.9 m.
	2 Sector (Berth N61)	6.0 m.
	3 Sector (Berth N60)	8.2 m.
	4 Sector (Berth N59)	6.0 m.
	11 Sector (Berths N63,N64)	6.0 m.
The Northern Side	5 Sector (Berth N70)	8.6 m.
	6 Sector (Berth N69)	6.0 m.
	7 Sector (Berth N68)	4.5 m.
	8 Sector (Berth N67)	4.5 m.
	9 Sector (Berth N66)	4.0 m.
	10 Sector (Berth N65)	4.0 m.

The mooring to the Sectors 7, 8, 9 and 10 is permitted for two vessels with draft under 6.5 m. turned broadside at the berth.

1.2 Any shifting in the Port is planned by the Port Operator with consent of the Port Inspection.

1.3 Vessels over 150 m. in length enter/leave the Harbour if wind less than 10 m./sec. Vessels moving to a dock and outwards is permitted if wind less than 10 m./sec., and a side wind of 8 m./sec.

2. Vessels towing in the Port.

2.1 Vessels towing operations should be requested from the Port Operator 24 hours a day by radio telephone VHF Channel 11, call sign "Tallinn Radio 33", or via Agent. A request should be made no later than 45 minutes prior to a vessel's arrival and 2 hours before a vessel's departure.

2.2 Communication between tugs and towed ships is maintained through radiotelephone on VHF Channel 11.

2.3 During mooring, unmooring and swinging operations, the tugs usage and their number is decided by the Master, with a Pilot's consent.

2.4 Mooring operations are performed only with a Pilot and the Master's consent, if wind velocity over 11 m./sec.

2.5 Towing operations for vessels with main engine, anchors and steering gear out of action, or other non-self-propelled vessels, in case of a wind over 11 m./sec. may be permitted only with Harbour Master's consent.

2.6 In case of a disagreement between a Pilot and the Master, tugs necessity, number and capacity is determined by the Harbour Master.

2.7 Towing and shifting in the Port Aquatorium should be ceased:
(a) When visibility is less than 2 cables.
(b) When wind is over 14 m./sec.

3. Vessels staying in the Port.

3.1 The Port Authorities and passenger delivery to vessels, riding at anchor, is performed by the Port fleet vessels at the Master's request if the sea state is less than 3.

3.2 Vessels staying at berths is permitted:
(a) Over 150 m. in length, for one vessel turned broadside on to a berth.
(b) Within 75 m. – 150 m. in length, for second vessel turned broadside on to another vessel at a berth.
(c) Under 75 m. in length, for third vessel turned broadside on to another two vessels turned broadside at a berth earlier.
(d) Small-tonnage vessels at the Port Inspection's judgement.

3.3 In case of favourable weather (wind force 6 in directions safe for joint staying at a berth), a small-tonnage vessel can be placed alongside a vessel over 150 m. in length.

3.4 The salvage boats launching and testing is performed only with the Port Inspection's consent.

3.5 After storm warning and wind strengthening up to 18 m./sec., the Port Operator assigns the most high-power tugboat on duty.

3.6 The 4th Sector (Berth N59) is an oil terminal. Repair works with an open fire on vessels staying within 100 m. from oil terminal is prohibited.

3.7 The simultaneous oil products discharging (bunkering) of two vessels, turned broadside to each other, is permitted at the oil terminal upon following conditions:
(a) Agreement of two vessels' Masters.
(b) 1st and 2nd class oil products, explosive and highly inflammable goods absence.
(c) Oil products discharging (bunkering) with a flash point no lower than 65°, should be reported to the Port Inspection.

3.8 Sound signals should be sent only while manoeuvring in the Port Aquatorium.

3.9 While bunkering at the berth, a tanker and a bunkering vessel should be surrounded by booms, and oil waste collector must be ready alongside.

3.10 In the Port Aquatorium, only segregated clean ballast waters can be discharged.

3.11 Scrap and oil products dropping overboard should be reported to the Port Inspection.

3.12 If while loading or bunkering oil products spill on board or overboard, then loading and bunkering operations should be ceased immediately until spill is cleaned up.

3.13 Before undocking operations, a dock floor must be carefully cleaned up (scrap and oil products).

3.14 Sailing from the Port is prohibited for vessels, having on board accumulated sewage, oily waste waters, scrap and oil residues.

3.15 The Port Inspection is situated in the cold storage building at the 4th floor (5 Sector, Berth N70). The Customs, Sanitary Quarantine Department, Fire Inspection are also in the same building.

E. *Muuga Port:*

1.1 Extreme drafts of vessels, calling at the Port or staying at the berths, should not exceed following values, in cases of datum water level and wave height less than 1 m.:

	Draft (m.)	*Length* (m.)	*Breadth* (m.)
In Channel	16.8		
Near Buoyant Berth	5.5		
Berth N3	5.5	under 90	
Berth N4	5.6	under 260	
Berth N5	6.2		
Berth N6	9.0	under 140	
Berth N8	13.0	under 260	33
Berth N9	16.5	under 280	40
Berth N10	16.5	under 280	40
Berth N11	9.9		25
Berth N12	8.5		25
Berth N13	9.9		25
Berth N14	7.6		

Ramp measurements for Ro/Ro vessels:
Berth N5 , breadth 16 m., rise upon sea level 1 m.
Berth N14, breadth 11 m., rise upon sea level 2 m.

1.2 Mooring operations for vessels over 25,000 g.r.t. are performed only when wind velocity less than 12 m./sec.

1.3 Vessels in the Port Aquatorium should maintain the slowest possible speed.

2. Vessels Towing.

2.1 When mooring and unmooring, number of tugs is decided by the Master with consent of a Pilot, tugs usage is obligatory for vessels over 20,000 g.r.t.

2.2 Tugs and towed vessels communication is maintained through radiotelephone VHF Channels 71 and 6.

3. Large Tonnage Vessels Placement Regulations.

3.1 Large tonnage vessels mooring to the grain terminal is permitted if wind under 12 m./sec., and at Berth N8 if there is a favourable weather forecast for a next day.

3.2 Large tonnage vessels mooring to the Berth N8 is performed portside to, and to Berths N9 and N10 bow to seaward.

These rules may be changed for some reasons, but only with the Harbour Master's consent.

3.3 Large tonnage vessels swinging for mooring at Berths N9 and N10, is arranged on the roadsteads outside 20 m. depth. These vessels' towing along the channel is performed stern first.

3.4 Vessels swinging for mooring at the Berth N8 is permitted in a basin between Berths N8 and N9.

4. Dredging Operations Regulations.

4.1 A dredging operations area is settled by the Harbour Master. Dredge Master should hand over to the Port Inspection a work quota, navigation safety instructions and dredgers anchor plan before work starts.

4.2 Dredgers and vessels should maintain communication with TCS by radio station on VHF Channel 67, and provide Port Operator and cargo vessels with dredging area deviation. Communication should be maintained 24 hours a day.

4.3 Dredge Master should be held responsible for dredgers safety, even in case of an unjustified weather forecast and ill-timed storm warning.

5. Vessel Mooring.

5.1 Passengers and Port Authorities delivery to vessels in the roadsteads is arranged by the port fleet vessels. Passengers embarkation/disembarkation is permitted only on the Berth N14 ramp of the ferry boat terminal or near grain terminal head.

5.2 The vessels' Masters should take into account that the Port Aquatorium and Muuga Bay are not protected from the winds from N., N.W., N.E. and E. directions.

In case of these directions with winds velocity over 17 m./sec. especially N.E. direction, staying at berths becomes unsafe, whereas near Berths N8 – N11 it is dangerous for the reason of very rough sea.

Tug operations are restricted by seaways. In case wave height over 1.5 m. tugs work becomes ineffective and it is dangerous for tugs themselves, Master's decision on sailing to the roadsteads should be agreed with the Harbour Master.

The Harbour Master's decision for sailing to the roadsteads should be executed implicitly. In case of an extraordinary sailing order in case of a storm warning, pilotage and towing operations sequence is settled by TCS.

5.3 A weather forecast and storm warning for the Western part of the Gulf of Finland and the Port Aquatorium are broadcasted regularly from 0730 hrs. to 1400 hrs. daily over VHF Channel 67 by TCS. Current weather and weather forecast information may be received in the Port Inspection on telephone number 532, or via TCS on VHF Channel 67, 24 hours a day, free of charge. In working time, weather data can be received from a weather chart maker on duty in meteorological service on Tel: 440-833.

5.4 The Master is responsible for vessel and crew safety even in case of unjustified weather forecast and ill-timed storm warning.

5.5 When wind comes from a dangerous direction, the Master should prepare a vessel for immediate sailing to the sea and report to the TCS. The TCS settles vessels' sailing order.

5.6 An extraordinary sailing from Berth N4 and N5 in case of storm phenomena can be performed without Pilot, with TCS consent.

5.7 The Western basin, protected by the mole, serves as a shelter for port and technical fleet vessels in case of strong North winds.

5.8 Duty Officer of the Port Inspection and a terminal representative control mooring and unmooring operations. A mooring team obeys a terminal representative. Auxiliary fleet mooring is controlled by the Port Inspection.

5.9 Mooring broadside to another vessel is prohibited (except port fleet vessels). Cargo vessels staying near berths except for loading/discharging is prohibited.

5.10 For extraordinary sailing to the roadsteads, crew members must remain on board a vessel.

Main engines, steering gear and anchor devices should be in good working order.

5.11 Any repair or preventive operations, resulting in vessels' sailing readiness, may only be arranged with the Harbour Master's written permit, and confirmed by the Port Operator.

5.12 All the vessels, staying at berths, should connect to the port telephone mains, after a request to the Port Operator (call sign "Muuga Radio 2", VHF Channel 35), or must maintain regular radio watch on VHF Channel 67.

5.13 Requests for port services of any kind should be made by Agent to the Port Operator on telephone 523 or by VHF radio telephone in advance, 2 hours prior to a desired time.

5.14 All vessels should discharge oily waste, fecal waters and scrap before departure registration.

5.15 The Port Inspection is sited in the Port Administration building on the 7th floor, Room 712.

6. The Port ATE telephone numbers:

Head of the Port – Office	503
Main Port Operator	530
Harbour Master	521
Port Inspection – Duty Officer	532
Pilots	621
Port Operator on Duty	523
Central Cargo Handling	
Area Operator	543
Harbour Fleet Operator	676
Tug on Duty	254
Water Supply	337
Emigration Service – Supervisor	559/228
Emigration Service – Duty Officer	556
Sanitary Quarantine Department	682
Dispensary	241/245/525
Police	284
Fire Station Inspector	239
ATE	211/522/525

Connection to the town ATE by dialling "1".

Agencies telephone numbers (through the town ATE):

TRANSFLOT	425-685
INFLOT	430-508
ESTMA	601-723
NOVOTRANS	236-731
TALLINK	215-708

7. Vessels Bunkering.

7.1 Oil and fuel bunkering is permitted on the roadstead and ex-berth. Bunkering is provided by self-propelled tanker.

7.2 Vessel approach initial information should contain a bunker request.

At the same time, a vessel's readiness for bunkering, estimated bunkering time should be reported to the Port Operator.

7.3 Bunkering on the roadstead is possible if wind less than Force 3.

While bunkering ex-berth, a vessel and a tanker must be surrounded by booms, and oil waste collector must be ready alongside.

7.4 Bunkering ex-berth ceases in case a wind strengthening to over 12 m./sec.

7.5 Bunkering is flatly prohibited for vessels operating with dangerous goods.

7.6 While bunkering from refuelling trucks, vessel should take all precautions against oil products spillage on to a berth or overboard.

F. *Archipelago Small Ports:*

1. Ferry boat navigation is prohibited in passages in case of South direction winds over 15 m./sec. and North direction winds over 18 m./sec., and mooring operations in case of rough sea near working berths over 1 m. wave height.
2. A vessel may call at an Archipelago Small Port after a permission receipt.
3. Vessels that may call at the Archipelago Small Ports:

Archipelago Small Ports	*Vessels' Measurements*			*VHF Communication Channel*	
	Length (m.)	*Breadth* (m.)	*Draft* (m.)	*Calling*	*Working*
Roomassaare	96	14	3.9	16	14
Virtsu	60	12	3.9	16	14
Kuivastu	80	14	4.5	16	14
Heltermaa	70	12	3.3	16	30
Rohukula	60	12	3.3	16	30
Sviby					

Comment: VHF monitoring is maintained constantly in working time and at any other time, 2 hours before vessel's arrival.

4. Mooring is permitted for vessels, calling at an Archipelago Small Port for loading and passenger operations. Other departments vessels' mooring is permitted by the Head of an Archipelago Small Port.

France

MARSEILLES: (Also see Page 686)

(b) **PORT DE BOUC,** including Port de Lavera 43.23 N. 05.00 E., Port de Berre 43.27 N. 05.10 E., Port de la Mede 43.24 N. 05.07 E. Caronte 43.24 N. 05.02 E.

PILOTAGE: *Delete and Substitute:* Pilotage is compulsory for tankers over 50 m. LOA and other vessels over 70 m. LOA.

Call "Fos Port Control" direct on Channel 12 for traffic. Pilot must be taken to enter Port de Bouc, Fos and Port St. Louis du Rhone. Contact by Marseilles Radio or pilot boat VHF (Channel 14 for calling, Channel 14 for traffic). Pilot boards in the Roads between 2 and 2.5 miles South of Lavera Buoy or further out if required, for entering Port de Bouc and Fos. Motor launch black hull, white cabin, white anchor on bow, "H" flag.

RESTRICTIONS: *Delete and Substitute:* No entry restrictions for Lavera. Night transit of Caronte Canal to Etang de Berre forbidden to tankers above 6,000 g.r.t. Transit of Caronte Canal to Etang de Berre is forbidden for vessels over 180 m. (598 ft.) overall and over 24 ft. draft.
Notice: *"Port Authorities instructions concerning Fos/Lavera Tanker Areas.*
Special Notice No. 94/81.
Re: Berthing of Tankers Loaded with Naphtha or Gasoline.

Vessels concerned will only be allowed alongside providing that pump room is clean, gas free and that no product is leaking at ship's valves or pumps.

Should above conditions not be fulfilled vessels could not be accepted in above areas.

MAX. SIZE: *Delete and Substitute:* Lavera: LOA 275 m., draft 12.80 m.
Caronte: LOA 190 m. – 200 m. - draft 8.23 m.
180 m. – 190 m. - draft 8.68 m.
Less than 180 m. – draft 9.14 m.
Berre: LOA 160 m., beam 24 m., draft 7.0 m.
La Mede: Draft 5.18 m.

Add after VHF:
VTS: *Port Authorities and Vessels Traffic Services:* Vessels entering the Gulf of Fos, must contact Port Authorities (VTS), calling "Fos Port Control" 2 hours before arrival on VHF Channel 12.

BERTHING: Lavera: *Delete and Substitute:* 16 berths for public and private use. Permitted drafts: 4 berths of 3.6 m. to less than 5.5 m.; 1 berth of 5.5 m. to less than 6.1 m.; 5 berths of 10 m. to less than 11 m.; 3 berths of 11 m. to less than 12.5 m.; 3 berths of 9.9 m.

1×12 tonne public mobile crane.

Lavera Harbour has been specifically designed and equipped to handle refinery products and the discharge of oil tankers.

Each berth has flexible pipe connections, with articulated metal arms, supported by special cranes. The type of pipework depends on the product handled (crude or refined) and is connected to the storage tanks of:—

C.F.R. and Shell
S.F.P. – B.P. Refinery at Lavera
The maritime terminal of S.P.L.S.E., which supplies the
Esso Refinery at Fos.

Berths A1, A4, H Bis, H and K1 have been designed to handle the loading and unloading of propane and chemical products.

Crude: 8 public berths in 4 basins.

Name of Berth	*No. of Berth*	*Max. Length* (m.)	*Max. Draft* (m.)
B	721	275	12.00
C	722	275	12.00
D	723	275	11.89
E	724	275	12.20
F	725	275	12.80

Refined Products: 12 public berths.

Name of Berth	*No. of Berth*	*Max. Length* (m.)	*Max. Draft* (m.)
A2	712	210	11.10
A4	714	240	12.20
B	721	275	12.00
C	722	275	12.00
D	723	275	11.89
E	724	275	12.20
F	725	275	12.80
K1	701	90	6.10
K5	705	100	5.80
K6	706	100	5.90

Liquid Gas: 6 public berths.

Name of Berth	*No. of Berth*	*Max. Length* (m.)	*Max. Draft* (m.)
A1	711	210	10.10
A4	714	210	12.20
F	725	325	12.80
G	726	275	12.80
H Bis	728	130*	11.00
K1	701	100	6.10

*Usable length 100 m.

Annual capacity of loading or discharge: 600,000 tons based on the 4 multi-purpose berths being exclusively used for discharge of vessels bringing propane gas.

Average output per quay 600 cu.m./h. (300 t.p.h.)

Storage capacity: The storage capacity of propane gas of the Societe GEOGAZ is 120,000 cu.m (60,000 tons).

Chemical Products (exclusively): 4 public berths.

Name of Berth	*No. of Berth*	*Berthing Length* (m.)	*Permitted Draft* (m.)
A1	711	210	11.10
A2	712	210	11.10
A4	714	240	12.20
H	727	200*	11.80
H Bis	—	130*	11.00

*Usable length 100 m.

Berth A4 is also equipped for refined oil products and for the importation of liquid gas.

Berths F, G and H Bis can also accept liquid gas.

Annual capacity of loading or discharge: 2,700,000 tonnes if these 2 berths are exclusively used for chemical product traffic.

Discharge rate using vessels' pumps: 150 t.p.h. Loading rate using land pumps 150 t.p.h. to 300 t.p.h.

Storage capacity: Societe NAPHTACHIMIE: factory. Societe MAVRAC: 53,000 cu.m. Density 0.80 – 1.62.

Report: Berthing Procedures: Tugs are made fast between the 2 buoys "Lavera" and "Les Tasques", using the "On the Hook" method. Tugs watch VHF Channel 6.

Loaded or ballasted tankers are berthed heading outwards. Ships are swung off the head of the pier and backed alongside stern first. On request (ship's manifold too far, only gangway available, weather conditions, etc.) they may be moored directly and swung on departure.

Anchors are only used in case of emergency or when the ship's bow overhangs the pier's end.

Port Authorities do not advise anchoring method for safety reasons (delay if emergency departure needed).

No shore gangway is available at this terminal. Vessels must use their own gangway with safety nets and lifebuoys.

Port de Bouc/Caronte:
Bulk Liquids:
Last Paragraph: *Delete and Substitute*
Chemical products exclusively: 1 private berth (Berth No. 786): Kuhlman Quay. Useful berthing length: 120 m. Permitted draft: 6.80 m.

Bulk Solids: Last 11 Lines: *Delete and Substitute*

The CARFOS storage installations include:
2 phosphate sheds with capacity 33,000 tonnes.
1 ilmenite shed of 3,000 sq.m.
1 open area of 3,000 sq.m.

Oil seeds – oil cake: 2 berths (No. 784 and No. 785) at the Caronte Quay, private use granted to CARFOS

Available berthing length and permitted draft.

LOA	*Draft*
Less than 180 m.	9.14 m.
180 m. – 190 m.	8.68 m.
190 m. – 200 m.	8.23 m.

Storage capacity: 10,000 tonnes. These berths are also used for ores, coal and heavy minerals.

Installations and equipment: Identical to those on the quays for ores, coal and heavy minerals.

FIRE PRECAUTIONS: Last Paragraph: *Delete and Substitute:*

There is a special fire-fighting Corps with fire vessel. Call for firemen on 42.06.21.29 in case of fire or call Fos Port Control on 42.40.60.60 or VHF Channel 16.

AUTHORITY: *Delete and Substitute:*

Port Autonome de Marseille, Capitainerie des Bassins Ouest, B.P.200, 13528 Port de Bouc Cedex. *Tel:* 42.40.60.05. *Telex:* 440164 CAPOR. *Cables:* PORFOS. *FAX:* 42.40.60.40. *Contact:* Harbour Master.

(c) FOS: 43.24 N. 04.53 E.

PILOTAGE: *Delete and Substitute:* Compulsory. Contact by Marseilles Radio VHF Channel 14 for calling, Channel 9 for traffic. Pilot boards in the roads between 2 and 2.5 miles South of Lavera Buoy or farther out if required. Motor launch, black hull, white cabin, white anchor on bow, flying "H" flag.

VTS: Fos Port Control, call on Channel 12, Channel 12 for traffic. Pilot boat on Channel 14 for traffic.

RESTRICTIONS: *Delete and Substitute:* When large tankers are proceeding in the Fos Channel, other vessels' entrance may be delayed.

Access channel for very large vessels dredged to 22 m. over a width of 250 m.

Notice: *Port Authorities Instructions Concerning Fos/Lavera Tanker Areas.*

Special Notice No. 94/81.

Re: Berthing of Tankers Loaded with Naphtha or Gasoline.

Vessels concerned will only be allowed alongside providing that pump room is clean, gas free and that no product is leaking at ship's valves or pumps.

Should above conditions not be fulfilled vessels could not be accepted in above areas.

MAX. SIZE: *Delete and Substitute:* Max.draft at Oil Jetty 22.25 m.; Sollac in Dock No. 1 – 18.59 m.; Mineral Quay in Dock No. 1 – 16.76 m. Dock No. 2 - 17.37 m.; Dock No. 3 - 14.93 m.

Add after VHF:

VTS: *Port Authorities and Vessels Traffic Services:* Vessels entering the Gulf of Fos, must contact Port Authorities (VTS). Calling "Fos Port Control" 2 hours before arrival on VHF Channel 12.

GENERAL CARGO FACILITIES: *End of the Mole between Docks 2 and 3:*

Berth 873: *Delete and Substitute:* Serviceable length: 222 m. Max. draft: 11.50 m.

Berths 821, 822, 823: Delete and Substitute: Soilac finished products dispatch quay.

South Dock: Length 360 m. Max. draft: 11.89 m. Equipped with 2 cranes of 50 tonnes at 26 m.

BULK HANDLING FACILITIES:

Public Berths: *Delete first 2 paragraphs and substitute:*

3 berths Q1 (No.851), Q2 (No.852) and Q3 (No.853) in Dock 1, West Quay: Total length of quay: 884 m. Usable length of quay: 850 m. Max. depth of water at quay side berth: 17.5 m.

Largest admissible ship: Deadweight capacity: 140,000 d.w.t. (approx.). Length: about 300 m. Max. draft: 57 ft. (17.37 m.).

TANKERS:

Refined Products: *Amend Table:*

Designation	*Berth* No.	*Berthing Length* (m.)	*Max. Draft* (m.)	*Remarks*
C.2	808	100	7.00	Public

FIRE PRECAUTIONS: *Delete and Substitute:* A special fire fighting corp. operates at Fos. Tel. 42.06.21.29 or call Fos Port Control on VHF Channel 12 or Telephone 42.40.60.60.

SHIPMASTER'S REPORT: August 1987 (updated 1990).

Pilotage: Delete and Substitute: Pilot boards between 2 and 2.5 miles South of Lavera Buoy. The vessel is to call Fos Port Control 2 hours before arrival and on passing Omega Buoy.

AUTHORITY: *Delete and Substitute:* Port Autonome de Marseille, Capitainerie des Bassins Ouest, B.P. 200, 13528 Port de Bouc Cedex. *Tel:* 42.40.60.05. *Telex:* 42.44.01.64 CAPOR. *Cables:* Capor. *FAX:* 42.40.60.40. *Contact:* Harbour Master.

Fos Facilities Management: *Tel:* 42.48.66.05. *FAX:* 42.48.66.00. *Telex:* 410789.

Gabon

GOMBE - BETA MARINE TERMINAL: 01.12 S. 08.56 E.

LOCATION: The storage tanker "Ocean Producer" (78,000 d.w.t., max. draft 10.7 m.) is moored in 15.2 m. of water in position Lat. 01° 11.9′ S., Long. 08° 55.6′ E.

PILOTAGE: Compulsory.

ANCHORAGE: Vessels waiting to berth at the Terminal, anchor in an area situated 1.75 miles N.W. of the Terminal.

MAX. SIZE: LOA 920 ft.

GENERAL: The following is a copy of the "Vessel Questionnaire": *Subject: Lifting Data – Gombe Marin No. 92.04.No.02.*

Below please find the information required prior to the upcoming lifting tentatively scheduled for ..... In order for a nominated vessel to be accepted by Amoco for loading at the Gombe-Beta Marine Terminal, the vessel must be equipped to conform to the loading requirements of the Gombe-Beta Marine Terminal Port Rules, which is currently in draft form.

Lifting Party:	Amoco Gabon
Vessel:	Please provide
ETA Gombe Terminal:	Please provide
Quantity to be lifted:	Please provide
Consignors:	Amoco Gabon Gombe Marin
Consignee:	Please provide
Last Port of Call:	Please provide
Cargo Final Destination:	Please provide
Vessel Data:	
Owner(s):	Please provide
Address:	Please provide
Ship's Charter:	
Date:	Please provide
At:	Please provide
Between:	Please provide
Size:	Please provide
Master:	Please provide
Marisat Number:	Please provide
Flag:	Please provide
Registration Number:	Please provide
Overall Length:	Please provide
Bow to Manifold Distance:	Please provide
Manifold on Port or Starboard:	Please provide
Method of Securing Mooring Chain:	Please provide

Lifting vessels shall maintain sufficient displacement at all times while at the Terminal, to permit the immediate movement of the vessel under her own power in the event of an emergency. At a minimum, vessel shall maintain 30% of her deadweight at all times. Should a vessel be incapable of loading cargo and discharging clean ballast simultaneously, sufficient cargo shall be laden prior to the discharge of clean ballast, to ensure compliance with the minimum deadweight requirement.

The starboard boom runner must be adequately equipped with a single sheave block and hook for floating hose handling and for all field operations. A 30 ft. long by minimum 40 mm. diameter messenger line must be connected to the starboard boom lifting hook for safe handling of it when lowered to the mooring launch or tug.

Does vessel meet these requirement:	Please provide
Does vessel's gear meet all requirements necessary to carry out the connection and loading as specified in "Port Information and Rules – Gombe Beta Marine Oil Terminal":	Please advise

Amoco Gabon Gombe Marin Company retains the right to reject the oil lifting from the Gombe-Beta Terminal. The vessel must be equipped with a Panama fairlead and a OCIMF approved Smit Bracket or chain stopper for the purpose of bow to bow mooring. It is essential that you confirm the vessel's bow to bow mooring equipment prior to chartering any vessel.

To avoid difficulties experienced previously, Amoco Gabon hereby invite you to communicate the following Terminal procedure to the shipowner's organisation, and ascertain that this information will reach the ship's Master timely:

1. The Anchorage Area for tankers arriving to load at the Gombe-Beta Terminal field is in the rectangular area within the following:
   01° 36′ S., 08° 57′ E.
   01° 36′ S., 09° 02′ E.
   01° 40′ S., 09° 02′ E.
   01° 40′ S., 08° 57′ E.
   The centre of which is 01° 38′ S., 08° 59.5′ E.
   Due to the restricted navigation area to the North of the anchorage, the anchorage can only be approached from directions within the angles 090° to 270° through 180°. Vessels arriving from the North *must* pass to the West of the Buoy at position:
   01° 36′ S., 08° 38′ E.
2. As soon as in VHF range of the anchorage, call the "Ocean Producer" on VHF Channel 8 for further instructions. If contact cannot be made, call the "Bon Bateau" for assistance.
3. What is your deballasting time after berthing? Please provide
4. Can you ballast and load safely at the same time? Please provide
5. To enable the Pilot, Mooring Master and other personnel to board, we require the use of a combination of a pilot ladder and accommodation ladder on the lee side.
6. What are your cargo requirements? Please provide

7. Upon arrival, the vessel's cargo tanks must be inerted. Before starting the final approach to the Terminal, Amoco Gabon Mooring Master will verify that the ship's Inert Gas System is fully operational. If the ship fails to meet these conditions, the mooring operation will stop until such time when the I.G.S. will be back in service in a satisfactory manner. In such a case, Amoco Gabon will not be in anyway liable for the time lost by the incoming tanker.

India

NAGAPATTINAM: (Also see Page 841)

Add:

PORT LIMITS: Area enclosed between shore lines drawn East from North and South Boundary Pillar up to 18.3 m. depth (Position of North Boundary Pillar Lat. 10° 49.67′ N., Long. 79° 50.98′ E., and South Boundary Pillar Lat. 10° 44.8′ N., Long. 79° 51.1′ E. approximately).

DOCUMENTS: *Delete and substitute:*

To be completed by Masters of vessels on arrival:
8 Crew Lists.
8 Passenger Lists.
3 Form of Import Manifests of Stores.
3 Lists of articles in slop chest.
3 Private Property Declaration of the Crew.
3 Manifests.
3 Bills of Lading.
Arrival Report in the proper form.
Deck Cargo Certificate.
Bottom Cargo Certificate.
Arms and Ammunition Certificate.
Drugs Certificate.
Gold or Silver Certificate.
Maritime Declaration of Health.

To be handed to Agents:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.
Certificates of Deck Officers, Engineers and Radio Officer.

ANCHORAGE: *Delete and substitute:*
Vessels anchor according to draft and prevailing weather conditions. In fine weather, good anchorage in depths of 7.0 m. – 14.0 m. with lighthouse bearing 281° to 255°. Holding ground, sand and mud, good. Agents, in consultation with Port Authorities, signal Master on arrival of vessel, anchorage position for guidance.

RADIO: *Delete and substitute:*
Madras Radio. Send ETA to local Agent 48 hours before arrival.

VHF: *Delete and substitute:*
Port Radio Station on Channels 16, 12 and 14. Working hours 0600 hrs. to 1000 hrs. and 1500 hrs. to 1900 hrs. on all days, except holidays and Sundays.

TUGS: *Delete and substitute:*
1 motor launch of 66 h.p. belonging to the Port Department is available for towing lighters. Launches owned by private owners are also available for towing lighters.

MEDICAL: *Add:*
There are also a number of private nursing homes available.

FRESH WATER: *Delete and substitute:*
Available in limited quantities and dependent upon port getting continuous supply from municipality. A water barge of 30 tons capacity is available.

SURVEYORS: *Delete and substitute:*
1. Cargo inspectors not available.
2. All leading Classification Society Surveyors available from Madras.

AIRPORT: *Delete and substitute:*
Nearest airport Trichy, served by regular airlines.

Indonesia

AMAMAPARE: 04.49 S. 136.58 E.

PILOTAGE: Not available. A Freeport Indonesia Master is available on request to assist the ship's Master with entering the channel.

NAVIGATION/APPROACHES:
Chart: B.A. Chart No. 3527.
Fairway Buoy: Buoy 'A' located in position Lat. 04° 55′ 17″ S., Long. 136° 42′ 59″ E. is the Fairway Buoy. Light is flashing white Morse 'A'.
Lighthouse: There is a new lighthouse to the West of the port.

Name	Aika
Visibility range	12 miles
Tower colour	White
Height of tower	30 m.
Light colour	White
Light characteristic	Gp.Occ.(2) 10 sec.

Harbour Passage: The distance from Buoy 'A' to the port is approximately 15 km. The channel is well marked by buoy and beacons. Width of channel is 1,000 ft.
Tides: Indonesian Tide Tables. Port used is Sungai Mimika/Muara (04° 07′ S., 136° 05′ E.). Lowest tide −0.3 m. Highest tide +3.3 m.
Approaches:

There is a sand bar between Buoys No. 3, 4 and 5, approximately 3 km. wide. The depth of water at the Bar is the controlling factor as to whether all of a specific cargo is loaded at the Amamapare Dock or partly offshore at Sea Buoy 'A'. Tides normally rise and fall every 24 hours. At low tide the water on the Bar is about 4.30 m.

If approaching the area on a clear night, lights in the mountains are visible due North of the Port. This is from the Freeport Mines and Tram area at 11,000 ft. elevation and can be seen from about 50 miles offshore.

On approaching the Port/Buoy 'A', call "Port Ampre" on VHF Channel 16 for further information.

MAX. SIZE: Vessels of 38,000 d.w.t. have docked to load concentrates.
Large vessels are normally topped-up outside the Bar at Buoy 'A'.
Also see "Cargo Handling Facilities".

RADIO/VHF: Dock Superintendent's office on VHF Channel 16.
Harbour Master's office on SSB radio – frequency 6215.0 kHz. Ore barge on same frequency when on ocean passage.
Office hours are 0800 – 0930 and 1630 – 1930 (local time).
Tugs on VHF Channel 16 and many SSB frequencies.

TUGS: 2×350 h.p. and 2×1,300 h.p.
Tugs are available throughout 24 hours to assist large vessels docking and undocking and to guide them in and out of the channel.

BERTHING: The wharf is about 600 ft. offshore and is parallel to the shore. It is well fendered with rubber tyres.

Length	942 ft.
Straight face	522 ft.
Height above LW	10 ft.
Depth at LW	9.2 m. (East end) 8.0 m. (West end and over a distance of 750 ft.)

CARGO HANDLING FACILITIES: *Bulk Cargo:* Vessels load copper concentrate from a conveyor and fixed shiploader at an approximate rate of 1,200 tonnes/hr. Weight of concentrate is approximately 175 pounds per cubic foot. Dust is not a problem as it has a 9% moisture content.

The shiploader can be raised and lowered but not moved. Ship's crew are responsible for shifting ship and changing of holds.

A loading plan should be telexed to the port at least 48 hours prior to arrival.

Large vessels are normally topped-off outside the Bar at Buoy 'A'. Cargo is delivered to the vessel by 2×2,500 tonne barges (additional barge of 3,500 tonnes to be delivered in May 1992) and loaded by ship's electric hydraulic grabs at a rate of 200 tonnes/hr. in good weather.
General Cargo: Flat top barges available for transhipment of cargo and fuel. A 100 ton non self-propelled barge crane and 4 ton forklift trucks available for cargo handling. Workboats and speedboats available for transporting workforce throughout 24 hours. General cargo handling rate is approximately 1,000 tonnes/day.

FRESH WATER: Available in emergency cases only.

FUEL: Available in emergency cases only.

TIME: GMT plus 9 hours.

GENERAL: *Immigration:* Rp. 200 per man fee upon docking of ship.
Customs: Inspection and clearance normally takes about 1 hour to 2 hours.
Harbour Master: Available.
Police/Security: Available.
Handling Agents: Not available. Freeport Indonesia handle all general cargo, explosives and fuel. Freeport Indonesia personnel operate general cargo cranes and other equipment.
Stores: Limited stores and provisions are available. They are sold on emergency basis only.

AUTHORITY: Freeport Indonesia Inc., Amamapare, Irian Jaya, Indonesia. *Contact:* Captain S. Rizal, Port Superintendent (Tel. 5260).
New Orleans office: *Telex:* 46703 Freetpe LA. *FAX:* (504) 582-1835.

CIGADING: (Also see Page 876)

SHIPMASTER'S REPORT: November 1992.

TANKERS: Vessel ties between 4 buoys, with 3 small hose marking buoys on starboard side. After the vessel is secured between 4 buoys, the divers pick-up 2 under water hoses for connecting to ship's manifold.

Maximum Size of Vessel : 220 m.

Depth at the berth is approximately 18.0 m.

Pilot uses 3 tugs for berthing/unberthing, which are necessary for positioning the vessel and keeping it away from hose marking buoys.

Hoses are 2 × 10 in., although I received conflicting information regarding the sizes of hoses until the time of berthing, Agents and Cabot Chemicals kept insisting that the hoses were 8 in. each.

The vessel has to connect both hoses as they are part of the same line ashore.

Maximum pressure permitted is 4.0 kg. at the ship's manifold. Vessels must not increase this pressure as it causes leaks in underwater hoses and unnecessary delay to the vessel.

Wind is normally from the S.W., hence it is necessary to pass 4 good ropes to buoys on port side (forward and aft), and 3 ropes to buoys on starboard side.

Berthing/unberthing only in daylight, although I received conflicting information about it as well, until the time of departure.

The berth and the pipelines are owned by the steel factory and they receive a fuel oil tanker every 14/15 days. My ship was discharging Carbon Black for P.T. Cabot Chemicals, who normally hire the berth and pipeline facilities from steel factory to fill up their tanks once every 6 months.

Lithuania

KLAIPEDA: (Also see Page 1254)

GENERAL: *Delete and substitute:*
A Baltic seaport, Klaipeda is situated in a narrow strait called the Jurinis Kanalas, which connects the Kursiu Marios (Gulf) with the Baltic Sea.

The Port of Klaipeda comprises the Jurinis (Sea) Canal consisting of 2 harbours: the Ziemos and Zlmones, the Fishing Port, Ferry Terminal and the Dane River quays situated by the roadway-bridge.

The port is open for navigation all the year round.

During strong winds blowing from directions between the S.W. and N.W., lying in the port is dangerous due to strong waves and surge (called "Tyagun"). In this event vessels must proceed to sea.

Add:

DOCUMENTS:

5 copies Crew List.
1 copy Passenger List.
1 copy Cargo Declaration.
1 copy Ship's Stores Declaration.
2 copies Crew Effects Declaration.
1 copy Maritime Declaration of Health.
Ship's Register.

APPROACHES: *Delete and substitute:*
The width of the approaching channel to the port is 100 m. and depth 11.5 m. Depths of the channel at a distance of 400 m. – 600 m. from the entrance to the Sea Canal are subject to changes due to lots of sand and mud brought down from the Kursiu Marios (Gulf) by the Spring floods, in particular. The entrance to the Sea Canal is protected by the Northern and Southern moles.

The length of the fairway of the Juru (Sea) Canal from the entrance up to the Secluma-Kiaules-Nugara shoal at the entrance to the Kursky Gulf is 4 miles, width varies from 180 m. to 300 m. and the depths are from 6 m. to 9 m. at the mean water level.

The permissible drafts for vessels navigating along the Juru (Sea) Canal are as follows: 10.6 m. to 8.0 m. from the canal entrance up to the Ziemos (Winter) harbour, but further up to the Fishing Port situated 1.5 miles and Ferry Terminal situated 2.5 miles to the South of the Dane River estuary – not more than 7.5 m. From the Fishing Port up to the Timber Harbour – not more than 5.0 m.

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: A Pilot boat usually meets a vessel at Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.). It carries the Pilot flag by day and lights prescribed for a Pilot boat by night.

Pilot's watch is kept 24 hours a day except in periods of dense fog and strong S.W. – N.W. winds over Force 7 Beaufort Scale.

The Master of a vessel shall order a Pilot via the Shipping Agency in advance.

The port is equipped with a coastal radar vessels' movement control system (Atlass type).

ANCHORAGE: *Delete and substitute:*
Anchorage can be obtained in the outer roads at Receiving Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.).

The outer roads anchorage for tankers is situated at a distance 3.5 miles (N.W.) from Receiving Light Buoy No. 1. Depths from 31 m. – 35 m.

The holding ground is sand and clay. Anchorage in the outer roads is not safe during heavy seas caused by Westerly winds.

RESTRICTIONS: *Delete and substitute:*
There are no restrictions for the entry to the port.

The width of the approaching channel to the port is 100.0 m. and depth 11.5 m.

MAX. SIZE: *Delete and substitute:*
Length not greater than 193 m. and breadth unlimited. Max. permissible draft for all vessels entering the port, 10.5 m.; and for tankers loading at installations outside main port area, 10.5 m.

RADIO: *Delete and substitute:*
Vessels can establish radio contact through the port radio station Klaipeda Radio, operating 24 hours per day on the following frequencies:

	Frequencies (kHz) or Channel		*Type of trans-mission*	*Time of work*
Call sign	*Working*	*Calling*		
LISCO	500	500	A1	H24
	455	454	A1	H24
	4229	4185.8	A1	HX
	5427	6278.7	A1	HX

(See Late Plans)

TANKERS: *Add:*
Report: December 1992.
New SRC Import/Export Facilities: Under development (See Plan).

Berth No. 1:
Max. Draft: 10.50 m.
Displacement: 14,000 tonnes.
LOA: No restriction for the above displacement.
Beam: No restriction for the above displacement.
Grades Handled: Fuel Oil, Kero, Leaded and Unleaded Mogas, Naphtha, Gas Oil.
Cargo Arms: "Kanon" 3×10 in. bolt flange connections.

Berth No. 2:
Max. Draft: 7.50 m.
Displacement: 7,500 tonnes.
LOA: No restriction for the above displacement.
Beam: No restriction for the above displacement.
Grades Handled: Base Lube Oils (Import), Kero, Leaded and Unleaded Mogas, Naphtha, Gas Oil.
Cargo Arms: "Kanon" 2×10 in. and 1×6 in. (lubes) bolt flange connections.

Berth No. 3:
Max. Draft: 10.50 m.
Displacement: 14,000 tonnes.
LOA: No restriction for the above displacement.
Beam: No restriction for the above displacement.
Grades Handled: LPG, Fuel Oil, Kero, Leaded and Unleaded Mogas, Naphtha, Gas Oil.
Cargo Arms: "Kanon" 3×10 in. with bolt flange connections and 1×6 in. for LPG with bolt flange connections and ESD and automatic release.
N.B. No vapour return line for LPG.

Bunkers up to 180 cSt available at each berth.

Bunker gas oil available at each berth.

Fresh water available ex-barge at anchorage.

Fendering: Cylindrical fenders and rectangular panels are fixed to the Outer Breasting Dolphins.

Type: Bridgestone SUC 145OH. 2 fitted to the Outer Breasting Dolphins of each berth.

Mooring Hooks: Stevens Quick Release Mooring System.
Type: U4 03008D 01.
Hook SWL 30 tons.
Hook Proof Load: 45 tons.
Capstan Load 2 tons.; speed 30 m./min.
Made by N.V. Steditek, Diepenbeek, Belgium.

Gangways: One provided for each berth with craneage.

General: Each berth also equipped with remote controlled fire water monitor and Closed Circuit TV.

On completion of construction, SRC (Marine Department) intend to sound berths to obtain detailed soundings.

No bollards are fitted to the jetty structure. All vessel impact loadings are taken by the Mooring Dolphins, the Outer Breasting Dolphins and the Inner Breasting Dolphins.

Latitudes and Longitudes for the final jetty structure will be submitted shortly.

A study will be undertaken shortly to determine the feasibility of berthing a 30,000 tonne displacement tanker with a fuel oil import cargo.

Additionally 2 transit navigation lights have been placed in a North/South line to indicate the approximate line of the subsea pipeline. Visible range of these lights will be 2 nautical miles. They will be sector lights. The rear light will be 100 m. North of the jetty, and will be white with a 10° visible sector showing to the South. The forward navigation light will be located on the jetty trestle. It will also show a 10° visible sector white light to the South. In addition, it will also show a 5° red and green sector to each side of the white light. By day, the rear navigation light shall have a daymark of a triangle point downward, and the forward navigation light shall have a daymark of a triangle point upwards.

Marshall Islands

MAJURO: (Also see Page 1299)

SHIPMASTER'S REPORT: December 1992.

General Information: Majuro Island is an atoll and is the main island of the Marshall Islands.

This vessel made the voyage to Majuro Island in the month of December 1992. In that period, a Northeasterly wind blows constantly with wind sometimes dying down unexpectedly, but also increasing to Force 8 during squalls.

Normal wind force in the month is 4-5, which makes unmooring rather difficult, and sometimes impossible, as the wind is then blowing on to the jetty.

Load port was Singapore, Guam first discharge port, Majuro second and Saipan third and last.

Arrival draft in Majuro was 8.50 m. even keel, and departure draft 4.65 m. forward and 6.90 m. aft.

Approach: Entering and leaving is only during daylight hours.

Anchoring outside not possible due to deep water.

Good radar echo at approximately 20 miles.

Calalin Channel is the approach channel, which is deep and wide.

Buoyage rather poor, but sufficient.

Coral reefs and shoals clearly visible and buoyed where necessary.

Charts used: B.A. 984 of no use, as scale is too small. U.S.C.G. 81782 is of large scale. This chart is not obtainable at Singapore, but when Guam is first port, then Guam Agent can obtain this chart, when requested, and is recommended.

Warning: On both charts buoys not charted correctly. Also shoals and reefs not as charted.

Calalin Channel and lagoon are free of dangers. If there is a shoal, it is buoyed, but not according to chart. This makes entering and leaving during daylight only, absolutely a must.

Strong cross currents experienced in Calalin Channel.

Pilots: Compulsory.

Pilot will board by a small motor speed boat.

When there is a heavy swell outside, which is often, Pilot cannot board outside, so will meet vessel in the lagoon.

Pilot will then talk ship in via VHF Channel 16.

Same will be done when outward bound.

Approach was made on course 175°, keeping the 3 green buoys on starboard side and the only red buoy on the port side. However, one cannot see the colour of the buoys at a distance, so Pilot will inform vessel.

It is essential to keep contact with the Pilot.

It may be possible that buoys will be changed at a later date, in order to meet the need for safe navigation, as shoals will change.

There are 2 Pilots, however one is mostly off the island, and the other one will then meet vessel.

Pilot to be ordered well in advance through Majuro Agent. Pilot is very competent, but he cannot board ship by pilot ladder, only by accommodation ladder.

One has to guess what side ship will berth, and consequently what side ladder has to be rigged.

During N.E.ly wind, berthing will be starboard side to.

Anchorage: Only possible in the lagoon, and according to Pilot not everywhere has good holding ground.

From the entrance channel to the jetty, vessel has sufficient time for accommodation ladder handling.

Jetty: The jetty is situated in the S.E. corner of the lagoon in position Lat. 07° 05.2′ N., Long. 171° 21.8′ E. Jetty direction is 080°.

Jetty is made of concrete, and has a horizontal top beam of wood, which is broken in some places, and heavy steel nails could cause some damage to hull.

Vertical rubber fender strips are placed regularly alongside the jetty. Bollards are placed at sufficient and regular intervals. This is not ideal, as an uneventful landing could therefore be on the concrete. High winds (squals of Force 8) could easily cause this.

Jetty length was estimated at at least 400 m.

Jetty is used for the inter-insular cargo ships (coasters) and visiting fishing vessels.

Jetty is not charted on both charts.

Berthing: No tugs or line handling boats are available. Ship will berth at the East end of the jetty, where the hose connection is located. In our case, we berthed starboard side alongside, with 8 shackles in the water on the port anchor.

As the ship's bow is close to jetty end, the forward ropes/breast lines are rather short. Aft ropes/breast lines were sufficient in length. 4 head ropes/breast lines and 2 forward springs were used. 5 aft ropes/breast lines and 2 aft springs were used. Due to the strong N.E.ly wind, one extra forward spring, leading forward, was used.

Other ships can moor close to the ship's stern.

It was very hard to get the bow alongside the jetty, due to the strong wind (Force 8) during mooring, and even with Force 4-5, it was difficult.

Draft: Various sources all issue drafts, ranging from 10.7 m. (Sietco), 10.50 m. (London) and 10.0 m. (Pilot). U.S.C.G. Publication 126, Sailing Directions for the Pacific Islands (obtainable in Singapore) states: Contact Local Authorities as depth may change and vary.

It took nearly 2 weeks to get a proper answer on the draft question, due to very difficult communications with Majuro.

Unmooring: Impossible during N.E.ly winds. Turning on fore springs with slow ahead and hard starboard rudder caused aft ship to turn away from jetty unsufficiently to get safe distance from jetty.

Any ship moored astern has to vacate jetty in order to avoid any touching with own ship.

Unmooring had to be abandoned and postponed to next day. Strong wind can last for several days. In that case, vessel has to seek assistance from any other vessel capable of towing.

There is a large buoy moored for the purpose of pulling the stern away. However, this is not recommended, due to the fact that 3 ropes have to be lashed together to reach the buoy.

Sometimes Pilot can arrange a launch to assist in pulling, but this is not always the case.

In our case, a visiting fishing vessel sent his skiff on our request and made fast and pulled the stern away from the jetty.

Special Regulations: Proceeding to and from Majuro requires navigation through the Kwajalein Missile Testing Area. This is a 200 miles radius area from Kwajalein (See B.A. Chart 761 Notice, and Pilot No. 61 and U.S. Publication 126).

In case vessel is unable to call Kwajalein Control Radio Station (ABK) by radio, then Guam Agent is able to contact the Military on Kwajalein on behalf of the Master and ask permission. Contacting the Military directly from ship, other than by radio, is impossible. There is no telex, and the telephone system is the Military telephone system, which cannot be penetrated by civil craft.

Typhoons: Majuro is situated in the region where most of the N.W. Pacific typhoons are generated. The track Guam/Majuro/Saipan is the most common track for these typhoons.

On this voyage, 2 typhoons of 945 mb. and 900 mb. were encountered within one week, all on the track Guam/Majuro. Normal typhoon warnings through the various meteo stations. There is one station which gives updates every minute. If vessel tunes to 15,000 kHz, it will have on line Port Collins in Colorado, which give warnings in human voice and the UTC time signal. After the UTC beep, updated and useful information is given for this area regarding tropical depressions, tropical storms and typhoons.

Sri Lanka

COLOMBO: (Also see Page 1776)

TANKERS: *Add:*
Report: December 1992.

(1) Proposed New Oil Terminal:
Planned LOA : 220 m.
Planned Draft : 13.0 m., could be increased to 14.0 m.
Deadweight : 60,000 tonnes
Diesel : Available
Bunkers : Available

This berth will be designed to accommodate broad beam shallow draft tankers up to a maximum of 60,000 d.w.t.

Although this berth was originally planned to be operational in 1993, due to the other various development programmes within the Port of Colombo, no priority has been afforded to this project. It is therefore unlikely that this terminal would be operational prior to the 2nd half of 1994.

(2) North Pier:
LOA : 180 m. at draft 10.36 m. LOA can be increased to 190 m. at draft of 9.8 m. for'd and 10.36 m. aft.
Bunkers/Diesel : Available, subject to quantity required and availability of berth.

Temporary restrictions have been placed on this berth as this area has been utilised in connection with the construction work of the new container terminal.

(3) Prince Vijaya Quay:
Operator : Sri Lanka Ports Authority
(A) PVQ 1
LOA : 137 m.
Draft : 9.2 m.
Density : 1025
(B) PVQ 2
LOA : 152 m.
Draft : 9.45 m.

This berth is primarily for general cargo. Bunkers and water available by barge.

LPG discharged into bowsers (road trucks). No storage available. Normally only vessels that can carry 1,200 – 1,600 tonnes are handled.

(4) Coastal Berth:
(A) CB 1
LOA : 98 m.
Draft : 6.0 m.

This berth is primarily for general cargo.
Bunkers and water available.

LPG discharged into bowsers (road trucks). No storage available. Normally only vessels that can carry 1,200 – 1,600 tonnes are handled.

TRINCOMALEE: (Also see Page 1778)

TANKERS: *Add:*
Report: December 1992
Oil Berth: A temporary restriction has been placed on the oil berth.

At present both the head and stern buoys are very old and due for replacement in the near future.

The fendering on the jetty is extremely poor and the connecting bridge between the dolphins is in a state of disrepair.
LOA: 180 m.
Draft: 10.0 m.

United States of America

GENERAL

CONTROLLED FLAG VESSELS:

SHIPPING AGENT GUIDELINES
UNITED STATES
PORT ENTRY REQUIREMENTS
FOR
CONTROLLED FLAG, CHARTERED AND
CREWED VESSELS
REVISED JULY 1991
PREVIOUS EDITIONS OBSOLETE
Issued by Department of Transportation
Commandant U.S. Coast Guard (G-MPS)
2100 2nd Street, S.W.
Washington, DC 20593-0001

PLEASE NOTE: The following is under constant review due to political changes taking place (See "Notes" at end of text).

1. General Requirements.

A. *INTRODUCTION.*

1. *Applicability:* This document provides guidance on requirements for entry into the United States territorial sea, internal waters, and ports for maritime vessels registered to, owned or operated by, chartered to, or which employ citizens of the nations listed below. Owners, Masters, Agents or persons in charge of these vessels should adhere to these requirements to facilitate legitimate entry of their vessels into the U.S. territorial sea, internal waters and ports.
   (a) Restricted countries:
   Albania
   Former Soviet Republics
   Bulgaria
   People's Republic of China
   Czechoslovakia
   Hungary
   Poland
   Romania
   (b) Vessels registered to, owned or operated by, or chartered by *Non-Entrant Nations* are not permitted to enter the U.S. territorial sea or U.S. ports. Nations appear on this list because of U.S. diplomatic sanctions against them.
   Non-Entrant Nations are:
   Cambodia
   Cuba
   People's Republic of Korea (North Korea)
   Vietnam
   Iran
   Iraq
   Libya
   Syria
   (c) Requirements contained in these guidelines also apply to officers and crew members from either Warsaw Pact or Non-Entrant Nations aboard *free-flag vessels* (Crew Make-Up Vessels). See Section 1.D. for Crew Make-Up Vessel requirements.
   (d) Although shipping agents may be hired to provide services for *public vessels*, all public vessel Entry Applications and changes are handled on a government-to-government basis at the embassy level via the Department of State, and must be made at least 14 days prior to desired entry date. See Section 1.B.13. for a definition of a public vessel.
   (e) The instructions provided in these guidelines apply to ports not designated as a notice port in any port access or maritime agreement. See Section 1.C. for definitions of request and notice port.
2. *Intent:* These guidelines are intended to assist shipping agents in obtaining port calls for vessels associated with the nations listed in Section 1.A.1. Access to U.S. ports by *any* foreign vessel is subject to compliance with applicable laws and regulations of the federal government and state and local authorities in the areas of their jurisdiction. Vessels associated with the nations listed in Section 1.A.1. must comply with all applicable foreign vessel regulations *and* any additional requirements found in these guidelines.
3. *Authority:* National security interests require that the movement of any vessel within the territorial sea or internal waters of the United States be subject to U.S. Government review. Authority for this is found in the Magnuson Act (Title 50, United States Code, Section 191, 1950). The President implemented this statute by Executive Order (E.O.) 10173, as amended since by E.O.s 10277, 10352 and 11249. These orders promulgated regulations in Part 6, Chapter 1, Title 33 of the Code of Federal Regulations (CFR). These regulations assign port security responsibilities to the U.S. Coast Guard.
   E.O. 10173 further directed all agencies and authorities of the United States Government and all state and local authorities to support, conform to, and assist in the enforcement of these regulations and any supplemental regulations issued.
4. *Maritime Agreements:* These guidelines implement and support provisions of treaties, conventions, agreements and similar instruments in force between the Government of the United States and the Governments of certain nations concerning maritime matters. Title I, United States Code, Section 112a, directs the Secretary of State to compile a publication *United States Treaties*

and Other International Agreements (UST) which contains all treaties to which the United States is a party. It also states that the UST "shall be legal evidence of the treaties, ... in all courts of the United States, ...". In some instances, these instruments and supporting documents state specific procedures for entry to United States ports, should be consulted for a complete understanding of requirements applicable to affected vessels. These guidelines address only those port entry requirements administered by the U.S. Coast Guard.

B. *DEFINITIONS.*

1. *2-Day Request (for Itinerary Changes).* This period is exactly 48 hours. It commences at the hour and minute that an Agent's Change Application Message is received at Coast Guard Headquarters. Weekends and federal holidays have no effect on 2-Day Requests.
2. *2-Working Day Notice:* This period excludes the day of receipt, day of entry, weekends, and federal holidays. For example, to obtain clearance for a ship to call on a Tuesday, the notice is required at the local Coast Guard Captain of the Port no later than the preceding Thursday, provided no federal holidays are involved.
3. *4-Day Notice:* This period excludes the day of receipt and the day of entry, but not weekends or federal holidays. Notice must be provided to the cognisant Coast Guard Captain of the Port.
4. *4-Working Day Request:* This period excludes the day of receipt, day of entry, weekends, and federal holidays. For example, to obtain clearance for a ship to call on a Tuesday, the request is required at Coast Guard Headquarters no later than the preceding Tuesday, provided no federal holidays are involved.
5. *7-Day Request:* This period excludes the day of receipt and the day of entry, but not weekends or federal holidays. For example, to obtain clearance for a ship to call on the 15th, the request must be filed by the 7th of that month.
6. *14-Day Request:* This period excludes the day of receipt only; not day of entry, weekends, or federal holidays. For example, to obtain clearance for a ship to call on the 15th, the request must be filed by the 1st of that month. 14-Day Requests are processed strictly on a government-to-government basis via the U.S. Department of State, not through Commandant (G-MPS).
7. *Government-to-Government:* These requests are co-ordinated at the embassy level. They are handled through diplomatic channels between the two governments only. When the Initial Itinerary Request is government-to-government, all desired future itinerary changes or late arrivals must also be handled on a government-to-government basis.
8. *Agent-to-Coast Guard:* Co-ordination of applicable port entry requests, itinerary changes, and special waivers are specifically conducted between the U.S. Coast Guard Headquarters Special Interest Vessel Desk and the U.S. Shipping Agent representing vessels covered by these guidelines.
9. *U.S. Coast Guard Special Interest Vessel (SIV) Desk:* The individual entry of all vessel's covered by these guidelines into the U.S. territorial sea and ports is co-ordinated by the USCG's SIV Desk. The SIV Desk or Duty Officer is available 24 hours a day. During working hours, call (202) 267-0476; after hours and weekends for *non-routine matters,* call Coast Guard Headquarters Command Center at (202) 267-2100, and ask for the Port Security Watch Officer.
10. *Port Call:* A port call includes anchoring or mooring within the territorial sea or, for ports not adjacent to the territorial sea, the waters of the geographical limit of the port area described in "Enclosure No.1". A vessel may be within these limits as long as it is either en route to an approved port call or departing from such a port call. A vessel's presence within these limits is only permitted within the time frame of the previously approved port call. Vessels must have either a Commandant (G-MPS) approved itinerary or provide advance notification to the local Captain of the Port for any U.S. port call.
11. *Port Area Descriptions:* Geographical port limits are defined for certain U.S. ports for purposes of administering this programme. See "Enclosures No.1 and 2" of port area descriptions. The port area descriptions apply to port calls involving the nations covered by these guidelines. Port areas, for which there is no geographical description, include that area which encompasses the physical facilities of the port, the internal water approaches, and the seaward approaches to the limits of the territorial sea.
12. *Free-Flag Vessel:* Any vessel which is registered to or owned by any nation other than those listed in Section 1.A.1.(a) or (b) of these requirements.
13. *Effective Control:* A vessel with a Soviet citizen serving in the capacity of Master or Chief Mate, or a vessel owned, operated or under charter to a non-entrant nation, is considered to be under the effective control of that country, and may therefore be subject to the same port access restrictions as a vessel bearing that country's flag.
14. *Crew Make-Up Vessel:* A free-flag vessel which is subject to these requirements because crew members or officers from certain nations listed in Section 1.A.1.(a) or (b) are aboard the vessel.
15. *Public Vessel:* A vessel which is owned or operated by a state and used only in non-commercial, government service. The term state (or nation) includes political subdivisions of the state as well as agencies of the state or its subdivisions. The term public vessel does not include vessels merely subsidised by the government, state-owned vessels chartered to private parties and engaged in commercial activities, or privately-owned vessels operated by government personnel that are engaged in commercial activities.
16. *Yacht:* Any vessel, under power or sail, operating for pleasure and not carrying cargo or passengers for hire.
17. *Greenwich Mean Time (GMT):* All times used in message communication are in GMT. Agents are responsible for converting GMT to local time as necessary.

C. *CHARTERED VESSELS:*

The U.S. Port Security Program also applies to free-flag vessels chartered by nations listed in Section 1.A.1.(b) of these guidelines.

1. Free-flag vessels chartered by *non-entrant nations* are considered to be under the effective control of the chartering nations, and are held to the same restrictions as vessels from non-entrant countries.

D. *CREW MAKE-UP VESSELS.*

1. *Restricted Country Nationals:* Free-flag vessels with Soviet nationals serving as Master or Chief Mate occasionally seek entry into Controlled ports. Problems involving the vessel's entry into a Controlled Port can be resolved in advance of the vessel's arrival if crew information is provided to the local Coast Guard and Immigration and Naturalisation Service (INS) with the normal 24 hour advance notice of arrival in accordance with 33 CFR 160, Subpart C. In those cases where crew information is brought to Coast Guard attention by other means, there may be delays while processing the entry. Any proposals for removal of Soviet nationals must be submitted to and approved by the Coast Guard Headquarters Special Interest Vessel Desk (G-MPS-2) prior to the vessel's entry into port.
   - (a) *Controlled Ports:* Soviet Masters and Chief Mates must be removed and kept away from the vessel during the vessel's entire port call, including the inbound and outbound transits.
     - (1) Proposals for removal should follow the format shown in Figure (C) of Enclosure No. 3 to these guidelines. Each proposal is evaluated on a case-by-case basis. Direct replacement of each officer removed is necessary if required to meet minimum manning standards or for safety reasons.
     - (2) Armed guards are required when the officer(s) removed do not hold current entry visas.
     - (3) Should a vessel be discovered in a Controlled Port with a Soviet Master and/or Chief Mate on board, the vessel may be ordered to cease cargo operations or depart the port until an acceptable proposal is received from the Agent and approved by the Coast Guard.
   - (b) *All Other U.S. Ports:* There are no Coast Guard requirements for removal of officers or crewmen. Immigration and Naturalisation Service (INS) requirements apply.
2. *Non-Entrant Officers and Crew Members:* Free-flag vessels with officers and crew members from non-entrant nations on board occasionally seek entry to U.S. ports. Six non-entrant nations have been designated by the Secretary of State as having repeatedly provided support for acts of international terrorism. They are: Libya, Syria, Iran, Iraq, Cuba and the People's Republic of Korea (North Korea). Restrictions imposed by the Coast Guard apply to officers and crew members of non-entrant nations IN ALL U.S. PORTS as outlined below.
   - (a) *Non-Entrants Subject to Restriction:* Crew members and officers from non-entrant, terrorist-supporting nations must be restricted to the vessel under *armed* guard with a ratio of one guard for every four restricted crew members. It is not necessary to restrict them below decks, nor is it necessary to prevent them from performing their normal shipboard duties. They must merely be kept from departing the ship. THIS REQUIREMENT APPLIES IN ALL PORTS.
     - (1) Proposals for crew restriction should follow the format shown in Figure (D) of Enclosure No. 3 to these instructions. Each proposal is evaluated on a case-by-case basis.
     - (2) Should a vessel be discovered in port with crew members or officers on board from a non-entrant country subject to restriction, the vessel may be ordered to cease operations or depart the port until an acceptable proposal is received from the Agent and approved by the Coast Guard SIV Desk.
   - (b) *Non-Entrants Not Subject to Restriction:* Crew members and officers from Cambodia and Vietnam are not subject to Coast Guard restriction, but are only subject to Immigration and Naturalisation Service (INS) requirements.

E. *NON-STANDARD ENTRIES:*

1. *Force Majeure:* Force majeure is based upon the historical premise in international law that if a vessel is compelled to move into the waters of a foreign state by some uncontrollable external force or condition, then the vessel should be excused from compliance with domestic laws which prohibit or restrict such entry. Force majeure is an overwhelming force or condition (e.g. storm, fire, disablement or mutiny) of such severity or magnitude that it threatens loss of the vessel, cargo or crew unless immediate corrective action is taken. Each Coast Guard District Commander holds authority for approving entry under claim of force majeure; however, the cognisant Coast Guard Captain of the Port must be informed prior to the vessel's entry into U.S. territorial seas. Vessels requesting entry into U.S. territorial seas under force majeure are subject to a boarding to validate the claim, and may be directed to a specific location, not to their port of choice.
2. *Innocent Passage:* All foreign ships, including warships, are entitled to the right of passage through the U.S. territorial sea, provided the passage is innocent under the United Nations Conventions on the Law of the sea. Innocent passage means continuous and expeditious traversing of the territorial sea either without entering internal waters or passage for the purpose of proceeding to or from internal waters. It may include stopping or anchoring only when

this is incident to ordinary navigation (such as when awaiting a favourable tide to traverse a particular narrows).

Innocent passage specifically does not include hovering, stopping or anchoring for other reasons, and it does not include fishing. Anchoring or slow steaming within the U.S. territorial sea to avoid early arrival in port for which the vessel holds an approved itinerary will not be considered innocent passage and may result in cancellation of the vessel's itinerary, except when the vessel's movements are directed by a Coast Guard Vessel Traffic Service (VTS) for purposes of safety or navigation.

3. *Medical Emergency:* Foreign flag vessels not previously approved for a U.S. port call may enter U.S. waters for the sole purpose of removing a crew member in need of *immediate* medical attention, or for the removal of a deceased crew member. The cognisant Coast Guard District Commander may grant permission for a vessel to enter territorial waters for a MEDEVAC (Medical Evacuation) or may also arrange a MEDEVAC outside the territorial sea. If the vessel is given permission to enter the territorial sea for a MEDEVAC, the vessel must depart upon completion of the transfer of the affected crew member. Notify the Coast Guard District Commander as soon as possible prior to desired entry.

4. *Repatriation:* It is the Department of State's position that repatriation of foreign nationals who have been evacuated for emergency medical treatment should be arranged and paid for by their countries of citizenship. Local INS and Customs should be notified of proposed repatriations. Requests for entry of vessels into U.S. territorial seas for the purpose of repatriation should be forwarded to Commandant (G-MPS) for consideration.

5. *Cooperative Marine Scientific Research:* When specifically authorised by Commandant (G-MPS), a Coast Guard District Commander may permit brief entry of research vessels (ocean and fishing) of nations subject to these requirements into the territorial sea of the U.S. for the sole purpose of embarking/disembarking U.S. scientists and their equipment.
   (a) Entry of these vessels for any purpose other than, or in addition to, U.S. scientist and equipment transfers must be approved by the U.S. Department of State. This includes transfer of non-U.S. scientists from U.S. vessels to or from foreign vessels.
   (b) Vessels permitted to enter U.S. waters to transfer U.S. scientists and equipment need not provide an Advance Notice of Arrival in accordance with 33 CFR 160, Subpart C; however, vessels must notify the local Coast Guard of their arrival and departure times into and out of the U.S. territorial seas.
   (c) Vessels permitted entry under this authority must return to international waters immediately upon transfer of the scientists and their equipment.

NOTE: Vessels discharging oil into the U.S. territorial sea or U.S. ports are liable for clean-up costs and subject to a civil penalty under the Federal Water Pollution Act. A Certificate of Financial Responsibility (COFR) is required for entry into the U.S. territorial sea.

6. *National Marine Fisheries Service (NMFS) Observer Program:* Under authority of the Fisheries Conservation Management Act, NMFS can place U.S. observers aboard foreign fishing vessels while they fish within the U.S. 200-Mile Fisheries Conservation Zone (also referred to as the Exclusive Economic Zone by Presidential Proclamation of 10th March 1982). In some instances, it is advantageous for a foreign fishing vessel to enter the U.S. territorial sea briefly to embark or disembark a NMFS observer. When specifically authorised by Commandant (G-MPS), a Coast Guard District Commander may permit brief entry of commercial fishing vessels of nations subject to these guidelines into the territorial sea of the U.S. for the sole purpose of embarking or disembarking NMFS observers. These fishing vessels must have a valid Governing International Fishing Agreement (GIFA) permit.
   (a) Entry of these vessels for any purpose other than, or in addition to, NMFS observer transfers must be approved by Commandant (G-MPS).
   (b) Vessels ordered or permitted to enter U.S. waters to transfer NMFS observers need not provide an Advance Notice of Arrival in accordance with 33 CFR 160, Subpart C; however, vessels must notify the local Coast Guard of their arrival and departure times into and out of the U.S. territorial sea.
   (c) Vessels permitted entry under this authority must return to international waters immediately upon transfer of observers.

NOTE: Vessels discharging oil into the U.S. territorial sea or U.S. ports are liable for clean-up costs and subject to a civil penalty under the Federal Water Pollution Act. A Certificate of Financial Responsibility (COFR) is required for entry into the U.S. territorial sea.

7. *Joint Fishing Ventures:* From time to time, fishing vessels from Restricted countries seek entry into the territorial sea and internal waters of the U.S. in order to participate in joint venture fishing operations between their government and individual U.S. state governments. These operations usually involve large foreign fish processing vessels anchoring within state waters and receiving fish caught by U.S. trawlers. The catch is processed aboard the foreign vessel and later (often a period of several weeks) transported for sale overseas. Since this fishing activitiy takes place wholly within state waters and not within the EEZ, it is not regulated under the Fisheries Conservation Management Act, but rather under the laws of the individual states involved. Participating foreign vessels are not required to hold Governing International Fishing Agreement (GIFA) permits. These vessels frequently change locations as they follow the U.S. fishing fleet along the coast. Requiring them to adhere to fixed port call itineraries and submit Itinerary Change Requests 2 days in advance to Commandant (G-MPS) is not desirable from a program administration or a security standpoint. Therefore, entry of Restricted vessels participating in joint fishing ventures will be governed by the following procedures:
   (a) Initial Itinerary Requests will be submitted to Commandant (G-MPS). Requests must specify desired operating areas and approximate dates of operation within the territorial sea or internal waters, as well as dates for specific port call requests.
   (b) Commandant (G-MPS) will issue port call approvals for whole itineraries *within a single COTP zone* (including specifically requested port calls requiring Commandant approval), not for specific dates within each operating area. A change of operating area to a different COTP zone will require submission of a separate Itinerary Request.
   (c) Vessel movements within a COTP zone need not be approved by Commandant, however, vessels must comply with local COTP position and movement reporting requirements. The vessel's Master or Agent must notify the cognisant COTP of the vessel's intended movements, new position, and estimated date and time of arrival at least 12 hours prior to weighing anchor and proceeding to a new operating area.
   (d) If a vessel desired an actual port call for locations or dates not approved on the Initial Itinerary Request, the Agent must submit an Itinerary Change Request to Commandant (G-MPS).

8. *Vessels Enroute Canadian Ports:* All vessels, including those from non-entrant nations, must pass through U.S. waters in the St.Lawrence Seaway, the Great Lakes or the Straits of Juan de Fuca enroute to ports in Canada. Vessels transiting U.S. waters for this purpose are considered to be engaged in innocent passage and Coast Guard permission for such passage is not necessary.

9. *Remote Ports Under U.S. Jurisdiction:* The requirements of this program apply to remote Alaskan ports as well as to Guam, American Samoa and the Commonwealth of the Northern Marianas Islands (CNMI – Saipan, Rota, Tinian).

10. *Deepwater Ports:* Port calls at U.S. deepwater ports require the same conditions of advance notification for entry as applicable in U.S. coastal ports (refer to Title 33, U.S.C., Section 1518(c)).

2. Port Entry Application Procedures.

A. *PORT ENTRY APPLICATION REQUIREMENTS.*

1. *General:* Agents should file Itinerary Requests for only those U.S. ports for which they will be acting as Agents. All port entry applications must be in writing. Telephone inquiries are welcome during normal business hours (0700 hrs. to 1530 hrs. Eastern time). The Special Interest Vessel Desk, in the Port Security Branch at U.S. Coast Guard Headquarters, can be reached by calling Tel: (202) 267-0476. For non-business hour emergencies, call U.S. Coast Guard Headquarters Command Center at Tel: (202) 267-2100. Port Entry Applications (except government-to-government) should be submitted by the vessel's Agent directly to Coast Guard Headquarters. *Telex messages are preferred.* Port Entry Applications will *not* be accepted by local or regional Coast Guard commands. Shipping Agents are responsible for ensuring that requests, whether sent electronically, by mail, or delivered by hand, arrive at Coast Guard Headquarters in time to meet all requirements. Coast Guard Headquarters will send a receipt confirmation telex within 24 hours of receiving a telex from a shipping Agent. *If you do not receive this confirmation telex within 48 hours, call the SIV Desk to inquire about your request.*

   Make application only to one of the following USCG Headquarters addresses:
   (a) Telex address: "Commandant (G-MPS), U.S. Coast Guard, Washington, D.C. 20593-0001. Telex No. 892427, Answerback COASTGUARDWSH."
   (b) TWX address: "Commandant (G-MPS), U.S. Coast Guard, Washington, D.C. 20593-0001. TWX No. 710 822 1959, Answerback CGDOTWSH."
   (c) Western Union address: "Commandant (G-MPS), U.S. Coast Guard, 2100 2nd Street, S.W., Washington, D.C. 20593-0001." (Prepaid).
   (d) Port entry applications may also be sent by mail or delivered by hand. The mailing address is:

   Commandant (G-MPS-2)
   U.S. Coast Guard Headquarters
   2100 Second Street, S.W.
   Washington, D.C. 20593-0001.

2. *Required Information:* All port entry applications must provide certain information in an orderly manner (See Figure 3-A of Enclosure 3 for an example of an Initial Itinerary Request). Agents should double check all information, including spelling of foreign translations, since requests with incomplete information will be denied. All Port Entry Applications *must* include the following:
   (a) Shipping agent's complete address, commercial telephone number, point of contact, and Telex/TWX number with answer back code or Western Union address.
   (b) Appropriate message title identification: For example, 4-working day request or 7-day request.
   (c) Itinerary number: For example, Initial Itinerary, or Change 1, 2, 3, ...
   (d) Vessel type: This information must precede the vessel's name. Use applicable abbreviation as follows:

Merchant Vessel,	M/V
Passenger Vessel,	P/V
Fishing Vessel,	F/V
Fishing Support Vessel,	F/V
Research Vessel,	R/V
Sailing Vessel,	S/V

   (e) Vessel's name, flag, call sign, and Lloyd's number.

(f) Itinerary Information:
  (1) U.S. ports of call in the order desired. See Section 1.B. for the definition of a port call.
  (2) Desired arrival and departure dates.
(g) Cargo information: Type of cargo loaded/unloaded; loading port of cargo being discharged; destination for cargo being loaded.
(h) Masters' name.
(i) Next and last foreign port of call.

(*Note:* Information above is *required*; failure to provide required information will result in denials or cancellations.)

3. *Arrival and Departure Dates:*
  (a) Only one day overlap is allowed for multiple port calls (i.e. Providence, 6/17-6/19, Morehead City 6/19-6/21, Miami 6/21-6/27).
  (b) All Approved Itineraries automatically terminate upon the vessel's departure en route a foreign port of call, except when the vessel departs en route Canadian ports, which have been noted on the Initial or Change Itinerary Message.
  (c) An Approved Port Call terminates upon departure of the vessel from the described port area. For instance, if a vessel is approved 6/04-6/10, but departs the port area on 6/08, it cannot re-enter port unless a new Initial Itinerary is filed.
  (d) The vessel's official notification period begins upon receipt of the agent's telex request or notice at Coast Guard Headquarters communication center. By return telex, Commandant (G-MPS) will inform the agent of the exact *Greenwich Mean Time* (GMT) his message was received.
  (e) Port approvals are in effect through 2359 (one minute before midnight) GMT on the final day stated on Port Call Approval. Vessels must be outside of the port area by this time. Vessels may not wait until this time to begin their outbound departure without being in violation of U.S. territorial waters.
4. *Advance Notices of Arrival:* None of the procedures outlined in this document relieves the Master or Agent of the requirement to provide advance notice of arrival to each local Coast Guard Captain of the Port (COTP) in accordance with 33 CFR 160, Subpart C, and to comply with other applicable laws and regulations.
5. *Approved Itinerary Entry Times: (Port Entry).* If the vessel's itinerary is approved, the Agent will be notified by message specifying the dates that the vessel is authorised to be in the port(s). The vessel may enter that specified port at any time during the approved dates. The vessel must depart the port no later than 2359 GMT of the final day stated on the port call approval unless the Agent has requested and received approval for an extension of the port call.
6. *Denials:* Vessels will be denied U.S. entry when there is insufficient information or if the agent's application message does not meet the time limits required by these guidelines. All denials are sent to the vessel's agent by the end of the working day, following the day of receipt of the telex. An agent may, however, submit a new corrected Entry Application for the vessel. In such cases, the official notification period commences upon receipt of the corrected Entry Application, not the original Entry Application which was denied.
7. *Early Arrival:* A vessel which holds an Approved Itinerary for a United States port entry shall not enter the U.S. territorial sea earlier than the first day on the approved itinerary. A vessel is considered to have arrived in port when it enters U.S. territorial waters, or, for ports not adjacent to U.S. territorial waters, the port area descriptions listed in "Enclosure No.1".

B. *ITINERARY CHANGE REQUESTS.*

1. *General:* Agents seek Itinerary Change Requests generally for three reasons: To add ports, to change the previously approved port call sequence and/or dates, and to cancel planned port calls after receiving approval to enter. In each case, the agent's message request must list the vessel's full remaining itinerary, in addition to the desired change. Failure to list the vessel's entire desired U.S. port calls will lead to automatic cancellation of the vessel's itinerary other than the requested change. For example, if the Initial Itinerary requested Providence, Morehead City and Miami, and the Agent sent a change listing only Providence, the vessel would be considered only for entry into Providence. Two days is the minimum time necessary to process itinerary change requests. Use the format in Figure 3-B to Enclosure 3 for Itinerary Change Requests. Actions applicable to three types of itinerary change requests follow.
2. *To add Port Calls:* Request for additional port calls are reviewed using the same criteria as for initial port calls. The following apply:
  (a) Agent messages should be titled CHANGE 1, 2, 3, etc.
  (b) Additional ports must be requested far enough in advance to comply with the applicable request period (i.e. 7-days, 14-days, etc.).
  (c) When an initial government-to-government request is required, all requests for additional ports must be made at the Embassy level.
3. *To Change Port Call Sequence/Dates:* Change requests to a vessel's approved port call sequence/dates are accepted by Commandant (G-MPS), and normally approved, provided the following criteria are met:
  (a) The initial port request was not government-to-government. (All others which are government-to-government must continue to be handled at the Embassy level).
  (b) The Itinerary Change Request was submitted far enough in advance. Two days is the minimum processing time required by the Coast Guard to process requests for changes in port sequence or dates. Whenever possible, the Coast Guard will try to expedite the itinerary changes, however, requests made within the minimum processing time may be delayed. Agents should submit change requests *as early as possible*.
  (c) The change was submitted prior to the close of the approved itinerary (See Section 2.A.5.).
  (d) The new date requested meets the minimum advance request period specified.
4. *Cancelled Port Calls:* Occasionally, cargo loading plans change and certain previously requested U.S. port calls may not be desired. Agents should notify the Coast Guard of cancelled port calls as far in advance as possible. Failure to arrive at a port within the approved itinerary dates will lead to cancellation of a vessel's remaining itinerary, and will subsequently delay entry to a previously approved port.
5. *Waivers:* The Coast Guard recognizes that unusual circumstances arise, which require agents to request waivers of the advance itinerary request period. *Approval of waiver requests will be the exception rather than the rule, and all waiver requests should be well documented.* Agents must fully elaborate on their justification for the Coast Guard to consider a waiver of these entry requirements. Agents should allow at least 48 hours for waiver requests to be processed. Waivers are not ordinarily approved for purely economic reasons. See "Enclosure No.2, Figure H." for an example of a waiver request.

3. Specific Entry Requirements for Restricted Nations.

A. GENERAL: Vessels that bear the flag of Restricted nations may enter the territorial sea, ports and internal waters of the United States subject to certain limitations. The following contains specific entry requirements by country for vessels registered to Restricted countries.

B. CREW MAKE-UP VESSELS: Officers from Restricted nations covered by these guidelines aboard free-flag vessels (see Section 1.D.) may be subject to removal or restriction on board prior to the vessel's entry into port. Agents should provide advance crew information to the local Coast Guard Captain of the Port (COTP) and the local Immigration and Naturalisation Service (INS) to avoid any possible delays due to crew nationality.

1. *Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania:*
  (a) Commercial cargo, passenger, fishing and fisheries support vessels and private yachts bearing the flag of the above countries need only submit Advance Notice of Arrival required by 33 CFR 160, Subpart C, for entry into *all* U.S. ports.
  (b) *Public* vessels bearing the flag of the above nations must submit a government-to-government request and receive approval from the Department of State for entry into *Controlled* U.S. ports. Entry into all other U.S. ports requires only Advance Notice of Arrival specified in 33 CFR 160, Subpart C.
2. *People's Republic of China (CH):*
  (a) Access for vessels from the PRC is governed under the bilateral Maritime Transport Agreement of 15th December 1988. Under the agreement, commercial cargo, fishing, fisheries support vessels, vessels engaged in hydrographic, oceanographic, meteorological or terrestrial magnetic field research, and private yachts bearing the flag of the PRC must submit a 4-day request to Commandant (G-MPS) and receive an approved itinerary for entry into Controlled ports.
  (b) Commercial cargo, passenger, fishing, fisheries support vessels, vessels engaged in hydrographic, oceanographic, meteorological or terrestrial magnetic field research, and private yachts bearing the flag of the PRC need only submit advance notice of arrival required by 33 CFR 160, Subport C, for entry into all other U.S. ports.
  (c) All other PRC vessels must submit a government-to-government request and receive approval from the Department of State for entry into U.S. ports.
3. *Former Soviet Republics (UR):*
  (a) Restrictions on access to U.S. ports for vessels from the Soviet Union are specified in the bilateral Maritime Transport Agreement of 1st June 1990, as described below.
  (b) No vessels bearing the flag of the Soviet Union are permitted to enter Controlled ports.
  (c) Commercial cargo, passenger, fishing and fisheries support vessels bearing the flag of the Soviet Union must submit a 2-working day notice to the COTP for entry into the ports listed in Exhibit 1 to this section.
  (d) Commercial cargo, passenger, fishing and fisheries support vessels bearing the flag of the Soviet Union must submit a 7-day request to Commandant (G-MPS) and receive an approved itinerary for entry into all other U.S. ports (with the exception of Controlled ports).
  (e) Public vessels bearing the flag of the Soviet Union must submit a government-to-government request and receive approval from the Department of State for entry into U.S. ports.
  (f) Yachts bearing the flag of the Soviet Union need only submit advance notice of arrival required by 33 CFR 160, Subpart C, for entry into U.S. ports; however, yachts may *not* enter Controlled ports.

Exhibit 1:

Designated 2-Working Day Notice Ports U.S./Former U.S.S.R. Maritime Transport Agreement 1st June 1990.

1. Albany, NY.
2. Baltimore, MD.
3. Baton Rouge, LA.
4. Bay City, MI.
5. Beaumont, TX.
6. Bellingham, WA.
7. Boca Grande, FL.

8. Boston, MA.
9. Brownsville, TX.
10. Burnside, LA.
11. Chicago, IL.
12. Cleveland, OH.
13. Duluth, MN. (including Superior, WS.)
14. Dutch Harbor, AK.
15. Erie, PA.
16. Everett, WA.
17. Fall River, MA.
18. Galveston, TX. (including Texas City, TX.)
19. Georgetown, SC.
20. Gulfport, MS.
21. Houston, TX.
22. Huron, OH.
23. Kenosha, WS.
24. Lake Charles, LA.
25. Long Beach, CA.
26. Longview, WA.
27. Los Angeles, CA. (including San Pedro, Wilmington and Terminal Island, CA.)
28. Milwaukee, WS.
29. Mobile, AL.
30. New Orleans, LA. (including Gramercy, LA.)
31. New York, NY. (including New York and New Jersey parts of the Port Authority of New York and New Jersey)
32. Olympia, WA.
33. Orange, TX.
34. Philadelphia, PA. (including Camden, NJ.)
35. Point Comfort, TX.
36. Ponce, PR.
37. Port Arthur, TX.
38. Port Everglades, FL.
39. Portland, ME.
40. Portland, OR. (including Vancouver, WA.)
41. Richmond, VA.
42. San Francisco, CA. (including Alameda, Oakland, Berkeley and Richmond, CA.)
43. Savannah, GA.
44. Seattle, WA.
45. Tacoma, WA.
46. Tampa, FL.
47. Toledo, OH.
48. Wilmington, DE.
49. Wilmington, NC.

Enclosure No. 1.

U.S. Port	*Geographical Description*
Alameda, California	See San Francisco, California.
Albany, New York	North of Castleton, New York Bridge Mile 135.6 on the Hudson River and South of U.S. Lock 1 at Troy, New York on the Hudson River.
Anchorage, Alaska	The waters of Cook Inlet, Northward from line drawn between Cape Douglas and Cape Elizabeth.
Antioch, California	See Stockton, California.
Apra Harbour, Guam	The waters of Apra Outer Harbour and Apra Inner Harbour.
Astoria, Oregon	Coincident with Clatsop County, Oregon.
Baltimore, Maryland	North and West of a line from North Point to Bodkin Point, but including Annapolis anchorage area between the Chesapeake Bay Bridge and Kent Point.
Bar Harbor, Maine	The waters of Frenchman Bay and Blue Hill Bay, North of Great Duck Island, East of Blue Hill Neck, and West of Schoodic Point.
Baton Rouge, Louisiana	See New Orleans, Louisiana.
Bay City, Michigan	The Saginaw River entrance to the limits of navigation.
Beaumont, Texas	The Neches River, from the Intracoastal Waterway (ICW) to Interstate 10 Bridge.
Bellingham, Washington	Bellingham Bay.
Benicia, California	See San Francisco, California.
Berkeley, California	See San Francisco, California.
Boca Grande, Florida	Boca Grande Channel, from sea buoy to Port Boca Grande on Gasparilla Island.
Boston, Massachusetts	Boston Harbour proper, including Mystic River and Chelsea River to limit of navigation and the harbors of Gloucester, Lynn, Salem and Plymouth, Massachusetts.
Brownsville, Texas	The Brownsville Ship Channel, from the sea buoy to the Brownsville Turning Basin.
Buffalo, New York	Outer Harbour, including Buffalo River to limits of navigation. Black Rock Canal, from the entrance channel downstream to its termination abeam of Placid Harbour. The Niagara River, downstream from Placid Harbour to limits of navigation.
Burnside, Louisiana	See New Orleans, Louisiana.
Camden, New Jersey	See Philadelphia, Pennsylvania.
Cape Cod, Massachusetts	An area extending from the Western Terminus of the Cape Cod Canal, Eastward (including Cape Cod Bay, Chatham, Sandwich and Provincetown).
Charleston, South Carolina	See "Enclosure No. 2."
Charlotte Amalie, St. Thomas, U.S.V.I.	St. Thomas Harbour, including East and West Gregerie Channels, Long Bay, Cay Bay, Crown Bay, Krum Bay and the Inner and Outer Harbor Anchorages.
Chicago, Illinois	Between Burns Harbour (including Burns Waterway Harbour) and Northern limits of Chicago Harbour, including Lake Calumet and other waterways, inland to intersection of the Chicago Sanitary and Ship Canal with Calumet Sag Channel.
Christiansted Harbour, St. Croix, U.S.V.I.	Christiansted Harbour proper.
Cleveland, Ohio	Cleveland Harbour, including Cuyahoga River to limits of navigation.
Coos Bay, Oregon (including North Bend)	All of Coos Bay to North of Coos River.
Corpus Christi, Texas	The Corpus Christi Channel, from the sea buoy to the Viola Turning Basin, and the La Quinta Channel from its junction to the Corpus Christi Channel.
Detroit, Michigan	All navigable waters of the United States within the St.Clair River, Lake St.Clair, and Detroit River from Fort Gratiot Light to the Detroit River Light.
Duluth, Minnesota/Superior, Wisconsin	Duluth/Superior Harbour only.
Dutch Harbour, Alaska	The bays and harbours of Dutch Harbour, Illiliuk Bay, Illiliuk Harbour, Captain's Bay, Nateekin Bay, Broad Bay, Wide Bay, and Unalaska Bay to a distance 3 miles seaward of the Northern end of Unalaska Island.
Erie, Pennsylvania	Presque Isle Bay.
Eureka, California	Humboldt Bay.
Everett, Washington	N.E. end of Possession Sound.
Fall River, Massachusetts (Including North Tiverton, Rhode Island and Somerset Massachusetts)	Mount Hope Bay and Taunton River coincident with corporate limits of the City of Fall River.
Fernandina, Florida	All waters of the St. Mary's River Entrance Channel West of the COLREGS Demarcation Line as described in Title 33 CFR Part 80.720 (c) and all waters of the Amelia River South to Intracoastal Waterway Statute Mile 718.
Frederiksted, St. Croix, U.S.V.I.	Frederiksted Harbour proper.
Freeport, Texas	Freeport Entrance Channel of the Old Brazos River to the Stauffer Turning Basin, to include the Brazos Harbour.
Galveston/Texas City, Texas	The Galveston and Texas City Channels from their intersection with the Houston Ship Channel to their respective Turning Basins.
Georgetown, South Carolina	Entrance channel between Sand and North Island and North Island at South Island Bend through Wingah Bay, including all Georgetown and Sampit River, North to where Waccamaw River and Pee Dee River merge at U.S. Route 17.
Gloucester, Massachusetts	See Boston, Massachusetts.
Guanica, Puerto Rico	Bahia de Guanica proper.
Green Bay, Wisconsin	Port area of Green Bay, including the Fox River upstream to the limit of commercial navigation.
Guayanilla, Puerto Rico	Bahia de Guayanilla and Bahia de Tallaboa.
Gulfport, Mississippi	Ship Island Pass and Gulfport Ship Channel from the sea buoy to the harbour basin.
Hampton Roads, Virginia (including Norfolk, Newport News, Jamestown, Yorktown and Portsmouth, Virginia)	See "Enclosure No. 2"
Harrisville, Michigan	See Detroit, Michigan.
Hilo, Hawaii	Eastern end of Kohio Bay on N.E. coast of the Island of Hawaii.
Honolulu, Hawaii	See "Enclosure No. 2".
Houston, Texas	The Houston Ship Channel, from Five Mile Cut to the Houston Turning Basin and the Bayport Turning Basin.
Humboldt Bay, California	All waters of Arcata Bay and South Bay shoreward of a line drawn from Humboldt Bay Entrance Light 4 to Humboldt Bay Entrance Light 3.
Huron, Ohio	Huron River to limits of deep draft navigation.

Jacksonville, Florida	All waters of the St. John's River upriver of the COLREGS Demarcation Line as described in Title 33 CFR part 80.723 (c) terminating at the Highway 295 bridge.
Juneau, Alaska	Auke Bay and Gastineau Channel, N.W. of a line between Pt. Salisbury to Marmion Island and S.E. of a line between Pt. Louisa to outer point on Douglas Island.
Kalama, Washington	See Longview, Washington.
Kenosha, Wisconsin	Line drawn from Breakwater Light to South Pier Light.
Ketchikan, Alaska	Tongass Narrows Northwest of a line between Mountain Point and Gravina Point, and Behm Canal North of a line between Vallenar Point and Caamano Point, and South of a line between Point Francis and Escape Point, including Vallenar Bay.
Kings Bay, Georgia	See "Enclosure No. 2".
Kodiak, Alaska	All waters of Woman's Bay, St.Paul Channel and Chiniak Bay N.W. of line from Cliff Point to Southern point of Woody Island.
Laguna de Las Mareas, Puerto Rico	Laguna de Las Mareas proper.
Lake Charles, Louisiana	The Calcasieu River, from Light "83" North to the Interstate 10 Bridge, including the Industrial Canal, Prien Lake, Lake Charles and the Turning Basins.
Limetree Bay, St. Croix, U.S.V.I.	Limetree Bay, Limetree Bay Channel, and Krause Lagoon (also known as Alucroix or Martin Marietta Channel).
Long Beach, California (including Eastern part of Terminal Island).	That portion of San Pedro Bay and Cerritos Channel within the City of Long Beach, California.
Longview, Washington	Columbia River, between Mile 62 and Mile 70.
Los Angeles, California (including San Pedro, Wilmington, and Western Terminal Island)	That portion of San Pedro Bay and Cerritos Channel within the City of Los Angeles, California, and the Chevron El Segundo Offshore Mooring.
Louisiana Offshore Oil Port (LOOP)	All waters comprising the LOOP Safety Zone and Safety Fairway as described in 33 CFR Appendix A and 33 CFR 166.200(d)(52) respectively.
Martinez, California	See San Francisco, California.
Mayaguez, Puerto Rico	Bahia de Mayaguez, Mayaguez Approach Channel and Mayaguez Terminal Channel.
Menominee, Michigan/ Marinette, Wisconsin	Breakwater entrance to the limits of navigation.
Miami, Florida	Upper Biscayne Bay, South of MacArthur Causeway and North of Rickenbacker Causeway, including Government Cut. The Miami River East of the Brickell Ave. Bridge.
Milwaukee, Wisconsin	Milwaukee Breakwater to limits of navigation.
Mobile, Alabama	The Mobile Ship Channel, from the sea buoy to the Cochran Bridge, and the Hollinger's Island Channel from its junction with the Mobile Ship Channel.
Morehead City, North Carolina	Morehead City Harbour, including Radio Island from the sea buoy at Beaufort Inlet, North Carolina.
Muskegon, MI	Muskegon Lake to limits of navigation within Muskegon Breakwater.
New Bedford, Massachusetts (including Fairhaven, Massachusetts)	The area North of a line extending from Wilbur Point in the East to Mishaum Point in the West.
New Harbor, Maine	The waters of Muscongus Bay North of Monhegan Island, East of Pemaquid Point, and West of Georges Island.
New Haven, Connecticut	The waters of New Haven Harbour bounded on the South by a line from Oyster River Point, West Haven, CT. to the RW"NH" Mo (A) Buoy, thence to Morgan Point, East Haven, CT. and on the North by the Quinnipiac River Bridge.
New London and Groton, Connecticut	See "Enclosure No. 2".
New Orleans, Louisiana	Sea Buoy to Mississippi River Mile 255.2. Includes New Orleans, Baton Rouge and Burnside, Louisiana.
New York, New York (including the Port Authority of New York and New Jersey).	North of a line drawn between Sandy Hook, NJ. and East Rockaway, NY., West of the Throgs Neck Bridge, South of the George Washington Bridge and East of Interstate 95 in New Jersey.
Newport, Rhode Island	Narragansett Bay South of a line extending from Conanicut Point to Carr Point.
North Bend, Oregon	See Coos Bay, Oregon.
Oakland, California	See San Francisco, California.
Ogdensburg, New York	Ogdensburg Harbour, including the Oswegatchie River to the limits of navigation.
Olympia, Washington	Coincident with Thurston County, Washington.
Orange, Texas	The ICW from Mile 276.5 to Mile 265; the Sabine River from the intersection with the ICW; North to the Navy Yard.
Oswego, New York	Oswego Harbour, including Oswego River to Lock 8.
Pago Pago, American Samoa	Pago Pago Harbour and access channel, located on the South side of Tutuila Island at 14° 16.5′ S., 170° 42′ W.
Pascagoula, Mississippi	From the sea buoy of Horn Island Channel Pass to Mile 1 of the Pascagoula River, including the Pascagoula Channel; and from the Bayou Cassote Harbour proper to the junction buoy of Bayou Cassotte Channel and the Pascagoula Channel.
Panama City, Florida	See "Enclosure No. 2".
Pensacola, Florida	See "Enclosure No. 2".
Philadelphia, Pennsylvania	The waters of the Schuylkill River, Delaware River, and Delaware Bay from Trenton, New Jersey to the Line of Demarcation at the entrance to Delaware Bay, excluding the port area of Wilmington, Delaware.
Pittsburg, California	See Stockton, California.
Point Comfort, Texas	The Matagorda Ship Channel from the sea buoy to the Calhoun County Navigation District Turning Basin.
Point Judith, Rhode Island	Narragansett Bay South of a line extending from Sauga Point Eastward to Conanicut Point.
Ponce, Puerto Rico	Bahia de Ponce proper.
Port Arthur, Texas	The ICW from Mile 276.5 to Mile 288.5 including the East Basin, West Basin, and Turning Basin of Taylor Bayou.
Port Canaveral, Florida	See "Enclosure No. 2".
Port Everglades, Florida	The Atlantic Intracoastal Waterway, South of the 17th Street Causeway, North of, but not including the Dania Cutoff Canal, including the Outer Bar Cut and Bar Cut.
Port Hueneme, California	See "Enclosure No. 2".
Port Huron, Michigan	See Detroit, Michigan.
Port St.Joe, Florida	See "Enclosure No. 2".
Portland, Maine	Hussey Sound and Fore River to the limits of navigation at the Veterans Memorial Bridge at Mile 3.0 on the Fore River.
Portland, Oregon	Three Oregon Counties: Multnomah, Clackamas, and Washington, and the Port of Vancouver, Washington.
Portsmouth, New Hampshire (including Kittery, Maine, and Dover, New Hampshire, on the Piscataqua River).	See "Enclosure No. 2".
Providence, Rhode Island (including East Providence and Pawtuckett)	Seekonk River, Providence River and Narragansett Bay extending North of a line stretching from Sauga Point East to Conanicut Point and Carr Point.
Quonset Point, Rhode Island	Includes that area between and including Sauga Point, Quonset Point and Davisville, Rhode Island.
Redwood City, California	See San Francisco, California.
Richmond, California	See San Francisco, California.
Richmond, Virginia	James River from Benjamin Harrison Memorial Bridge, Hopewell, Virginia, to limits of navigation.
Rockland, Maine	The waters of Rockland Harbor and West Penobscot Bay North of a line drawn from Owls Head Light to Browns Head Light and South of a line drawn from Northeast Point to Webster Head.
Rota Harbour, Rota, CNMI	The waters of Sasanhaya Harbour, all waters North of a line drawn between Puntan Pona and Puntan Taipingot. The waters of Sasanlago Harbour, all waters West of the Island of Rota within an arc of 1.5 miles drawn from the centre of the town of Rota.
San Diego, California	See "Enclosure No. 2".
Sacramento, California	All waters of the Sacramento River Deep Water Ship Channel from Sacramento River Deep Water Ship Channel Light 1 to the William G. Stone Lock.
San Francisco, California (including Alameda, Oakland, Berkeley, Richmond, Martinez, Benicia, and Redwood City)	All waters of Suisan Bay, the Carquinez Straits, and San Pablo Bay and all waters of San Francisco Bay shoreward of a line drawn from Point Bonita Light through Mile Rocks Light to the shore.
San Juan, Puerto Rico	Bahia de San Juan proper.
San Pedro, California	See Los Angeles, California.
Savannah, Georgia	Savannah River from the Route 17 Bridge to the territorial sea limit.

Seattle, Washington	Coincident with King County, Washington.
Seward, Alaska	All headwaters of Resurrection Bay to a line from Cape Resurrection to Callisto Head.
Sitka, Alaska	Sitka Sound and Silver Bay, North of a line between Cape Edgecombe on Kruzof Island to Pavorotni Point on Baronof Island and South of a line between Point Brown on Kruzof Island to Lisianski Point on Baronof Island.
Skagway, Alaska	Taiya Point (in Tiaya Inlet on Lynn Canal) to the town of Skagway, Alaska.
Stockton, California	All waters of the New York Slough, the San Joaquin River, and the Stockton Deep Water Channel from Suisan Bay Light 30 to the Interstate 5 Bridge.
Superior, Wisconsin	See Duluth, Minnesota.
Tacoma, Washington	Coincident with Pierce County, Washington.
Tampa, Florida	That portion of Tampa Bay contained within Hillsborough County.
Tanapag Harbour, Saipan, CNMI	The waters of Garapan Lagoon and Puetten Tanapag (Tanapag Harbour) North of 15° 30.0′ N. and South of 15° 15.5′ N.
Terminal Island, California	See Los Angeles, California.
Texas City, Texas	See Galveston, Texas.
Tinian Harbour, Tinian, CNMI	The waters of Tinian Harbour and Sunharon Roads enclosed within a line drawn between Carolinas Point and Gurguan Point.
Tiverton, Rhode Island	Sakonnet River from the Route 138 Bridge to a line extending from Sachuset Point to Sakonnet Point.
Toledo, Ohio	Maumee River to limits of navigation.
Trenton, Michigan	See Detroit, Michigan.
Vancouver, Washington	See Portland, Oregon.
Whittier, Alaska	All waters of Passage Canal, West of Trinity Point.
Wilmington, California	See Los Angeles, California.
Wilmington, Delaware	The waters of the Delaware River and Bay, including the Christina River and the Salem River, from the Delaware/Pennsylvania state border to the Line of Demarcation at the entrance to Delaware Bay.
Wilmington, North Carolina	The Cape Fear River, from the Sea Buoy to Point Peter, and then the N.E. River to the Turning Basin at Mile 2.
Woods Hole, Massachusetts	See New Bedford, Massachusetts.
Yabucoa, Puerto Rico	Puerto de Yabucoa proper.

Enclosure No. 2:

CONTROLLED PORT AREA DESCRIPTIONS:

U.S. Port	*Geographical Description*
Charleston, South Carolina	Charleston Harbour and approaches from the sea buoy to the navigable limits of the Cooper River, Wando River and Ashley River.
Hampton Roads, Virginia (including Norfolk, Newport News, Jamestown, Yorktown and Portsmouth, VA.)	All the waters of a line from Cape Henry Light to New Point Comfort, which includes the Southwest portion of Chesapeake Bay, Hampton Roads, and the Elizabeth and York Rivers.
Honolulu, Hawaii	All internal waters and waters of the Pacific Ocean out to three nautical miles from and including Honolulu Harbor Westward to and including Barbers Point Harbor.
Kings Bay, Georgia	All waters of Cumberland Sound from the entrance to St.Marys River at Intracoastal Waterway Statute Mile 712.5 North to the entrance of Crooked River at Statute Mile 705.
New London/Groton, Connecticut	All waters encompassed by a line from Goshen Point, Waterford, CT. to Dumping Ground Buoy Y"NDA", thence to Avery Point, Groton, CT.
Panama City, Florida	From the Panama City Harbour Channel Entrance Buoy "SA" to Panama City proper, including St.Andrews Bay.
Pensacola, Florida	The Pensacola Ship Channel from the sea buoy to Pensacola Bay, inclusive.
Port Canaveral, Florida	All waters of the Atlantic Ocean within 3.0 nautical miles of the seaward extremity of the Port Canaveral Entrance Channel jetties including all waters of the Entrance Channel Westward to the Canaveral Barge Canal Lock.
Port Hueneme, California	The waters of Port Hueneme Harbour shoreward of a line drawn from Port Hueneme East Jetty Light 4 to Port Hueneme West Jetty Light 3.
Port St. Joe, Florida	From Port St.Joe Harbour proper to Buoy 6 of the Port St.Joe Entrance Channel, the entrance to the Gulf County Canal and St.Joseph Bay.
Portsmouth, New Hampshire (including Kittery, Maine and Dover, New Hampshire on the Piscataqua River)	Portsmouth Harbor from the COLREGS Demarcation Line to the limits of navigation on the Piscataqua River to include Kittery and Eliot, Maine, and Portsmouth, Newington and Dover, New Hampshire.
San Diego, California	San Diego Bay, Mission Bay, and all waters of the Pacific Ocean adjacent to the cities of La Jolla, Pacific Beach, Ocean Beach, San Diego, Coronado, National City and Chula Vista out to three nautical miles.

Enclosure No. 3.

AGENT PROPOSAL FOR REMOVAL OF RESTRICTED NATIONALS

FM: Agency Name
Complete Address (Street, City, State, Zip Code)
Point of Contact (Person)
Commercial Phone Number (include Area Code)
Telex/TWX No. (Include Answer Back Code)

TO: Commandant, U.S. Coast Guard (G-MPS)
Washington, D.C. 20593-0001
Telex No. 892427 (See Section 2.A.1. for other message addresses.)

Subject: (Type of Vessel, Name, Flag, Call Sign, Lloyd's Number) – Crew Removal.

ETA Cape Henry early am hrs. 22 Aug 1989 to Lynnhaven Anchorage. Vessel scheduled to load cargo in Norfolk 22-24 Aug then transiting outbound 27 Aug bound for Miami, FL.

The vessel has two (2) Soviet Officers onboard.

Name	*Position*
Ilchinovich, A.	Master
Yilshenokov, S.	Chief Mate

On behalf of the vessel's owners, we propose to remove the 2 Soviet Officers at the Pilot Station by commercial launch. We understand that if the men hold valid entry visas, no other restrictions other than being kept off the vessel apply. Otherwise, the men will be escorted to and remain under armed guard at the America House Hotel, Cape Charles, until the vessel completes cargo operations in Norfolk. We will arrange to have these individuals rejoin the vessel at the Pilot Station during the vessel's outbound transit. The local Coast Guard and INS Offices have been advised and we will coordinate with them.

During the time the Soviet Officers are not onboard the vessel, their positions will be filled by suitable replacements to ensure the safe navigation of the vessel as per manning requirements.

FIGURE (D)

AGENT PROPOSAL FOR RESTRICTION OF NON-ENTRANT NATIONALS

FM: Agency Name
Complete Address (Street, City, State, Zip Code)
Point of Contact (Person)
Commercial Phone Number (include Area Code)
Telex/TWX No. (Include Answer Back Code)
TO: Commandant, U.S. Coast Guard (G-MPS)
Washington, D.C. 20593-0001
Telex No. 892427 (See Section 2.A.1. for other message addresses.)

Subject: (Type of Vessel, Name, Flag, Call Sign, Lloyd's Number) – Crew Restriction.

ETA Cape Henry early am hrs. 22 Aug 1989 to Lynnhaven Anchorage. Vessel scheduled to load cargo in Norfolk 22-24 Aug then transit to Richmond, VA, to load cargo 25-26 Aug; Transiting outbound 27 Aug bound for Miami, FL.

The vessel has one (1) Syrian crewman onboard.

Name/Rank	*Passport No.*	*Date of Birth*
Mustafa Nabelsy / Wiper	123456	3 Jan 45

On behalf of the vessel's owners, we propose to restrict the 1 Syrian crewman upon arrival Lynnhaven Anchorage. The man will remain onboard the vessel under armed guard on the inbound and outbound transit and during the entire stay in the ports of Norfolk and Richmond. The local Coast Guard and INS offices have been advised and we will coordinate with them.

We understand that the Syrian crewman may participate in regular assigned duties aboard the vessel.

Telex/TWX No. (Include Answer Back Code)
TO: Commandant, U.S. Coast Guard (G-MPS)
Washington, D.C. 20593-0001
Telex No. 892427 (See Section 2.A.1. for other message addresses.)

1. Special Waiver Request.
2. (Vessel Type, Vessel Name, Flag, Call Sign, Lloyd's Number)
M/V Kapitan Kapital UR YZQE L9000008
Providence, RI. 6/30-7/04
Morehead City, NC. 7/08-16
Miami, FL. 7/17-21
Cargo: Discharge Wood Products from Piraeus.
Load Bulk Corn for Vladivostok.
Master: Ivan Boranoff
Last Port of Call: Havana, Cuba.
Next Port of Call: Vladivostok, UR.

On behalf of the vessel's owners, we request that the vessel be allowed to remain in Morehead City to repair a broken generator. Parts are available and estimate date of repair is 16 July.

Note: This must be received at the SIV Desk no later than the close of the official Port Approval Date and Time.

NOTES:

May 1991: The President of the United States signed into law the removal of all restrictions effecting former Warsaw Pact nations.

Those nations, i.e. Albania, Bulgaria, Czechoslovakia, Hungary, Poland and Rumania are now treated as free-flag nations and allowed entry into the 12 previously restricted ports.

This does not apply to Soviet vessels which are handled under the U.S./Soviet agreement.

April 1992: The United States Coast Guard recently announced a change in policy concerning access to U.S. ports which previously had been off limits to Soviet owned, operated or chartered vessels.

Effective 7th April 1992, vessels flying the flag of the countries listed below will be allowed to enter the ports of Hampton Roads, VA.; Charleston, SC.; Honolulu, HI (except Pearl Harbour); Panama City, FL.; Pensacola, FL.; Port St.Joe, FL. and Portsmouth, NH.:

Armenia (AM)
Azerbaijan (AJ)
Byelarus (BO)
Georgia (GG)
Kazakhstan (KZ)
Kyrgyzstan (KG)
Moldova (MD)
Russia (RS)
Tajikistan (TI)
Turkmenistan (TX)
Ukraine (UP)
Uzbekistan (UZ)

Vessels flying the flags of the above listed countries must submit an itinerary request to the Coast Guard Commandant 7 days prior to a proposed entry. There will be strict enforcement of the 7 days advance request requirement. All requests will be reviewed on a case by case basis, and approval will be issued in writing by the Commandant.

After permission is granted, Agents must still provide the Captain of the Port with a 24 hour advance notice of arrival as required by Coast Guard regulations.

Because of sensitive operations conducted at or near the port, the following ports will remain closed:

New London and Groton, Connecticut
Kings Bay, Georgia
Port Canaveral, Florida
San Diego, California (with the exception of Mission Bay)
Port Hueneme, California

Vessels flying the Latvian, Estonian or Lithuanian flags are not considered as belonging to former Soviet Republics, and have access to all U.S. ports on the basis of a 24 hour advance notice.
